Every cloud has its silver lining; every sunstorm has its rainbow and I believe the sign of promise in the building business shows like a rainbow today in a plan for a proposed Builders' Clearing House. The question arises in your mind, "How can the fourth square—this Builders' Clearing House, be made operative? First, it may be done, I believe through the co-operation of the various trade organizations. A little missionary work on the part of some of the larger operators in these organizations would, I am sure, result in the passing of a resolution that all contracts must be handled through some escrow agency; for that, in fact, is all that a Builders' Clearing House is—a simple escrow agency. There are none of us, who, in order to receive our money in the proper time upon the completion of our contract but would be glad to discount our claims to the ordinary 2%. This 2% cash discount paid to the Clearing House as a maintenance cost would raise sufficient funds. I am most certain, when you consider the bulk of the building business in the Bay District, to maintain every trade organization in the district most comfortably and satisfactorily. This money could be allocated to each organization on the basis of the gross amount of business that particular organization reports and the claims settled for that line of work. This, to my mind, would be the ideal way of handling the situation. All that would be necessary would be to secure a high class executive a good bookkeeping machine, and some stationery and our job would be on its way. A second method of making the Builders' Clearing House operative would be done through cooperation, which could be organized to carry on the details of the work in the man-

ner outlined. Perhaps this would be the better scheme.

Again I appeal to you men to give this problem some of your best thought. I told you that I felt the Builders' Clearing House was the rainbow showing after the dark, cloudy period of loss and disturbance which we have gone through these many years. I believe the sun is shining through these clouds and I can see the rainbow of promise. What will this rainbow produce? First, under a Builders' Clearing House System every contract will have real cash value at your bank. Second, it will require the owner to know his costs before operation begins. Third, it will eliminate the dishonest speculator. Fourth, it will eliminate the dishonest contractor. Fifth, it will make a contract a contract, protecting both parties. Sixth, it will protect the innocent home builder, which is another story that could be developed, but at this particular time, it is unnecessary. Seventh, it will eliminate the darkest pages in American's business, the pages referring to the building business. Eighth, and finally, it will put the building business on a practical cash basis with the resultant tremendous savings in costs. This will be reflected in a large degree in lower building costs, the same as is reflected by the cash and carry chain stores which have become national in their scope.

STATE BUILDING, ELECTRIC AND FIRE CODES ARE CONSIDERED

Approval of a complete state electrical code drafted by the Washington State Chamber of Commerce was given at a recent meeting of three special committees of the state chamber. The committees, namely the state building code, state electrical code and state fire hazard committees, were named last June by the chamber and met to lay plans for putting their findings and recommendations before the entire membership for approval.

Action similar to that taken on the electrical code was taken on a plan for creation of a state building fire marshal and definition of the duties of that supposed office. Both plans were approved at the meeting and will be submitted to all parties interested throughout the state for approval or further suggestions.

The state building code committee, which also held a special meeting, is not yet ready to submit its recommendations and has called another special meeting for November 14. Another meeting of the committees is also called for December 3.

The meeting was presided over by S. B. Asla, representing the Building Owners' and Managers' Association of Seattle, who acted as general chairman. Among those attending were: J. C. Horne, building superintendent at Tacoma; Neil McDonald, representing the Association of General Contractors; Robert L. Laing, Seattle fire marshal; H. S. Jenkins, city electrical inspector at Bellingham; E. G. S. Pryor of the Underwriters' Laboratories; Arthur S. Smith, electrical inspector for the state of Washington; Harry H. Botten, assistant manager of the Washington Survey and Rating Bureau; Frank Fowler, Seattle architect and chairman of the state building code committee; J. G. Waitland, electrical inspector in Seattle; W. A. Groce, deputy state fire marshal; Ray Muffley and W. J. Howard, representing the Northwest Brick & Tile Association.

Architect Harry H. James' name was added to the state building code committee personnel at the meeting.

Palo Alto building permits in October represent an expenditure of $129,432. Business structures were estimated to cost $46,534 and residential construction, $33,250.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

At a meeting of the executive committee of the American Forest Week Committee, R. S. Kellogg, of the News Print Service Bureau, chairman presiding, preliminary steps were taken for the observance of Forest Week in 1927. As was the case last year, the week will be the same as that of 'anadian Save-The-Forest-Week, which is that of April 24 to 30. It is possible that Mexico may observe the same week this year, in which case it will become North American Forest Week.

Reclamation, with particular reference to important Western projects mentioned by Secretary of Commerce Hoover in recent addresses, will occupy the larger part of the program at the Western Divisional meeting of the Chamber of Commerce of the United States at Colorado Springs, December 6 and 7. Secretary Hoover has pointed out that it will take about ten years to complete some of the larger projects, among which may be mentioned the Colorado River, and by that time the country will need more land for food production. In addition to plans regarding particular projects, some important reclamation phases, such as land settlement, will be discussed at the meet.

Plans for binding thirty-eight cities and towns of Southern California into a metropolitan water district to devise means of financing construction of an aqueduct to carry water from the Colorado River to the cities are announced by W. B. Mathews, special counsel for the Los Angeles Board of Water & Power Commissioners and spokesman for the Boulder Dam Association and the Colorado River Aqueduct Association. The proposed aqueduct would be 260 miles long, is designed to carry water sufficient for the needs of 7,000,000 persons and is estimated to entail an expense of between $150,000,000 and $200,000,000.

San Francisco Real Estate Board is on record opposing the proposed city ordinance that would place the construction of all side sewers in charge of the city. At the present time these are built by the property owners or by private contractors. The ordinance, now pending before the supervisors, was declared to have been prepared at the request of the municipal employees who build the main sewer, and who seek to have construction of side sewers placed in city hands to assure continued work to this branch of the Board of Public Works.

Acting in behalf of thirty-two of the leading producers of small dimension stock, (and with the approval of the National Committee on Wood Utilization and W. A. Babbitt, Chairman of the Dimensions Stock Sub-Committee) E. C. Kratsch, Managing Editor, Wood Working Industries, has called a meeting of such producers for November 10, at the Hotel Sinton, Cincinnati, Ohio, for the purpose of forming a dimension stock association. It is open to manufacturers only, and an invitation to attend has been extended to both hardwood and softwood lumber manufacturers

Plans for what is expected to be the largest and most important meeting of highway officials ever held in Washington have been definitely put under way by the Highway Research Board of the National Research Council. The final plans for the sixth annual session of the Research Board were completed at a meeting of its executive committee at the National Academy of Sciences, October 28th. Charles M. Upham, Director of the Highway Research Board, has invited all road officials, contractors, material and equipment manufacturers and representatives of other industries interested in highway research to be present at the meeting to be held in the National Academy on December 2nd and 3rd.

September shipments of floor and wall tile, as reported to the Department of Commerce by 37 concerns, making nearly 80 per cent of the total volume of floor and wall tile produced in 1923, were 5,624,720 square feet, compared with 5,884,807 in August and 5,177,809 in September, 1925. Prices for selected white ceramic mosaic, ¾ inches square, and for bright glazed standard white wall tile, 6 by 3 inches, have remained unchanged to date at 24 cents and 10 cents per square foot, respectively.

Recent discoveries in bridge construction that will safeguard the structures from seismic disturbances and which in principle have been used at the Panama Canal, will be outlined before the San Francisco Board of Supervisors in the near future when Gustav Lindenthal, New York bridge engineer, appears before the board. Engineer Lindenthal, through Attorney Jerome B. White, notified the board that he would be in San Francisco on November 15 to 17 and asked to he heard on the project of bridging the bay. He will come west with A. J. Rich Sr., one of the sponsors of the bridge project for which Lindenthal is engineer.

The average wage rate of common labor in the principal industries of the United States now ranges from 33.6 cents per hour to 47.9 cents, according to a study made by the United States Government. Lumber mills pay the lowest and petroleum refining plants the highest average rate. The construction industry which employs the largest amount of common labor or, at least during the building season of each year, ranks second highest with an average rate of 47.1 cents per hour. Next in order comes the automobile industry which pays 46.1 cents, or 3.4 cents more than the iron and steel industry. The iron and steel industry heretofore has been regarded as the leader in fixing the wages of common labor.

On October 16, 1926, there were 56 strikes before the Department for settlement and in addition 10 controversies which had not reached the strike stage. Total number of cases pending 66—13 of which are new. The 13 new cases may be compared with 10 and 9 of the first and second weeks preceding.

The electors of San Diego have voted favorably on a proposition to issue bonds of $2,000,000 for the construction of two masonry dams both being part of the municipally-owned water system. One dam is at the Sutherland site on Santa Ysabel Creek and the other is at the San Vicente site on San Vicente Creek. The bonds carried by a vote of 16 to 1. The city engineer has been directed to prepare detail plans. A. P. Davis has been retained as consulting engineer.

TRADE NOTES

After twenty-three consecutive years of operation, the Chris. Seiber & Company, hardware concern of Woodland, has closed its doors. Seiber states his plans for the future are indefinite.

G. H. Schwitzer, formerly manager of the Hammond yard at Van Nuys is now with the Pioneer Lumber Co. of Stockton.

John C. Larson and William Larson will operate from 2138 Twenty-third Ave., Oakland, under the firm name of Larson Hardware Company.

Diamond Point Roofing Company has opened quarters at 2847 Hannah street, Oakland, and will engage in a general roofing business.

S. M. Bump, formerly general manager at Los Angeles of the Los Angeles Lumber Products Company, has moved from Vancouver, B. C., to Mill Valley, Calif., for the winter.

Art Metal & Heating Company, operated by R. J. Payne, successor to Robt. Dalziel Jr., has opened offices and shop at 215 Washington street, Oakland. The company will do general cornice and skylight work and heating and industrial work.

Motion pictures are being used by the Research Department of the Plastoid Products Company to aid the concern in a campaign to "sell" the idea of better construction to prospective home builders. Bricks, concrete, roofing materials and other materials are featured in a two-reel film entitled "Hidden Values."

Construction has been started on the plant of the California Concrete Products Company at San Carlos, San Mateo County. The plant will be served by the Southern Pacific Railroad and is the sixth industrial plant to locate in the San Carlos district.

The Lincoln Clay Products Company, Inc., is making a survey for a new clay products plant at a location one-quarter of a mile south of its clay mine and closely adjacent to the town limits of Lincoln, Placer County. M. J. Dillman, superintendent of the company, says "time is about ripe for the establishment of an additional plant near Lincoln, especially in contemplation of the wonderful growth of the Sacramento Valley."

An advisory vote to determine if Berkeleyans would prefer an annual direct tax to a bond issue of $2,942,000, with which to modernize the school system, cannot be taken, the Board of Education was informed by Earl Warren district attorney. A special bond election will be held December 11.

ALONG the LINE

John Edward Peterson, 49, retired contractor, died at his home in Berkeley, Nov. 7. His widow, daughter and two sons survive.

The position of harbor master has been officially abolished by the Richmond City Council and Jackson H. Misner, who has held the position for several years, has been dropped from the city payroll.

Seattle's proposed city charter, which sought to establish a form of municipal government retaining the mayoralty system and combining with it the principle of business managership, was decisively defeated at the recent general election. The figures were 20,153 in its favor and 30,602 against.

J. E. Tannehill, Salinas plumber, left an estate of $32,583, according to a petition for the probate of his will. The estate is mostly in Salinas realty, $10,000 in Liberty Bonds and $17,000 on deposit in a bank.

James M. Barry, former chief of the San Francisco Department of Electricity, has been appointed vice-president of the Alabama Power Company, one of the largest electrical distributing firms in the South.

Members of the Sacramento City Planning Commission contemplate the appointment of an authority on city planning to aid in the plan for development during a 3-year period, Dr. R. F. Giffen, chairman of the Commission, announces recommendations for appointment of such an expert will be made at an early meeting of the city council. The cost of employing an expert will be approximately $7000 or about $20,000 for the 3-year period, the commissioners estimate.

CEMENT ORDERS SHOWS BUILDING ON INCREASE

C. A. Low, director of sales for Monolith Portland Cement Company, reports an upward trend in orders which he construes as an indication of increased building activity throughout the Pacific coast region. Orders for the last month show a marked increase all along the line and particularly in the vicinity of Los Angeles, he said. In addition to its various uses for structural work one of the newest applications of Monolith cement, Mr. Low points out, is mixing it with an asphalt preparation for coating piles and pier bases to protect them from borers and from action of the salt water.

CEMENT BIDS WANTED

Bids are being received by State Purchasing Office in Sacramento for one year's supply of Portland cement for all state construction, with the exception of that under the jurisdiction of the State Highway Commission, which is expected to require from 100,000 to 150,000 barrels. In past years the cement has been purchased as the need arose, but this method, according to the state purchasing agent, has been far from satisfactory, as the quotations offered by the companies did not indicate keen competition. The calling for bids on the year's supply is expected to remedy this.

MARSH SLATED FOR TECHNICAL ENGINEERS POST

J. L. Marsh of Sacramento, prominent in state labor circles, is reported to have been selected an international vice-president for the Pacific Coast District of the International Union of Technical Engineers, Architects and Draftsmen.

Marsh is secretary of the Federated Trades Council of Sacramento and business agent of the Technical Engineers' of the Capitol city. While he has made no comment upon his probable elevation to the office, friends and associates have pointed out that his service for the organization during the recent American Federation of Labor Convention at Detroit makes him the natural choice for the position.

Marsh attended the national meeting as official delegate of the Sacramento council, but when C. L. Rosemond, international president of the Technical Engineers, was suuddenly called to Washington he selected Marsh to represent him for the remainder of the convention. This resulted in wide publicity for Marsh, especially among the Pacific Coast locals of the international union, which are located at San Francisco, San Diego, Vallejo, Sacramento and Bremerton, Wash.

BOOKLET ON TERRA COTTA INSTALLATION COMPLETE

Proper methods for the installation of terra cotta in order that architects and builders may attain the best results are given in specifications just published by the Nation Terra Cotta Society of New York, which organization comprises virtually all the terra cotta manufacturers in the United States.

Use of terra cotta for ornamental facings of buildings has shown an increase of almost 100,000 tons over the consumption of four years ago, the society announces, owing principally to the fact that the material is a burnt clay product that cannot decay because perishable substances in it are eliminated during the firing process.

Experts for the organization declare that builders will find terra cotta will stand up for years and not show signs of damage if properly protected against seepage of moisture behind it, contraction and deflection of structural steel frame-work, settlement of buildings, etc. They point out further that when terra cotta is applied as a facing on the modern structure of steel and concrete or with walls as backing, certain conditions are encountered which have to be met by appropriate provisions.

RELATIONSHIP BETWEEN CAPITAL AND LABOR

Thinking employers and employes everywhere are becoming more and more convinced that their interests are mutual and therefore anything which benefits one group cannot help but be beneficial to the other. Secretary of Labor Davis emphasized this viewpoint recently when he said: "This country had the good luck to be settled by the hardest workers in the world. Their big production made us rich. If we slacken production we will soon be poor. The white man who does not want to work is sick. He needs a dose of medicine, not a dose of the millenium. When labor loafs, it injures labor first and capital last, for labor grows poor today and capital gets poor tomorrow. But tomorrow never comes. The capitalist can turn laborer and raise himself a mess of pork and beans. The laborer who does not turn capitalist and have a house and garden for his old age is lacking in foresight."

Sectional Unfriendliness Is Detrimental To State

(Editorial In San Francisco Examiner, Nov. 6.)

Sectionalism in California was injected into the recent election through no fault of the entire State, but through the individual action of certain small groups who put sectional measures on the ballot by the misuse of the initiative.

Once aroused, this spirit of sectional antagonism and prejudice is a dangerous thing for this State; good citizens, at both ends and in every part of California, will do their utmost to put a sound and friendly mutuality in its place.

Too much weight should not be given to the wave of sectional irritation that is, at the moment, so evident on all sides. Because one particular organization did not want the gasoline tax increased, a "backfire" measure was placed upon the ballot, greatly favoring Southern California, for the purpose of alienating the Southern California vote from Number 4.

The presence of this measure, one of the worst pieces of legislation ever placed before the people, aroused a purely temporary line of cleavage between South and North. We may be very thankful that Number 8 was defeated; because had it passed, that antagonism would have grown with each year of its malignant operation. It was very heavily beaten, by Southern votes as well as Northern—which, in itself, shows that the "sectional" feeling does not affect very many minds. On sober second thought, this wave will die down, as it certainly deserves to do.

The defeat of the gasoline tax, a thoroughly sound road-progress measure, does not mean that all hope of highway completion is lost.

Study of the vote shows, indeed, that almost every section favored the measure and, especially, that a clear majority of all legislative districts favored it. The needed road-money for all the State will be provided, and that will be that. A few more months' delay on California's highway program is a small price to pay for the satisfaction of seeing sectionalism soundly rebuked on its first public appearance. The proponents of Number 8 made use of a dangerous weapon, and it has recoiled upon them.

The main thing for Californians to consider is this: That this State is one; that its vast interests cover all sections and are closely interlocked; that our greatness would gain nothing and lose much by being segmented; that progress lies in co-operation, while the only result of antagonism is deadlock.

It would have been easily possible, for example, for ALL forces to have gotten together in advance, on the road-building issue, and put forward a jointly compiled measure that would have passed by a huge majority.

That is the way it should have been handled; and that is the way for all California's problems to be handled in the future. Co-operation is the positive force; as long as sections of this State knife each other, neither will get anywhere.

There are enough real Californians, in all sections, to see that the error of sectional antagonism is not repeated, and its use as a political weapon thrown into the limbo of forgotten things.

Mutual Problems Of Cement Manufacturer And The Dealer

(By J. W. Johnston, Vice-President and Manager, Alabama Portland Cement Company, addressing the Third Quarterly Executive Meeting of the Southern Builders Supply Association at Asheville, N. C.)

It is easily demonstrated that profit to the cement dealer is most certain and most in keeping with the service rendered in those communities where there prevails a feeling of mutual respect and confidence among the dealers. All of you are familiar with examples of both extremes. All of you can name towns where the dealers' differential exists only as a subject for conversation and dealers speak of each other in terms far from complimentary. Other towns may be pointed out where a differential of fair proportion is being maintained and harmony prevails. The same factors of economics and the same elements of human nature are present in both towns. There is no difference at all in respect to the possibility of making a fair profit on handling cement. If a fair profit can be had in one town, it appears stupid to persist in the belief that it cannot also be had in any other town.

In those towns where a fair profit is being made, such conditions are not the result of chance or accident. They exist only as a result of continuous effort and some sacrifice on the part of every local dealer.

The producers' interest in the ability of the dealer to make a fair profit may easily be called a selfish one. There are many uses of cement for which a competitive material may be substituted. It is only human nature for any dealer to advocate the use of those commodities on which he makes most profit. Hence it behooves the producer of cement to help in seeing that a fair profit is being made by those who handle his product.

This brings up the subject of co-operation between merchant and manufacturer. There is no good reason why both cannot operate under a common flag as members of the same big commercial fleet, where individual success is dependent upon progress of the whole.

Importance of Dealer

Picture our cities today without any cement dealers. Commercial confusion would quickly follow and economic disorder would soon prevail throughout the building industry—an industry that involves an annual national expenditure of six to seven billions of dollars.

The cement industry as a whole is becoming more and more committed to the fact that the cement dealers and the services they perform constitute an economic necessity to the unimpeded progress of the building industry. Nothwithstanding all arguments to the contrary, the dealer is a permanent and essential factor in the modern scheme of commerce and deserves recognition and appropriate treatment by the producer in accord with the useful service he is rendering his community.

It is true that contractors and other large volume users may be found who still contend and probably always will contend that a middleman is unnecessary in the distribution of cement. Their viewpoint is somewhat like the distressed husband who, rushing into the drug store, said, "My wife is sick, where can I get an undertaken." The druggist, somewhat surprised said, "My friend, why don't you send for a doctor?" "No," said the husband, "what I want is the undertaker, I am cutting out the expense of the middleman."

There may be instances where, on large volume orders the service rendered by the dealer amounts to little, but if exceptions are made for one case, there are countless others calling for similar handling and it becomes diffcult to draw the line. Given a reasonable price, most contractors are interested only in knowing that their competitors are not enjoying a price lower than their own.

Privilege of Manufacturer

It is the privilege of any manufacturer to sell his product in any manner, under any terms, and to anyone he pleases. There is no method that can be used effectively by any manufacturer to compel, on the part of another manufacturer, unwilling compliance with a code of ethics in which the dealer is given fair recognition.

Likewise, it is the dealer's privilege to purchase his cement requirements from any producer he chooses. Very naturally, those producers who observe a faithful regard for the dealer and his rights are justified in excepting and receiving reciprocal recognition on the part of the dealer. In other words, the thing works both ways. An attitude of fairness to the dealer on the part of the manufacturer should receive, and in most cases is receiving appropriate reward.

Where any manufacturer professing so-called one hundred per cent dealer policy offends against good dealer ethics, the remedy lies within easy reach of the dealers, no matter where the offense may be located. A policy to be a policy must be made so in fact as well as word, and the dealers through their opportunity of selective purchase can exert a powerful influence by demanding proper observance of their right to recognition.

Joint Offenders

Under the stress of severe competition, the frailties of human nature are sometimes made apparent in ways that show manufacturer and dealer to be joint offenders against a strict adherence to good ethics.

It has been considered the dealer's privilege to name his own price for the resale of cement. Some dealers have been asking and receiving a reasonable profit, while some may simply trade dollars with their customers and wind up the year's business with no profit to show for their effort. Those who use cement naturally seek to buy it at the lowest possible price, but most users, even those of large tonnage, are willing and can be induced to pay a fair profit to the dealer.

Manufacturers and dealers who persist in being joint parties to split differentials and various special arrangements are both guilty of perpetuating evils of their own creation and are a distinct menace to both dealer and manufacturer alike. Price concessions on the part of either manufacturer or dealer have never yet increased noticeably the total volume of cement sold or used.

Building News Section

APARTMENTS

Taking Sub-Bids.
APARTMENTS Cost, $65,000
SAN FRANCISCO, SW Franklin and Willow Ave.
Five-story and basement Class C concrete (40) apartments.
Owner—Ida Krohn.
Architect—H. C. Baumann, 251 Kearny St., S. F.
Contractor—Monson Bros., 251 Kearny St., S. F.

Plans Complete.
APTS., STORES Cost, $35,000
OAKLAND, Alameda Co., Cal. Hopkins Ave. near 14th St.
Three-story frame and stucco apartments and stores (4 stores and 12 apts., 8 2-room and 4 3-room).
Owner—Mrs. Margt E. Hubbert, Coit Hotel, Oakland.
Architect—C. H. Jensen, Santa Fe Bldg San Francisco.
Owner will take sub-bids. General work to be done by day's labor.

Owner Taking Structural Steel Bids.
APARTMENTS Cost, $150,000
SAN FRANCISCO, O'Farrell St. near Leavenworth.
Six-story and basement class C steel frame and concrete apartment house 70x137-6, (75 2-room apts.) 2 elevators.
Owner—Marian Realty Co., 110 Sutter St., S. F.
Architect—H. C. Baumann, 251 Kearny St., S. F.
Plans for the building will be completed in about two weeks at which time other bids will be taken.

Segregated Figures Being Taken.
APARTMENTS Cost, $8500
OAKLAND, Alameda Co., Cal. San Pablo Ave. and Gilman St.
One-story frame store and apartments
Owner—Withheld.
Architect—Leonard H. Ford, 1435 Harrison St., Oakland.

To Be Done By Day's Work.
APARTMENTS Cost, $35,000
SAN FRANCISCO. S Filbert St. 155 W Franklin St.
Three-story and basement frame and stucco (18) apartments.
Owner—T. B. Strand, 521 Pierce St., San Francisco.
Architect—H. C. Baumann, 251 Kearny St., San Francisco.

Contract Awarded.
APARTMENTS Cost, $75,000
OAKLAND, Alameda Co., Cal. Fourth Ave. and E-19th St.
Three-story brick apartment house, 80 x120 feet; 14 2-room apts. and 7 stores.
Owner—Mr. Goldman.
Architect — Clay N. Burrell, American Bank Bldg., Oakland.
Contractor—M. F. Sommarstrom, Syndicate Bldg., Oakland.

Segregated Figures Being Taken.
APARTMENTS Cost, $11,000
OAKLAND, Alameda Co., Calif., E Richmond Blvd. near Randolph St.
Two-story frame and stucco apartment house (one 7-room and 2 3-room apartments.)
Owner—H. Clark, 304 Fairmount Ave., Oakland.
Architect—Clay N. Burrell, American Bank Bldg., Oakland.

To Be Done By Day's Work.
APARTMENTS $38,000 - $24,000
SAN FRANCISCO. S W Clement and 33rd Ave. and S Clement 50 W 33rd Ave.
Two 3-story and basement frame (18 and 12) apartments.
Owner—T. I. Strand, 595 22nd Ave.
Architect—None.

Contract Awarded
APARTMENTS Cost, $15,000
OAKLAND, Alameda Co. W 16th Ave. 90 S E 15th.
Two-story 16-room frame apartments.
Owner—A. Blasbalg, 717 Castro St., Oakland.
Architect—None.
Contractor—A. M. Pike, 1825 Fruitvale Ave., Oakland.

LOS ANGELES, Calif.—A. B. Crist, 5646 Hollywood Blvd., applied for bldg. permit 11-6-26 to erect 4-sto. and part basement 110-rm., 48- fam., class C apt. bldg., 122x85 ft., at 5757 Franklin Ave. for Cleveland Syndicate Co., 5646 Hollywood Blvd.; comp rf., tile coping, face brick, art stone trim, fire escapes, etec. elevator, terrazo lobby flr., wall beds, met. sash, tiled bath flrs., and sinks, struc. steel, steam htg sys., refrigerators, incinerator, storage water htr.; $125,000.

CLARENCE (SANDY) Pratt is "Mayor."
OF BEAUTIFUL Westwood Park.
AND SANDY will soon move.
INTO A new home.
IN MONTEREY Heights.
BUILT BY Hans Nelson.
AND DESIGNED by Charley Strothoff.
SANDY MOVED into Westwood Park.
OVER NINE years ago.
AND HAS an attractive home.
AT 348 Granada Avenue.
NEAR OCEAN Avenue.
THAT SOME one.
IS GOING to buy.
AND ENJOY (Sandy hopes).
AND SANDY Pratt, producer.
OF SAND, rock and gravel.
HOPES THE new owners.
WILL HAVE as much fun.
AND HAPPINESS.
IN SANDY'S Granada Avenue home.
AS MRS. Sandy and Sandy.
HAVE BEEN blessed with.
SO IF you know a friend.
WHO WANTS a home.
PAINTED WITH good luck.
WITH A roof of joy.
AND THE windows.
COVERED WITH happiness drapery.
TELL THEM.
TO SEE Sandy.
AND HIS for sale house.
OR BALDWIN & Howell.
ON "COMFORT Avenue."
AT "PLEASANT Boulevard."
OR PHONE Delaware One.
"EASY TO remember."
AND SANDY, a salesman.
OF CLEAN "real estate."
(WASHED SAND and washed gravel).
WILL SHOW them.
A NICE, five-room house.
WITH A pretty breakfast room.
AND A roomy garage.
TERMS ARE attractive.
AND THE price is right.
AND YOU will say.
"I THANK you."

Mr. and Mrs. N. O. Homer and their beautiful daughter, Ima Homelesskid, who did not buy Sandy Pratt's pretty Granada Avenue home (see above K.C. B.-like story). They now live in a stuffy flat and cried so hard that the tears ran down the street and some one phoned the Spring Valley Company that one of the water company's mains was broken.

Official Proposals

NOTICE INVITING BIDS

(Nurses' Home—San Joaquin County)

Notice is hereby given that sealed bids will be received by the Clerk of the Board of Supervisors of San Joaquin County, California, at the office of said Board, in the City of Stockton, **until 11 o'clock A. M. of Monday, November 29, 1926,** for the construction of a Nurses' Home at the San Joaquin General Hospital near French Camp, San Joaquin County, California, in accordance with plans and specifications prepared by Davis-Pearce Co., Architects, and adopted and filed by said Board November 8, 1926, and to which bidders are particularly referred.

Duplicate plans and specifications may be obtained at the office of the Board of Supervisors upon depositing the sum of $50.00 to insure the prompt return of same on or before the expiration of seven days.

All bids must be made on forms to be obtained at the office of the Board of Supervisors, and presented in sealed envelopes addressed to the Board of Supervisors, and marked to indicate the work for which bid is submitted.

All proposals must be accompanied by United States currency or certified check made payable to the chairman of the said Board of Supervisors in the sum of 10 per cent of the amount of the bid, or by a bond for such amount, and two bonds, each equal in amount to 50 per cent of the contract price, will be required of the successful bidder.

The Board reserves the right to reject any or all bids.

By order of the said Board made November 8, 1926.

EUGENE D. GRAHAM,
Clerk.
By S. A. CARTER, Deputy Clerk.

(University High School Gymnasium Oakland)

OFFICE OF THE SECRETARY OF THE BOARD OF EDUCATION OF THE CITY OF OAKLAND.

Notice is hereby given that the Board of Education of the City of Oakland and of the Oakland High School District of Alameda County, hereby calls for sealed proposals to be delivered to the Secretary of said Board, Room 211, City Hall, Oakland, California, **until the 23rd day of November, 1926, at 9:45 A. M.,** at which time said bids will be opened for the erection and completion of the University High School Gymnasium of the Oakland High School District, located at the east side of Grove Street, between Aileen and 58th Streets, in the City of Oakland, County of Alameda, State of California. These bids shall be presented in accordance with plans and specifications for said building on file in the office of the Secretary of the Board of Education, City Hall, and in the office of the Superintendent of Buildings, 337 17th Street, Oakland, California.

On a deposit of Twenty-five ($25.00) Dollars, complete sets of plans and specifications may be had by any bidder on application to the Superintendent of Buildings at his office hereinbefore mentioned and in each case shall be returned within ten (10) days after securing same, to the Superintendent of Buildings. If the plans and specifications are not returned within said time, or if mutilated, the said deposit shall be retained by the said School District as agreed and liquidated damages for said mutilation or detention.

Bids must be made on proposals obtained at the office of the Superintendent of Buildings and be signed by the bidder and accompanied by a certified check, certified to by some responsible bank or banker, and made payable to the Board of Education of the City of Oakland and of Oakland High School District, to be retained by said School District, as agreed and liquidated damages should the party or parties to whom the contract should be awarded fail to enter into the contract after the award or to give bonds required for the faithful performance of the contract or any bond required by law. The amount of said check shall not exceed Five Thousand ($5000.00) Dollars, but for all bids of less than Fifty Thousand ($50,000.00) Dollars, said check shall be for at least ten (10%) per cent of the amount of the bid. Each bidder shall execute the affidavit accompanying the proposal obtained from the Superintendent of Buildings.

Bids will be opened by the Board of said District on Tuesday, the 23rd day of November, 1926, at 9:45 A. M., in the Board Room, 211 second floor, of said City Hall, in said City of Oakland. The Board reserves the right to reject any and all bids or any or all items of such bids.

JOHN W. EDGEMOND,
Secretary of the Board of Education of Oakland, California.

NOTICE TO BIDDERS

(Pump and Motor—City of Eureka)

Sealed proposals or bids are hereby invited by the City of Eureka for furnishing One Centrifugal Pump guaranteed to deliver Three Hundred Thousand (300,000) gallons of water per day of twenty-four hours against a delivery head of seventy pounds gage pressure and fourteen feet suction lift, direct connected to a squirrel cage 220 volt, 60 cycle, 3 phase, induction motor of such design that it can be started and stopped by a float switch without the aid of an attendant. Also for furnishing such float switch complete. Each bidder shall name the overall efficiency he will guarantee for his equipment, together with detailed specifications.

This equipment is for use by The Eureka Water Department of Eureka and the price quoted to be f. o. b. Dock, Eureka, California.

Each bid must be signed and accompanied by a certified check payable to the order of Charles A. Jeffrey, clerk of the Board of Trustees, in the amount of ten per cent (10%) of each bid.

All bids must be delivered to the Clerk of the Board, in the Lincoln School on Hepburn Street between Clark and Carpentier streets, San Leandro, **on or before November 22nd, 1926, at 2:30 o'clock P. M.** All bids will be opened by said Board at its office, located as stated above, on November 22nd, 1926, at 2:35 o'clock P. M.

The Board reserves the right to reject any and all bids.

By order of the Board of Trustees.
Dated, November 4th, 1926.

CHAS. A. JEFFERY,
Clerk.

NOTICE TO BIDDERS

(Modesto Irrigation District, Stanislaus County, California)

Sealed proposals will be received at the office of the Modesto Irrigation District at Modesto, California, **until 2:00 o'clock P. M., November 22, 1926,** for submitting Form and Delivery Contracts or other agreements covering eur requirement of electric meters and distribution transformers to be furnished in accordance with the terms of contracts covering a twelve-month period.

As a basis for comparing bids, an estimate of $10,000 for meters and $30,000 for transformers to be purchased during the said period will be used in determining the proposal most favorable to the District. Bidders will submit their prices with base and quantity discounts covering a year's supplies above specified. Bids may cover either or both classes of apparatus.

Bids on Watthour meters shall be for those used on sixty-cycle circuits and must be accompanied by the following data: Weight, dimensions, material used in base, type of cover, type of bearing, shunt coil loss, current coil loss, accuracy curves covering voltage, load and frequency, weight of moving element, and stock of the following sizes normally carried in San Francisco or Bay Region; also, in Los Angeles and North Pacific Coast Cities.

SIZES OF METERS

10 Amp 110 Volt, 2 wire, single phase
15 Amp, 110 Volt, 2 wire, single phase
20 Amp, 110 Volt, 2 wire, single phase
10 Amp, 220 Volt, 2 wire, single phase
15 Amp, 220 Volt, 2 wire, single phase
25 Amp, 220 Volt, 2 wire, single phase
10 Amp, 220 Volt, 3 wire, single phase
15 Amp, 220 Volt, 3 wire, single phase
25 Amp, 220 Volt, 3 wire, single phase
50 Amp, 220 Volt, 3 wire, single phase
5 Amp, 110 Volt, 3 wire, poly-phase
5 Amp, 220 Volt, 3 wire, poly-phase
10 Amp, 220 Volt, 3 wire, poly-phase
15 Amp, 220 Volt, 3 wire, poly-phase
25 Amp, 220 Volt, 3 wire, poly-phase
50 Amp, 220 Volt, 3 wire, poly-phase

Bids on transformers shall be for those used on sixty-cycle circuits, single phase with primary voltage of 11,500, 6,600 and 2,300. The following data for 2300-volt primary to 115-230 or 230-460 must accompany bid, weight without oil, material used in case, number and percentage of taps, copper loss, core loss, per cent regulation on one-half, three-fourths, and full load; also list of stock of the following sizes normally carried in San Francisco or Bay Region, also, in Los Angeles and North Pacific Coast Cities.

SIZES OF TRANSFORMERS

5, 7½, 10, 15, 25, 37½, 50, 75, 100, 150 kva.

The Contract will be let to the lowest responsible bidder, but the Board of Directors reserve the right to reject any or all bids.

Each proposal must be accompanied by a certified check for 5 per cent of the above amounts, payable to the order of the Treasurer of the Modesto Irrigation District for the benefit of said District as a guarantee that the bidder will, if successful, execute a satisfactory contract and furnish a bond for 10 per cent of the above amounts for the faithful performance of the terms of said contract.

Proposals must be marked "Proposal for a Twelve-Month Contract for Furnishing Transformers and Meters" and addressed to Modesto Irrigation District, Modesto, California.

Done in pursuance of the order of the Board of Directors of the Modesto Irrigation District this 25th day of October, 1926.

MODESTO IRRIGATION DISTRICT,
C. S. ABBOTT,
Secretary

NOTICE TO CONTRACTORS

(Memorial Building—Chico)

Notice is hereby given by the Board of Supervisors of Butte County, California, that sealed bids will be received by the Clerk of the said Board, at his office in the Butte County Court House, in the City of Oroville, California, **up to Monday, November 22nd, 1926, at 2:00 o'clock P. M.,** for the erection of a Memorial Building, to be built in the City of Chico, California, according to plans and specifications prepared for the same by Chester Cole, architect, Chico, California.

All bidders will bid on the work as follows: General Construction as a whole, and not segregated.

Plans and specifications can be seen during office hours at the office of the aforesaid Clerk of the Board of Supervisors, and also may be seen and obtained from the office of the architect, at his office, Chico, California, in the First National Bank Building.

All bids will be presented on blank forms which may be procured from the office of the architect.

Each bid must be accompanied with a certified check on some responsible California Bank, or by a Bidder's Bond, for a sum not less than ten per cent of the amount of the bid, made payable to the Chairman of the Board of Supervisors of Butte County, California, as a guarantee of good faith, that the party to whom the contract may be awarded will, within ten days after the award is made, enter into the necessary agreement and furnish the necessary Surety Bonds for the faithful performance of the said work, and in case the bidder to whom the contract is awarded, fails or refuses to enter into the aforesaid agreement, or to furnish said bonds, said check will be forfeited to the said County of Butte, in the manner provided by law.

Each bid must be enclosed in a sealed envelope and addressed to the Clerk of the Board of Supervisors of Butte County, California, and endorsed, "Proposal for Building Memorial Building, Chico."

The Board of Supervisors expressly reserves the right to reject any or all bids and to waive any informality in any bid received.

By order of the Board of Supervisors. Butte County, California.

C. F. BELDING, Clerk.
By B. L. McCOY, Deputy Clerk.

NOTICE TO CONTRACTORS

(Mechanical Work)

Sealed bids will be received by Geo. B. McDougall, State Architect, Chief, Division of Architecture, Forum Building, Sacramento, California, **up to and including 12 o'clock noon, Tuesday, November 30th, 1926,** said bids then and there to be publicly opened and read, for furnishing all plant, materials and labor required for the **Mechanical Work,** Science Building, San Francisco State Teachers' College, Buchanan and Haight Streets, San Francisco, California, in accordance with plans and specifications therefor, copies of which may be obtained on application to the Division of Architecture, State Department of Public Works, Forum Building, Sacramento, California.

Mechanical Work includes Plumbing, Heating and Electrical Work, and separate bids will be received for each branch of the work. Combined bids will also be received covering two or all three branches of the work. Bids must be submitted on forms prepared and furnished by the Division of Architecture.

Cash, a bidder's bond made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bid, must be enclosed with each bid.

A deposit of twenty-five ($25.00) dollars will be required on plans and specifications, the deposit to be returned immediately upon the return of the plans and specifications to the Division of Architecture at Sacramento, California, in good condition.

The Division of Architecture, State Department of Public Works, reserves the right to reject any or all bids and to waive any informality in any bid received.

All bids must be addressed to Geo. B. McDougall, State Architect, Chief, Division of Architecture, Forum Building, Sacramento, California, and plainly marked on the envelope: "Proposal for Mechanical Work, Science Building, San Francisco, California."

STATE DEPARTMENT OF PUBLIC WORKS DIVISION OF ARCHITECTURE
GEO. B. McDOUGALL,
State Architect.
PAUL BAILEY,

SAN BERNARDINO, Cal.—Report of Burns-McDonnell-Smith Corp., 422 Western Pacific Bldg., Los Angeles, consulting engrs., to city council on proposed sewer and disposal system, recommends a sys. costing bet. $600,000 and $800,000. The recommendations are: 1—That an outfall sewer of a cap. sufficient to carry the est. sewage flow from a city of 110,000 people, with connecting sewers to present mains and the proposed main intercepter, be constr. from the south city limits southward to the present sewer farm. 2—That intercepting sewers be const. on Base Line St. and Third St. to relieve the present north and south sewers of their overload. 3—That a main intercepter be constr. on A St. from Base Line St. south to the city limits. 4—That the sewer farm be adopted as the site for disposal of sewage for San Bernardino, and that sufficient land be acquired thereon at the present to provide for the future needs of the city. 5—That a sewage disposal plant, with preliminary treatment of the separate sludge digestion type, with aeration tanks for secondary treatment be constructed with a capacity sufficient to provide for the estimated flow of sewage from a city of 55,000 people. A summary of an est. of cost for the proposed improvts. follows: Outfall sewer, $240,435; disposal plant, $390,636; land and right-of-way, $20,500; total, $651,571; plus intercepters, $209,587. The est. net annual cost of operating the disposal plant recommended for the est. population of San Bernardino in 1928 would be $10,464.

1926 Edition

San Francisco Building Laws

Ready For Distribution

With the issuance of this 1926 edition, the Building Ordinance Books heretofore published will be obsolete, inasmuch as many sections of the law have been amended and additional sections added.

This 1926 edition contains all revisions and additions to the code up to and including June 1926.

In addition to the Building Laws of San Francisco, the 1926 edition contains the FIRE ORDINANCES as regards the construction industry, the ELECTRICAL ORDINANCES, the SIGN ORDINANCE, the BILLBOARD ORDINANCE and other laws covering regulations concerning the construction interests.

Price $1.00 per copy.

TIMPIE
HYDRATED LIME

(a true dolomite lime)

for Brick Mortar, White Coat and Sand Float Finish, and for inducing plasticity in and water proofing Portland Cement Concrete.

Used in approximately $70,000,000 High Class Pacific Coast construction in last 3 years.

EXAMPLES:—

New Standard Oil Building, San Francisco
Federal Reserve Bank
Pacific Telephone and Telegraph Building
Central Bank, Oakland
Oakland Savings Bank
New Subway Terminal Building, Los Angeles

Sold by most progressive dealers throughout Pacific Coast.

Industrial Buildings of Permanent Construction

COASTEEL Standard Buildings, manufactured on the Pacific Coast, are in every sense permanent buildings. They are constructed of completely standardized units, of a specially manufactured steel. **Every member is hot dip galvanized after fabrication.**

In such places as window sash, where complete protection from weathering is essential, copper bearing steel is used and all of it is galvanized.

COASTEEL Buildings are made in various types—in all sizes—and are entirely suitable wherever a one-story industrial building is desired.

CONTRACTORS FINED $50 A DAY ON SCHOOL DELAY

A penalty of $50 a day will be paid by Sample & Cody, general contractors on the San Leandro Junior High School, according to the Oakland Board of Education.

The contract for building the school expired November 9. Building Superintendent W. E. Whalin announced that there was "no excuse" for the builders to be so far behind in their contract.

Whalin asserted that it will be three months before the structure is finished. He recommended no extension of time to the contractors. A $50 daily penalty for failure to complete the job on time is provided in the contract.

SEWER CONTRACTORS OF EAST BAY TO ORGANIZE

Sewer contractors in the East Bay district have taken steps to organize a permanent organization to improve conditions in their line. Contractors who have already signed membership applications include: C. E. Bonnell, John Travers, E. H. Cavanagh, M. Perry, J. M. Calhan, V. B. De Carlo, H. Gonsalves, Tony Abrew, A. V. Freitas, J. F. Ponte, Ed. Bowman, J. Dalton, W. Tenbrook, John White, Julius Ferreira, Frank Ferreira, J. Pestana and A. Menke.

LONG BEACH PLANS TO HAVE ARCHITECTURAL CLUB

An architectural club is being formed in Long Beach. At a meeting attended by about 30 architects and draftsmen Natt A. Piper was elected temporary chairman and Joseph Roberts temporary secretary.

LUMBER "MACHINE WITH BRAINS" IS PERFECTED

A "machine with brains," which converts scrap wood into box boards, and which it is estimated by lumber companies will reduce their waste from 30 to 50 per cent, has been invented and patented by a former Eastern shipping man now living in San Francisco.

The machine, believed by some to be the forerunner of a still more "intelligent" device which will make possible the building of portable houses from waste wood, is already in commercial use and is being manufactured now in a California foundry.

H. P. Schuck, former ship owner, lumberman and mechanical engineer of East Orange, New Jersey, is the inventor. He is living at 536 Leavenworth street, San Francisco.

When interviewed, he told of the operations of his ingenious invention, estimating that when it comes into general use it will not only save thousands of dollars worth of wood now going to waste, but will materially affect every fruit and other packing industry in the country.

The device, known as the Danschuck box spliner machine, is uncanny in its workings. At one end narrow scraps heretofore valueless in wooden box making, are fed into a hopper, from which they are carried through on runners to be fitted properly together, cut, and bound by a wooden core which is forced into a groove under pressure, and glued into place.

This core presents a cross-grained surface on two sides of the finished box end, thus giving crossgrained strength on all four sides.

Two of the machines, operating tandem, are now being used in a lumber mill at Westwood, Lassen County, where they have demonstrated a capacity of 20,000 box ends a day.

STATE HIGHWAY FINANCE PLAN IS SOUGHT

Efforts to bring the northern and southern sections of California into harmony on highway matters so that a comprehensive highway financing program can be formulated and authorized at the session of the legislature this winter have been undertaken at Sacramento by the Sacramento Region Citizens Council, Inc., representing the twenty-one northern counties.

Lack of State highway building funds at the present time and failure of the people to vote new revenues at the recent election were discussed by officials of the council at a week-end conference which also considered the gasoline tax, a crude oil tax and bond issues as possible means of providing road money.

The session concluded with announcement by President Simon J. Lubin that he will appoint a special committee of three to study the situation and co-operate with leaders of the San Francisco Bay district and Southern California in the interest of harmony and concerted efforts for new road funds at the legislative session.

CALIFORNIA WATER WORKS MEN MEET AT SAN DIEGO

At the seventh annual convention of the California Section, American Water Works Association, held at San Diego Oct. 28, 29 and 30, more than 400 were in attendance, by far the largest convention yet held by this section. An indication of the registration of water works men from Vancouver, B. C.; Tucson, Ariz.; Salt Lake, Utah, and Denver, Colo., as well as delegates from a very considerable percentage of California cities.

The convention was held in American Legion Hall in Balboa Park where there was available a 46x110-ft. meeting room adjoining a 77x110-ft. hall which was fitted up with booths for the manufacturers' exhibits. In all, fifty exhibitors had displays, completely occupying all available space in the hall. There was on display a practically complete line of materials and equipment essential to construction and operation of the modern water-supply system.

Officers elected for the ensuing year were as follows: Chairman, S. B. Morris, Pasadena; vice-chairman, J. J. Ryland, San Jose; secretary-treasurer, Paul Magerstadt, Oakland; membership committee, P. Dietrich, Glendale, and J. Burt, San Rafael. The annual meeting next year will be at San Jose.

DRAFTSMEN NEEDED FOR U. S. CONSTRUCTION

The United States Civil Service Commission has announced that until December 14 it will receive applications for positions of architectural draftsmen and senior architectural draftsmen in the office of the Supervising Architect for employment in connection with the $165,000,000 public buildings program which is now under way.

Entrance salaries are $1,680 a year for architectural draftsmen and $1,860 a year for senior architectural draftsmen. Higher-salaried positions are filled through promotion.

There are vacancies in positions of principal architectural and structural steel draftsmen in the lighthouse service throughout the United States. Applications for these positions will be received by the Civil Service Commission until December 14. The entrance salary is $2,100 a year. Promotion to higher grades may be made in accordance with the civil service rules.

The United States Naval Station at Pearl Harbor, Hawaii, is in need of a structural design draftsman. The rate of pay is $9.84 a day. Applications will be received by the Civil Service Commission until December 14.

Information regarding any of these examinations, and application blanks may be obtained from the United States Civil Service Commission, Washington, D. C., or from the secretary of the United States Civil Service Board at the post office or customhouse in any city.

Olmsted & Gillilen, consulting engineers of Los Angeles, in a report to the Roseville city council recommends a bond issue for $326,000 to finance construction of a municipal water works system.

Two Hundred Fabricators Attend Annual Steel Meet

Extension of Field of Usefulness of Structural Steel Is Discussed—Standard Fireproofing Specifications Proposed—Wind Bracing Problems, Building Codes and Other Matters are Subjects of Discussion—J. L. Kimbrough, Retiring President, Honored

Further steps toward extending the field of usefulness of structural steel for the benefit of the building industry, the general public, and the fabricator, were discussed at the fourth annual convention of the American Institute of Steel Construction held at White Sulphur Springs, West Virginia, October 26-30.

The convention was attended by 200 structural steel fabricators of the United States and Canada, and by representatives of the leading steel mills. Addresses of welcome were delivered by J. L. Kimbrough, President of the Institute, and by C. Edwin Michael, Second Vice-President. Both speakers stressed the importance of closer cooperation between the rolling mills and the fabricators as one of the chief requirements for the continued progress of the steel industry as a whole.

A decision to embark upon a new move aimed at lessening the fire hazard in office buildings and other large commercial structures was a feature of the convention. A standard specification for the fireproofing of such structures will be formulated by the American Institute of Steel Construction during the coming year. The specification will be based upon a detailed study of existing methods and upon additional field and laboratory investigations.

"Up to the present time," said Lee H. Miller, Chief Engineer of the Institute, "it has been customary to rate in accordance with their thickness the insulating properties of materials used to protect columns and girders from high temperatures. Recent investigations, however, have indicated that the nature of the surface of the insulation has an important bearing upon the insulating qualities. Special attention will be given to this phase of the problem."

Wind statistics based on pounds per square foot rather than on miles per hour, and study of the force of the rain-fall during the hurricane, are essential for the design of structures in hurricane areas, according to F. E. Schmitt an engineer of New York City, who addressed the convention on the problems of wind-bracing. Mr. Schmitt had recently returned from Florida where he made a survey of the structures in the area devastated by the September hurricane.

"The Weather Bureau," said Mr. Schmitt, "now gives complete information concerning the velocity of winds in various sections of the country, but new instruments which will give the force of the winds in pounds, the point of real interest to the engineer, will be an invaluable aid in designing buildings to withstand any pressure to which the wind may subject them." Mr. Schmitt stated that during the Florida hurricane the rain was thrown against the building with a force equivalent to that of a stream from a hose line under a 250 pound pressure.

C. R. Young, Professor of Structural Engineering, University of Toronto, told the convention that unreasonable restrictions included in many municipal building codes penalize the competent engineer and result in unnecessarily high costs which must be borne by the public.

"Complete realization of the possibilities of steel and other structural materials," said Mr. Young, "is possible only where competent engineers are allowed free rein for the exercise of their skill and experience, and where the results of their work are checked by careful supervision. Sooner or later the public will realize the colossal waste involved in setting up barriers to structural progress by debarring responsible engineers from using materials to their full advantage because others are too careless or incompetent to do so."

As an example of the varying and unjustifiable restrictions imposed by building codes in different sections of the country, Mr. Young cited the fact that Philadelphia fixes the live load for the floors of office buildings at 100 pounds per square foot while the Chicago code permits a live load of only 50 pounds per square foot. The only apparent reason for the divergence, according to the speaker, is a difference in civic temperament.

Another cause of waste was emphasized by Dr. George F. Swain, former president of the American Society of Civil Engineers and now Professor of Civil Engineering at Harvard. Dr. Swain stated that an enormous waste of the taxpayer's money is caused annually by the ill-advised selection of building materials for bridges, schools, and other structures erected by the municipal, state, or federal government.

"There are many materials and each has its proper uses," said Dr. Swain "Officials responsible for the selection of materials for a given project owe it to the public to acquaint themselves with the known advantages of each material as regards its proposed use in the structure under consideration. Their decision should be formed with due attention to the type of structure and the uses to which it will be put Neglect of such factors frequently results in structures lacking in permanence, the possibility of alterations or additions, or other vital features."

Referring to the economic waste involved in conflicting building codes and the ill-advised selection of building materials, Charles F. Abbott, Executive Director of the American Institute of Steel Construction, announced further progress in the country wide adoption of the Institute's standard specification for the design and erection of structural steel, and stated that the Institute had already taken the first step in the organization of a staff of field engineers to co-operate with those responsible for the selection of materials.

"Sixty-three large cities," said Mr. Abbott, "have either adopted or are permitting the use of our standard specification. This is an increase of 18 cities over last year and leaves New York, Philadelphia, Chicago and St. Louis the only major cities in which the standard specification is not in use. Satisfactory progress towards adoption in those cities is being made. It is estimated that the general use of the specification will result in an annual saving of approximately $50,000,000.

"The Institute has already secured the services of its first field engineer. One of the chief functions of this engineer will be to co-operate with Building Committees, Boards of Education, and public officials. He will suggest the use of steel when steel is the logical material for any particular project, but will make no attempt to secure its selection where it cannot be used to advantage."

Among the others who addressed the convention were Dr. Milo S. Ketchum, Dean of the College of Engineering, University of Illinois; Harvey Wiley Corbett, of the firm of Helmle & Corbett, architects, New York; William Spraragon, of the National Research Council; and Bradley Stoughton, Professor in Charge of the Department of Metallurgical Engineering, Lehigh University.

W. M. Wood, of the Mississippi Valley Structural Steel Company, Decatur, Illinois, was elected President of the Institute to succeed J. L. Kimbrough, of the Indiana Bridge Company, Muncie, Indiana, who resigned because of the pressure of private affairs. Directors of the Institute presented Mr. Kimbrough with a platinum watch and chain as a token of their appreciation of his services as President extending over a period of seven years.

C. Edwin Michael, of the Virginia Bridge & Iron Company, Roanoke, Virginia, was elected First Vice-President. C. M. Denise, of the McClintic-Marshall Company, Pittsburgh, Pennsylvania, was elected Second Vice-President, and George E. Pistor, of the Hay Foundry & Iron Works, New York City, was elected Treasurer. H. A. Fitch, of the Kansas City Structural Steel Company, Kansas City, Kansas, was elected as the new member of the Board of Directors.

BRICKLAYERS' MOTIONS CALLED NEAR-PERPETUAL

The bricklayer is the most efficient workman in the world and "The nearest approach to perpetual motion to be found in industry," in the opinion of John Gill, chairman of the local executive council of the Bricklayers' Union.

Gill appeared before the Industrial Survey Commission at New York to refute what he termed libels up n his craft by a representative of the Building Trades Employers' Association.

The modern bricklayer is laying from 1400 to 1600 plain brick a day on straight walls, Gill said, as compared with from 600 to 700 brick when on a $5 wage scale. A daily wage of $14 is now received, he said, adding that there were 12,000 bricklayers and 4000 apprentices in New York City.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

Unfilled orders of the United Steel Corporation on October 31, amounted to 3,683,661 tons, an increase of 90,152 tons compared with the end of the preceding month.

Direct appropriation of approximately $3,600,000 to permit continuation and expansion of the state prison road camp system will be sought at the forthcoming session of the state legislature by highway officials.

Classes for apprentice paper hangers and painters have been authorized by the Sacramento Board of Education. The classes are held three times a week for two hours late in the afternoon and the state department of education aids in the expense.

Contracts totaling $174.168 for construction on the Edison Technical School at Fresno have been awarded by the Board of Education. All work will be done by union labor. This will avoid any labor difficulties during the erection of the structure, in the opinion of the school officials. The Edison school is the first unit of a $1,800,000 expenditure for school construction.

The $26,000,000 bond issue for further work by the Los Angeles County Flood Control District was defeated at the election on Nov. 2. This issue was to supplement the work initiated two years ago when an issue of $35,300,000 was approved. The $26,000,000 issue was opposed, among other organizations, by the Los Angeles City Committee of the California Taxpayers Association, and the Los Angeles Chapter of the American Association of Engineers.

Two million dollar Dumbarton highway bridge over San Francisco Bay opposite Menlo Park, San Mateo county, will be opened to traffic early next month, it is announced by John G. Sutton, general manager of the Dumbarton Highway Bridge Corporation. The total length of the bridge is 6305 feet. Of this length 226 feet consists of a steel span over deep water, the balance being concrete trestle. The width is 24 feet over the entire length.

California State Civil Service Commission, Forum Bldg., Sacramento, announces the receipt of applications for examination for the position of Bridge Engineer, paying from $360 to $420 a month, will close Nov. 30. Duties of the position provide for one capable of taking charge of the bridge department of the State Highway Commission and to supervise and direct an organization of 30 to 50 engineers engaged in designing and supervising the construction of highway bridges, railroad grade separations and related structures. Receipt of applications will close on the same date for the following positions: Junior Hydraulic Engineer, Grade 3, Assistant Hydraulic Engineer, Grade 4; Associated Hydraulic Engineer, Grade 5 and Hydraulic Engineer, Grade 6. Further information regarding these examinations may be obtained from the California State Civil Service Commission at Sacramento.

City Manager H. C. Bottorff of Sacramento has submitted the proposed new building law to the city commissioners. The law was prepared by the Uniform Building Code Officials' Conference. Action has been deferred for three weeks to permit hearings before final adoption. A number of changes have already been made in the code to fit local conditions.

Atkinson-Spicer Co., Edwards-Wildey Bldg., Los Angeles, at $2,268,025.50 submitted low bid to the U. S. Indian Irrigation Service, Federal Bldg., Los Angeles, to construct the Coolidge multiple dome dam at San Carlos, Arizona, involving approximately 190,-930 cubic yards of concrete; 2250 tons of steel; 26,000 cubic yards sand and gravel excavation and 209,000 cubic yards rock excavation. Other bidders were: Utah Construction Co., $2,451,-329; W. A. Bechtel, $2,465,056; Bent Bros., $2,489.572; Allied Contractors, Inc., and Ross Construction Co., $2,-593,000; Claude Fisher, $2,594,701.25; D. A. Foley, $2,613,563.25; A. Guthrie, $2,799,048; MacDonald & Kahn, $3,-016,000.

The Santa Cruz Portland Cement Company has filed suit in the superior court at Sacramento against T. H. and M. C. Polk, Chico contractors; the highway commission, State Controller Ray L. Riley, State Treasurer Gus Johnson and the Southern Surety Company over the construction of a highway bridge over the railroad at Hinton, Nevada County. The cement company alleges the Polks owe $2160.60 on material furnished for the bridge and seeks to prevent the highway commission, Riley and Johnson from paying $3872 due the contractors until their claim has been settled. The surety company, bondsmen for the Polks, is sued in order to collect any balance due if its obtains judgment on the initial suit.

ALONG the LINE

Voters of the city of Santa Clara have authorized the sale of the municipal gas distribut ng plant and system, 529 being in favor of the sale and 39 against it.

Lewis D. Blauvelt of Denver was elected president of the American Association of State Highway Officials at the closing session of the organization's convention in Pinehurst, N. C. Harvey Toy of California was elected a member of the executive committee. Denver will be the 1927 meeting city.

Marston Campbell, division engineer and former director of the East Bay Municipal Utility District, is in a serious condition at the Providence Hospital, Oakland, as the result of an acute attack of stomach trouble. An operation may be necessary, but his condition is such that it cannot be performed at this time, according to his physician.

Bids will be considered by the Santa Cruz city council on December 30th to construct a sewerage and outfall system. Bonds of $450,000 have been voted to finance construction. Chas. Gilman Hyde of Berkeley is consulting engineer on the project.

State Railroad Commission has ordered the construction of a forked viaduct spanning seven tracks of the Southern Pacific Company at the foot of Seventh street, Oakland. The estimated cost of construction is placed at $285,409, the railroad to pay one-half and the City of Oakland and County of Alameda, the remaining half of the cost.

The Concrete Mining & Conveying Company bas filed suit in the Federal Court against the Great Western Power Company of California. The complaint charges that the defendant company has been infringing upon a patented method of treating and transporting concrete.

Ernest H. Rogers has been named building inspector of Alameda at a salary of $185 a month. Eugene Maillot will remain as sanitary and plumbing inspector, with Rogers taking over the construction end of building.

TRADE NOTES

W. H. Vogt Electrical Company, formerly operating from 1108 J street, has moved to new and larger quarters at 1106 J street, Sacramento.

Borchers Brothers, building material dealers, have moved to new quarters at 396 North First St., San Jose.

San Francisco offices of the Monolith Portland Cement Company have been moved to Rooms 622-624 Monadnock Bldg. General offices of the company are located at 215 West Seventh street, Los Angeles.

Madary Planing Mill at Fresno suffers $300,000 fire loss Nov. 10. Damage consists of 14 motor trucks and more than 2,000,000 feet of lumber

A stock dividend of 35 per cent in common stock and an extra of $1.40 a share on the common were declared by the United States Gypsum Company in addition to the regular quarterly disbursements of 40 cents on the common and 1 ¾ per cent on the preferred, all payable December 31 to holders of record December 4. In two preceding quarters extras of $1 each were paid on the common and at the end of last year, a 15 per cent stock dividend on the common.

Albert E. and Frederick B. Fake will operate from 1338 East Fifteenth St., Oakland, under the firm name of Oakland Wood Cabinet Company.

ELECTRICAL INSPECTORS TO MEET IN PORTLAND

The Northwest Association of Electrical Inspectors will hold its annual convention in Portland, Ore., January 17 and 18. Representatives from the states of Oregon, Washington and Idaho and the Province of British Columbia will attend the meet. J. H. Sroufe of the Jagger-Sroufe Co., electrical contracting engineers, is chairman of the entertainment committee and is arranging a program to the delegates.

KIRCHMANN LUMBER COMPANY BUYS BANKRUPT MILL

The entire contents of the yards of the Cook Lumber Company, San Jose, recently adjudicated bankrupt, except for 68 barrels of nails and 177 rolls of wire was sold to the Kirchmann Lumber Company of San Francisco for $15,780, at a public auction conducted by the creditors in San Jose last Saturday.

Contents of the lumber mill included 200,000 feet of mahogany lumber and a large truck. Material in the mill was valued by the proprietor, C. M. Cook, at $21,000.

Sixty-two barrels of nails and 177 rolls of wire valued at $1055 were sold to Simon Meyer of San Francisco for $870. The equities of two houses were bought by F. A. Gabriel for $150, and O. A. Trowbridge for $250.

Sale of 52 houses, practically all of which have not been completed, will be held in the Chamber of Commerce hall, Saturday, November 20, at 10 o'clock. George W. Waldorf, United States referee in bankruptcy for northern California, presided at the sale.

PACIFIC CLAY PRODUCTS OFFERS STOCK

An investment banking syndicate comprising Banks, Huntley & Co., Hunter, Dulin & Co., M. H. Lewis & Co. and Drake, Riley & Thomas is offering 100,000 shares of no-par value common stock of the Pacific Clay Products Company of Los Angeles, carrying full voting privileges at a price of $28 per share to yield approximately 8 per cent.

The business of Pacific Clay Products consists of the manufacture and sale of various grades of vitrified sewer pipe, electric conduit tile, water pipe, face enamel brick, fire brick, terra cotta, flue lining, stoneware and drain tile. The company is one of the old-established industrial concerns of Los Angeles, being an amalgamation of properties that have been engaged in the industry for the last thirty years.

It is the intention of the directors to maintain a conservative dividend policy, and earnings are considered to warrant the declaration of monthly dividends on an annual basis of $2.25 per share. For the nine months ended September 30, 1926, the net ernings after depletion and depreciation exceeded this dividend rate by a wide margin, and current earnings are reported to be satisfactory.

GOVERNMENT IN BUSINESS

"Building material dealers and contractors object to government in business because it is unsound, uneconomical, un-American; they object because this growing tendency threatens their own business, their family and their livelihood; they object most of all, however, because it means another step toward communism, which, when fully realized, means the destruction of America itself," declared C. W. Rosenthal, president of the C. W. Rosenthal-Cornell Company, Chicago, builders, in Universal Dealer, published by Universal Portland Cement Company. Mr. Rosenthal cites various examples where the government has entered the construction, building material field and other fields and concludes, "The wastefulness of these public ventures must be evident and I can safely say that no governmental agency could compete with private business if it competed fairly. The expansion of these governmental bureaus is due largely to concealment of costs of the absence of proper cost counting systems."

$39,948,721 Is Pacific Coast Construction Total In October

A grand total of 14,879 building permits calling for construction costs aggregating $39,948,721, issued during October in 92 cities of the Pacific Coast area, reflects a 6% reduction from the comparable figures of 1925, but an increase of 11% over the September total of this year, according to the National Monthly Building Survey of S. W. Straus & Co.

California's October total for 57 cities shows a 24% gain over the September figures, but a 5% reduction from the total for last October. Elimination of the dominant Los Angeles total, however, leaves the 1926 October total slightly above that of last year.

In Oregon 7 cities report an October aggregate 24% above that of last October and slightly in excess of the September total of this year. All but two of these cities show substantial October gains over both previous comparable totals.

In Washington 10 cities report an October total of 32% below that of September and 19% below the October figures of a year ago. Three of these cities, however, show increases over both previous comparable totals.

The Los Angeles October total of 3,482 building permits issued, involving $9,950,229 in construction costs, is 14% below the October figures of last year, but is 21% above this year's September total.

In the Los Angeles metropolitan area 15 municipalities issued $15,742,993 in building permits during October, 3% below last October's record, but 31% above that of September of this year.

San Francisco reports an increase of 41% over the September total and an increase of 29% over that of last October, with 849 October building permits calling for $5,649,690 in construction costs.

Portland, issuing 1229 building permits during October, totaling $2,624,320 in construction costs, shows a slight gain over the September figures and a 10% gain over the record of last October.

Seattle's October total of 923 permits for buildings to cost $1,457,965, reflects a reduction of 49% from the September building program and a reduction of 28% from that of October, 1925.

Oakland, reporting 970 October building permits totaling $1.777,083 in construction costs, shows a 16% reduction from September's program and a 46% reduction from the total for last October.

Sacramento issued 249 building permits involving $615,413 in construction costs during October, 10% less than last year's October total, but reflecting a 48% increase over September of this year.

Following are the official October, 1926, construction cost figures reported by building department executives from 92 cities comprised in the Pacific Coast Section of the National Monthly Building Survey issued by S. W. Straus & Co.:

City	October, 1926 No.	October, 1926 Cost	October 1925	September 1926
Alameda	82	$ 105,199	$ 529,740	$ 135,624

Uniform Mechanics' Lien Act Completed By Gov't. Committee

The committee of thirteen men appointed by Secretary of Commerce Herbert Hoover, to draw up a mechanics' lien act to serve as a basis for more uniform state legislation on this subject, has mailed out copies of its first tentative draft to several hundred trade associations, labor organizations and individuals who have expressed an interest in the subject.

Existing mechanics' lien laws of the different states, as applied to building construction, aim to provide a procedure by which contractors, sub-contractors, material men, laborers, and others, if they are not paid promptly, may obtain some extra protection beyond their usual right to bring personal action against the owner, contractor or subcontractor who may have employed them. Under these laws the property and improvements afford security for the debts of those who have contributed to the improvement. To perfect a lien on the property each claimant is required to file for public record a statement of the amount due him.

If an owner fails to make payments as required by his building contract the property may be sold and payments made from the proceeds. If the contractor defaults or goes into bankruptcy leaving obligations due workers, material men or sub-contractors they have a claim on the property. On projects carried to completion the total amount of liens is usually limited to the unpaid balance of the contract price of the work and where the improvement is not completed the total of liens is limited to the unpaid balance of the amount earned by the contractor for the work performed. If the claims are not satisfied by the owner a sale of the property may be compelled by court action.

This study was undertaken at the request of several national organizations interested in the construction industries, and the committee is composed of men representing the principal groups whose interests are affected by such laws, including whose interests are those of the owner.

The tentative draft contains few new departures, practically all of its provisions having been found workable in several jurisdictions. The aim of the committee has been to produce an act which will adequately protect the interests of the worker and others concerned in construction as well as the interests of the owner and those who finance building operations, and to distribute as equitably as possible among the groups the burden of securing such protection.

The tentative draft of the act is being distributed to individuals and to trade and professional bodies who will study it in detail and submit to the committee their comments and suggestions. The committee has requested that all comments be forwarded to its secretary before January 31, 1927. They will then be collated and carefully studied by the committee with a view to perfecting the act.

The committee believes that a wide and thorough study will aid in producing an act which will be fair and just to all and which can be recommended to each state legislature for consideration.

The committee also believes that uniformity in this field would eliminate much confusion and expense which those doing business in more than one state experience on account of the wide divergencies in the present laws.

The committee's membership is as follows: F. Highlands Burns, Baltimore, Md., Pres. Maryland Casualty Company; William F. Chew, Baltimore, Md., Ex-Pres. National Association of Builders' Exchanges; H. E. Essley, New York, N. Y., Associated General Contractors; George F. Hedrick, Lafayette, Ind., Vice-Pres. Building Trade Department, American Federation of Labor; Charles V. Imlay, Washington, D. C., National Conference of Commissioners on Uniform State Laws; C. Clinton James, Washington, D. C., Pres. U. S. League of Local Building and Loan Associations; Stewart A. Jollett, Philadelphia, Penn., Ex-Pres. Heating and Piping Contractors' National Association; William B. King, Washington, D. C., Counsel National Association of Builders' Exchanges; Victor Windeleff, Washington, D. C., American Institute of Architects; Charles H. Paul, Dayton, Ohio, American Engineering Council; W. T. Rossiter, Cleveland, O., Ex-Pres. National Builders' Supply Association; E. W. Shepard, New York, N. Y., National Association of Credit Men; Frank Day Smith, Detroit, Michigan, National Retail Lumber Dealers' Association; Dan H. Wheeler, Secretary, Division of Building and Housing Department of Commerce.

LUMBER MILL AT SUGAR PINE CLOSED FOR SEASON

With the closing of the Sugar Pine Lumber Company mill at Sugar Pine, Nov. 1, logging and milling operations for the 1926 season were closed by the company, and a crew of approximately 800 men released from producing activities. Some of the men had already gone to Madera to take up Winter employment in the company's yards there, and others will be required here during the Winter to work on repairs and railroad projects.

D. C. Birch, assistant manager in charge of logging and milling activities, finished the run of 50,000,000 board feet, the output of the season, about two weeks earlier than is usual. Some embarassment to milling and logging operations resulted from numerous forest fires in the vicinity of the mill and logging camps during the season. Operations were occasionally suspended while the entire force battled the flames that threatened to wipe out the company's equipment as well as the forests. The extent of the damage done to standing timber has not yet been estimated, but it is known to be heavy.

"Copper Bearing Steel Resists Corrosion" is the title of a treatise containing facts figures and photographs showing the marked rust-resisting properties of steel containing a percentage of copper. Compiled by Robert D. Snodgrass, consulting engineer, this 15 page treatise will be found of great interest to those in any way connected with the iron and steel industry. Copies may be obtained by addressing the Truscon Steel Company at Youngstown, Ohio. Ask for Booklet 679.

Progress In Cement Making Told In Government Publication

Many interesting mechanical and chemical developments have contributed to the progress of the cement industry since it began its rapid growth 30 years ago, states the Bureau of Mines, Department of Commerce. The first kilns were vertical, like lime kilns, and operations were intermittent. An attempt was made to improve operation by making it continuous, but as this change could at most only double the output, interest was soon directed toward the rotary kiln which was in use in England. This type of kiln was first introduced into the United States in 1889. Its use necessitated radical change in the form of fuel, for the vertical kiln had used coke or coal interbedded with the stone, but the rotary required a gaseous fuel and this could be supplied only by blowing oil, gas, or pulverized coal in the kiln. This change of kilns and fuel, which became general within the next few years marks the beginning of the rapid increase in output of Portland cement through increased capacity of plants and lower cost of production.

Other important developments in the industry were the introduction of steam shovels in quarrying, enlargement of crushing, grinding, conveying, and storage facilities, improvements in power plants, introduction of electrical drives, use of mechanical packing and weighing devices, improvement and extension of wet process, finer grinding of raw materials and finished cement, dust collection, increased length and diameter of kilns, enlargement of lower end of kilns, utilization in power plant boilers of waste heat from rotary kilns, and the use of concrete for plant construction. With all this development has come more accurate chemical control of the product and a gradual improvement of its quality.

A recent trend in the industry has been toward further improvements in Portland cement and the development of special qualities, such as the early hardening of the high-alumina cements which makes them desirable for road or bridge repair work or for work in cold weather or where the forms can not long be used. Quick-setting cement has been developed for use in oil wells and cement with good plasticity and water-retarding properties for use in stucco finish. To some extent the efforts to produce improved Portland cement have led experimenters outside the limits of that type of cement officially defined as "the product obtained by finely pulverizing clinker produced by calcining to incipient fusion an intimate and properly proportioned mixture of argillaceous and calcareous materials with no addition subsequent to calcination except water and calcined or uncalcined gypsum." Certain of the departures are fused cements high in iron and alumina or in titanium.

Detailed statistical information in regard to the operations of the cement industry are contained in Bureau of Mines publication "Cement in 1924," by E. F. Buchard and B. W. Bagley, copies of which may be obtained from the Superintendent of Documents, Washington, D. C., at a price of 5 cents.

1926 Construction In U. S. Exceeds Seven Billion Dollars

More than seven billion dollars already have been spent this year for construction in the United States. The volume of building operations financed by this enormous expenditure during the first ten months of 1926 is greater than the volume registered during the corresponding period of last year, when all previous records were broken, according to statistics compiled by the Associated General Contractors of America.

Despite a decrease of 10 per cent from the September volume as noted last month, the total for the first ten months of 1926 stands 1½ per cent above the corresponding 1925 figure.

The amount of construction work handled during October was exactly twice the figure registered as the monthly average in 1913.

A study of the statistics shows that no decrease in the volume of construction has extended through more than one month. This fact is being viewed as remarkable in view of the high peak figure set last July when all records for a single month were broken. Following a decrease in August, operations again increased in volume in September.

October operations stand at the 200 point mark on a scale which places the 1913 monthly average on the 100 point basis. The average for 1925 was 176.

New Cement Coloring Methods Announced By London Chemists

Architect and Building News of August 6, describes a new method of dyeing cement to produce stuccos of any color desired, perfected by two London chemists. The article describing the process is quoted in full:

"The increased use of concrete for structural purposes has long demanded the introduction of some satisfactory means for relieving this material of its drab, monotonous color. Hitherto colorings have been obtained by mixing mineral pigments with the cement and sand, but only in cases where the pigment particles are more finely ground than those of the cement can any reasonable success be obtained, for if the pigment particles are larger than the cement particles, the former are readily covered with cement dust and tend to produce a greyish effect. The range of colors obtainable by the admixture of dry mineral pigments is, moreover, a very limited one, and although the use of dyes is not attended by the same limitations, the direct admixture of dyes with the cement would not be an economic proposition on account of the quantity of dyestuff required to give any reasonable depth of shade. A process of dyeing cement akin to the dyeing of certain textiles has, however, been brought into being by the researches of two London chemists, Dr. G. N. White, D. Sc., F. I. C., and C. J. Goodwin, A. C. G. I. In this process the cement admixture is gauged with water containing colorless derivatives of the dyestuffs, instead of with water containing the ordinary dyestuff, paste in suspension. In this way the cement matter is subsequently generated in a permanent, insoluble form by exposure to the air. These dye bases are soluble in water and give a solution of a somewhat muddy appearance, but while the gauging is in progress, the coloring will be seen to develop and by the time the mixture is applied the whole mass will be colored throughout. The speed at which this oxidation takes place varies with different dyes and in some cases the cement may have to be applied before the dye is properly generated. Satisfactory depths of shade produced by the use of no more than 0.1 to 0.5 per cent of dye, or 1 to 6 parts of dye per 1000 parts of cement. All the dyes used in the process are fast to light and are insoluble when fixed by the cement particles. They are unaffected by conditions prevailing in the atmosphere of large towns, particularly in the case of sulphur fumes which will rapidly darken many of the lighter colored mineral pigments. The range of colors available is also an extensive one, and almost any reasonable color scheme desired by the architect should be easily attained." (Report submitted by Consul Robert B. Macatee, London, England).

METHODS OF LAYING TERRAZZO FLOORS

Two methods of laying terrazzo floors are discussed by H. S. Wright, structural engineer of the Portland Cement Association, in a recent bulletin. One of these methods is referred to as the after-bonded top course and the other a completely separated course. According to Mr. Wright, the after-bonded top is more desirable from the angle of dead-load, resistance to impact and economy, but it has its limitation. It should be used only over a foundation slab of such rigidity and strength that temperature changes of excessive deflection will not result in surface cracking in the terrazzo. This type of surface is successfully used on floor slabs laid directly on the soil where adequate provision is made for subdrainage or against unequal heaving due to frost and where contraction cracks have been guarded against by joints of proper design. It is also a satisfactory type over flat-slab or heavy beam-and-slab construction in which sufficient negative reinforcement is used. The integral type permits the designer to utilize the topping course as a part of the effective slab depth in figuring design requirements, but it is extremely difficult to build to a true level and usually delays other structural operations to some extent.

The after-bonded top eliminates difficulties due to delay but presents the much discussed problem of good bonding practice. It also is much easier to build to true level and to protect from damage caused by subsequent operations or weather. The after-bonded top introduces an extra dead-load of from 10 to 18 pounds per square foot in the design of the structure, depending upon the top thickness.

McDougall, State Architect, Chief, Division of Architecture, Forum Building, Sacramento, California, **up to and including 12 o'clock noon, Tuesday, November 30th, 1926,** said bids then and there to be publicly opened and read, for furnishing all plant, materials and labor required for the **Mechanical Work,** Science Building, San Francisco State Teachers' College, Buchanan and Haight Streets, San Francisco, California, in accordance with plans and specifications therefor, copies of which may be obtained on application to the Division of Architecture, State Department of Public Works, Forum Building, Sacramento, California.

Mechanical Work includes Plumbing, Heating and Electrical Work, and separate bids will be received for each branch of the work. Combined bids will also be received covering two or all three branches of the work. Bids must be submitted on forms prepared and furnished by the Division of Architecture.

Cash, a bidder's bond made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bid, must be enclosed with each bid.

A deposit of twenty-five ($25.00) dollars will be required on plans and specifications, the deposit to be returned immediately upon the return of the plans and specifications to the Division of Architecture at Sacramento, California, in good condition.

The Division of Architecture, State Department of Public Works, reserves the right to reject any or all bids and to waive any informality in any bid received.

All bids must be addressed to Geo. B. McDougall, State Architect, Chief, Division of Architecture, Forum Building, Sacramento, California, and plainly marked on the envelope: "Proposal for Mechanical Work, Science Building, San Francisco, California."

STATE DEPARTMENT OF PUBLIC WORKS DIVISION OF ARCHITECTURE
GEO. B. McDOUGALL,
State Architect.
PAUL BAILEY,
Director of Public Works.

IRRIGATION DISTRICT FACES CONTRACT SUIT

Officers and directors of the Merced Irrigation District are charged with fraudulently awarding a construction contract to the United Concrete Pipe & Construction Company of Los Angeles, in a suit filed in Superior Court at Merced by W. O. Smith, land-owning taxpayer.

The district is accused of illegally disregarding two other contracts at a lower figure to award the United corporation the work of relining a canal at a cost of $3307.50. Smith's suit places the bid of T. E. Clark, Merced, at $2475 and of the California Air Construction Company, Santa Barbara, at $2425.50.

Smith asks the court to issue an injunction restraining the district and the United Concrete Pipe & Construction Company from completing the contract.

Construction has been started on a new salesrooms, office and warehouse quarters for the Walworth Company of California, successors in California to the Mark-Lally Plumbing Company, plumbing supply house, at 317 North Grant street, Stockton, L. V. Rice is manager of the branch.

Official Proposals

STATE OF CALIFORNIA

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of **the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock P. M., on December 13, 1926,** at which time they will be publicly opened and read, for construction, in accordance with the specifications therefor, to which special reference is made, of portions of State Highway as follows:

Humboldt County, between Fernbridge and Loleta (1-Hum-1-G), about two and one-tenth (2.1) miles in length; to be graded and surfaced with crushed gravel or stone.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco and at the office of the Division Engineer of the division in which the work is situated. The Division Engineers' offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

HARVEY M. TOY,
LOUIS EVERDING,
N. T. EDWARDS,
California Highway Commission.
R. M. MORTON,
State Highway Engineer.

ACCREDITED APPRAISER

Company accredited by the Board of Education for an amount not less than ten per cent of the amount of the bid shall accompany each proposal, drawn payable to the Board of Education, as a guarantee that the bidder will within five days after being informed of the acceptance of his bid enter into a contract with said Board in accordance with said bid and that he will furnish the necessary surety bonds; said check or bond to be forfeited to the said Board should the bidder fail to execute contract and furnish bond as above mentioned.

All bids must be made out on forms furnished by the architect. Plans and specifications for all the above work may be seen at the office of the architect, W. H. Weeks, 369 Pine St., San Francisco, or at the office of the Board of Education, 1235 Chapala St., Santa Barbara. A limited number of plans will be loaned out to bidders upon deposit of $50.00 for the general set and $25.00 for each of the other sets, said deposit to be refunded to bidder when plans and specifications are returned in good condition accompanied by bid; such deposits to be forfeited to the Board of Education provided the plans and specifications are not returned in good condition within three days from the time set is taken out, unless a bid is to be submitted on or before December 15, 1926.

Said Board of Education reserves the right to reject any or all bids and to waive any informality in any bid received.

By order of the Board of Education of the Santa Barbara High School District, County of Santa Barbara, California.

E. CARLOTTA DENGATE,
Clerk.

November 13, 1926.

NOTICE TO CONTRACTORS

(School Assembly Building—Oakland)

OFFICE OF THE SECRETARY OF THE BOARD OF EDUCATION OF THE CITY OF OAKLAND.

Notice is hereby given that the Board of Education of the City of Oakland and of the Oakland School District of Alameda County, hereby calls for sealed proposals to be delivered to the Secretary of said Board, Room 211, City Hall, Oakland, California, **until Thursday, the 2nd day of December, 1926, at 4:15 P. M.,** at which time said bids will be opened, for the erection and completion of the Franklin School Assembly Building, of the Oakland School District, to be erected on the West side of Tenth Avenue, between East 15th and East 16th Sts. These bids shall be presented in accordance with the plans and specifications for said building on file in the office of the Secretary of the Board of Education, City Hall, and in the office of the Superintendent of Buildings, 337 17th Street, Oakland, California.

On a deposit of Twenty-five ($25.00) Dollars, complete sets of plans and specifications may be had by any bidder on application to the Superintendent of Buildings at his office hereinbefore mentioned, and shall be returned within fifteen (15) days after securing same, to the Superintendent of Buildings. If the plans and specifications are not returned within said time, or if mutilated, the said deposit shall be retained by the said School District as agreed and liquidated damages for said mutilation or detention.

Bids must be made on proposals obtained at the office of the Superintendent of Buildings, and be signed by the bidder and accompanied by a certified check, certified to by some responsible bank or banker, and made payable to the Board of Education of the City of Oakland and the Oakland School District, to be retained by said School District, as agreed and liquidated damages should the party or parties to whom the contract should be awarded fail to enter into the contract after the award, or to give bonds required for the faithful performance of the contract, or any bond requirtd by law. The amount of said check shall not be less than ten (10%) per cent of the amout bid, provided, however, that in no case shall said check be required to be in excess of Five Thousand ($5000.00) Dollars. Each bidder shall execute the affidavit accompanying the proposal obtained from the Superintendent of Buildings.

Bids will be opened by the Board of said District on Thursday, the 2nd day of December, 1926, at 4:15 P. M., in the Board Room, 211 Second Floor, of said City Hall, in said City of Oakland. The Board reserves the right to reject any all bids or any or all items of such Secretary of the Board of Education of bids.

JOHN W. EDGEMOND,
Oakland, California.

NOTICE TO CONTRACTORS

(Los Olivos School District)

Plans and specifications necessary for the supplying of labor and materials necessary for the construction of the Los Olivos School, Los Olivos, California, may be obtained on and after November 15th, 1926, by application to Louis N. Crawford, Architect, 8 Jones Building, Santa Maria, Calif.

Plans and specifications provided must be returned at the time of submitting proposal in order for proposal to be considered.

Separate proposals numbered 1 to 4, inclusive, are required as follows; (1) General Construction, (2) Plumbing and Sheet Metal, (3) Electrical Work, (4) Roofing.

Each proposal must be accompanied by a certified check in the amount of ten per cent (10%) of the proposal price.

Surety bond to the total amount of the proposal price will be required of the successful bidders.

Sealed proposals will be received by the Board of School Trustees, F. C. Lang, Clerk, Los Olivos School District, Los Olivos, California, **on or before 8:00 P. M., Thursday, December 2nd, 1926,** at a meeting to be held in the Los Olivos School, Los Olivos, California, at which time and place bids for the erection of the Los Olivos School will be considered.

The Board of School Trustees above mentioned, reserves the right to reject any proposal not in compliance with the conditions above stated, or to reject all proposals, or to accept any proposal which it considers to be in the best interests of the Los Olivos School District.

By order of the Board of School Trustees, Los Olivos School District, Los Olivos, California.

F.C. LANG,
Clerk.

Cement Plant Fails To Earn Its Bond Interest

(Reprint from Aberdeen, S. D., News)

Among the state owned business enterprises, the one showing the most favorable report is that of the cement plant at Rapid City. The state report for the first half of 1926 shows an undivided profit of $118,200.25, according to official figures recently made public.

An independent study of these figures made by an accountant for the American-News, however, brings the undivided profits down to $90,996.94. According to accounting methods, the items of Shut Down expense, and the anticipated recovery from cash in closed banks, which in all amounts to a sum of $27,203.31, should be deducted from the undivided profits.

This $90,996.94 would be clear velvet to the taxpayers of the state if we had no interest on bonds to pay, but this interest amounts to a sum of $154,050, making the total operating loss to the state for the half year $63,053.06 as shown below.

STATE CEMENT PLANT

Results of Operation From January 1, 1925, to June 30, 1926

Undivided profits as shown by report of State Accountant as at June 30, 1926		$118,200.25
Less—Shut down expense capitalized	$20,537.95	
Cash in closed banks	$11,108.93	
Less amount of anticipated recovery, 40 per cent	4,443.57	6,665.36
Total		$ 27,203.31
Adjusted undivided profits for period of operation		$ 90,996.94
Interest:		
$270,000 bond issue at 6 per cent, January 1, 1925, to June 30, 1926		$ 24,300.00
$1,730,000 bond issue at 5 per cent, January. 1,. 1925, to .June 30, 1926		129,750.00
Total interest carrying charge on bonds		$154,050.00
Less adjusted undivided profits as above		90,996.94
Loss to state through payment of bond interest		$ 63,053.06

While general books of the state institutions appear to have been conscientiously and accurately kept, we believe that they should be transferred to Pierre and kept there the same as those of the educational institutions of the state. This would enable anyone wishing to check up on the operations an opportunity to do so without making trips to every plant in the state in order to get authentic figures. Furthermore, it would only be following the same plan that is adopted by all business institutions having subsidiary branches. They all recognize the necessity of keeping the records of operations under one central head.

TO SELL SECURITIES

One of the largest public utility financing programs ever brought before the California State Railroad Commission was submitted when the San Joaquin Ligh & Power Corporation and the Great Western Power Company requested permission to sell $35,000,000 worth of securities. The new financing will be used for new construction and for the refund of outstanding bonds.

TIMPIE
HYDRATED LIME

(a true dolomite lime)

for Brick Mortar, White Coat and Sand Float Finish, and for inducing plasticity in and water proofing Portland Cement Concrete.

Used in approximately $70,000,000 High Class Pacific Coast construction in last 3 years.

EXAMPLES:—

New Standard Oil Building, San Francisco
Federal Reserve Bank
Pacific Telephone and Telegraph Building
Central Bank, Oakland
Oakland Savings Bank
New Subway Terminal Building, Los Angeles

Sold by most progressive dealers throughout Pacific Coast.

Type MM shown; type A trusses also available

Industrial Buildings of Permanent Construction

COASTEEL Standard Buildings, manufactured on the Pacific Coast, are in every sense permanent buildings. They are constructed of completely standardized units, of a specially manufactured steel. **Every member is hot dip galvanized after fabrication.**

In such places as window sash, where complete protection from weathering is essential, copper bearing steel is used and all of it is galvanized.

COASTEEL Buildings are made in various types—in all sizes—and are entirely suitable wherever a one-story industrial building is desired.

JOHN GALEN HOWARD RESIGNS AS UNIVERSITY ARCHITECT

John Galen Howard, director of the school of architecture at the University of California, has submitted his resignation to the Board of Regents of the university. It was accepted with many expressions of regret and with encomiums for his services to the institution and the State. Professor Howard has been connected with the university for twenty-five years, and in that time designed most of the new buildings erected under the Phoebe Apperson Hearst plan.

Mr. Howard's fame has not been confined to California. His work has attracted attention throughout the world, and his reputation has been international. He was on the preliminary advisory board of architects that drew up the plans for the Panama-Pacific International Exposition held in San Francisco in 1915, and was on the consulting board that designed the Civic Center of San Francisco.

Among the buildings Howard designed at the University are the Sather tower or Campanile, the memorial mining building, Greek Theatre, Boalt hall of law, California hall and Wheeler hall.

In his letter of resignation Professor Howard said that he was leaving because of a need for rest and a desire to spend the next few years in travel in Europe. The resignation is effective on June 30, 1927.

Joseph Dunn, general contractor of Berkeley, died in that city Nov. 19, following a brief illness. He was 61 years old and had been a resident of California for the past 20 years.

State School Planning Body Urged To Eliminate Poorly Planned Schools

That a division of school planning be organized in the state department of education for the purpose of advising school boards in their planning of capital outlays and in preparing for the issue of bonds, is urged in a statement by Will C. Wood, state superintendent of public instruction. Greater economy in the construction of school buildings throughout the state would result, he states.

Superintendent Wood's statement follows:

"In my last biennial report, I pointed out the tendency to waste public money in poorly planned school houses, and in over elaboration and over adornment of school houses. While there has been a wholesome reaction to the criticism made in 1924, there is need for continued emphasis on the economical planning of school structures. The waste I have pointed out is due in no small part to the employment in many school districts of architects who know little about school house planning. It is not true, as many trustees assume, that any architect can plan a school building economically. The planning of school buildings is a highly specialized and technical business, involving not only a knowledge of architectural design, building stresses and strains, and the preparation of specifications, but also a good knowledge of school administration, school hygiene, and the sciences underlying the heating and ventilating of large buildings.

"The inexperienced school architect sometimes wastes as much as a quarter of the cubic contents of a building in such extravagances as hallways and stairways of unnecessary dimensions, and in unnecessarily large rooms. One must understand how a school is organized and conducted to plan a school building successfully. We have reached a point in California where we should no longer let architects learn at public expense how to plan school houses by experimenting and making costly errors. We should insist that such buildings shall be planned only by competent men who have made a special study of the problem.

Bond Issues

"Another great saving can be made by making accessible to school boards information about estimating the amount of money that should be put in a school building construction program, and about the issuance of bonds. Too frequently a school board facing the need of new buildings has no advice on their building program before bonds are voted. The board members guess at the amount of money required, and because of inexperience in school house planning and construction, they usually make very poor guesses. If they guess too large an amount, and the bonds are voted, the extra amount is usually wasted in unnecessary adornment, or in building experiments of questionable value. If they guess too small an amount, the people are called upon to vote additional indebtedness, which brings criticism not only on the board, but also on the school.

"I wish also to point out that the average school board is not in a position to know what is the prevailing rate of interest at which bonds may be floated, consequently the interest rates paid on no small number of bond issues is too large. In fact, some school boards deliberately fix a high rate of interest in order to get a large premium on the bond issue, which is in the long run a very expensive way to get more money for building than the bond issue calls for.

"In view of the need for professional assistance to school boards in the planning of school buildings, I recommend that a division of school planning be organized in the state department of education whose function shall be to advise school boards in their planning of capital outlays and in preparing for the issue of bonds. Such division should be in charge of a competent expert in school planning and should be financed in part by the state and in part by the districts concerned. To this division, the plans for all school buildings should be submitted for approval, according to such regulations as the state department of education may prescribe. Such a division in the state office, properly managed, could effect a saving amounting to many times the cost of such a division."

J. W. PLACHEK APPOINTED TO STATE ARCHITECTURAL BOARD

James W. Plachek, Berkeley architect, has been appointed a member of the State Board of Architecture to succeed J. B. Miller. Mr. Miller's term has expired and the appointment of the Berkeley man was made to fill the vacancy.

Mr. Plachek, who has made his home in Berkeley for 16 years, came originally from Illinois. He is a graduate of the University of Illinois. Following the fire of 1906 he was sent to San Francisco by the city of Chicago to investigate building materials. He remained on the coast, coming to Berkeley to make his home in 1910.

Architect Plachek has taken a prominent part in the civic affairs of Berkeley, serving as president of the Chamber of Commerce and on the City Planning Commission. He is also prominent in fraternal circles and a member of the Rotary Club.

He designed the Federal Land Bank in Berkeley, Ennor's building, the Hotel Richmond, the Odd Fellows' Hall, now under construction, and the First National Bank building addition which is also being constructed.

Building Wage Scales Firm— Five-Day Week Will Be Issue

Rising Tendency in Labor Costs at Standstill—Bonus Payments and Buying of Skilled Mechanics Practically Disappear—Building Unions Report Increased Membership—Labor Officials Report Progress In Eliminating Jurisdictional Disputes

Wage scales of building craftsmen throughout the country are generally holding firm and there is no indication of any immediate widespread downward revision of rates, according to a national survey of labor conditions in the building industry just completed by the Building Economic Research Bureau of the American Bond & Mortgage Company.

Building labor conditions are summarized as follows:

(1) Rising tendency in labor costs seems to be stopped for the present at least.

2.) Building crafts plan to maintain wages and working conditions attained during building prosperity period.

(3) Common labor plentiful and supply of skilled craftsmen adequate to take care of present construction, except in a few localities.

(4) Bonus payments and practice of contractors bidding against each other for men have practically disappeared.

(5) Labor fairly tranquil and little interference to building operations from strikes expected this winter.

(6) Building unions with largest membership in history plan renewal of campaign for five-day week.

(7) Definite progress being made by labor officials in eliminating jurisdictional strikes.

"The building industry is now being favored by a more pronounced tendency toward stabilized labor costs," said the survey. "Conditions of employment and labor rates generally during the last sixty days have shown but little change.

"Wage readjustments reported have been very small and in a majority of cases affected only a few of the so-called 'key trades', such as, plasterers, bricklayers and carpenters. In a few cities where building operations are large they have asked and received small wage advances. The majority of crafts, however, show a willingness to go along under present schedules. Few wage reductions have been reported, but there is nowhere any indication of any radical downward revision.

"While contractors in practically all the larger cities have decided against higher wage rates, they are showing a disposition to co-operate with the building trade unions and peacefully adjust wage disputes. As a result, labor conditions generally are quiet and no serious troubles have hindered construction, except in a few localities, where an effort has been made to establish the 'open shop,' or the unions are engaged in inter-union strife.

"Determination of labor to maintain indefinitely the high wage rates they have obtained during the last two years was expressed at the convention of the Building Trades Department of the American Federation of Labor at Detroit, Mich., last month. The building unions unanimously decided 'to hold their ground, and maintain to the utmost of their ability, the wage scales and conditions which have required so many years of effort to obtain.' They also declared that wage reductions were out of the question at this time.

"The largest membership in history was reported by the sixteen national and international unions represented at the convention. These unions, which have a paid up membership of 574,497, gained 30,592 new members during the last year. This was the largest gain reported in any one year since the Building Trades Department was organized in 1908.

"The United Brotherhood of Carpenters and Joiners, the largest building trades union, which is not affiliated with the Building Trades Department, has a membership of 404,917, having gained 39,924 members in the last twelve months. The combined membership of the seventeen building unions affiliated with the American Federation of Labor now totals 979,407

"Union officials pointed out that jurisdictional troubles are being satisfactorily adjusted and greater solidarity than ever before prevailed within the building trades organizations.

"Notice was also served on the construction industry that labor would strive for a shorter work-week. The forty-four- hour work-week now prevails generally throughout the country, and there are few cities with a forty-eight hour week. In a number of cities the efforts of the painters and plasterers to shorten the working week to forty hours has already been successful.

"Building trades employers are now generally taking cognizance of the shorter work-week movement and are planning organized opposition. They contend that the shorter work-week would add to building costs and would tend 'to further create an artificial shortage of labor.'

"All building labor seems well employed, and there is an ample supply of skilled and unskilled mechanics to meet present construction needs. Bonus payments have entirely disappeared, except in a few isolated localities The demand for apprentices is also reported to have subsided, although high schools, universities and trade schools throughout the country continue to turn out considerable numbers of new building craftsmen.

"Indications are that the seasonal decline in building employment this winter will be less than in past years unless unusually severe weather is encountered. This is due to the fact that builders are becoming better educated and equipped to cope with adverse weather conditions and are arranging their work in such a way as to provide winter employment.

"Leading labor officials have joined in an effort to eliminate jurisdictional disputes which have been a continual source of annoyance to the building industry for many years. The United Brotherhood of Carpenters and the Sheet Metal Workers Union, which have been quarrelling for the last five or six years over the installation of metal-trim are reported to have practically adjusted their grievances. The controversy between the bricklayers and the plasterers unions is also being settled by arbitration. Disposal of these two inter-union disputes would go far toward the re-establishment of united action and harmony in building trade circles throughout the country.

"Reports on wage changes from cities and towns throughout the country show that small increases, ranging from 1½ to 12½ cents an hour have been granted in about forty trades in fourteen cities. These increases were reported from Atlanta, Ga., Buffalo, Chicago, Cincinnati, Detroit, Duluth, Kansas City, St. Louis, Dayton, Nashville, Tenn., Norfolk, Va., Pittsburgh, Philadelphia and Reading, Pa.

"Reductions were reported from Philadelphia, Salt Lake City and Atlanta. These were very small and mainly due to a surplus of common labor and some skilled craftsmen.

"Few strikes were reported and labor conditions generally were reported quiet throughout the country, except in San Francisco where the carpenters strike against the 'open shop' continues to interfere with building activities. In Cleveland, there has been some jurisdictional trouble and the glaziers and painters strike has had its effect on building. In New York there is plenty of winter work in prospect and labor conditions are quiet.

"In Chicago there has been a shortage of labor and some trouble has developed on building projects due to the effort of the Building Trades Council to carry out its threat to enforce union conditions on projects that are now working under the Landis Award. Although the Landis Citizens Committee has up to date imported approximately 19,000 building craftsmen, a shortage of carpenters, bricklayers and others still remains.

"Wage scales in the building trades, as reported by the National Association of Builders' Exchanges show that labor is getting the highest wages in history. Bricklayers throughout the country are receiving from $1.00 to $1.75 per hour; carpenters $.60 to $1.50; plasterers $.90 to $1.87½; building laborers $.25 to $.87½; structural iron workers $.60 to $1.50; plumbers $.80 to $1.50; electricians $.65 to $1.50; stone masons $.85 to $1.75; lathers $.75 to $1.62½; sheet metal workers $.80 to $1.50; painters $.50 to $1.50 and hoisting $.50 to $1.75.

"Review of these wage scales shows that New York building mechanics are receiving the highest wages of any city in the country. Bricklayers, plasterers, hoisting engineers and stone masons are receiving $1.75 per hour, and the majority of other trades $1.50 per hour. St. Louis, Chicago, Pittsburgh and Philadelphia, where the prevailing rate is $1.50 per hour, are about tied for second place.

"Columbus, S. C., reported the lowest wage scale. Here laborers receive from $.15 to $.20 an hour; bricklayers $.90 to $1.00; carpenters $.40 to $.60; plast-

erers $.90 to $1.00 and painters $.50.

"Reports from Canada indicate that wages and conditions in the building industry are well stabilized. Both skilled and unskilled labor is well employed, and in the provinces of Quebec and Ontario there is a shortage of common labor. Only one or two labor disturbances have been reported during the last sixty days."

TACOMA GETS NEXT MEETING OF WESTERN PAINTERS

Horace H. Mann of Los Angeles was re-elected unanimously as president of the Northwest Painters and Decorators Association at the closing meeting of the annual convention of the association held in Portland, Ore.

A. F. Shepherd of Seattle was re-elected first vice-president, William J. Hansen of Tacoma second vice-president and J. W. Sorenson of Portland secretary and treasurer.

The Board of Directors for the ensuing year include Henry Hanneman for Oregon, William J. Hansen for Washington, William Woolley for California and A. C. Rudell for Montana.

The next annual convention of the association will be held at Tacoma in November.

Following the concluding business session and inspection of practical work the conventioners enjoyed a buffet luncheon, and at 1:30 P. M. left for an automobile trip on the Columbia River highway which extended until late afternoon.

The convention was declared successful from every standpoint, and much credit was given to the following committeemen, headed by the general chairman, E. T. Crane:

Arrangements, Henry Henneman; publicity, J. W. Sorenson; finance, John Blied; practical exhibits, Bert Groocock Sr.; program, C. N. Anderson; entertainment, Will Demme; registration, F. Ritzinger; housing, J. H. Clifton; auto, A. Garrow; Portland Paint & Varnish Club, Chester Peterson; Ladies' Auxiliary, Mrs. Henry Henneman.

CHANGE ANNOUNCED IN S. F. ELECTRICAL CODE

On and after January 1, 1927, the San Francisco Department of Electricity will permit the use of so-called single-pole fusing and switching in the City and County of San Francisco, provided all the rules of the 1925 National Electrical Code and the Electrical Safety Orders of the Industrial Accident Commission are complied with. The installation of the so-called single-pole fusing and switching will be optional and not compulsory.

The aanouncement is made by Ralph W. Wiley, chief of the Department of Electricity.

MORTAR BULLETIN ISSUED BY LIME ASSOCIATION

"The Fallacy of Unnecessary Strength," is the title of a 16-page, 6 by 9-inch bulletin on mortar, just issued by the National Lime Association. The bulletin is attractively printed in two colors. The bulletin shows, by illustration, statistics and text, the wasteful extravagance of using good materials in the wrong places, using mortars as the basis of the discussion. Copies will be mailed free upon request to the National Lime Association, 927 15th St., Northwest, Washington, D. C.

MORE SPEED IN BUILDING SOUGHT BY MATERIAL MAKERS

"One of the questions that will come before the research department of the proposed national lumber use extension undertaking," says Wilson Compton, secretary and manager of the National Lumber Manufacturers Association, "is that of lumber's contribution to the problem of providing good housing at much lower costs than at present. In view of the bedrock prices of material, a searching examination of building costs and methods is indicated.

"Other building material interests are making studies of reducing construction costs by enlarging the material units. Sample concrete-block houses actually have been reduced to about 100 units.

"Grosvenor Atterbury of the New York Tenement House Committee, points out that 63 per cent of the cost of a house goes to putting the units together. It is possible to build concrete large-unit houses of five or six rooms and 100 different pieces in about three days.

"Considering the nature of lumber, it ought to be possible to plan frame houses with even less than 100 piecee. If concrete and other materials, including steel, realize the success along this line that they now predict, lumber may have to get into the competition, no matter how distasteful it may be to lumber manufacturers to become fabricators. The knock-down houses and ready-sawed lumber already offered by mail-order houses and a few special fabricators may point the way to what is coming. These innovations have been outside the regular lumber trade, and have been rather emphatically opposed by it as destructive of trade customs and affiliations. However, if the parent industry, the making of lumber, should find it competitively necessary to unite its present units into larger ones for merchandising I see no reason why the present trade organization could not be maintained. A retail lumberman ought to be able to sell the parts of a frame house in terms of tens as well as in hundreds.

"Lumber in the form of the board unit is probably much cheaper than any other building material in its present units or methods of application, but if the competing materials compensate for this difference by enlargng and changing the form of their standardized units, lumber may have to do likewise in order to maintain its basic advantage."

CELOTEX PRODUCTION SHOWS HEALTHY INCREASE

Speaking at a meeting in Chicago, of retail lumber dealers from all sections of the country with officials of Celotex Co., B. G. Dahlberg, president, said the company had been producing 750,000 feet of Celotex a day and in December production will be increased by 500,000 feet. A new plant to be erected in Porto Rico will bring more of this product into the market a year hence. He said the company will spend $1,000,000 for advertising in 1927.

C. E. Stedman, vice-president, said the company is doing business with about 6000 retail dealers and has an organization of 200 of its own men in the field. It operates 14 branch offces, each with a divisional manager. He said: 'We intend to market Celotex through the retail lumbermen of the United States and we intend that every dealer shall make a profit."

After consultation with National Retail Lumber Dealers' Association, a National Celotex Dealer Council was appointed, to push a program for home ownership and the building of "better homes."

PIPE WANTED

Pacific Water Works Supply Co., Inc 3136 Arcade Square, Seattle, is in the market for used standard black steel pipe, to be re-conditioned and to be dipped in asphalt and wrapped with burlap. Pipe must be of the followiog sizes: 1370 ft. 3½-in., weight 9.202; 3290 ft. 3-inch, weight 7.616; 4144 ft. 2½-inch, weight 5.819. Pipe must weigh as specified and have couplings on each length.

ISSUES NEW CATALOGUE

Architects and contractors will be interested in the contents of a new catalogue issued by the Truscon Steel Company presenting details, specifications, drafting room standards and illustrations of Truscon Solid Steel double-hung windows. Copies of the catalogue (No. 680), which conforms to the A. I. A. requirements, may be secured by addressing the Truscon Company at Youngstown, Ohio.

U. S. ENGINEER EXAMINATION

U. S. Civil Service Commission anaounces receipt of applfcations for the position of Associate Construction Engineer will close December 30th. The examination is to fill vacancies in the Supervising Architect's Office, Treasury Department, for duty in the field, and vacancies in positions requiring similar qualifications.

The entrance salary is $3000 a year. After the probational period required by the civil service act and rules, advancement in pay without material change in duties may be made to higher rates within the pay range for the grade, up to a maximum of $3600 a year. Promotion to higher grades may be made in accordance with the civil service rules as vacancies occur.

Information and application blanks may be obtained from the United States Civil Service Commission, Washington, D. C., or the secretary of the board of U. S. civil-service examiners at the post office or customhouse in any city.

S. L. HARDMAN NAMED MANAGER OF FRESNO EXCHANGE

S. L. Hardman has been named secretary-manager of the Fresno Builders' Exchange, the reorganization of which is now being advanced by the new Board of Directors. Hardman has been connected with the Sun-Maid Raisin Growers and has both executive and engineering experience. He is conversant with local conditions.

An intensive membership campaign will be launched immediately by the exchange, with Hardman in direct charge of the drive. According to officials of the exchange, the organization has been strengthened materially both financially and from a member ship standpoint.

San Jose Brick & Tile Company has filed articles of incorporation in Oakland. The company is capitalized at $250,000 and has the following directors: Leon A. Clark, Edwin A. Heafey, E. D. Hay, E. W. Staager and H. A. Scott.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

Plans for a $250,000 development program which will open up more than 50 square miles of isolated mountain timber have been placed under way by the Diamond Match Company. More than half a billion feet of timber will be made available by the work, and employment for logging crews will be furnished for more than 18 years. Most of the area is in Butte county.

Development of asbestos deposits on Mears creek, five miles from Hazel creek in Shasta County, has reached a point where production has begun. Shipments are being made to Redwood City, and the outlook is pronounced favorable for eventual development of a large tonnage of valuable material The long-fibred product being mined is drawn largely from surface workings. The work is directed by R. M. McDonald, graduate geologist of California University.

The 1927 convention of the Pacific Coast Electrical Association will be held at the Casa Del Rey in Santa Cruz, June 14 to 18, it was decided by the executive committee of the association at a recent meeting in San Francisco. S. Waldo Coleman is president of the organization, which has 3000 members.

A process for coloring stainless steel, making it useable for decorative purposes, has been discovered by Miss C. Griff, a woman engineer of Birmingham, England, who has worked for six months in research on the subject.

How to build roads in California deserts by melting the sands into lava by means of a patented 72-inch lens, Will W. Beach of "Beach & Sun," Los Angeles, has written to Governor Richardson offering the patent to the state of California. "This lens will reduce the cost of the Colorado dam and aqueduct one million dollars," Beach explained, and will build them without masonry. It will grid iron the desert with paved roads, and save 100 per cent in cement, 85 per cent in fuel and 60 per cent in labor." The Governor has referred Beach's letter to the Department of Public Works.

Southern capital has bought the mills and timber holdings of the F. S. Lumber Company, which operates a mill at Quincy and another at Sloat. The deal is understood to have involved about $300,000. The new company will operate under the name of the Quincy Lumber Company.

Smith Co-operative Builders', Inc., capitalized at $100,000, has been incorporated in San Francisco. Directors are: J. J. Smith, G. J. Regan and Mike Smith.

Plans for the annual meeting of the Sacramento Valley Lumbermen's Association to be held in Sacramento, December 18, are being completed by Curtis Cutter who has been chosen chairman of the Entertainment Committee.

H. H. Barg and John G. Ziel will operate from 16 California St., San Francisco, under the firm name of Barg Lumber & Shipping Company.

Harry J. Scott and Gerald M. Grimes will operate in San Francisco under the firm name of Better Homes Plan Service.

Samuel Levy and Theo. Ramsing will operate in San Francisco under the trade name of Fillmore Hardware Company.

Peerless Oil Burner Company will shortly open new shop and general office quarters at San Carlos, San Mateo County.

In a creditors' petition filed in Federal Court, R. A. Hiscox, head of the Golden West Lumber Company of San Francissco, was asserted to be an involuntary bankrupt. The petition avers that Hiscox committed an act of bankruptcy July 29, last, when, while insolvent, he gave five promissory notes, totaling $25,000, to the Western States Lumber Company in preference to other creditors and with the intention to "hinder, delay and defraud other creditors." The petitioning creditors and the amounts said to be owing them by Hiscox are: MacDonald & Harrington, $18,808.36; W. P. Fuller & Co., $3315.79; California Cedar Products Co., $778.29, and the Fischer Brothers Lumber Co., $171.47, all of San Francisco.

Stanley Construction Company of Fresno has started operating its concrete pipe plant at Madera. The plant has a capacity of 2500 feet a day and is at present turning out from 8-inch to 18-inch pipe. Twelve men are employed.

With the adoption of a new charter the city of Santa Barbara voted to abolish the city manager form of government, effective June 1, 1927.

Roy W. Pilling, assistant to John N. Edy, city manager of Berkeley, has tended his resignation to the city council effective Dec. 1. Pilling was the first appointee of the city manager when Berkeley adopted the city manager form of government in 1923.

Elmer Rahm, general contractor of Sacramento, committed suicide in that city, Nov. 19. He was believed to be despondent over a slight attack of paralysis six months ago. A shotgun charge through the body was the death cause.

Western Pacific Railroad, at a recent reorganization meeting, voted to expend $2,000,000 in the construction of warehouse and terminal facilities on the north side of Islais Creek, San Francisco. A 200-acre site, already owned by the railroad, is available.

Announcement has been made that W. D. M. Allan has been appointed manager of the Cement Products Bureau of the Portland Cement Association, effective November 1. He succeeds A. J. R. Curtis who becomes Assistant to the General Manager of the Association on the same date. Mr. Allan who is widely known in the building and cement products field has been engaged in the promotion of concrete products for the past seven years. Formerly he was a member of the Cement Products Bureau Staff, but more recently he served as Office Manager of the Illinois District Office of the Association. The Cement Products Bureau handles one of the most important divisions of Association activities, which include concrete masonry houses and structures of all kinds, stucco, lighting standards, cast stone, roofing tile, as well as concrete around the home and farm uses.

Increased business has prompted F. P. Schultz, operating the Schultz Paint & Wall Paper Company, Fresno and Broadway Sts., Fresno, to lease additional floor space adjoining the present quarters. The expansion program will affect all departments of the business, particularly the wall paper and art supply branches.

During the ten years, 1915 to 1925 inclusive, the cost of industrial disputes to this country was $12,983,048,000. To employers it was $496,187,000; to workers it was $1,804,316,000 and to the public it was $10,681,545,000. These facts were reported to the National Association of Manufacturers by O. D. Frost, chairman of the employment relations committee. He urged his hearers to continue their efforts to bring about a further co-operation of employers and workers, that all may benefit.

Carrying out its program mapped recently for the employment of an exper city planner to aid in its work, the Sacramento city planning board has approved a contract retaining Harland Bartholomew and associates, city planners of St. Louis, Mo., for a three-year period at a cost of approximately $20,000. Chas. H. Diggs, representing the St. Louis firm completed the negotiations. The Bartholomew concern has been retained by many of the larger cities of the country, including Washington, D. C.; New Orleans, Duluth, Toledo, Pittsburgh and Los Angeles. Smaller California cities which have employed the firm are San Jose, Riverside and Glendale

ARCHITECTURAL CLUB TO HOLD ANNIVERSARY JINKS NEXT MONTH

Arrangements are being completed by the San Francisco Architectural Club for the twenty-fifth anniversary jinks to be held Saturday evening, December 11th at Eagles' Hall, 273 Golden Gate Avenue.

Members of the Entertainment Committee report a lengthy and varied program of entertainment will be offered which promises to surpass all previous performances of the club socials.

A feature of the anniversary celebration will be the issuance of a beautiful forty-page illustrated souvenir program which will be distributed at the show.

Tickets for the event may be purchased at the office of the San Francisco Builders' Exchange or at the club headquarters at 523 Pine street.

The San Francisco Architectural Club is an organization of architectural draftsmen and younger members of the architectural profession and was organized September 28, 1901, to further the study of architecture and the allied arts. It is at present located in a three-story structure at 523 Pine St. which is devoted to both educational and recreational purposes.

Luncheon meetings of the organization are held every Thursday in the club quarters. These luncheons are opened to all members of the construction industry.

Economics Applied To The Construction Industry

By G. Szmak, Treasurer, American Institute of Quantity Surveyors

While it is true that there is nothing new under the sun, yet during the march of human generations everything is learned, forgotten and re-learned. It is the duty of everyone to investigate, teach and learn the things effecting human wellfare in order that the man of today can live as complete a life as the man of yesterday or that of tomorrow, even though the ways and means may be different. All matter and principles forever remain the same. One of the most important conditions having effect upon human wellfare is shelter against the elements. The work to provide this shelter is invested in what is probably the greatest single industry of men and women, known as the Construction Industry. This industry is composed of the Construction Designer, Surveyor and the Constructor and only when all three branches are intelligently utilized can the greatest efficiency, economy and durability result. The services and scope of these three absolutely essential branches of the Construction Industry are the subject in the continuation of this article, for the enlightenment and guidance of the prospective investor, purchaser or owner of Construction Work.

Whenever we contemplate to erect a structure of any sort whether it is a large commercial building, a factory or a residence if we act along the lines of proven efficiency the first thing we do is to secure the services of a competent Construction Designer, more generally known as the Architect. We have learned by example manifested through our own occupations that the man engaged in any particular calling is more fitted to be entrusted to do special work than if we were to do the work ourselves unaware of the principles of the work involved. The work of the Architect is to design artistically economically and substantially through a wise selection of materials and labor to be incorporated in his design, in such ratio as each characteristic may be required by the particular problem in hand. An Architect having fulfilled these requirements has done well his work. To expect him to do more would be to ask things beyond the scope of his profession; for instance, his work does not include the science of measuring and tabulating the quality and quantity of materials and labor required nor the efficient practical erection of a structure which are within the province of the Construction Surveyor and Builder

As we study the causes of high cost in materials and production we realize more and more that to erect the designed structure economically it is necessary to enlist the aid of and to know something of the science of Economics. "ECONOMICS IS THE SCIENCE OF CONSERVING ENERGY APPLIED TO TRANSFUSION, TRANSMUTATION AND TRANSPORTATION OF PHYSICAL AND SPIRITUAL MATTER"

The first essential principle of engineering is knowledge in the science of measuring and tabulating the intensity and resistance of energy included and the space occupied by physical and spiritual matter; in order to determine the exact extent it shall be necessary to apply or conserve energy in the process of transfusion, transmutation and transportation of the matter involved. The branch of engineering which deals with the intensity of energy—quality and space occupied—quantity of matter used in the erection of architectural and engineering structures is known as Construction Surveying—sometimes called Quantity Surveying among the profession and in some countries where it is practiced under such title. This branch of engineering is fast gaining in importance due to its high economic value in conserving energy—eliminating waste matter. "Construction Surveying is the science of measurement and tabulation applied to the physical members of a structure expressed in uniform units of measurement with an analysis and detailed accounting of its requisite **Quality** and **Quantity** of material and labor applications;" thereby eliminating waste matter in order to obtain the greatest economic result or value compatible with the desired Quality, Quantity and Price to be exchanged under the laws of Fair Competition. Persons engaged in the Construction Surveying profession are known as Construction and Building Surveyors and oftentimes as Quantity Surveyors, however, the former titles are more specific than the latter one and are therefore more generally recognized. The duties of the Construction Surveyor are well indicated by his title and the purpose of his profession is purely one of economics, ie., the elimination of waste matter in the process of constructing architectural and engineering structures. It is not within the scope of his profession to design or erect a structure, this work is handled more efficiently by the Architect and Constructor respectively. An experienced Surveyor can furnish information of great economic value to the Architect or his client in the efficient selection of materials and labor because he not only keeps posted on the relative cost of materials and labor but also has exact knowledge of what method in design of any given material will prove to be the most economical to construct deducted from his past experience and analysis of the amount of material and labor required for any particular of various designs. Such information can be had before the design or plans and specifications are even started, although, it is most often through neglect determined after even the construction work has been completed and it is already too late for changes. Construction Surveys can be used on Lump Sum, Cost Plus Percentage, Unit price or any other form of contract. The survey will in any case perform its economic function. The cost of designing structures is usually from 3 to 10% of its physical value and the fee for the Construction Survey is about 25% of the cost of designing. The amount paid to the Surveyor is saved several times over by the survey through the elimination of waste.

The Surveyor's fee may be paid direct by the Owner, incorporated within the fees of the Architect or may be specified to be included within the contract of the successful Constructor. The Surveyor may be employed direct. The the owner or his representative, the Architect or the Designer. The process of having a Construction or Quantity Survey prepared is simply to secure the services of a Surveyor upon the completion of the plans and specification prior to securing bids from the Constructors or Builders and when ready it is furnished to the bidders along with the plans and specification giving them an absolutely definite instrument of purchase; a complete plan with specific instructions and a survey expressing full intentions of purchase in structural dimensions, physical members in detail showing sizes, types, quality and quantity of materials and workmanship required to produce the desired structure. Construction, Building or Quantity Surveys are now available throughout the United States and also in a number of foreign countries.

The third essential service in the process of erecting a structure is pretty generally known, that of employing a Constructor or Builder; the right selection of which is not so easy as it might seem at first. The work of the Constructor is not to design or to survey a structure but to construct accurately and substantially. Some of the qualifications that are helpful in making an efficient selection of a Constructor or Builder are as follows:

1. Agreeability to conduct his business under sound and open methods in dealing with his clientele.

2. Knowledge of his personal integrity or that of the organization with which he is associated.

3. Reputation of competency to correctly executed physically the design of the Architect, ie., his ability judged by past performance. These same recommendations are applicable also in the proper selection of the Construction Designer and the Construction Surveyor.

LOS ANGELES BUILDING

Los Angeles' building is moving along at a steady pace with all indications pointing to a total for November, 1926, in excess of that for the same month last year and close to that for the preceding month. Up to and including the 16th, the city building department issued 1743 permits with an estimated valuation of $5,376,869. For the corresponding period in October, 1926, the number of permits was 1898 with an estimated valuation of $4,132,066, and for 16 days of November, 1925, the number of permits was 1997 with an estimated valuation of $4,728,495. For the current year up to and including Nov. 16 Los Angeles' building total was $109,601,958 as compared with $132,151,814 for the corresponding period in 1925.

DELIVERING CONCRETE AT 20 MILES PER HOUR

To expedite the work and cheapen the cost, Gutleben Brothers, contractors for the State on the Rio Hondo Bridge on Whittier Boulevard, Los Angeles County, have constructed a novel motorized outfit for delivering concrete mix. The arrangement is described in California Highways as follows:

A second-hand Ford automobile with the wheels and body removed was fitted with flanged wheels for operation on an industrial railroad. A riveted sheet steel hopper takes the place of the body for carrying the concrete. The mixer dumps directly into the hopper and the driver steps on the throttle and the load is quickly delivered to its destination on the bridge.

A lever near the driver's seat makes it possible to release the mix on either side of the hopper as desired. The speed at which a load of fresh concrete may be delivered makes the apparatus very effective, in the opinion of the contractors.

APARTMENTS

Plans Being Prepared.
APARTMENTS Cost, $1,000,000
SAN FRANCISCO, Calif., Pacific Ave near Laguna.
Fifteen-story and basement class A apartments.
Owner—E. A. Tropp, et al.
Architect—Hyman & Appleton, Foxcroft Bldg.
Construction will not be started until April or May of 1927.

Plans Being Prepared
STORE Cost, $25,000
SAN JOSE, Santa Clara Co., Cal. East Santa Clara St., San Jose, Calif.
Two-story reinforced concrete store and apt.
Owner—Dr. A. M. Barker and Associates.
Architect—William H. Weeks, 369 Pine St., S. F.; Ray Bldg., Oakland; and 246 So 1st St., San Jose.
Ready for bids in 30 days.

Permit Applied For
APARTMENTS. Cost, $50,000
BERKELEY. 2200 Chapel.
Three-story 84-room 24 apartments.
Owner — Martin E. Marks, Hotel St. Marks, Oakland.
Architect—Slocombe & Tuttle, 337 17th St., Oakland.

To Be Done By Day's Work And Segregated Contracts.
APARTMENTS. Cost, $28,500
SAN FRANCISCO. E Funston Ave. 50 N Anza.
Three-story and basement frame (12) apartments.
Owner—Lager and Val Franz, 180 Jessie St.
Architect — J. C. Hladik, Monadnock Bldg.

To Be Done By Day's Work
APARTMENTS. Cost, $30,000
SAN FRANCISCO. S W Castro and 20th Sts.
Three-story and basement frame (12) apartments.
Owner—E. C. Ellingson, 85 Liberty St.
Architect—None.

Contracts Let
APARTMENTS Cost, $120,000
STOCKTON, San Joaquin Co., Calif. N. E. Hunter and Lindsay Sts.
Five-story and basement, 54x96 ft. class C brick apartments, terra cotta trimmings.
Owner—A. B. Hanson, Lake View Tract Stockton, Calif.
Architect—Glenn Allen and Chas. Young, Stockton, Calif.
Basement will house social hall, ladies' parlor, smoking rooms, boiler room and 40 trunk storage rooms, freight and passenger elevators are provided for in plans together with inter-communicating phone system. Hardwood floors throughout, with tile baths; electric refrigerating system. Murphy wall beds.
Following contracts have been let:
Excavating—Gannon . and . McCarty Stockton.
Concrete Work — D. A. Brady, 632 E Jackson St., Stockton.
Brick Work — E. L. Morrison, 1605 Argonne St., Stockton.
Metal Window Frames, Lath and Other Fire Proof Material—General Fireproofing and Building Products Co., 461 Market St., S. F.
Sand, Lime and Cement—Yolland Ice and Fuel Co., 245 N Eldorado St., Stockton.
Lumber—Pioneer Lumber Co., 448 W Main St., Stockton.

Owner To Take Segregated Bids.
APARTMENTS Cost, $200,000
SAN FRANCISCO. N Jackson St. 34 W Buchanan St.
Seven-story Class B reinforced concrete apartment building (28 three to five-room apts. Brick or cement exterior).
Owner — Wm. L. Penziner, 747 Geary St., San Francisco.
Architect—W. L. Schmolle, 519 California St., San Francisco.
Owner will be ready to take segregated bids about Nov. 26th.

Completing Plans.
APARTMENTS Cost, $——
SAN FRANCISCO. N Grove St. — W Franklin St.
Four-story and basement Class C apartment building (24 apts.)
Owner—E. V. Lacey and Wm. Van Herick, 708 Hearst Bldg., S. F.
Architect—Owner.
Work will be done by segregated contracts and day's labor.

LOS ANGELES, Los Angeles Co., Cal. —Ridgley Wilson and W. H. Diaber, own. and bldr., 666 N. Kenmore Ave., applied for bldg. permit to erect 4-sto. 88-rm., 40-fam., brick apt. bldg. at 133 S. La Fayette Park Pl.; 55x131 ft., comp. rf., staff, art stone, fire escapes, orn. iron, pine flrs. and trim, tile baths and drainbd., steam htg., Hoffman water htr., refrigerators, passenger elevator, garage; $107,500.

Contracts Awarded.
APARTMENTS Cost, $75,000
SAN FRANCISCO. N Haight St. 173 E Laguna St.
Six-story and basement Class C concrete (42) apartments.
Owner—E. V. Lacey, 708 Hearst Bldg., San Francisco.
Architect—C. O. Clausen, Hearst Bldg, San Francisco.
Concrete Work—Wm. Van Herick, 2508 Lake St., San Francisco.
Reinforcing Steel—Frederick Steel Co. Webster and Standard Sts., Alameda.
Electrical Work—Fred Wilson, 144 8th St., San Francisco.
Plumbing—Owner.
Ornamental Iron—Michel-Pfeffer Iron Works, 10th and Harrison Sts., San Francisco.
Heating—Andy Harper, 140 8th St., San Francisco.

LOS ANGELES, Calif.—W. E. Chadwick, 424 Union League Bldg., is preparing plans for 4-sto. and part basement, class C apt bldg., 50x136 ft., in Wilshire dist. for client. It will contain 32 single and 8 doublt apts.; face brick and art stone exter., comp. rf., fire escapes, marble entrance, plate and leaded glass, wr. iron, oak and pine flrs., tiled baths and sinks, built-in beds, refrigeration sys., storage water htr., aut. elec. elevator, comp. tile lobby and hall flrs., gas htrs.

Completing Working Drawings.
APARTMENTS Cost, $55,000
BERKELEY, Alameda Co., Calif. 2200 Chapel Berkeley, Calif.
Three-story frame and stucco apartments (24 2- and 3-room apartments.
Owner—Martin E. Marks, Hotel St. Marks, Oakland.
Architect—Slocombe & Tuttle, 337 17th St, Oakland.
Plans will be completed in about two weeks.

Contracts Awarded.
APARTMENTS. Cost, $50,000
SAN FRANCISCO. S Page St. 82-6 E Octavia St.
Four-story and basement reinforced concrete (20) apartments.
Owner—E. V. Lacey, 708 Hearst Bldg., San Francisco.
Architect—C. O. Clausen, Hearst Bldg., San Francisco.
Concrete Work—Wm. Van Herick, 2508 Lake St., San Francisco.
Reinforcing Steel—Badt-Falk Co., 74 New Montgomery St., S. F.
Electrical Work—M. Schimetschek, 526 Hayes St., San Francisco.
Steel Sash and Fire Escapes—Michel-Pfeffer Iron Works, 10th and Harrison St., San Francisco.
Lumber—Reinhart Lumber & Planing Mill Co., Jerrold and Barnevelt Sts., San Francisco.
Heating—Andy Harper, 140 8th St., San Francisco.

LOS ANGELES, Cal.—Lentzner & Anderson, owner and builder, 4075 Beverly Blvd., applied for building permit to erect 4-story and part basement, 74-room, 37-family Class C apartment building, 47x110 feet, at 157 S. Catalina St. Plans by J. C. Berry, 1214 S. Bonnie Brae; face brick and art stone, composition roof, metal frame and sash, fire escapes, skylights, structural

BONDS

MARTINEZ, Contra Costa Co., Cal.—Steps are being taken to form a junior college district. After formation of district an election will be submitted to vote bonds to finance construction of a new school plant.

STOCKTON, San Joaquin Co., Calif.—Election will be held Dec. 11 in Calaveras School District to vote bonds of $62,000 to finance erection of new school. Trustees of district are: Emily M. Dodge, (clerk); M. E. Phillips, C. M. Chase, John N. Tone and Mrs. E. J. Lundigard. Davis-Pearce Co., Weber and Grant Sts., Stockton.

LYNWOOD, Los Angeles Co., Cal.—A special election will be held Dec. 4 in Lugo School District, near Lynwood, for the purpose of voting bonds in the sum of $140,000 for purchasing sites and erecting new school buildings. Kelso & Mackle, Washington Bldg., Los Angeles, are the architects.

SEATTLE, Wash.—City will call election in March to Vote bonds of $900,000 to finance construction of athletic stadium.

PALO ALTO, Santa Clara Co., Calif.—Palo Alto Union High School District votes bonds of $200,000 to finance additions to present high school. Plans will be prepared by Birge M. Clark, architect, 310 University Ave., Palo Alto.

CHURCHES

Plans Being Prepared.
CHURCH, ETC. Cost, $——
WATSONVILLE, Santa Cruz Co., Cal.
California and Sudden Sts.
Gothic-Mansion type church and parsonage (frame and stucco construction with tile roof).
Owner — First Methodist Episcopal Church, Wall St. & Van Ness Ave., Watsonville.
Architect—Rollin S. Tuttle, 337 17th Oakland.
Site has 96 ft. frontage in Sudden St.; 196 ft. in California St., and a depth of 137 ft. on a portion of the California St. frontage. Construction will not be started for sometime.

Contcart Awarded.
REMODEL Cost, $10,999.45
SAN FRANCISCO, Calif., N. W. Mission and 24th Sts.
Reconstruct roof; new plumbing; partitions, electric work; hardwood floors, etc., for dancing school and ball room.
Owner—C. & J. Borgfeldt, 519 California St.
Architect—W. I. Schmolle, 519 California St.
Contractor—Walter E Schuetz, 80 Duncan St.

SIERRA, Madre, Los Angeles Co., Cal.—Congregational church of Sierra Madre has started campaign to raise $75,000 for erecting and furnishing new edifice at Central and Hermosa Aves., Sierra Medre. Architect Mott M. Marston, 507 Douglas Bldg., Los Angeles, has prepared preliminary sketches for building. It will be masonry construction.

PASADENA, Los Angeles Co., Cal.—Architects Marston, Van Pelt & Maybury, 25 S. Euclid Ave., Pasadena, are completing working plans for a main auditorium building to be erected on Lake Ave. and Woodbury Rd., Pasadena, for the Westminister Presbyterian Church; reinforced concrete construction, seat 1600; 150x150 feet, stone exterior, tile roof, tile floors, tower 150 feet high, steel sash, wrought iron. Dr. Josiah Sibley, pastor; $300,000.

LOS ANGELES, Cal.—Wm. Simpson Constr. Co., Bank of Italy Bldg., was low bidder for erecting new Class A church and parish house at the southwest corner of Wilshire Blvd. and Berendo St. for Immanuel Presbyterian Church; C. F. Skilling and H. M. Patterson, Chamber of Commerce Bldg., architects. The building committee of the church, the architects and the Simpson Co. are working on revisions to reduce the cost of the structure slightly and a contract will probably be awarded in a few days. The buildings complete will cost approximately $1,000,000.

FACTORIES & WAREHOUSES

Contract Awarded
MACHINE SHOP Cost, $17,240
SAN FRANCISCO, Calif. S E 19th and Tennessee.
Two-story steel frame class "C" machine shop.
Owner—Aug. Bowle, Wells Fargo Bldg. San Francisco.
Architect—August Nordin, Mills Bldg., San Francisco.
Contractor — Vogt & Davidson, 185 Stevenson St.
Note: Contract does not include electrical work or heating.

Low Bidder
WAREHOUSE Cost, $——
SAN JOSE, Santa Clara Co., Calif. Plant No. 4.
One-story brick, frame and concrete warehouse (about 100 x 400).
Owner—California Packing Corp., 101 California St., S. F.
Engineer—Phillip L. Bush, 101 California St., S. F.
Low Bidder—J. D. Carlson. 76 West San Antonio St., San Jose.

Plans Being Prepared.
SHOP BLDG. Cost, $25,000
PIEDMONT, Alameda Co., Cal. Piedmont Ave and Echo St.
One-story concrete and brick shop building.
Owner—Weeks Invst. Co.
Architect—W. H. Weeks, 369 Pine St., San Francisco, and Ray Bldg., Oakland.

LOS ANGELES, Calif.—Archt. W. Douglas Lee, 709 Textile Center Bldg., will start wkg. plans soon for 12-sto. and basement reinf. concr. loft bldg., at Pico St. and Maple Ave., adjoining the Allied Crofts Bldg., for Lloyd & Casler, 12th floor, Textile Center Bldg.; stores and lobby on 1st floor with loft space above; 100 x 160 ft., comp. rfg., plate glass, terra cotta facing, steel sash, Terrazzo and cem. flrs., gas htg., pine trim, elec. elevators, ornam. iron wk.

PHOENIX, Ariz.—Archt. Norman F. Marsh, 1011 Broadway Central Bldg., has completed plans for a brick church bldg., to be erected at Phoenix, Ariz., for First Presbyterian Church; drawings have been forwarded to Phoenix for final approval and bids will be taken next week. Brick constr., press. brick and Tufa stone facing, clay tile rfg., steel roof trusses, mahogany trim, art glass, steam htg; $250,000.

OAKLAND, Cal.—New Metal Products Co., 59th and Doyle Sts., Oakland, has purchased 23,000 sq. ft. of additional property adjoining the present plant and will construct additions. Company manufactures underground oil and gas storage tanks, "tube" tanks, ranges, boilers, etc.

LOS ANGELES, Calif.—Troy Motor Sales Co., Nash distributors for Southern Calif., has purchased property at s. e. cor. of Wilshire Blvd. and Shatto Pl. and contemplates the erection of an automobile display and sales bldg. It will probably be a 3-sto. structure. The site is 152x208 ft.

SAN FRANCISCO—Western Pacific R. R. Co., Mills Bldg., at recent reorganization meeting voted to expend $6,000,000 in the construction of warehouse and terminal facilities on the north side of Islais Creek. A 200-acre site already owned by the r. r. is available.

UPLAND, San Bernardino Co., Calif.—Hamm & Grant, Inc., archts., and engrs., 607 Ferguson Bldg., Los Angeles, has compl. plans and will erect a 1 sto. and basement lemon storage plant at Upland for Upland Lemon Growers Assn.; 138x186 ft., concr. basement, reinf. concr. frame, hollow tile filler walls, mill constr. rf., comp. rfg., cork insulation, maple flrs., refrig. doors, ventilating system; $65,000.

OAKLAND, Alameda Co., Cal.—Following bids rec. Nov. 18th, by Eugene K. Sturgis, City Clerk, to construct new one-story concrete building at Corporation Yard, 9th and Fallon Sts., to house city street equipment. All bids were rejected:

R. W. Littlefield, 367 12th Ave., Oakland, Cal.	$63,430
Frederickson & Anderson, Oak.	63,816
Sullivan & Sullivan, Oak.	65,000
Schuppert & Swanstrom, Oak.	67,000
Koepke Bros.	68,762
John Banagh, Oak.	69,500
Dinnle Constr. Co., Oak.	69,571
Schuler & McDonald, Oak.	73,000

SEATTLE, Wash.—Puget Sound Bridge and Dredging Co., Central Bldg., at approx. $500,000 has contract to erect meat packing plant together with miscellaneous out buildings for Barton and Co., at present operating a plant at Spokane ave., and Wyoming St. Plans are being completed by Chicago architects.

FLATS

To Be Done By Day's Work.
FLATS Cost, $10,000
SAN FRANCISCO, Calif., N W 30TH and Sanchez Sts.
Two-story and basement frame (4) flats.
Owner—Jeffers, Tuenc & Wiseth, 3573 16th St.
Architect—Dodge A. Riedy, 821 Market St.

GARAGES

LOS ANGELES, Calif.—Archt. Kenneth Macdonald, Jr., Spring Arcade Bldg., is preparing plans for a 13-sto. and basement class A garage bldg., to be erected on west side of Spring St.,

so. of 4th St., adjoining the Angelus Hotel bldg., for Frank C. Hill, Merchants' National Bank Bldg; 78x155 ft., reinf. concr. constr., stucco and cast stone exter., steel sash, 3 automobile elevators; $500,000. The bldgs. now on the site are being wrecked by Whiting Wrecking Co.

Plans Being Prepared.
AUTO SHOP Cost, $100,000
EMERYVILLE, Alameda Co., Cal. NE 59th and Green Sts.
Concrete, steel and corrugated iron auto shop building.
Owner—Associated Oil Co.
Architect—Engineering Dept. of Owner 79 New Montgomery St., S. F.
The shop will be used to build bodies and tanks and service for the company's fleet of machines.

LOS ANGELES, Cal.—Architects Curlett & Beelman, 408 Union Bank Bldg., have prepared plans for a two-story Class A garage building at 715 Stewart St. for Sun Realty Co.; 74x106 ft., reinf. concrete frame and floors, brick filler walls, face brick, plate glass, steel sash, metal skylights, elevator; $30,000.

GOVERNMENT WORK AND SUPPLIES

HILO HARBOR, T. H.—Until Dec. 1, 9 A. M., bids will be received by U. S. Engineer Office, Honolulu, for dredging in Hilo Harbor. Spec. obtainable from U. S. Engineer Office, 401 Customhouse, San Francisco.

SAN FRANCISCO—Until Nov. 29, 11 A. M., under Order No. 7634-997, bids will be rec. by U. S. Engineer Office, 85 2nd St., to fur. and del. Rio Vista, Solano county, Common Pine and R. W. lumber. Spec, obtainable from above office on request.

SAN DIEGO, Cal.—Capt. PHOENIX, Ariz.—Archts. Walker & Eisen, Western Pacific Bldg., have been commissioned to prepare plans for a group of bank, store and hotel bldgs. to improve an entire city block in Phoenix, Ariz. Property is 300x300 ft., bounded by Central Ave., Monroe, 1st and Van Buren Sts., and has been purchased and will be improved by a syndicate of L. A. capitalists. The improvements will include two 3-sto., class A bank bldgs. for two principal banks of Phoenix, a 16-sto., 250- rm. hotel bldg., theater to seat 1800 people, a large 1-sto garage and a 1-sto. bldg. approximately 500 ft. in length to be subdivided into stores; bldgs. will be of reinforced concrete and brick construction and total investment will exceed $2,000,000.

PORTLAND, Ore.—W. D. Andrews Construction Co., Broadway Bldg., Portland, at approx. $200,000 awarded contract to erect 8-story concrete, 41 by 91 ft., hotel-apartments in Yamhill St., bet. 15th and 16th Sts., for R. H. Griffith; will contain 50 suites of 2 and 3 rms. each. L. L. Dougan, architect, Kraemer Bldg., Portland.

LA JOLLA, San Diego Co., Cal.—H. H. Hinds, 351 S. Hoover St., has contract to erect a nine-story Class A hotel building at La. Jolla, San Diego County, for E. A. Wayt; Norman W. Alpaugh, 2404 W. 7th St., Los Angeles, architect; reinforced concrete construction, stucco and cast stone exterior; $786,000.

LONG BEACH, Wash.—Arch. R. C. Reamer, Skinner Bldg., Seattle, commissioned to prepare plans for $300,000 hotel to be erected for group of capitalists headed by E. E. Edmunds of Portland, Ore. Will be 3-story, T-shape, covering area of 300 ft. long and 80 ft. deep; 125 rooms all with private bath.

ICE AND COLD STORAGE PLANTS

MERCED, Merced Co., Cal.—Merced Ice & Cold Storage Co., 17th and M Sts., will expend $30,000 in additions and mechanical installations in the present plant. Additions will be of brick construction. Mechanical equipment to be installed will cost approx. $15,000. The equipment has already been purchased, John Graham Jr., plant manager, announces.

POWER PLANTS

PLACER COUNTY, Calif.—A filing fee of $700 has been paid to the State Department of Public Works, Division of Water Rights, by the American River Water and Power Co., in applying for 200 cubic feet per second and 100,000 acre feet per annum from the north and middle forks of the American river, Placer county, for the generation of approximately 75,000 theoretical horsepower at an estimated cost of $8,250,000. The application of the power company takes over two applications filed by Fred P. Tuttle, which have been pending since October, 1921. The project comprehends the construction of two dams, each forty feet high and eighty long. One dam will be near French Meadows, Placer county, and will be capable of impounding 100,000 acre feet. A diverting dam is expected to be built on the middle fork of the American river to divert water into the reservoir. Water will be taken through ditches, tunnels and penstocks for twenty miles and will utilize a fall of 3750 feet to generate the electricity which will be sold to power companies.

HUNTINGTON BEACH, Cal.—Southern California Edison Co. will start work at once on new substation for Huntington Beach and adjacent territory; it is estimated to cost $140,000.

Contractors Attention!

I am selling lumber from mill to you in car lots at wholesale prices. Can furnish dimension all lengths, also mixed cars including uppers.

W. B. OLSEN is part.
OF THE T. I. Butler Co.
WHO SELLS Sandy's sand.
FROM PRATTCO (Monterey County).
IN SAN Francisco.
AND FRIEND Olsen.
AND HIS good wife.
JUST RETURNED from Sweden.
WHERE FOR five months.
OLSEN TOLD the Swedes.
ABOUT "PRATTCO Amber" sand.
BOTH COARSE and fine.
FROM MONTEREY County.
OLSEN HAD just brushed.
ALL OF the foreign soil.
OFF OF his clothes.
WHEN TOMMY Butler.
AND THEIR cyclone salesman.
LOUIS XV Allen told Olsen.
ABOUT SANDY Pratt's home.
IN BEAUTIFUL Westwood Park.
AND BIG salesmen.
THAT THEY are.
THEY SOON had the Olsens.
BUYING SANDY'S pretty home.
AND NOW Sandy.
IS CLIMBING up Mt. Davidson.
TO MONTEREY Heights.
INTO A home.
BUILT BY Hans Nelson.
AND THE Olsens.
ARE NATIVES.
OF THE fast growing district.
WEST OF Twin Peaks.
AND IF Olsen.
AND TOMMY Butler.
AND CYCLONE Salesman Allen.
WILL SELL Pratt's sand.
AND PRATT'S gravel and rock.
THEY WILL soon have money enough.
TO PAY for Sandy's home.
"I THANK you."

M., on the 9th day of December, 1926,** at the office of the said Board in the Hawthorne School Building, 2425 Fresno Street in Fresno, California, sealed proposals for the furnishing of labor and materials for the construction of toilet buildings and lunch room at the Lowell School as per plans prepared by Trewhitt-Shields Company, Architects, Pacific Southwest Building, Fresno, Calif.

Bids will be received as a whole under specifications A, segregations I to 14 inclusive, B-1 and 2 combined or B-1 and B-2 separated, Specifications C, Plumbing, E, Painting, F, Electric Wiring, H Finished Hardware.

Reference is hereby made to "General Information to Bidders," Building Form 6, for further particulars regarding all bids.

Plans and specifications, together with forms for submitting all bids, and further details regarding any and all bids may be obtained from the undersigned Secretary of said Board of Education at the office of said Board above designated.

A bidder's surety bond or certified check equal to at least 10 per cent of the amount of the bid submitted must accompany all proposals.

The Board of Education of said School District reserves the right to reject any and all bids.

By order of the Board of Education City of Fresno School District.

L. L. SMITH, Secretary.

NOTICE TO CONTRACTORS

(Wharf Repairs—S. F. Presidio)

OFFICE CONSTRUCTING QUARTERMASTER, Fort Mason, Calif. Sealed proposals will be received here until 11 A. M., Nov. 27, 1926, for repairs to timber wharf at Presidio of San Francisco, Calif. Information upon application.

NOTICE TO CONTRACTORS

Veterans' Memorial Building—Oakland

OFFICE OF THE CLERK OF THE BOARD OF SUPERVISORS OF ALAMEDA COUNTY, CALIFORNIA.

Sealed bids will be received by the Clerk of the Board of Supervisors of Alameda County, California, at his office **until Monday, December 20th, 1926, at the hour of 10:30 A. M.** (the day when said bids will be opened and the contract awarded) for the erection and completion of a two-story and basement Veterans' Memorial Building at Adams Park, Oakland, Alameda County, California.

Complete plans and specifications for the above work are on file in the office of the County Clerk, where copies may be obtained by depositing with the County Clerk the sum of $100.00.

Contractors will be restricted as to the length they may retain these plans and specifications to fifteen (15) days. Deposits of contractors failing to return said plans and specifications in good condition within said time limit will immediately become forfeited to the County of Alameda.

Each bid must be accompanied by a check for at least ten (10%) per cent of the total amount of the bid or proposal certified to by some responsible bank and made payable to Geo. E. Gross, Clerk of the Board of Supervisors, to be forfeited to the County of Alameda as agreed and liquidated damages should the party or parties to whom the said contract shall be awarded fail to enter into the contract after the award or to give the bond required by the Board for the faithful performance of the Contract.

The Board reserves the right to reject any and all bids.

Dated: November 15, 1926.

GEO. E. GROSS,
Clerk of the Board of Supervisors of Alameda County, California.

A call for bids published in this section indicates that bids are desired from other than local bidders Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

NOTICE TO BIDDERS

Each person bidding must, if he is awarded the contract, furnish a certified check for ten (10 per cent) per cent of his bid, said check to be made payable to the City of Madera and to insure that said contractor shall proceed with his contract.

Said Board of Trustees hereby reserve the right to reject any and all bids and to re-advertise for bids,

Full plans and specifications are on file with the City Clerk of said city and can be seen at his office in said City Hall.

Dated: November 17, 1926.

BOARD OF TRUSTEES OF THE CITY OF MADERA.
JOHN B. GORDON,
President Thereof.
JAS. WAKEFIELD,
City Clerk.

NOTICE TO CONTRACTORS

Bids Wanted For Highway Improvement

Sealed proposals will be received by the undersigned on **December 8, 1926,** for constructing portions of the state highway system in Clark and Washoe Counties as follows:

(1) Bids received until and opened at 1:30 P. M., for grading, construction of structures and placing of surfacing material between Jean and Bard in Clark County, a length of 16.25 miles.

(2) Bids received until and opened at 2:30 P. M., for the placing of surfacing material between Hafed and Derby in Washoe County, a length of 14.81 miles.

Plans may be examined and form of proposal, contract and specifications secured in the office of the undersigned; also may be examined in the county clerk's office in the county in which the work is located; the division offices at Elko, Reno, and Las Vegas; and the district office of the Bureau of Public Roads, 461 Market Street, San Francisco. For copy of each set of plans, undersigned required a deposit of Fifteen Dollars ($15.00), Ten Dollars ($10.00) of which will be refunded upon return of plans in good condition within thirty (30) days after opening of bids. Bids must be on proposal form of Highway Department and must be accompanied by a certified check in the amount of five per cent (5%) of bid.

Each bidder must accompany his bid with certificate from a surety company duly authorized to do business in Nevada, stating that such surety company will provide said bidder with bond in such sum as is required in and in accordance with the provisions of said specifications, conditioned for faithful performance of the contract and specifications.

Right is reserved to reject any or all bids.

GEO. W. BORDEN,
State Highway Engineer,
Carson City, Nevada.

NOTICE TO DEALERS IN MACHINERY AND LABORATORY EQUIPMENT

(Alameda High School District)

Notice is hereby given that the Board of Education of the City of Alameda, and of the Alameda High School District of Alameda County, State of California, hereby calls for sealed proposals to be delivered to the Secretary of said Board, Room 9, City Hall, Alameda, California, **until 8:00 o'clock P. M., Thursday, the 7th day of December, 1926,** at which time and place said bids will be opened for furnishing and delivering Machinery and Equipment for a Vocational Laboratory.

These bids shall be presented in accordance with the specifications on file in the office of the Secretary of said Board, Room 9, City Hall, Alameda, California.

Copies of Schedule may be had upon application to the Secretary of the Board of Education, and bids must be made without erasure or alteration.

All articles are to be delivered f. o. b. Room 223, Alameda High School, Alameda, California.

Where aggregate amount of bid is $500.00 or over, bid must be accompanied by cash or a certified check for at least ten (10%) per cent of the total amount of the bid, certified to by some responsible bank, or banker, and made payable to the Secretary, Alameda Board of Education, to be retained by the said Board as agreed and liquidated damages should the party or parties to whom the contract is awarded fail to enter into the contract after the award, or to give bonds required for the faithful performance of the contract, or any bond required by law. Only surety bonds will be accepted by the Board.

The Board reserves the right to

QUANTITY SURVEYOR

ACCREDITED APPRAISER

reject any and all bids, or any or all items of such bids.

WM. G. PADEN.
Secretary, Alameda Board of Education, and Clerk, Alameda High School Board, Alameda High School District, Alameda, California.

NOTICE TO CONTRACTORS

(Infirmary—Kern County)

Notice is hereby given that sealed bids will be received by the Clerk of the Board of Supervisors of the County of Kern, State of California, **up to 10 A. M. of Monday, December 13th, 1926,** for the furnishing of labor and materials for the erection complete of the Stoneybrook Retreat Infirmary, at Keene, California, in accordance with plans and specifications prepared by Charles H. Biggar, Architect, 405 Bank of Italy Building, Bakersfield, Calif.

Plans and specifications for same may be obtained at the office of the Architect upon deposit of Ten Dollars ($10.00) which will be returned upon receipt of the said plans and specifications in good order at the time designated by the Architect.

Bid forms will be furnished by the Architect.

A certified check or bidders' bond in the amount of ten per cent of amount bid to be to the order of the Clerk of the Board of Supervisors as evidence of good faith, and that the bidder, if successful, will enter into a contract satisfactory to said Board of Supervisors, and in addition thereto will furnish good and sufficient bonds therefor.

Board reserves the right to reject any and all bids not deemed advantageous to the County and to waive any informality in any bid received.

By order of the Board of Supervisors of the County of Kern, State of California, adopted November 8th, 1926.

F. E. SMITH,
County Clerk and ex-Officio Clerk of the Board of Supervisors.

NOTICE TO BIDDERS

(Tulare Lake Basin Committee)

Tulare Lake Basin Committee hereby calls for bids on the following work:

The building of a ditch through Section 11, Township 18 South, Range 19 East, in Kings County, California. The estimated quantities are 105,383 cubic yards of earth work.

Plans and specifications may be seen at the office of Roy May in the Courthouse, Hanford, California, or can be obtained on deposit of $10.00, returnable upon return of plans in good condition.

Sealed proposals therefor shall be delivered to said Roy May **before 7:00 o'clock on the 7th day of December, 1926,** at which time the said proposals will be opened, and the contract will be awarded to the lowest responsible bidder.

The Committee reserves the right to reject any or all bids.

TULARE LAKE BASIN COMMITTEE,
By ROY MAY,
Engineer.

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of **the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock P. M., on December 13, 1926,** at which time they will be publicly opened and read, for construction, in accordance with the specifications therefor, to which special reference is made, of portions of State Highway as follows:

Humboldt County, between Fernbridge and Loleta (1-Hum-1-G), about two and one-tenth (2.1) miles in length; to be graded and surfaced with crushed gravel or stone.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco and at the office of the Division Engineer of the division in which the work is situated. The Division Engineers' offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

HARVEY M. TOY,
LOUIS EVERDING,
N. T. EDWARDS,
California Highway Commission.
R. M. MORTON,
State Highway Engineer.
W. F. MIXON, Secretary.

Dated November 15, 1926.
(Nov. 19-26, Dec. 3-10)

THE CONTRACTORS' ROOM

BUILDING AND ENGINEERING NEWS maintains a Contractors' Room where plans and specifications may be filed by Architects, Engineers and Owners for the convenience of bidders in San Francisco and the Bay Counties.

Architects, Engineers and Owners are invited to forward plans of their projects to BUILDING AND ENGINEERING NEWS. No charge for this service. The plans will be returned in good condition when contract for work is let.

SAN FRANCISCO BUILDING FOR NOVEMBER

November, 1926, building activities in the city and county of San Francisco, represent an expenditure of $3,293,891, acording to figures compiled by John P. Horgan, chief inspector of buildings of the Department of Public Works. During the month 765 building permits were issued.

For the corresponding period in 1925, records of the Department of Public Works show a total of 863 permits issued for improvements valued at $3,478,843 of which $4,683 covered public building construction and $10,000 for work undertaken by the State Board of Harbor Commissioners. The balance of the operations during the period covered private construction.

During the month of October, 1926, Horgan reports the issuance of 849 permits for improvements having an estimated valuation of $5,619,690 which amount included $412,063 for three public structures and $1,326,852 covering the construction of a pier for the State Board of Harbor Commissioners, leaving the balance of the total valuation for private construction.

Home building construction leads all activities with flats and apartment building following in line.

The following is a report of the November, 1926, operations classified to type of construction:

Class	No. of Permits	Estimated Cost
A	1	$ 375,000
C	16	616,400
Frames	327	1,942,395
Alterations	420	301,358
Harbor	1	28,740
TOTAL	765	3,293,891

Total for past eleven months is $52,887,289, as compared with $50,332,793 for the entire year of 1925.

STATE RAILROAD COMMISSION ENGINEERS ADVANCED

The California State Railroad Commission has appointed Chas. Grunsky, Gas and Electrical Engineer, to succeed Mr. A. V. Guillou, promoted to be Assistant Chief Engineer. It has also appointed Mr. J. G. Hunter, Transportation Engineer, to succeed Mr. A. G. Mott, who has been appointed Chief Engineer of the Commission to succeed Mr. Lester S. Ready. The changes will be effective officially as of December 15, 1926, but the new officials will assume their positions immediately and will be in charge of their respective divisions as of December 1, 1926.

Mr. Charles Grunsky, who has been appointed Gas & Electric Engineer, has been with the Commission since 1914. Mr. Grunsky was employed on valuation work up to 1922, and, for the major portion of the time since 1922, as an assistant engineer in the Gas and Electric Division. He is a graduate of the University of California (Class of 1913) and engaged in construction work for a year before entering the employ of the Commission. During the World War Mr. Grunsky went over seas and, after the Armistice, he returned as a Captain in the Engineer Corps.

Mr. J. G. Hunter entered the employ of the Commission in April, 1920, worked as an assistant engineer part of the time in the Hydraulic Division and, since 1923, in the Transportation Division. Since 1924 he has represented the Transportation Division in the Los Angeles Office of the Commission. Mr. Hunter is a graduate of the University of Utah (Class of 1908), was employed for a number of years in the office of the City Engineer, Portland, Oregon, and, later, in the U. S. Geological Service.

MANUFACTURERS HIT FIVE-DAY WEEK PROPOSAL

The National Association of Manufacturers, New York, makes public a symposium of opinions expressed by executives of thirty-two leading industrial organizations throughout the country on the five-day labor week.

The consensus, summarized by the association, was that the general adoption of the reduced basic working week, proposed by Henry Ford and endorsed by the American Federation of Labor at its recent convention, would:

Increase the cost of living, increase wages by 15 per cent and decrease production, prove impracticable for all industries, create a craving for additional luxuries to occupy the additional spare time, causing a "trend to the arena—Rome did that, and Rome died," react against the best interests of workmen who desire to advance, make the United States more vulnerable to economic onslaught from Europe.

The only approximate favorable reply noted by the association was that the scheme "would be all right to meet a sales emergency, but would not work out as a permanent thing."

STANDARDIZATION OF MATERIALS SAVES MILLIONS

In a recent statement issued by the Department of Commerce Secretary Hoover estimates that standardization in the lumber industry alone has affected an annual saving of $200,000,000 and referring to the work for standard building codes he says: "The estimated savings in construction by revision of obsolete codes run into as high as 20% of the costs." In his comment on reduction of seasonal operation of industry, he saye: "The annually enlarged building program of the country has been handled in large part by extension of the building season into winter months; thie has had a stabilizing effect upon prices and has given increased annual earnings to workers, not only in the construction but in the construction material industries. The price of most building materials has, in fact, decreased despite the large increased demand."

CALIFORNIA MAN PROVES PRIZE WINNER

H. Roy Kelly of Pasadena, who won the first prize in the small house competition conducted by the Own Your Own Home magazine, has also been awarded first prizes in two competitions conducted by the Biscayne Boulevard Association of Miami, Fla., for the best design for an automobile filling station and for the best design for street traffic signal tower, traffic signal standards and street electroliers, including street signs. Mr. Kelly is a graduate of Cornell University and is a member of the Los Angeles Architectural Club.

HYDRATED LIME DISTRIBUTION IN U. S. FOR 1925

Domestic producers of hydrated lime shipped into the various states of continental United States 1,552,179 short tons of hydrated lime during 925, according to statistics compiled by the Bureau of Mines, Department of Commerce. These figures show an increase of 18 per cent compared with corresponding figures for 1924. Of the total amount, 771,150 tons, or about one half, was produced in Ohio. Since so large a part of the total shipments came from Ohio plants, the distribution of the Ohio product is compared with that of the United States as a whole in the table given. Reshipment by dealers is not considered. Publication of comparative figures of shipments into individual states is not permissible as it would tend to disclose items relating to distribution by individuals.

VENTURA CONTRACTORS ELECT

Roy W. Guyer of Oxnard was elected president of Ventura Chapter, Associated General Contractors, at the annual meeting. B. F. Barr of Ventura was chosen vice-president and A. Schroeder, Oxnard, treasurer. New directors are: W. A. Hudson and J. D. Westling, Santa Paula, and L. R. Barr and Thamos Bergseid, Ventura. Bergseid is the retiring president.

Cement Ass'n At Annual Meet Elects Officers And Discusses Important Topics

G. S. Brown, president of the Alpha Portland Cement Company of Easton, Penn., was elected president of the Portland Cement Association at the annual meeting conducted at the Drake Hotel, Chicago, November 15, 16 and 17. Mr. Brown succeeds Blaine S. Smith, vice president and general sales manager of the Universal Portland Cement Company.

Col. E. M. Young, president of the Lehigh Portland Cement Company, Allentown, Penn., and Robert B. Henderson, president of the Pacific Portland Cement Company, San Francisco, were elected vice presidents. John W. Boardman, vice president of the Huron Portland Cement Company, Detroit, was re-elected treasurer.

New members of the board of directors are: L. R. Burch of New York City, vice president of the Atlas Portland Cement Company; Richard Hardy of Chattanooga, chairman of the board of directors of the Pennsylvania Dixie Portland Cement Corporation; Blaine S. Smith of Chicago, vice president of the Universal Portland Cement Company; L. T. Sunderland of Kansas City, Mo., president of the Ash Grove Lime and Portland Cement Company; and C. E. Ulrickson of Dallas, vice president of the Trinity Portland Ce ment Company.

Dust Collection Talk

During the three days of the convention many problems were discussed in committee meetings and in general sessions. A "Symposium on Dust Col lection" was presented Tuesday, November 16, by J. B. Taylor who spoke on "Some Aspects of the Dust Problem;" J. H. Kempster whose topic was "Dust Collection and Prevention in Packing and Grinding Departments;" Walter A. Schmidt who talked on "Electrical Precipitation of Dust in Portland Cement Plants;" and Frank Moyle who spoke on "Cyclone Dust Collectors.'

Progress in accident prevention work was reported by the accident prevention committee. During October 73 of the 127 plants reporting came through without a single accident. Each year a substantial reduction in accidents has been secured over the previous year and now mishaps have been reduced by one-half since the formation of the Accident Prevention Bureau of the Association.

Cement Industry Reviewed

At the business session Mr. Smith, the retiring president, reviewed the portland cement industry for the past year and pointed out certain conditions which will influence the industry in the near future.

Mr. Smith in part spoke as follows.

"Everything considered, it is not difficult to believe that unless something unforseen occurs a large construction program can be expected next year and consequently a good cement demand although an increase over this year's consumption is not likely.

"A year ago if we could have been assured that shipments in 1926 would exceed those of the year before, most of us would have felt relieved. At that time prospects of such a showing were not promising, yet government figures for ten months indicate total shipments for the year of 162,000,000 barrels, or about three per cent more than the previous year.

"Stocks on hand November 1 were the highest for that date in history and one-fifth greater than a year ago. Substantial curtailment during the winter is inevitable.

"Capacity to manufacture continues to increase. At present it is about 200 million barrels per year. The addltional capacity of ten new plants and enlargement of old plants practically assure a total capacity of 215 million barrels next year. This is 33 per cent greater than this year's indicated consumption.

"In the last few years greatly increased storage facilities for both cement and clinker have been built, which in effect increase capacity. As the necessity of winter shutdown due to full stock houses is reduced, this large excess of capacity over demand presents a serious problem.

Cement Imports Increase

"Complicating it is the menacing increase of cement imports. Within five years importations have grown from practically nothing to an estimated 4 million barrels this year. Those who are in direct competition with this imported product need no reminder of it but perhaps some in the interior of the country do not fully realize its size and importance. Nearly one-half of the cement consumption of the metropolitan district of Boston in the first nine months of this year has been of foreign cement.

"As late as May 1922 when the proposed duty on cement was under debate in Congress, it was stated many times that no foreign cement except that from Canada could enter into competition with the American product; yet imports have jumped from about 325 thousand barrels that year to about 4 million barrels this year, with the peak not yet in sight. With Europe's labor getting about one-fifth of the day's wage of American workers, with low transportation costs and light overhead charges, Europe is dumping here these large quantities of cement at prices which American producers cannot profitably meet.

Tariff Legislation Pending

"Immediate tariff legislation is unlikely but pending the time when Congressional relief can be effected, government officials and national legislators should be made acquainted with the facts in the hope that they will not permit the error of opinion of 1922 to prevail. We should show public officials what the menace of this foreign enterprise is and where American dollars are being expended for the construction of public buildings and roads, we can rightfully insist that specifications call for an American product. American taxes should be spent for American goods and foreign cement should be excluded.

"The American cement manufacturer is not the only one injured. A pamphlet recently published by one of our large cement manufacturers shows that American industry lost $29,000,000 through the importation of 10 million barrels of foreign cement in the last five years. This loss is borne not alone by the capital and labor in cement plants but by American coal and oil industries, power companies, railroads, sack manufacturers, explosive and gypsum producers, machinery manufactureres and others. These facts should be made known to those who are fostering the use of foreign cement. We should influence buyers of the imported product to cease their patronage of foreign producers not alone for patriotic consideration but for sound business reasons as well."

In speaking of the work of the Portland Cement Association Mr. Smith stated:

"We have found out in our laboratories many things new to the engineering profession which have been distinctly helpful in improving the methods of using cement. Tests have been devised which are now applied quite generally in construction work of note which enables engineers to determine in advance the quality of concrete which they are to use.

"Another line of development of technical knowledge which is very much worth while is the study of the constitution of cement clinker. The policy on which this work is being pursued is characteristic of the studies which have been made of concrete, namely, to establish basic facts about cement and not to try to support any previously established opinions."

The convention was closed Wednesday evening with a banquet at the Drake Hotel with Blaine S. Smith acting as master of ceremonies. George Woodruff, vice-chairman of the National Bank of the Republic, spoke on "The Possibilities For 1927." Col. Sidney D. Waldon, president of the Detroit Rapid Transit Commission, also delivered an interesting talk on "Untying the Traffic Knot."

Foreign Competition Cited

Mr. Woodruff in speaking of foreign competition with American manufacturers declared:

"We should not fail to realize that European competition is slowly gaining and that while it can hardly hit us as hard in 1927, it will doubtless be the factor that will ultimately bring about our next great period of business readjustment. If America were still a debtor country, we might be able to maintain our prosperity on a basis of very high production costs for a long time to come, but the fact that we are now the greatest creditor nation in the world make the cost of production in our country a serious matter. The world must henceforth pay large sums of money to America every year and this can be done in but three ways—by sending gold, by sending goods or by sending stocks and bonds. We do not want more gold and foreign countries do not possess sufficient gold to send. Stocks and bonds will doubtless come in large amounts but this cannot go on forever. Goods must then come our way and the force of competition will be felt by us in foreign trade and here at home. Only through the tariff can we guide from our ports the goods that will do the greatest harm and let in the things that will hit domestic output least."

CONTRACTOR SEEKS TO HALT HOSPITAL PROJECT

Charging that the Kings County Board of Supervisors accepted a bid higher than that submitted by him for the new power house and laundry at the county hospital, R. B. Burniss of Tulare, has served notice that unless he received $125 to reimburse him for expenses incurred, he will take steps to enjoin the supervisors from proceeding with the contract.

R. B. Burniss of Tulare and John P. Williams of Fresno were the low bidders at $7540, but the board accepted the bid of J. F. Brown, a local man, of $7625.

It is asserted by District Attorney W. R. McKay that the supervisors acted within their discretionary powers, as to which was the best bid, and that their action is not subject to review.

CONCRETE PRODUCTS MEN TO MEET IN JANUARY

The second annual meeting of the Northwest Concrete Products Association will be held in Seattle January 21 and 22.

The association, which was formed a year ago, comprises the principal concrete products manufacturers of the states of Washington, Oregon and Idaho, and a membership which includes 41 active plants manufacturing every type and kind of concrete products, such as sewer, culvert and irrigation pipe, drain tile, concrete building units, cinder concrete products, cast stone and building trim, roofing tile, lighting standards, concrete brick and many other articles.

Committees are now at work preparing program and entertainment. A number of papers covering original work in concrete research pertaining directly to products plants will be presented.

The meetings of the association are open to all interested in concrete products.

DEFECTIVE PAINTING CHARGES ARE DENIED

A protest by the Master Painters' Association of Sacramento against the painting work on the Dr. Charles Strub building in Sacramento, designed for the State motor vehicle department, is without foundation, it is declared by Fred Zelinsky, superintendent of the job for D. Zelinsky & Sons, Inc., contractors. He denied charges that the work did not meet specifications and attributed the accusations to local firms in Sacramento seeking to injure outside competition. Dispatches from Sacramento said the Master Painters' Association there had adopted resolutions to the effect that specifications had been disregarded.

OREGON MATERIALMEN TO ALTER LIEN LAW

Ben Finnigan and Virgil A. Crum, attorneys, have been requested by the legislative committee from the Building Material Dealers Credit Association of Portland, Ore., to go over the present lien law and make such suggestions as they think proper and necessary concerning the proposed amendment to the law, according to J. A. Jackson, chairman of the committee. The amendment definitely would determine the time for filing liens for materials furnished in the construction of buildings. The question is to be placed before the coming legislature.

NEVADA STATE CONTEMPLATES REFORESTATION

Definite arrangements for reforestation of burned-over areas in Nevada state and treeless wastes in virgin districts have been made by the forest service. Following a conference between Governor James G. Scrugham and James E. Garr, supervisor of the Toyiabe National Forest, in Eastern Nevada, it was arranged to cultivate seeding trees near Elko.

These will be later moved to sections desolated by fire and areas always barren of forest growth. The plan provides for care of the seeding trees by inmates of the Nevada School of Industry at Elko.

Governor Scrugham says arrangements have been made for immediate planting of 125 acres of seeding trees near the Nevada Industrial school. Seedings valued at $2000 are to be bought by the state through provisions of the Clark-McNary Act, and the stock used for reforestation of burned-over and treeless lands.

Within a comparatively short time the reforestation is expected to develop valuable lumbering industries in several mountain districts.

AMERICAN BOND ESTABLISHES RESEARCH BUREAU

In response to a growing demand for more direct, comprehensive and impartial determination of the facts regarding the building industry, The American Bond & Mortgage Company announces the establishment of a Building Economic Research Bureau, under the direction of Guy W. Seem. The buseau will be located at the company's New York offices, 345 Madison Avenue.

Mr. Seem, director of the bureau, has had wide experience in research and public relations work for a number of years with several leading investment banking houses. He is also well known in newspaper circles throughout the country, as an industrial and labor news expert, having formerly been associated with the editorial staff of the New York Times, Associated Press, and United Press.

The Building Economic Research Bureau, it was announced, will extend the scope of its work to cover all activities in the building construction industry throughout the United States and Canada. The bureau will prepare comprehensive sectional and national surveys, compile statistics and data showing the trend of building labor and material costs and disseminate information regarding building construction financing and real estate securities. Study will also be made of rental and housing situations in the larger cities of the country, where a large volume of construction financing is being reported.

Data and statistics compiled by the Bureau will be made available to the public, through a monthly publication to be known as the "American Builder-Economist." Investors and builders are invited to consult the bureau at any time on any questions pertaining to activities in the building industry and the real estate bond financing field.

CEMENT IMPORTS GAIN WHILE EXPORTS SHOW DECLINE

At the present rate of increase 1926 importations of portland cement will exceed those of last year by about 1.3 per cent, according to latest figures submitted by the Bureau of Foreign and Domestic Commerce.

Exports of the same material will probably show a drop of approximately 3.4 per cent.

For the first nine months of this year imports totaled 2,779,570 bbl., against 2,436,120 for the same period in 1925. Exports for the first three-quarters of 1926 amounted to 738,263 bbl., compared with 744,080 in the corresponding months last year.

About 88 per cent of present cement imports come from Belgium, against 38 per cent a year ago. Canada, Denmark, Faroe Islands, and the United Kingdom are jointly supplying the other 12 per cent. A year ago eleven nations were sending cement to the United States.

SIMPSON-GRAY LUMBER SEEKS FOR DISSOLUTION

Petition for dissolution of the Simpson-Gray Lumber Company Corporation has been filed in the Superior Court at Stockton. Superior Judge George F. Buck named January 10, 1927, as the time for hearing the petition.

According to the petition, the application for dissolution was decided upon by a meeting of the stockholders called for such purpose, November 19, 1926. At the meeting a copy of the minutes of which are attached to the petition, all of the 1000 shares of outstanding stock were represented as follows: Estate of late J. A. Hooper, represented by A. W. and F. P. Hooper, executors, 475; Eugene T. Perry, 472; C. G. Bird, 50; H. M. Furman and A. W. Hooper, one each.

The petition sets forth that the lumber company was incorporated October 5, 1912, and that all claims against it have been discharged. The directors and officers are named as C. G. Bird, president; Eugene T. Perry, secretary; H. M. Furman and A. W. Hooper. The fifth director, John A. Hooper, died last year, and his place on the board was not refilled.

$97,000,000 U. S. RECLAMATION EXPENDITURE

Specifications for the $97,000,000 program for the completion of reclamation projects already under way are made public by the Interior Department, covering 22 areas, but calling for no new undertakings until the old ones are out of the way.

The projects and the sums to be expended are the Yuma-Arizona-California, $1,291,000; Stony Gorge reservoir at Canal Extension, Orland, Cal., $727,000; Grand Valley, Colo., $136,000; Uncompahgre, Colo, $500,000; Arrow Rock and Payette division, Boise, Idaho, $6,334,000; American Falls reservoir and power development and Minidoka power development, Idaho, $8,423,000; St. Mary's canal and Sherburne Lake reservoirs and canals, Milk river, Mont., $181,000; Gibson reservoir and Fort Shaw distribution system, Mont., $3,653,000; Lower Yellowstone-North Dakota, $460,000; Guernsey reservoir and drainage on Fort Laramie, North Platte, Wyo., $707,000; and Truckee storage canal at Carson division.

The tenth annual convention of the National Crushed Stone Association will be held at the Book-Cadillac Hotel, Detroit, on January 17, 18, 19 and 20, 1927. A manufacturers' exhibit of equipment for the crushed stone industry is being arranged by the manufacturers' division of the association. Additional information concerning the convention and exhibit can be obtained from the offices of the association, 661 Earle Building, Washington, D. C.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

M. Marin & Co., 1747 Sacramento St., has taken over the business of I. R. Kissel, painting contractor.

Mrs. Dora M. Harmon, mother of W. W. Harmon, city engineer of Oakland, died at her home in that city, Nov. 29.

E. A. Walton and W. G. Nance will operate from 55 New Montgomery St., San Francisco, under the trade name of Nance & Walton Tile Company.

N. R. Davenport and H. D. Christie will operate from 441 Franklin St., San Francisco, under the trade name of C and D Hardwood Floor Company.

Mortenson Construction Co. of San Francisco, capitallzed at $100,000, has been incorporated with the following directors: A. S. Hutchinson, C. F. Johnson and G. Tichy.

Enterprise Oil Burner Company of San Francisco, capitalized at $100,000, has been incorporated. Directors are: H. Barley, C. R. Reichel, A. J. Martens, H. J. F. Nieman and Chas. Hoehm.

Jas. S. Dean of Sacramento has been appointed a member of the California State Board of Architecture, Northern District. A. M. Edelman of Los Angeles was appointed a member of the board from the Southern District.

The 23rd annual convention of the American Concrete Institute will be held Feb. 22, 23 and 24 at the New Palmer House, Chicago. Harvey Whipple, 2970 West Grand Blvd., Detroit, Mich., is secretary and treasurer.

Curt F. Setzer, former president and general manager of the Sacramento Box & Lumber Company, destroyed by fire, announces he will erect a new plant on a 6-acre site at Third and Y streets, Sacramento.

Oakland school district bonds amounting to $2,120,000 were sold by the Alameda county supervisors to four San Francisco bond houses for a total premium of $191,429. The bonds included $1,270.000 of Oakland High School district bonds and $850,000 in grammar school bonds.

The United States won in the Supreme Court today in its prosecution of manufacturers, contractors and union carpenters at Chicago on charges of criminally violating the anti-trust law by restraining interstate commerce in mill work.

In an effort to glorify good work and honor good workers, the Philadelphia Building Congress awarded 63 craftsmanship certificates to individuals and firms of that city, on October 21st before more than one hundred representatives of all branches of the building industry. D. Knickerbacker Boyd, President of the Congress, announced that the awards were made after the committee on awards had reviewed nominations received through the co-operation of architects and others qualified to pass upon the work performed during 1925.

At the annual business meeting of the Portland Cement Association held in Chicago recently the following officers were elected: President, G. S. Brown, president, Alpha Portland Cement Co.; vice-president, Col. E. M. Young, president, Lehigh Portland Cement Co., and secretary-treasurer, John Boardman, president, Wyandotte Portland Cement Co.

Contract for 650 tons of terra cotta to be used as exterlor facing on walls of the new $2,250,000 Beverly-Wilshlre Apartment Hotel at Los Angeles has been given Gladding, McBean & Company. Officials of the concern say it is one of the largest contracts of its kind awarded in many months.

Lovelock Irrigation District of Lovelock, Nevada, has set December 18 as the date to hold an election to vote bonds of $1,287,000 to finance construction of irrigation works including a reservoir impounding 116.000 acre feet of overflow waters of the Humboldt river. Fred H. Tibbetts of San Francisco is consulting engineer on the proposed project.

It will cost less to build a home in 1927 than it does this year, Robert Gillespie of St. Louis, president of the Masons and Contractors International Association, declared at the American Face Brick Association's convention at French Lick, Nov. 30. Wages of bricklayers and other laborers probably will be reduced in some cities.

On November 13, 1926, there were 57 strikes before the Department for settlement and in addition 9 controversies which had not reached the strike stage. Total number of cases pending 66—9 of which are new. The 9 new cases may be compared with 5 and 6 of the first and second weeks preceding.

Marking an effort to maintain a high standard of building construction, City Commissioner Frank Colbourn has opened a laboratory to test materials to be used in the erection of Oakland buildings. "It is just as important that the materials be good as that the workmanship be good," declared Colbourn, who said the laboratory will be an adjunct to the building inspection bureau.

"Architectural Specifications" is the subject of a new book published by the Architectural Division of the E. I. du Pont de Nemours & Co., Philadelphia. This book is planned as a service to architects and specification writers and is arranged to conform with the plans recommended by the American Institute of Architects for filing specifications and descriptive data on paint and varnish products. The book contains complete specifications and descriptions of all du Pont paint and varnish products of interest to architects, including Duco, house paint, metal paint, shingle stains, flat wall paints, floor paint, enamels and wood finishes. Color sheets are included in each classification showing the line of du Pont finishes. The book is being distributed exclusively to members of the architectural profession.

A study of the Rochester Community Conference Board shows the average building trade worker in that city is now earning approximately 42% more in "real" wages than in 1914, states R. F. Miller, Secretary of the Board. Continuing Mr .Miller says: "This figue was arrived at by comparing the composite wage scale with the cost of living figures on the basis of 1914 as 100. This shows that although the cost of living has increased 66% since that year, the hourly rate of building trade workers has arisen from an average of 44.3 cents per hour in 1914 to $1.04 per hour at present, an increase of 135%.

The General Electric Company has been declared by the supreme court to be following a lawful method in marketing electric incandescent lights which are manufactured under patents controlled by it. The government had charged the company, together with the Westinghouse Electric and Manufacturing Company and the Westinghouse Lamp Company with being engaged in an unlawful conspiracy to monopolize interstate commerce and arbitrarily fix prices. The federal district court for northern Ohio had decided against the government which appealed to the supreme court.

A practical course in building construction has been added to the shop department of the Pittsburg, Contra Costa County, high school, under the direction of R. Boydstun, woodworking instructor. The students are engaged in building garages for private parties, and will undertake construction of several cottages before the close of the semester. The work is done at no profit, the only expense to owners being the cost of material. Several orders have been placed for construction of bungalows, Boydstun says, but he will not permit the students to start a house until they have had considerable experience on garages.

Further expansion of the Columbia Steel Corporation is made known by the announcement that the corporation in question has taken over the Pacific Sheet Steel Corporation. The latter concern operates a sheet mill in South San Francisco with a capacity of 3500 tons per month of steel sheets, covering full range of sizes, and represents an investment of about $2,000,000. The business of the Pacific Sheet Steel Corporation will hereafter be conducted as part of the business of the Columbia Steel Corporation.

The Supreme Court of Illinois recently upheld the decision of the Appellate Court which in turn had reaffirmed the conviction by the lower courts of business agents for a local union of sheet metal workers, a local union of painters and a local union of plumbers on the charge that these officials had collected money from contractors on various jobs with the understanding that such operations would proceed without interruption. The officials guilty of such extortions will be obliged to spend one year in jail.

Sam Cohn, chairman of the Entertainment Committee of the San Francisco Builders' Exchange, announces arrangements will be made early next month for a Ladies' Night Dinner-Dance to be held sometime in February. At a general meeting of the Entertainment Committee, Cohn says, the location will be selected and a special committee named to arrange a program of talent for the affair.

Building News Section

APARTMENTS

Contract Awarded.
APARTMENT Cost, $25,000
ALAMEDA, Alameda Co., Calif. 2021 Clinton Ave.
Three-story 18-room frame apartment house (cement plaster finish.)
Owner—R. G. Templeton, 2021 Clinton Ave., Alameda.
Designer and Contractor—Joseph Coward, 1930 E 27th St, Oakland, Calif.

Completing Plans.
BUILDING Cost, approx.$74,000
OAKLAND, Alameda Co., Calif. 416 Perkins St.
Four-story reinf. concrete, Spanish style apartment building (twenty-two 2- and 3-rm apartments) with basement garage.
Owner—H. C. Cameron.
Architect—Arthur Young, 339 15th St., Oakland.
Architect will take segregated bids in ten days.

Owner Taking Bids For Heating and Plumbing.
APARTMENTS Cost, $100,000 each

IF YOU passed the windows.

OF THE Owl Drug Company.

AT TENTH AND K Streets.

IN SACRAMENTO this week.

YOU SAW Sandy's "rock."

ON DISPLAY.

AND IF you bought.

SOME OF these "rocks."

AT THE candy counter.

YOU WILL find.

THAT THEY are good enough.

TO EAT.

AND THIS applies to all.

OF THE sand, rock and gravel.

THAT CLARENCE (Sandy) Pratt, President.

OF THE Pratt Building Material Co.

PRODUCES AT Marysville, Sacramento.

PRATTROCK (NEAR Folsom).

MAYHEW (SACRAMENTO County).

AND PRATTCO (Monterey County).

FOR SANDY'S company.

WASHES THEIR sand and rock.

'TILL IT is as clean.

AS THE Owl's "rocks."

ALSO IF you are.

PASSING TENTH and K Streets.

IN THIS unique window display.

YOU WILL see red trucks.

FURNISHED BY Carroll Stephens.

WHO IS Sacramento Manager.

FOR THE Golden Gate-Atlas Co.

RETAIL DEALERS in Pratt's sand.

AND PRATT'S rock and gravel.

AS WELL as ready mixed mortar.

(MADE OF Pratt's clean sand).

FROM THE Pratt bunkers.

AT FIFTEENTH and A Streets.

NEAR THE Sixteenth Street viaduct.

IN FAST growing Sacramento.

ANYWAY, THE Owl's "rocks."

ARE A perfect imitation.

OF PRATT'S rock and gravel.

AND ARE even better.

BECAUSE YOU can eat.

WHAT THE Owl sells you.

BUT IF you want.

TO HAVE fun.

BUY SOME Owl "rocks."

AND FOOL your folks.

SANDY PRATT was able.

TO FOOL all the "rock" experts.

IN HIS famous organization.

INCLUDING HARRY Bell, plant Superintendent.

AT PRATTROCK (near Folsom).

GEORGE TYLER, plant Superintendent.

AT MAYHEW (near Sacramento).

H. C. CATE, plant Superintendent.

AT THE 12th Street Bridge.

IN SACRAMENTO.

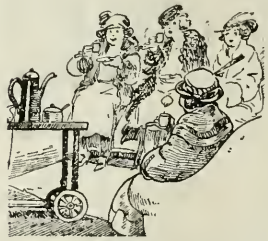
ALSO JACK Long, Sales Manager.

FOR THE Sacramento Valley.

AND CHARLEY McTavish, Sales Manager.

FOR THE San Francisco Bay district.

"I THANK you."



This shows the Monday Club that meets in the Tuesday Club Building (opposite Fort Sutter, Sacramento) on Wednesday. Some of the girls want to visit the Owl Drug Company's display of Sandy Pratt's "rocks" (see above K.C.B.-like story) on Friday, others prefer to go down town Saturday. Anyway, Sandy Pratt, producer of sand, rock and gravel is sure all the ladies will enjoy the Owl's famous candy from Sandy Pratt's rock and gravel plants.

NOTICE TO CONTRACTORS

Concrete Arch Bridge—Pacific Colony

Sealed bids will be received by Geo. B. McDougall, State Architect, Chief, Division of Architecture, Forum Building, Sacramento, California, **up to 2 o'clock P. M., December 28th, 1926,** said bids then and there to be publicly opened and read, for furnishing all plant, materials, and labor required for the erection and completion of a Bridge over San Jose Creek, Pacific Colony, near Pomona, California, in accordance with plans and specifications therefor, copies of which may be obtained on application to the Division of Architecture, State Department of Public Works, Forum Building, Sacramento, California.

In general the work consists of a reinforced concrete arch of 35'-0" span with abutments, spandrel walls, sidewalks, earth fill for roadway approaches and macadam surfacing of the roadway.

Cash, a bidder's bond made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bid, must be enclosed with each bid.

Only those bids of Contractors who have had experience in the construction of reinforced concrete arch bridges will be considered.

A deposit of twentyfive ($25.00) dollars will be required on plans and specifications, the deposit to be returned immediately upon the return of the plans and specifications to the Division of Architecture at Sacramento, California, in good condition.

The Division of Architecture, State Department of Public Works, reserves the right to reject any or all bids and to waive any informality in any bid received.

All bids must be addressed to Geo. B. McDougall, State Architect, Chief, Division of Architecture, Forum Building, Sacramento, California, and plainly marked on the envelope: "Proposal for Bridge, Pacific Colony, California."

STATE DEPARTMENT OF PUBLIC WORKS, DIVISION OF ARCHITECTURE.
GEO. B. McDOUGALL,
State Architect.

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received by **the California Highway Commission, at the office of the Division Engineer, 211 State Building, San Francisco, California, until 2 o'clock P. M., Monday, December 13th, 1926,** at which time they will be publicly opened and read, for performing work as follows:

San Mateo County between South San Francisco and Burlingame (IV S M 68 B), the following pile timber structures to be repaired.

Station 331+
Station 377+

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the above address.

No bid will be received unless it is made on a proposal form furnished by the Commission. Each bid must be accompanied by cash, or a certified check made payable to the "Secretary, California Highway Commission," for an amount equal to ten (10) per cent of the amount bid, such guaranty to be forfeited should the bidder to whom the contract is awarded fail to enter into the contract.

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

NOTICE TO CONTRACTORS

(Firehouse—City of Salinas)

The Council of the city of Salinas hereby invites sealed bids or proposals for the construction of a fire house in said city, the same to be constructed in accordance with the plans and specifications adopted therefor, which said plans and specifications are now on file in the office of the city clerk of said city and are open for the inspection of interested persons, or may be secured on application and a deposit of $20 to insure the return of same.

Bids must be filed with the said clerk **on or before seven-thirty o'clock P. M., on Monday, the 13th day of December, 1926,** and accompanied by a certified check, payable to the city of Salinas, certified by a responsible bank, in an amount which shall not be less than ten per cent of the aggregate of such bid or proposal, or by a bond for a like sum and so payable, signed by the bidder and two sureties, who shall justify before any officer competent to administer an oath, in doubla said sum and over and above all statutory exemptions.

Bids or proposals will be opened, examined and declared on the said 13th day of December, 1926; the said Council, however, reserving the right to reject any and all bids or proposals, in its discretion.

M. R. KEEF,
Clerk of the city of Salinas and Clerk of the Council of the city of Salinas.

NOTICE TO CONTRACTORS

(Liberty Union High School District)

The Board of Trustees of the Liberty Union High School District hereby advertise for sealed bids, for the construction of a Manual Training Building, to be erected on the High School premises at Brentwood, Contra Costa County, State of California. Plans and specifications of the construction of building as drawn by J. W. Williams, can be obtained from Robt. Wallace Jr., Clerk of the Board, at Brentwood, Calif.

A deposit of Twenty ($20.00) Dollars must be made with the Clerk of the Board, at the time that a set of the plans and specifications are furnished. This amount will be returned at the time that the plans and specifications are returned; with the exception of the successful bidder, whose deposit will be retained until the building has been completed, and accepted by the Board of Trustees. A certified check amounting to Ten (10%) per cent of the bidder's price must accompany the bid; otherwise the bid will not be considered by the Board. The bid must be for a complete building, including heating furnace, electric wiring and sewerage; local firms to be given the preference for the furnishing of the heating furnace, installing of the electric wiring and laying the sewer on an even basis price; the certified check for Ten (10%) per cent of the successful bidder's price will be retained by the Board as a guarantee for the faithful performance of the contract, and will be returned to the successful bidder after the building has been completed and accepted by the Board. Bids will be received by the Board **up to 8 o'clock P. M., on the 20th day of December, 1926.**

The Board reserves the right to reject any or all bids. Address all bids to Robt. Wallace Jr., Brentwood, Calif. Mark on outside of envelope, "Bids on the Manual Training Building at Brentwood, California."

By order of the Board at a meeting held on Nov. 12, 1926.

ROBT. WALLACE, JR.,
Clerk of Board.

NOTICE TO CONTRACTORS

(Sewer Pipe—Hanford, Calif.)

Pursuant to motion duly made and adopted by the Board of Trustees of the City of Hanford at a regular meeting of said Board held on Monday, November 22, 1926, Notice is Hereby Given that said Board of Trustees will receive sealed proposals or bids for the furnishing of 2000 feet, more or less, of No. 1 6 inch Vitrified Sewer Pipe. All the above to be f. o. b. cars at Hanford.

All bidders must accompany their bid with a certified check for 10% of the amount of said bid.

All bids must be on file **on or before 8 o'clock P. M., Monday, December 13, 1926,** at which time said bids will be opened and declared.

All bids must be addressed to D. C. Williams, City Clerk.

The Board of Trustees, expressly reserve the right to reject any and all bids.

Dated at Hanford, California, this 23rd day of November, 1926.

D. C. WILLIAMS,
(Seal) City Clerk.

NOTICE TO CONTRACTORS

Galt Joint Union High School District

NOTICE is hereby given that sealed bids will be received by the Board of Trustees of the Galt Joint Union High School District for the complete erection of a High School Building, in accordance with plans and specifications on file with the Clerk of the Board of Trustees of the Galt Joint Union High School District, Sacramento and San Joaquin Counties, California, and also in the offices of Dean & Dean, Architects, Room 1406, California State Life Building, Sacramento, California.

The said building is to be erected on the property owned by the District, in the City of Galt, Sacramento County, California.

On a deposit of $15.00 with the Architects, complete sets of plans and specifications may be had by any prospective bidder, and retained for a period of 15 days. The deposit will be returned to the bidder on the return of the plans and specifications in good condition.

Bids must be made on proposals obtained at the office of the Architects, and be signed by the bidder, accompanied by a certified check for at least 10% of the amount of the bid or proposal, certified to by some responsible bank or banker, and made payable to Dr. F. W. Harms, Clerk of the Board of Trustees of the Galt Joint Union High School District, said check to be forfeited to and retained by the School District, should the party or parties to whom the contract shall be awarded fail to enter into the contract after the award, or to give bonds as required. Bids must be plainly marked on the exterior "Proposal for the erection of Galt Joint Union High School Building."

All bids must be filed with Dr. F. W. Harms, Clerk of the Board of Trustees of the Galt Joint Union High School District, said check to be forfeited to and retained by the School District, should the party or parties to whom the contract shall be awarded fail to enter into the contract after the award, or to give bonds as required. Bids must be plainly marked on the exterior "Proposal for the erection of the Galt Joint Union High School Building."

All bids must be filed with Dr. F. W. Harms, Clerk of the Board of Trustees of the Galt Joint Union High School District, Galt, California, not later than **7:30 o'clock p. m., Monday, December 20th, 1926.**

The Board of Trustees of the Galt Joint Union High School District reserves the right to reject any and all bids.

BOARD OF TRUSTEES,
GALT JOINT UNION HIGH SCHOOL DISTRICT,
Dr. F. W. Harms, Clerk.

STATE OF CALIFORNIA

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the California Highway Commission, 1211 Sun Finance Building, Los Angeles, Cal., **until 11 o'clock A. M. on December 24, 1926,** at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, of portions of State Highway as follows:

Orange County, through Laguna Beach (VII-Ora-60-B. C.), about one and five-tenths (1.5) miles in length, to be graded and paved with Portland cement concrete.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineers' offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interest of the State.

HARVEY M. TOY,
LOUIS EVERDING,
N. T. EDWARDS,
California Highway Commission.
R. M. MORTON,
State Highway Engineer.
W. F. MIXON, Secretary.
Dated November 29, 1926.

NOTICE TO CONTRACTORS

Montague Water Conservation District

Sealed proposals will be received by the Directors of Montague Water Conservation District, at their office in Montague, Calif., **until four o'clock P. M., December 14, 1926,** for furnishing outlet gates and accessories, and other fabricated metal work for the Shasta River Dam, and will at that time be opened in public.

The material to be furnished will require about 70,000 pounds of metal work. Each proposal should cover all the material required as the contract will not be subdivided.

The material shall be delivered f. o. b. Weed, California, on or before March 1st, 1927.

A contract will be let to the lowest responsible bidder subject to the right reserved by the Board to reject any or all bids.

Each proposal must be accompanied by a certified check or bid bond in the amount of four hundred dollars ($400) payable to the order of Montague Water Conservation District.

All certified checks or bid bonds accompanying rejected bids will be returned. Such check or bond of the successful bidder will be returned, conditioned on his executing the contract and furnishing bonds reuired, within the time stipulated in the proposal.

A full set of plans, specifications and contract form may be obtained from the District Office, Montague, California, on deposit of five dollars ($5.00) which will be repaid of the set is returned in good condition on or before December 14, 1926.

Bidders are requested to state the earliest date on or before which they will agree to deliver the work.

Envelopes enclosing proposals must have stated thereon the word "Proposal" and be addressed "Montague Water Conservation District, Montague, California."

Dated: November 22, 1926.

By order of the Board of Directors of Montague Water Conservation Dist.

ROY E. SWIGART, Secretary.

HYDRATED LIME

(a true dolomite lime)

for Brick Mortar, White Coat and Sand Float Finish, and for inducing plasticity in and water proofing Portland Cement Concrete.

Used in approximately $70,000,000 High Class Pacific Coast construction in last 3 years.

EXAMPLES:—

New Standard Oil Building, San Francisco
Federal Reserve Bank
Pacific Telephone and Telegraph Building
Central Bank, Oakland
Oakland Savings Bank
New Subway Terminal Building, Los Angeles

Sold by most progressive dealers throughout Pacific Coast.

WATER SUPPLY FOR NAPA HOME IS REPORTED

State Engineer Paul Bailey in a report to the State Board of Control recommends Rector Canyon, just east of the Napa State Farm and Veterans' Home, with an annual runoff of 1,830,000,000 gallons, as the best available source of a new water supply for state institutions in the Napa Valley. A concrete arch dam 112 feet high with outlet gates across Rector Canyon would cost $175,000 and wrapped steel pipe lines, $255,000, making a total construction expenditure of $430,000 according to the engineer's report.

VALLEY CEMENT COMPANY TO ISSUE STOCK

Tests of a deposit near Goshen Junction, Tulare County, indicate the presence of sufficient crude cement to care for highway and skyscraper requirements for the next half century, according to a report made to Clifford J. MacMillan, State Corporation Commissioner.

The report was in connection with an application of the Valley Portland Cement Company for a permit to sell 250 of its preferred shares at $80 a share. The permit was granted.

The company, which is a Nevada corporation, is engaged in developing the cement field and the tests referred to are being made by nationally known experts, Commissioner MacMillan was told. Howard Throckmorton, who is said to have been identified with the Key Route System merger at Oakland and the Borax Smith amalgamation recently became president of the Valley concern.

The stock authorized to be sold will be taken by a few individuals. The company's California headquarters are in Los Angeles.

CARPENTERS' STRIKE SUIT TO BE REVIEWED

An order for a review of all the evidence in the case of William L. Hutcheson, international president of the United Brotherhood of Carpenters and Joiners, now under sentence in Superior Court, San Francisco, for contempt, has been granted in the District Court of Appeals. The writ of review was issued on the petition of Attorney Carroll S. Bucher, representing Hutcheson, and reopens a case that has been pending since last June. The writ is returnable January 10. The suit that led to a contempt verdict against Hutcheson, whose home is in Indianapolis, headquarters of the carpenters, was commenced June 25 by W. A. Wunrath, a non-union San Francisco carpenter.

LOS ANGELES BUILDING FOR MONTH OF NOVEMBER

A normal seasonal recession was shown by the report of building operations in Los Angeles for November, 1926, and a slight increase compared with November a year ago, says the Southwest Builder and Contractor.

During November, 1926, the Los Angeles city building department issued 2943 permits with an estimated valuation of $8,688,255. For the same month last year the number of permits was 3409 and the estimated valuation was $8,412,440. For October, 1926, the number of permits was 3482, and the estimated valuation was $9,950,229.

Building operations for November were fairly well balanced. Class A construction comprised seven buildings, estimated to cost $1,597,500; Class B construction, two buildings, estimated to cost, $169,000; Class C construction, 43 buildings, estimated to cost $944,275, and Class D all-frame construction, 1988 buildings, estimated to cost, $4,661,405.

For 11 months of 1926 Los Angeles' building total was $112,916,344 as compared with $135,835,759 for the corresponding period last year.

Housing operations for November, 1926, showed a normal seasonal recession, but indicated continued healthy development. Permits were issued for 934 dwellings and apartment houses estimated to cost $4,575,762, being 31.7 per cent of the entire number of permits and 52.6 per cent of the total valuation for the month. Accommodations were provided for 1519 families.

$65,477,365 RECOMMENDED FOR RIVER AND HARBOR IMPROVEMENTS

Expenditure of $65,477,365 on river and harbor improvements for the fiscal year ending June 30, 1928, is recommended in the annual report of Major General Edwin Jadwin, chief of engineers, U. S. Army. This is distributed as follows:

For river and harbor work, general, $54,159,365; Sacramento River flood control, under Mississippi River Commission, $10,000,000; Sacramento River Flood Control under California Debris Commission, $518,000; examinations, survey and contingencies, $500,000.

Included in the recommendations in the report are the following proposed appropriations:

Los Angeles harbor, $1,800,000; San Francisco harbor, $110,000; Oakland harbor, $345,000; Richmond harbor, $20,000; San Pablo Bay and Mare Island Strait, $500,000; Suisun Bay channel, $30,000; Napa River, $500; Petaluma creek, $60,000; San Rafael creek, $50,000; Humboldt harbor and bay, $350,000; Crescent City harbor, $50,000; San Joaquin River, $25,000; Stockton and Mormon channels, $5000; Mokelumne River, $1400; Sacramento River, $95,000; Sacramento River flood control, $1,000,000; Yuba River debris control, $30,000; regulation of hydraulic mining, $18,000.

General Jadwin also asked for $3,043,870 for civil projects under his jurisdiction that do not come within the scope of river and harbor improvements, yet are closely related thereto.

SEVERAL SEEKING APPOINTMENT AS HIGHWAY ENGINEER

From present indications R. M. Morton, State Highway Engineer, will face considerable competition to retain his post when the present administration changes hands January 3. An imposing list of candidates are either in the field or ready to make the plunge with a little encouragement, capitol gossip has it.

C. C. Cottrell, engineer of the California State Automobile Association, is mentioned quite often around capitol corridors as a possibility. Cottrell is said to have been connected with the engineering department of the Nevada highway system.

Charles W. Deterding, county engineer for Sacramento county, also is being prominently mentioned as a possible successor to Morton.

So many new names are mentioned for the State highway commission that the entry of a new name hardly causes a ripple now. Colonel Ed Fletcher, promoter, newspaper man and road booster of the south, is the latest to be named.

J. L. Flaherty, former supervisor of Riverside county, is mentioned in certain quarters as an aspirant for the same position.

TO SELL POWER UNIT

The Pacific Gas & Electric Company has applied to the State Railroad Commission for permission to sell its entire system of ditches, reservoirs and water rights in the Deer Creek district of Nevada County to the Nevada Irrigation district for $350,000. The application, which included a petition from the purchaser for authority to acquire the system, marks the final step in the development of the district, which will place under irrigation more then 800,000 acres of land, involving the expenditure of more than $8,000,000.

Revision Of Building Code Extends Use Of Concrete Hollow Tile In Los Angeles

Amendments to the Los Angeles city building ordinance classifying concrete hollow tile in two grades and extending its use have been adopted by the city council and approved by the mayor and will go into effect about Dec. 17, 1926. These amendments are embodied in Sec. No. 173 of the building code, paragraphs a, b, c, d, e and f of which have been revised and rewritten. Paragraphs g to m inclusive have not been materially modified. Changes have been made in Sections 9, 20 and 30, relating to Class A, Class B and Class C buildings to conform to the amendments to Sec. 173.

Under the amendments concrete hollow tile of Grade No. 1 may be used in exterior bearing walls and filler walls of buildings not more than two stories in height in Fire Dist. No. 2 and in buildings of not more than three stories in height outside Fire Dists Nos. 1 and 2. It may also be used for filler walls in buildings not more than four stories in height outside Fire Dists. Nos. 1 and 2.

Concrete hollow tile of Grade No. 1 is the one piece type not more than 12 in. long, 8 in. wide and 4 in. high with walls and webs at least 1½ in. thick and in which the air spaces do no exceed one-third the volume of the tile. All other tile conforming to city specifications, which remain unchanged, are classified as Grade No. 2.

Following is the text of the revised paragraphs of Sec. 173, covering all the material changes in the ordinance affecting concrete hollow tile:

Sec. 173. Concrete Hollow Wall Construction. (a) For the purposes of this ordinance concrete hollow tile shall be of grade one or grade two as hereinafter defined in this section.

Grade one concrete hollow tile shall be of the one piece type not more than twelve (12) inches in length, eight (8) inches in width and four (4) inches in height, with walls and webs at least one and one-half (1½) inches in thickness, and in which the cellular of air spaces do not exceed one-third (⅓) of the volume of the tile, and which also conforms to the specifications therefor hereinafter contained in this section.

Grade two concrete hollow tile shall be a concrete tile conforming to the specifications therefor hereinafter contained in this section but which does not conform to the above definition of grade one concrete hollow tile.

(b) Buildings Allowed. Any building not more than two (2) stories in height, located inside of Fire District No. 2, may have exterior bearing walls and filler walls of grade one concrete hollow tile; and any building not more than three (3) stories in height, located outside of Fire Districts Nos. 1 and 2, may have exterior bearing walls of grade one concrete hollow tile; and any building not more than four (4) stories in height, located outside of Fire Districts Nos. 1 and 2, may have filler walls of grade one concrete hollow tile; but every such two, three or four story building, as the case may be, shall comply with all provisions of this ordinance for a Class A, B, C or D building, as the case may be, except that exterior, division and party walls in lieu of being of solid masonry may have not to exceed fifty (50) per cent of their thickness in cellular or air spaces at any point. Every hollow tile wall allowed by this paragraph (paragraph (b) of this section) shall be of the thickness required by Sections 112, 114 and 115 of this ordinance, and shall also comply with all provisions of this section therefor.

Any building, not required to be a Class "A," "B" or "C" building, and not exceeding one or two stories in height as hereinafter provided, may have the exterior or enclosing walls and the partitions thereof constructed of grade one or two concrete hollow tile, concrete hollow blocks, concrete precast slabs or poured concrete hollow walls, if erected outside of the limits of Fire Districts Numbers 1 and 2, and if constructed as specified in this section.

(c) Thickness of Walls and Partitions. Outside of Fire Districts Numbers 1 and 2 the exterior walls of any concrete hollow wall building not over one story in height, or the exterior walls of the second story of a concrete hollow wall building for a one or two family dwelling, private garage or outbuilding, private stable or barn, may be not less than eight (8) inches in thickness, in case such walls do not exceed a clear story height of ten (10) feet, and such eight (8) inch walls may extend up to enclose roof spaces; provided, however,, that a second story may be erected on top of an eight (8) inch wall one story building if the second story is supported independently of such eight (8) inch walls. Every such eight (8) inch walls having an unsupported length of more than twenty-four (24) feet shall be braced laterally every twenty-four (24) feet by means of a reinforced concrete column at least eight (8) inches by twelve (12) inches in size reinforced with at least four (4) one-half inch diameter rods extending eight (8) inches into the foundation under the column and with such rods tied together every twelve (12) inches by at least No. 9 B. & S. gauge wire, or braced by solid masonry piers at least twelve (12) inches by seventeen (17) inches, or braced by cross walls, studded partitions diagonally braced or by some quivalent method of lateral support.

The thickness of any other exterior wall shall be not less than twelve (12) inches for the one story building or for both stories of a two story building, and be not less than the thickness required by this ordinance for clay brick walls. Every exterior wall shall also conform to the requirements of Section 137 of this ordinance for the height of stories in buildings.

Every exterior wall shall be of solid masonry from the underside of the first floor joists to the base of the foundation and be of the same thickness as the walls of the first story unless the underside of the first floor joists are more than five (5) feet above the ground, in which case such portion of the exterior wall shall be at least four (4) inches more in thickness than the first story wall at that point.

A variation of not to exceed one-quarter (¼) of an inch may be allowed in the thickness of walls.

The height of any exterior wall, except an exterior wall constructed of grade one concrete hollow tile, shall not exceed thirty-five (35) feet from the adjoining ground level to the top of the wall at any point.

Bearing and non-bearing partitions, constructed of concrete blocks, concrete tile, concrete slabs, concrete brick or poured concrete, shall be not less in thickness than prescribed in Section 34 for tile partitions, except that no concrete brick partition shall be less than four (4) inches in thickness; or partitions may be constructed as is elsewhere specified in this ordinance for Class "A," "B," "C" or "D" buildings, as the case may be.

No such wall or partition or any portion thereof shall be supported on wood; and no wooden nailing strips other than 2"x4"x8" blocks spaced not less than 24" from center to center and necessary for nailing on trim shall be built into any such wall or partition.

(d) Foundations. Every such wall and partition shall be supported by solid masonry from the base of the foundation or footing to the underside of the first floor joists level, or to the adjoining ground level if higher than the first floor level, and such foundation wall shall be of the thickness elsewhere provided in this section.

Every such wall and partition shall be supported by a continuous foundation having a width at the base or footing thereof of not less than thirteen (13) inches, if supporting eight (8) inch thick walls, and a width of not less than seventeen (17) inches if supporting twelve (12) inch thick walls, and as elsewhere provided in this ordinance for walls of greater thickness.

In all other respects every such wall, foundation and footing shall comply with the provisions of this ordinance for Class "A," "B" or "C" buildings, as the case may be.

(e) General Construction. Every joist, rafter, lintel, beam, girder, truss or other structural member shall be supported in such a manner that the bearing and compressive stress will not exceed one hundred and fifty (150) pounds per square inch on the net area or section of any such wall or partition, and such members shall be anchored and tied to walls as required by this ordinance for masonry buildings, except that joist anchors may be one-half (½) inch diameter rods for eight (8) inch walls.

Floor joists and roof joists or rafters shall be supported by a solid masonry bearing course or lintel extending from a point six (6) inches below such members to the underside thereof of a width equal to the thickness of the wall below, and such solid masonry shall extend to the top of every such joist to which a required anchor is attached. The ends of floor joists extending into walls shall be beveled or fire cut as required by Section 106 of this ordinance.

A continuous solid masonry beam or lintel at least six (6) inches in depth shall be constructed at any level where walls are reduced in thickness to provide a solid support and bearing to carry the wall above that level.

(f) Concrete Hollow Tile Walls. Any building having exterior walls of concrete hollow tile shall not exceed the height limits prescribed in subsections (b) and(c) of this section.

Grade one concrete hollow tile shall comply with all requirements of this ordinance for concrete used in reinforced concrete construction.

Grade two concrete hollow tile shall be composed of at least one part of Portland cement to not to exceed six parts of aggregate consisting of sand or sand and rock, or may be Grade one concrete as specified in Section 178 of this ordinance.

The rock in any such aggregate for concrete products, having walls not more than one and one-half (1½) inches in thickness, shall be a size which will pass through a three-quarter (¾) inch diameter ring; and all concrete shall comply with the other provisions of this ordinance therefor.

Grade one concrete hollow tile shall be of such a hardness and density that the absorption of water thereby will not exceed eight (8) per cent of the dry weight of the tile when immersed in water for forty-eight (48) hours; and grade two concrete hollow tile shall not absorb more than ten (10) per cent of water under the same conditions.

Grade one concrete hollow tile shall have an ultimate crushing strength of at least one thousand (1000) pounds per square inch on the gross cross-sectional area of the tile when tested with the walls and webs in a vertical position; and grade two concrete hol-

low tile shall have an ultimate crushing strength of at least twelve hundred (1200) pounds per square inch on the net cross-sectional area of the walls and webs of the tile when tested with the walls and webs in a vertical position.

Grade one concrete hollow tile shall have the exterior surfaces of the walls and webs of sufficient roughness to provide a strong mechanical bond for mortar and plaster.

In the construction of grade one concrete hollow tile walls half tile, jamb tile or other similar special shapes may be used when approved by the Board of Building and Safety Commissioners.

Each concrete tile shall be moulded with straight sides and square angles, be free from injurious check s or cracks, have a clear ring when struck with a hammer, and the tile shall attain an age of not less than twenty-eight (28) days before being used in the construction of any building. Concrete tile shall have cross webs extending the full height or width thereof not more than eight (8) inches apart in the length of the tile joining the outer walls together and such walls and webs shall be not less than one and one-quarter (1¼) inches in thickness; or such tile shall have cross webs extending the full height or width thereof not more than four (4) inches apart in the length of the tile joining the outer walls together and such walls and webs shall be not less than one (1) inch in thickness; or such tile may have not to exceed thirty-five (35) per cent of its volume in voids or air spaces, and in which no wall, web or other solid portion of such tile is less than one (1) inch in thickness at any point, and grade one concrete hollow tile shall have such walls and webs at least one and one-half (1½) inches in thickness.

All such tile shall be laid with webs and air spaces in a vertical position, and shall be well bedded in mortar composed of not less than one part cement to six parts of sand and lime mortar. The mortar shall be used within forty-five (45) minutes after the cement is added thereto and such tile shall be thoroughly wet with water immediately before it is laid in the wall.

Bond shall be provided for concrete hollow tile by breaking vertical joints in each course in height of the wall with vertical webs superimposed over the webs in the course below, and where tile is used of a lesser width than the thickness of the wall or partition bond shall be provided by means of a continuous header course the full thickness of the wall every twenty-four (24) inches in the height thereof; and bond shall be provided at all corners by tile which project and mesh into the abutting walls securely tieing them together.

In buildings of not more than one story in height concrete hollow tile need not be laid in Mortar in the event that each tile is moulded and constructed so as to be mechanically interlocking with the tile in the course above and below it in at least two directions by means of grooves, chases or projections securely holding each tile in place after being laid in the wall, and in case concrete studs not less than 4"x4" in cross sectional area extending the full height of the wall are poured into such tile after they are laid in the wall at least every six feet in the length of the wall or partition, and in case such wall is capped with a continuous poured reinforced concrete beam or lintel of a width equal to the thickness of the wall and a depth of at least six inches and is reinforced with at least two one-quarter inch steel rods placed in the upper half of such beam or lintel.

John H. McBride of Pasadena has tendered his resignation to Governor Richardson as a member of the State Immigration and Housing Commission. The governor declares he will not fill the vacancy, leaving the duty to the new governor.

Better Built And Better Financed Buildings Demanded

(Special Correspondence)

The American Construction Council in its national survey of construction conditions just made reports healthy activity in the building industry generally. The volume of operations points toward as great a total for the present year as for 1925, although there has been a slight seasonal recession and the situation is somewhat spotted in various parts of the country. The amount of work scheduled and contemplated for winter operations is very favorable.

The character of operations is a much more substantial type than that of the past few years, showing an increased demand for better built and probably financed buildings which the American Construction Council has been advocating so strenuously since the setting in of the building boom in 1922. This is by far the healthiest situation that has existed in the building industry for some years as there has been a very noticeable recession in new speculative building not backed up by adequate values, and a better class of business is coming upon the market.

The slowing down in housing construction further reflects a favorable trend, with an increasing demand for a higher class of apartments and hotels and of suburban homes, the need for which the Council emphasized during the peak period of indiscriminate house building the past few years.

Building operations in general show a large percentage of structures for commercial and industrial purposes, public buildings and public utilities. There is a better supply of rentable space of good quality.

Material prices and labor are reported fairly well stabilized with no apparent indication of any radical change in the near future. Labor productivity is increasing.

Contracts for engineering construction show a very substantial increase over the first ten months of last year with equally favorable prospects as to proposed work.

Highway construction has been very active, the main obstacle being the lack of stable fnincing which would permit a continuous road building program in some states. Some of the trunk line railroads report the greatest capital expenditures on construction for a number of years with a corresponding amount of projected work.

In general the reports favor the probability of well sustained business in all branches of the construction industry for some time to come. Some persons, however, urge caution along all lines of building operations except what is necessary for private use to meet the needs of industry in growing districts, feeling that this will help make for stability of values.

The great need continues for better conceived, better financed and better built buildings, accompanied by intelligent city, town, and community planning not only as to building proper but also with regard to traffic conditions and health hazards. The public can now get, and should insist upon getting, full value for every dollar it puts into highway construction, which means that it must demand not only better highways of first class construction but also stabilized highway building programs so as to permit economical construction.

One Hundred Story Buildings To Be Common In Future Is Edict

Santa Barbarans, where the height of buildings are limited to six stories, and Los Angeles inhabitants, where a building may be no taller than 13 stories, may gasp, but an architect of New York says people now living will live to see buildings 100 stories tall in the great cities of America.

Alfred C. Bossom, New York architect, is responsible for the statement.

There will be two strata of tenantry, the residential population living atop of the business institutions of the city, he asserted recently. Continuing he said:

Fifteen stories, perhaps, will be as high as trade will extend, and there will begin the residential section, reaching in series of steps or set-backs to a height of 100 floors. On each step will be gardens or playgrounds. The residents of the upper stratum may be employed in the business section of the same structure. Should this be the general scheme there would end the pressing problem of providing continually additional transit facilities. My prophecies will be realized within 50 years—20 years for some sections of the city.

There will be recessional sidewalks around the buildings allowing the residents to stroll around the entire structure, not unlike a sightseer on a mountain trail. In the Chili building in Hamburg, Germany, recessional sidewalks have been built around it. These allow the office workers to spend their lunch hour high above the noise and bad air, yet in perfect safety. Stores, lunchrooms and other concessions will be built on these sidewalks. There are possibilities of new standards of healthfulness in the densely crowded cities.

There will be no obstruction in the view because of one skyscraper being in front of the other. The enormous size of the building at the base will permit the structures to rise only at intervals of one block and their recessional construction, a result of the "zoning law," a sort of pyramidal design, will make their highest points on a perspective with other nearby skyscrapers, so that the tenant can always have a clear view in any direction.

The large structures will automatically stop the smaller ones, for there will be no profit to the owner of a small building should he compete with the rates offered by these great structures of the future.

The trend for tall buildings is an economic one.

Every three floors or so a setback will start, and on its level there will be private gardens, with real trees, grass plots, pools and flowers in abundance.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

The proposed Mount Whitney Highway project was considered at a recent meeting in Bakersfield of the supervisors of Kern, Tulare and Inyo counties and directors of the joint highway district. Preliminary surveys for the road have been prepared. The cost is estimated at $1,000,000.

The Campbell Bill, which proposes to have all government construction projects, involving more than $5000, handled on a contract basis, will come up before the short session of Congress which will convene this month. Hearings were held on this measure last Winter before the House Judiciary Committee.

On Novmber 20, 1926, there were 52 strikes before the Department for settlement and in addition 9 controversies which had not reached the strike stage. Total number of cases pending 61—10 of which are new. The 10 new cases may be compared with 9 and 5 of the first and second weeks preceding.

An immediate appropriation of $700,000 to complete the new state library and office buildings in Sacramento will be recommended to the 1927 legislature by the present State Board of Control. The $8,500,000 bond issue approved by voters last month includes $1,250,000 for completion of the new buildings and restoration of the state capitol, but the bonds may not be sold for several months

While not exactly a bolt from the blue, the announcement from the statistical bureau of the Department of Labor that wages in the United States are higher than they were ever before is still interesting. As of May 15 last the average of union scales of wages in 66 cities was 150 per cent above the level of 1913. For the full-time week, which is shorter than it was, the pay envelope is 133 per cent fatter than it was in 1913—in other words, it contains two and a third times the money it contained then. With the general price level hardly 50 per cent above the 1913 level, it would seem that wages were about as high as they could safely go. Yet there have been a few advances here and there since the middle of May and demands for other advances, as those of the railroad brotherhoods, are pending.—(The Economist).

Geo. N. Radle, Oakland civil engineer, is being considered by Governor-elect C. C. Young for appointment as chief engineer of the State Department of Public Works, it is reported at Sacramento. Radle was chief assistant engineer in the office of the state commissioner of public works from 1901 to 1906, later served as city engineer of Sacramento for seven years and has recently been engaged in private engineering projects. Paul Bailey, present chief engineer of the public works department, is slated for dismissal, according to reports, due to the fact that he is said to be out of sympathy with Young's stand in favor of the Swing-Johnson bill to develop the Colorado river project.

Harry H. Hume has been re-appointed county engineer by the Butte County supervisors, the appointment to cover a period of four years.

John Alvin Rymer and John Steward Switzer will operate under a partnership in the East Bay section under the firm name of Exchange Electric Company.

Seth G. Beach, 74 years old, first El Dorado county pioneer lumberman, died in Placerville, Dec. 6. He was a native of Elmira, N. Y. A widow and four children survive.

Bids will be considered by the Modesto and Trulock Irrigation Districts, meeting at Turlock on December 30, to furnish two 7500-KW electric generating units at the Don Pedro Dam. The estimated cost is placed at $750,000.

Resident workers for local construction is the policy adopted by the Berkeley Board of Education in announcing its stand on contemplated extensive improvements in the Berkeley school system, contingent upon the passage of the $2,942,000 school bond issue to be voted upon next Saturday.

Roche Harbor Lime & Cement Co., and Pacific Lime & Plaster Co., announce that all lime products of the Roche Harbor Lime & Cement Company will hereafter be distributed in Northern California, wholesale only, by the Pacific Lime & Plaster Company, maintaining main offices at 58 Sutter street, San Francisco.

To eliminate any possibility of additional flood damage during construction, the collapsed portion of the Claremont Tunnel of the East Bay Municipal Water District will not be rebuilt until next April when all flood menace will be eliminated, according to the contractors, Grier & Mead. The loss due to the flood and accident will exceed $50,000, the contractors declare.

A resolution has been introduced in the Stockton city council seeking the appointment of a City Port Commission to handle the affairs of Stockton's deep water port and to act in an advisory capacity to the city council in all matters involving expenditures connected with the harbor.

TRADE NOTES

White Crystal Magnesite Co. of San Francisco, capitalized at $150,000, has been incorporated with the following directors: F. A. Alexander, J. M. Staples and L. P. Fogarty.

Leitch Roofing Co., and Leitch Draying Company announce the removal of their offices and display rooms from 1126 Second street to 1009 Thirteenth street, Sacramento. The concern does a wholesale and retail business specializing in Vickalt membrane roofs, fire resisting shingles and tar and gravel roofing in addition to a general draying business.

Hayward Electric Co. has moved from Castro and A streets to the new Oakes Building in A street, Hayward. The concern is owned by Henry H. Fenneman

Buick Truck $450.00 Guaranteed first Carjolee Wall Paper Co., Inc., capitalized at $20,000, has been incorporated in San Francisco. Directors are: C. J. McFall, Hilda L. McFall, K. J. Collins, J. E. Landerville and R. L. Winn.

Bay City Asbestos Co., Inc., is having a new plant erected at Tenth and Jackson streets, Oakland. The company acts as distributor and applying agent for the Johns-Manville Company on asbestos shingles, insulations, packing and gaskets.

Diamond Point Roofing Company is occupying quarters at 2847 Hannah street, Oakland, and will engage in a general contract and jobbing roofing business. J. F. McCarthy, D. C. Little, H. Ford and H. Booth are members of the firm.

E. A. Hunn was elected manager of the Marysville Brick Co., Marysville, at a recent meeting of stockholders, It is announced by Erling S. Norby, president of the company. The company proposes to manufacture not less than 1,500,000 brick during the season run

Stirling City sawmill operated by the Diamond Match Company has closed down for the Winter after a season's run of 36,000,000 feet, according to W. B. Dean, general manager of California lumber operations for the Diamond Match Company.

The Oakdale plant of the Atlas Rock Company has closed down for repairs after a 2-year run. The company just completed a contract with the Oakdale and San Joaquin Irrigation Districts for the delivery of 200,000 tons of sand and gravel for use in the Melones Dam project. A 40,000-ton contract with the Pacific Gas & Electric Company for the power house in connection with dam was also filled by the Atlas Company.

D. A. Williamson Lumber Co., of Lodi, has leased property on the Lincoln Highway at Galt, Sacramento, and will establish offices and yards. Williamson was formerly manager of the Ferguson yards at Galt and when the Tilden Lumber Company took over that plant, Williamson opened a yard at Lockeford which has since been closed.

Dispatches received in San Francisco from Seattle announce the appointment of receivers there for the Southern Alberta Lumber & Supply Company, one of the great lumber exporting firms of the continent, which is said to do a business running into millions of dollars annually. S. W. Barker and L. T. Silvain of Seattle were named as receivers by Judge Mitchell Gilliam. The application for the receivership was made by the Eclipse Mill Company of Seattle, which claimed $6,003.88 for lumber delivered during the past three years. An affidavit signed by Sam B. Purdy, president of the Alberta company, in which inability to pay is admitted, was filed with the application.

City of Roseville will call an election shortly to vote bonds of $326,000 to finance construction of a municipal water system which will involve 118,815 feet of piping estimated to cost $168,987 in addition to a 6,000,000-gallon reservoir.

ALONG the LINE

Lester Keaton, San Jose plumber, has been appointed assistant city plumbing inspector of San Jose. The appointment was made by C. B. Goodwin, city manager. Fred N. Johnson is chief plumbing inspector.

Making a survey of the industrial situation with reference to carpenters, George H. Lakey of Chicago, vice president of the United Brotherhood of Carpenters is in Oakland as the personal representative of William Hutchinson, general president. Lakey will direct the bay district campaign for the closed shop.

F. Curt Miller, city engineer of Elsinore has rendered his resignation to city trustees. The city board contemplates the appointment of the Currie Engineering Company of Alhambra to fill the vacancy. A street improvement program is under discussion.

C. L. Riley, chief engineer for the South San Joaquin Irrigation District at Manteca for the past eighteen months, has tendered his resignation to the directors of the district. G. K. Parker, formerly with the Mathews Construction Company, has been named to fill the position vacated by Riley.

L. B. Shannon of the Department of Irrigation of the South African government and N. Shand of Capetown, both engineers, were recent visitors to the offices of the California State Highway Commission at Sacramento. Both are seeking information concerning the engineering phases of building California state highways. Mr. Shannon is from Pretoria, while Mr. Shand is connected with the Capetown Corporation of Capetown, South Africa.

FEDERAL PROSECUTION AND LABOR DISPUTE

Federal prosecution and injunction preceedings are both being invoked in an effort to remove union restrictions on the free use of artificial building stone in the New York metropolitan district. Members of the Journeymen Stone Cutters Association have for some years refused to set artificial stone manufactured in plants by men who were not members of the organization. The boycott extends to those products which, though made by union labor, yet are not made by the particular organization of union men that the New York workers accept.

A number of strikes have been called in and around New York to force the demands of the Journeymen Stone Cutters Association. Because of these activities a federal grand jury returned indictments on July 8th this year against five union officials. During the same month the Decorative Stone Company sought an injunction in the federal court to restrain the labor unions from combining or conspiring to interfere with the sale, erection, installation or use of their product.

Both actions charge that a monopoly is created through the refusal of the local stone cutters to work on cast stone imported from sections outside the territory over which the soft stone workers maintain job control. The federal indictments charging conspiracy in restraint of trade are to be pushed in the federal courts in New York City by Assistant U. S. Attorney A. B. Royce, the case being set for the latter part of this month.

Are American High Wages Attributable To Labor Unions

(By Halbert P. Gillette, Editor, Engineering and Contracting)

Recently the American Federation of Labor made the claim that high wages in America are attributable to the efforts of labor unions; and it occurs to us to inquire whether the labor unions of England, which are far more powerful than those of America, are claiming the credit for the low wages that prevail there. And we wonder whether the castes of India, which are labor unions so ancient that they have become part of the religion, are likewise pointing with pride to what they have accomplished in wage matters.

According to our census, about 40 per cent of our people are engaged in "gainful occupation." This does not include housewives, whose occupation is also gainful if "a penny saved is a penny earned." Since we number almost 120 million people, we number about 48 million workers—toilers for gain with brain and hand. And of these 48 millions barely 4 millions are members of labor unions. It would be peculiar indeed if 9 per cent of the workers had been able to raise the wages of the entire 100 per cent merely by bargaining collectively to have their own wages raised; and it would be still more peculiar if, during a century, a few union workers could have more than quadrupled real wages in America, that is quadrupled wages measured in goods bought.

It is easy to claim credit for such an achievement as that, but the claim is not likely to receive much attention unless sustained by some sort of evidence. It is asking us to believe not merely that the tail has been wagging the dog, but that the hairs on the end of the tail have been wagging the dog. But we ask for some evidence in support of the claim.

Without a question, labor unions have hastened the adoption of a shorter working day; but a shorter working day would not have been adopted, had it not become possible to produce more goods in the 8 hours of today than in the 11 hours of our great grandfathers. Yet who has ever put forth the claim for the labor unions that they have been instrumental in increasing productivity? Have they not, usually opposed any increase in productivity? Do they not even yet oppose it in the face of overwhelming evidence that American prosperity is based entirely upon increasing productivity?

Committees of English labor unionists have recently visited America, and have reported that the amazingly high wages here are attributable to our high productivity and to the willingness of our capitalists to share liberally with the workers. Not one of these English workers has reported that our American labor unions have brought this enviable condition about.

You can't squeeze a pint of juice out of a gill-sized lemon, and the average worker can't squeeze an eight-dollar wage out of a two-dollar average output; all he can possibly squeeze out of such an output is something less than two dollars. And, so far as we see, all the labor unions anywhere have ever accomplished is to squeeze a little bit more of juice out of the lemon than they might have received without hard squeezing. But is is questionable whether even hard squeezing of the lemon has yielded as much juice as could have been secured by other means. At any rate the raising of a bigger crop of bigger lemons yields much more lemon juice than the most powerful of presses can extract from a small crop of undersized lemons, as many of our American labor union leaders are beginning to realize.

Still there are several labor unions in which increased output is bitterly opposed, notably in the building trades. Without realizing it perhaps, those union men are riding on the backs of other workers who are not so short sighted, for if all workers were so resistant to increased output as are most of the building trade workers, there certainly would be no $1.50 an hour plasterers, masons, etc.

The editor has talked with a good many building contractors, and has yet to hear any violent opposition to paying high wages where the workers are really trying to do a faithful day's work. The opposition is always to the restriction of output; and it is unfortunate for the building workers themselves that this opposition has yet been powerful enough to bring all those workers to their senses.

Restriction of output and limitation of apprentices has been tried "to the limit" for generations in Europe, and long before that in India and Asia. Wherever it has been most successful, there have wages been the lowest.

America's vast expanse of unused acres and her relative scarcity of population served for two centuries to prevent men from thinking much about restricting their output in order to prolong their jobs. By that time, our inventors and business men had so greatly increased outputs and wages that the old European and Hindu theories of limiting outputs were seen by most workers, to be false. Then, too, we have a nation composed of many states, each with its own laws, and this has helped greatly; as, for example, when Illinois passed laws that gave the union coal miners a power that they were not slow to abuse, Kentucky and West Virginia still were free from the tyranny that existed in Illinois.

So long as labor unions confine their efforts to bargaining for the best attainable wages and conditions without intimidation, without restrictions upon the output of individuals, and without attempting to usurp the functions of management, there will be few employers who will deny their usefulness or belittle their accomplishments. No man blames another for trying to sell his services at the highest attainable price. The blame occurs when attempts are made to force a price upon the buyer, and especially when the goods delivered for the price are under weight.

SPAIN TO PURCHASE ROAD BUILDING EQUIPMENT

The Spanish government has authorized the immediate purchase of road rollers, tanks and tractors to the amount of 19,000,000 pesetas, (about $2,900,000 at present exchange) according to a cable to the Department of Commerce from Madrid. The public roads program of Spain provides for highway construction involving an expenditure of 55,000,000 pesetas ($8,360,000) and of bridges costing 4,000,000 pesetas ($608,000).

CONTRACTOR SUES HOSPITAL

F. T. Edmans, San Jose contractor, has brought suit against the San Jose Hospital for $720 alleged unpaid on a contract for construction of the annex to the institution recently. The complaint charges that a contract entered into on October 23 called for payment of $44,697 at completion of the work. An additional $661.87 was agreed upon for other labor and materials, Edmans declares. Of the total contract price, $44,638.87 has been paid, leaving an unpaid balance of $720, he alleges.

SACRAMENTO BUILDING

One hundred and eighty-two building permits were issued by Ben H. Covell, city building inspector at Sacramento, during the month of November for improvements estimated to cost $369,378.50.

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

SAN JOSE CONTRACTORS URGE LICENSE AND BOND LAW

Building Contractors' Association of Santa Clara County has proposed adoption of an ordinance to the San Jose City council to license and bond persons constructing buildings within the city limits. The matter has been referred to the Ordinance and Franchise Committee for investigation and report.

BRICK CONTRACTORS ELECT

H. B. Brigham was elected president of the Brick Contractors' Craft Council of Alameda County, at the annual meeting held in the Directors' Room of the Builders' Exchange of Alameda County. Other officers elected to serve during the year 1927 are: Herman Block, vice-president; Tony D. Bebbe, secretary and Herbert Beckwith, treasurer. Beckwith was elected a delegate to the Central Council with Steve McPherson as alternate.

PLUMBERS PROVIDE FUNDS FOR TRADE COURSES

The board of directors and committee chairman of the National Association of Master Plumbers recently held a three-day meeting at Hotel Statler, St. Louis. Decision was made to hold the 1927 annual convention of the association at Minneapolis on June 21st to 23rd. The board voted a substantial increase to the contribution from the association to the expense of maintaining the course in heating, plumbing and ventilating at the Carnegie Institute of Technology at Pittsburgh.

PEACE IN CHICAGO

Peace in Chicago's building industry for at least three years has been assured as a result of an agreement negotiated between the building trades council, representing 90,000 union men, and the building construction employers' association. The agreement, negotiated by Patrick F. Sullivan, president of the council, makes arbitration of grievances compulsory. The new contract according to both organizations, assures continuation of $300,000,000 worth of construction

ENGINEERS OF LOS ANGELES ORGANIZE CLUB

A tentative organization for an Engineers' Club of Los Angeles has been formed with J. E. Macdonald president pro tem and W. C. Hogoboom secretary pro tem. Porter H. Albright, Myron C. Burr and E. O. Slater were appointed a committee to draft a constitution and by-laws and to make arrangements for permanent organization. Dues were fixed at $5 for the year ending Dec. 31, 1926, without membership fee for all members affiliating before that date. Objects of the club will be the promotion of social activities, public relations, engineering employment and joint publication for all technical groups.

WEEKLY MEETING OF EXCHANGE TO BE RESUMED

The Richmond Builders' Exchange has voted to continue meeting every Friday evening instead of holding one meeting a month. Thursday afternoon luncheons will be held by the organization as usual.

A preliminary draft of the uniform building code for Pacific Coast cities, presented to the exchange by A. J Hurley, city building inspector of Richmond, will be discussed at each meeting of the exchange.

RULE OF PAINTERS' INTERNATIONAL IS NOT UNLAWFUL—COURT DECISION

The rule of the Brotherhood of Painters, Decorators & Paperhangers requiring contractors doing work in a city other than the city of their headquarters to pay to their employers the local wage rate and work the local number of hours, or to pay that of their home city and working home hours, whichever is the higher in wages and shorter in hours, has been several times before the courts. The courts have divided on the subject; the lower federal courts enjoining the operation of the rule, and the state courts refusing to interfere with it.

The U. S. Circuit Court of Appeals in the case of the Barker Painting Company v. Brotherhood of Painters, Decorators and Paperhangers ruled as follows:

"All the cited state decisions are against injunctions; all the federal decisions favor injunctions. The learned trial court was inclined to the reasoning of the state decisions; and so are we, not because the respondents have shown that the rules are unlawful, but, rather, because the complainant has failed to show that they are unlawful."

The court further states that it is now settled law that employers have no vested interest in the labor of workers and that their workers have a right, individually and collectively, to lay down terms on which they will sell their labor for the highest return they can obtain, and when not satisfied, they have a right to strike. The court held in the above case that so long as they do this in their own interest, not with the purpose of assailing others, such action in itself is not unlawful.

CERTIFICATES GRANTED

Carl Frederic Gromme, 540 Powell street, San Francisco, and William E. Coffman, 871 42nd St., Sacramento, have been granted certificates to practice architecture in California. The certificates were issued at the last regular meeting of the California State Board of Architecture, Northern District.

BONDS VOTED

Turlock Irrigation District at a recent election voted bonds of $600,000 of which $514,000 will finance construction of two new power units at the Don Pedro Dam and $86,000 for line construction and additions to the Turlock substation.

FRESNO BUILDERS' EXCHANGE GROWS IN MEMBERSHIP

Membership in the Fresno Builders' Exchange has increased twenty-five per cent in the last two weeks as a result of a membership campaign, it is announced by H. L. Hardman, secretary of the organization.

A general meeting of the exchange will be held January 11 at the exchange's quarters in L street, Fresno, when amendments to the constitution and by-laws will be submitted for adoption. No drastic changes are contemplated, the secretary reports, merely some which will facilitate the working of the constitution.

Ben Tyre, a director, resigned due to the press of private business and a new director will be elected at the meeting. He is still an active member of the exchange.

A speaker of the American General Contractors' Association is to be brought from Los Angeles to address members at the meeting, according to tentative plans. The general subjects will be building estimating and general contracting accounting.

FUNDAMENTALS OF BUILDING TO RESIST CYCLONES

Examination of the destructive effects of recent hurricanes in Maryland and the Southern Mississippi valley, accompanied by many casualties, have prompted the engineers of the National Lumber Manufacturers Association to advise the public of two fundamental rules in erecting buildings to resist hurricanes and tornadoes.

It is admitted that it is perhaps not feasible generally to erect buildings that will certainly stand up against the terrific force of tornadoes, (popularly called cyclones) which exert simultaneously pressure and explosive forces, accompanied by a lifting power that pick up steel rails, brick and concrete piers and heavy boulders and carries them considerahle distances. Yet it is urged that in addition to well-braced and sturdy construction, whatever the materials, these two precautions should always be taken:

1. The sills of the buildings should be anchored strongly to monolithic concrete foundations, which, in turn, should be as massive and deep seated as cost considerations will permit. Foundations of built-up masonry, with horizontal planes of weakness are not so effective.

2. The roof structure should be strongly bolted or nailed to the wall, and should afford little opportunity for the wind pressure to take effect under the eaves.

COOLIDGE DAM AWARD

Atkinson-Spicer Co., of Los Angeles, bidding $2,268,025.50, has been awarded a contract by the U. S. Indian Irrigation Service to construct the Coolidge Multiple Dome Dam at San Carlos, Arizona. Construction will involve approximately 190,930 cubic yards of concrete; 2,250 tons of steel, 26,000 cubic yards of sand and gravel excavation and 209,000 cubic yards of rock excavation.

Building News Section

APARTMENTS

Permit Applied For.
APARTMENTS Cost, $40,000
SAN FRANCISCO. E Pierce 96 N Alhambra Street.
Three-story and basement frame apartment house (12 3-room apts).
Owner—Viggic Rasmussen, 95 Cervantes Blvd., San Francisco.
Architect—Albert Larsen, 447 Sutter St., San Francisco.
Work will be done by day's labor and segregated contracts.

Plans Being Prepared.
APARTMENTS Cost, $40,000
OAKLAND, Alameda Co., Hawthorne Street.
Three-story frame and stucco (18 1 and 2-room) apartments.
Owner—Withheld.
Architect—Clay N. Burrell, American Bank Bldg., Oakland.

Taking Sub-Bids.
APARTMENTS Cost, $60,000
SAN FRANCISCO. N Sacramento St. 137 W Van Ness Ave.
Six-story and basement reinforced concrete (36) apartments.
Owner — J. Greenbach, Hearst Bldg., San Francisco.
Architect—C. O. Clausen, Hearst Bldg., San Francisco.
As previously reported, structural steel awarded to Herrick Iron Works, 18th and Campbell Sts., Oakland; concrete work to Mission Concrete Co., 125 Kissling St., San Francisco.

Taking Sub-Bids.
APARTMENTS Cost, $250,000
SAN FRANCISCO. Hyde Street near Greenwich Street.
Ten-story and basement Class A steel frame community apartment building (1 apt. to a floor.) (stucco exterior, terra cotta trim)
Owner — Joseph Greenback, Hearst Bldg., San Francisco.
Architect—C. O. Clausen, Hearst Bldg., San Francisco.
As previously reported, concrete work awarded to Mission Concrete Co., 123 Kissling St., San Francisco; structural steel to Herrick Iron Works, 18th and Campbell Sts., Oakland.

December 4, 1926
Owner Taking Segregated Figures.
APARTMENTS Cost, $55,000
SAN FRANCISCO. NE Chestnut and Divisadero Sts.
Three-story and basement frame and stucco apartment house (6 3-room and 21 2-room apts).
Owner—R. J. Stempel, 80 Sotelo St., San Francisco.
Architect — J. C. Hladik, Monadnock Bldg., San Francisco.

SACRAMENTO, Cal.—Immediate appropriation of $700,000 to complete new state library and office buildings at State Capitol grounds will be recommended to the 1927 State Legislature which meets in January by the State Board of Control. The $8,500,000 bond issue approved last month includes $1,250,000 for completion of the new buildings, and the restoration of the state capitol. The bonds, however, may not be sold for several months.

Plans have been prepared by architects Weeks and Day, 315 Montgomery Street, San Francisco, and are now being checked by the State Architect's office, Geo. B. McDougall at Sacramento. Slight changes will be made in the plans for requirements of the different departments.

FRESNO, Fresno Co., Calif.—Until Jan. 4, 1927, 2 p. m., bids will be received by D. M. Barnwell, county clerk, for rewiring and furnishing and installing fixtures at Fresno County Library. Cert. RESIDENCE Cost, $12,000
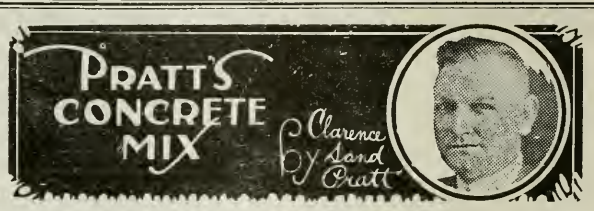
SAN FRANCISCO. Ventura Ave., Forest Hill.
Two-story hollow tile residence with tile roof.
Owner—Withheld.
Architect—Willis E. Huson, Oakdale Ave., Mill Valley.



SANDY PRATT ANOTHER "MAYOR"

Clarence (Sandy) Pratt has been "Mayor" of beautiful Westwood Park since he moved into this bungalow district nine years ago, when only six families were living there (now Westwood Park boasts of over 700 families). Sandy has just moved into a new home in Monterey Heights between Westwood Park and St. Francis Wood. Mr. and Mrs. Pratt's house overlooks the Pacific Ocean, Farralone Islands, Lake Merced, San Francisco Bay, Oakland, Alameda, Hayward and the surrounding country.

Sandy has elected himself "Mayor" of exclusive Monterey Heights and is already boosting for this sub-division of Baldwin & Howell's, who are well-known real estaters. Hans Nelson, the builder, built Sandy's wonderful home, and Charlie Strothoff was the architect.

The question that attorneys and politicians are now trying to decide is: Can Sandy still hold down the office as "Mayor" of Westwood Park, and still claim the "Mayor's" office in exclusive Monterey Heights? Sandy also claims to be "Mayor" of Prattco, (Monterey County), and Prattrock (near Folsom) where Sandy has sand, rock and gravel producing plants. We presume that he claims to be "Mayor" because his famous, much-advertised, electric lighted signs at Prattco and Prattrock read: "Speed Limit 90 miles Per Hour, Fords Do Your Best, Sandy Pratt, 'Mayor.'" In real life, Sandy is President of the Pratt Building Material Co.—West of Twin Peaks (San Francisco) Community News., Dec. 3, 1926.

WESTWOOD PARK MOURNS LOSS OF ITS MAYOR

Clarence (Sandy) Pratt has been "mayor" of beautiful Westwood Park since he moved into this bungalow district nine year ago, when only six families were living there. (Now Westwood boasts of over 700 families). Sandy has just moved into a new home in Monterey Heights, between Westwood Park and St. Francis Wood.

Sandy has elected himself "mayor" of exclusive Monterey Heights and is already boosting for this sub-division of Baldwin & Howell's, well-known real estaters. Hans Nelson, the builder, built Sandy's wonderful home, and Charley Strothoff was the architect.—San Francisco Bulletin, Dec. 4, 1926.

AS SANDY has said.

ON MANY occasions.

IT PAYS.

TO TELL the world.

ABOUT YOURSELF.

(SEE ABOVE K.C.B-like story).

NOT FORGETTING to **"sandwich"** in.

ABOUT YOUR sand business.

SANDY ALWAYS tells the public.

THAT HIS clean, sharp sand.

AND HIS clean, hard rock.

AND WASHED gravel.

IS FOR sale.

AT SACRAMENTO, Marysville.

PRATTROCK (NEAR Folsom).

MAYHEW (SACRAMENTO County).

AND PRATTCO (Monterey County).

AND WHEN you stop.

TO THINK about it.

ARE YOU not rendering.

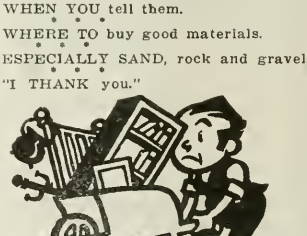
A SERVICE to the public.

WHEN YOU tell them.

WHERE TO buy good materials.

ESPECIALLY SAND, rock and gravel.

"I THANK you."



Clarence (Sandy) Pratt, President of the Pratt Building Material Company, and producer of clean sand, rock and gravel, moving from beautiful Westwood Park to wonderful Monterey Heights, where Sandy has an unobstructed view of the Pacific Ocean, San Francisco Bay, Oakland, Alameda, etc.

Owner Taking Segregated Figures.
RESIDENCE Cost, $10,000
SAN FRANCISCO. Oeary St., bet. 37th and 38th Aves.

BUSINESS OPPORTUNITIES

SAN FRANCISCO—Further information regarding these opportunities may be obtained from the office of Larsen Advance Construction Reports, 818 Mission Street, San Francisco, either by phone, letter or personal call. Requestions for additional information should be made to the Business Opportunities Department. Such requests must be accompanied by the Index Number of each opportunity.

10991—New York and Chile. The United States buying office of a Chilean company wishes to get in touch with suppliers of Oregon pine lumber; also importers of foreign woods, such as mahogany, lignum vitae and teak. This would be required for export to Chile. They supply excellent San Francisco and Berkeley references.

10993—Paris, France. Large manufacturers of asbestos cement building materials, such as shingles, corrugated roofing sheets, panels, tiles, etc., absolutely fireproof, of high insulating properties, desire to establish a Pacific Coast agency. Prices can beat all competition.

10995—London, Berlin and Paris. Resident American gentleman in touch with business, professional and sales interests in Europe is in position to act as agent Excellent connections and references.

10996—Perry, Fla. The senior of an old-established Hamburg (Germany) importing, exporting and commission house, well connected at all important European business centers, at present traveling in the U. S. A., is open to negotiate personally with reliable American firms desirous of getting in touch with European trade; he also will be disposed to intermediate any relations between this country and abroad or act confidentially as representative in charge of commercial, financial and private matters in Europe Will visit San Francisco in near future.

10997—Schmiedefeld, Germany. Large manufacturers of hydrometers and kindred glass apparatus and instruments wish to market their products on the Pacific Coast. Their products are high class and they are in a position to ship at advantageous prices.

10998—Bremen, Germany. Old-established firms of general importers and exporters handling machinery and all continental lines for export desire to establish connections with San Francisco firms which are in the market for German manufactured goods, or firms wishing to establish business connections with Germany. A representative of the Bremen house will be in San Francisco during the early part of 1927 and will call upon interested parties at that time.

11000—Hamburg, Germany. Flotation plant engineering works, exporting mining and concentrating machinery, tubular burners for roasting pyrites, coal dressing appliances, coke quenching and loading machines, desires to establish business connections with interested San Francisco firms.

11002—Kobe, Japan. Telegraph and telephone machine works desires to get in touch with San Francisco suppliers of wireless telegraph machines, as well as accessories, especially for marine system.

11003—Osaka, Japan. Import house desires to establish business connections with Pacific Coast suppliers of scrap iron for export.

11004—Papeete, Tahiti. Party desires to get in touch with San Francisco wholesale grocers interested in exporting. He requests price lists, giving discounts, etc., for payment by cash in San Francisco.

11008—Los Mochis, Mexico. Manufacturer of a high grade of charcoal desires to find a market in California for his product. He is in a position to ship in carload or boatload lots.

11009—San Francisco, Cal. An experienced traveling salesman, leaving in a few weeks for the west coast of Mexico, desires to represent San Francisco firms interested in selling goods there or having other matters requiring attention. He is well acquainted with commercial conditions throughout above territory. Represented firms to share traveling expenses and pay a commission on business done. References furnished.

11010—Santiago, Chile. Firm solicits catalogs or descriptive pamphlets from manufacturers of doors and windows in this territory.

11012—Guayaquil, Ecuador. Established firm of commission agents and manufacturers' representatives offer their service to San Francisco manufacturers or exporters wishing to market their products in Encador.

Official Proposals

NOTICE TO CONTRACTORS
(Rock Fill—State Board Harbor Commissioners)

OFFICE OF THE BOARD OF STATE HARBOR COMMISSIONERS, Union Depot and Ferry House, San Francisco, California, December 3, 1926.

Sealed proposals or bids will be received at this office **at or prior to 2 o'clock P. M., Thursday, December 16, 1926,** for furnishing necessary materials, labor and equipment for making a fill at the onter ends of Piers 30 and 32, on the waterfront of the City and County of San Francisco, in accordance with plans and specifications adopted by the Board December 2, 1926, and on file in this office, to which special reference is hereby made

The work to be done under these specifications consists in furnishing all necessary materials, labor and equipment for making rock fills at the outer ends of Piers 30 and 32.

The work to be done includes the furnishing of approximately 65,000 cu. yds. of fill.

The material to be used for fill shall be hard shale, hard serpentine, sandstone or any rock deposit which will break in a fair assortment of sizes from 3 inch material up to 1000 lb. pieces. Sand, loam, clay, soft shale, soft serpentine or other fine materials will not be accepted.

No bid will be received unless it is made on a blank form furnished from this office and is accompanied by a certified check for an amount equal to five (5) per cent of the amount of the proposal, to be made payable to the Secretary of the Board, conditioned that if the proposal is accepted and the contract awarded, and if the bidder shall fail or neglect to execute a contract and give the bond required within six (6) days after the award is made, in that case the said sum mentioned in said check shall be deemed liquidated damages for such failure and neglect, and shall be paid into the San Francisco Harbor Improvement Fund.

Bids will not be considered by the Board unless delivered to the Secretary or to the Assistant Secretary, at the office of the Secretary, Room No. 17, Union Depot, and Ferry House, at or prior to 2 o'clock P. M., on Thursday, December 16, 1926, at which time and place the bids will be publicly opened.

The Board reserves the right to reject any or all bids if deemed for the best interests of the State.

Plans and specifications for this work to be had at Room 18, Union Depot and Ferry House, upon depositing $10 for same, which will be returned on return of plans and specifications.

Bidders are requested to mark envelope containing bid: "Bid for making fill at Outer End of Piers 30 and 32."

WM. A. SHERMAN,
JOHN B. SANFORD,
J. SHERMAN McDOWELL,
Board of State Harbor Commissioners.
FRANK G. WHITE,
Chief Engineer.
J. L. PHELPS, Secretary.

NOTICE TO CONTRACTORS
(Wiring and Fixtures—Fresno Co.)

Pursuant to an order of the Board of Supervisors, duly made and entered in its minutes on the 24th day of November, 1926, notice is hereby given that the said board will receive up to **2 o'clock p. m., on the 4th dny of January, 1927,** sealed proposals for rewiring, furnishing and installing fixtures at Fresno County Public Library, according to specifications therefor heretofore adopted and on file in the office of the clerk of said board.

A certified check in the sum of 10 per cent of the amount of the bid, made payable to the Chairman of the Board of Supervisors, must accompany each proposal as a guaranty that the successful bidder will, within ten days after the acceptance of his bid, enter into a contract with Fresno County, to do the above mentioned work, and the successful bidder is also to furnish a good and sufficient bond as required by law and rules of this board, conditioned upon the faithful performance of said contract and all the provisions thereof.

The Board of Supervisors reserves the right to reject and or all bids or to accept any bid.

Dated this 24th day of November, 1926.

(Seal)

D. M. BARNWELL,
Clerk.
By FRED E. MAIN,
Deputy Clerk.

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

NOTICE TO BIDDERS
(Steel Lockers—Oakland Board of Education)

Notice is hereby given that the Board of Education of the City of Oakland and of the Oakland School District and Oakland High School District of Alameda County, hereby calls for sealed proposals to be delivered to the Secretary of said Board, Room 211, City Hall, Oakland, California, **until Tuesday, the 21st day of December, 1926, at 9:30 A. M.,** at which time and place said bids will be opened for: Steel Lockers for University High, W. P. Frick Junior High, Woodrow Wilson Junior High, and San Leandro Junior High. These bids shall be presented in accordance with the Specifications on file in the office of the Assistant Business Manager, City Hall, Oakland.

Price, fitness and quality being equal, preference will be given to the products of the State of California.

Persons or firms desiring to be on the mailing list of the Oakland Board of Education may list themselves with the Purchasing Department.

NOTICE TO CONTRACTORS
(Paving—State Board of Harbor Commissioners)

OFFICE OF THE BOARD OF STATE HARBOR COMMISSIONERS, Union Depot and Ferry House, San Francisco, California, December 3, 1926.

Sealed proposals or bids will be received at this office at or prior to **2 o'clock P. M., Thursday, December 16, 1926,** for furnishing materials and labor for paving the deck of Pier 60 and adjacent bulkhead wharf, on the water-front of the City and County of San Francisco, in accordance with plans and specifications adopted by the Board, December 2, 1926, and on file in this office, to which special reference is hereby made.

The work to be done under these specifications consist in furnishing all materials and labor for the work of paving the deck of Pier 60 and adjacent bulkhead wharves.

The materials to be used in this work shall consist of the requisite quantities of rock and sand aggregates and asphaltic cement.

The approximate quantities of work to be done under this contract are: 34,500 sq. ft. of 1½-inch Topeka and 2½-inch bituminous binder and 246,000 sq. ft. of 2-in. Topeka.

No bid will be received unless it is made on a blank form furnished from this office and is accompanied by a certified check for an amount equal to five (5%) per cent of the amount of the proposal, to be made payable to the Secretary of the Board, conditioned that if the proposal is accepted and the contract awarded, and if the bidder shall fail or neglect to execute a contract and give the bond required within six (6) days after the award is made, in that case the said sum mentioned in said check shall be deemed liquidated damages for such failure and neglect, and shall be paid into the San Francisco Harbor Improvement Fund.

Bids will not be considered by the Board unless delivered to the Secretary or to the Assistant Secretary at the office of the Secretary, Room 17, Union Depot and Ferry House, at or prior to 2 o'clock P. M., on Thursday, December 16, 1926, at which time and place the bids will be publicly opened.

The Board reserves the right to reject any or all bids if deemed for the best interests of the State.

Plans and specifications for this work to be had at Room 18, Union Depot and Ferry House, upon depositing $10.00 for same, which will be returned on return of plans and specifications.

Bidders are requested to mark envelope containing bid: "Bid for Paving Pier 60 and adjacent Bulkhead Wharf."

NOTICE TO CONTRACTORS

Concrete Arch Bridge—Pacific Colony

Sealed bids will be received by Geo. B. McDougall, State Architect, Chief, Division of Architecture, Forum Building, Sacramento, California, **up to 2 o'clock P. M., December 28th, 1926,** said bids then and there to be publicly opened and read, for furnishing all plant, materials, and labor required for the erection and completion of a Bridge over San Jose Creek, Pacific Colony, near Pomona, California, in accordance with plans and specifications therefor, copies of which may be obtained on application to the Division of Architecture, State Department of Public Works, Forum Building, Sacramento, California.

In general the work consists of a reinforced concrete arch of 35'-0" apan with abutments, spandrel walls, sidewalks, earth fill for roadway approaches and macadam surfacing of the roadway.

Cash, a bidder's bond made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bid, must be enclosed with each bid.

Only those bids of Contractors who have had experience in the construction of reinforced concrete arch bridges will be considered.

A deposit of twentyfive ($25.00) dollars will be required on plans and specifications, the deposit to be returned immediately upon the return of the plans and specifications to the Division of Architecture at Sacramento, California, in good condition.

The Division of Architecture, State Department of Public Works, reserves the right to reject any or all bids and to waive any informality in any bid received.

All bids must be addressed to Geo. B. McDougall, State Architect, Chief, Division of Architecture, Forum Building, Sacramento, California, and plainly marked on the envelope: "Proposal for Bridge, Pacific Colony, California."

STATE DEPARTMENT OF PUBLIC WORKS, DIVISION OF ARCHITECTURE.

GEO. B. McDOUGALL,
State Architect.

PAUL BAILEY,
Director of Public Works.

Assistant Secretary.

NOTICE TO CONTRACTORS

(Liberty Union High School District)

The Board of Trustees of the Liberty Union High School District hereby advertise for sealed bids, for the construction of a Manual Training Building, to be erected on the High School premises at Brentwood, Contra Costa County, State of California. Plans and specifications of the construction of building as drawn by J. W. Williams, can be obtained from Robt. Wallace Jr., Clerk of the Board, at Brentwood, Calif.

A deposit of Twenty ($20.00) Dollars must be made with the Clerk of the Board, at the time that a set of the plans and specifications are furnished. This amount will be returned at the time that the plans and specifications are returned; with the exception of the successful bidder, whose deposit will be retained until the building has been completed, and accepted by the Board of Trustees. A certified check amounting to Ten (10%) per cent of the bidder's price must accompany the bid; otherwise the bid will not be considered by the Board. The bid must be for a complete building, including heating furnace, electric wiring and sewerage; local firms to be given the preference for the furnishing of the heating furnace; installing of the electric wiring and laying the sewer on an even basis price; the certified check for Ten (10%) per cent of the successful bidder's price will be retained by the Board as a guarantee for the faithful performance of the contract, and will be returned to the successful bidder after the building has been completed and accepted by the Board. Bids will be received by the Board **up to 6 o'clock P. M., on the 20th day of December, 1926.**

The Board reserves the right to reject any or all bids. Address all bids to Robt. Wallace Jr., Brentwood, Calif. Mark on outside of envelope, "Bids on the Manual Training Building at Brentwood, California."

By order of the Board at a meeting held on Nov. 12, 1926.

ROBT. WALLACE, JR.,
Clerk of Board.

NOTICE TO CONTRACTORS

Galt Joint Union High School District

NOTICE is hereby given that sealed bids will be received by the Board of Trustees of the Galt Joint Union High School District for the complete erection of a High School Building, in accordance with plans and specifications on file with the Clerk of the Board of Trustees of the Galt Joint Union High School District, Sacramento and San Joaquin Counties, California, and also in the offices of Dean & Dean, Architects, Room 1406, California State Life Building, Sacramento, California.

The said building is to be erected on the property owned by the District, in the City of Galt, Sacramento County, California.

On a deposit of $15.00 with the Architects, complete sets of plans and specifications may be had by any prospective bidder, and retained for a period of 15 days. The deposit will be returned to the bidder on the return of the plans and specifications in good condition.

Bids must be made on proposals obtained at the office of the Architects, and be signed by the bidder, accompanied by a certified check for at least 10% of the amount of the bid or proposal, certified to by some responsible bank or banker, and made payable to Dr. F. W. Harms, Clerk of the Board of Trustees of the Galt Joint Union High School District, said check to be forfeited to and retained by the School District, should the party or parties to whom the contract shall be awarded fail to enter into the contract after the award, or to give bonds as required. Bids must be plainly marked on the exterior "Proposal for the erection of Galt Joint Union High School Building."

All bids must be filed with Dr. F. W. Harms, Clerk of the Board of Trustees of the Galt Joint Union High School District, said check to be forfeited to and retained by the School District, should the party or parties to whom the contract shall be awarded fail to enter into the contract after the award, or to give bonds as required. Bids must be plainly marked on the exterior "Proposal for the erection of the Galt Joint Union High School Building."

All bids must be filed with Dr. F. W. Harms, Clerk of the Board of Trustees of the Galt Joint Union High School District, Galt, California, not later than **7:30 o'clock p. m., Monday, December 20th, 1926.**

The Board of Trustees of the Galt Joint Union High School District reserves the right to reject any and all bids.

BOARD OF TRUSTEES,
GALT JOINT UNION HIGH SCHOOL DISTRICT,
Dr. F. W. Harms, Clerk.

Co., Box 345, Santa Ana, sub. low bid to city at $14,300 using vit. pipe for const. of 15-in. trunk sewer compl. with all appurtenances to connect the present South Bay Cities San. Dist. trunk sewer and the present city san. sys., approx. 3000 lin. ft. Cash contr. Victor H. Stahell, city engr. Engrs. est. on vit., $15,000. Bids taken under advisement two weeks.

ROAD CONTRACTORS LOSE $412,000 IN SUIT

Judgment for $412,000 against the Hoffman Construction Company of Eastland, Tex., has been entered in the district court of Austin, Texas, in favor of the state. The recovery is for alleged excess profits on Texas highways contracts. This makes $1,012,000 which Attorney General Dan Moody has won in the two suits against highway contracting firms who held contracts awarded by Governor Miriam A. Ferguson's highway commission.

New Building Boom Is Likely For Next Year

"Investment interests believe that building as an industry is going to be swung out of its recent decline into an approximate one-year boom," says Alton F. Boala, in the "Dow Service". He adds. "They also believe an economic price will be paid for this violating the lay of supply and demand." The article in part follows:

"Building material mills are being geared for big production. The word has gone forth from sales managers to salesmen to make 1927 another boom year. Mill orders are being placed on that bas s by jobbers and distributors throughout the industry now, hence the increase recently noted in national industrial building expansion. Architects are getting busy again and contractors are getting better prices for next year's work, according to the Department of Labor, which says that "in 1913 material cost on a building operation was 54.8 and labor 45.2 per cent. Two years later the situation was reversed. Labor costs then were 58 I and material 41.9 per cent. In 1924 material cost was 40.5 and labor 59.5 Last year, according to the same authority, material costs were 39.8 and labor cost 60.2 per cent of a building operation.'

Buy on the Rise

"Another reason given by building investors for their growing belief that the national building construction industry is headed for another brief speculative rodeo is that it is the custom of people to buy when prices rise. When there is a falling building material price market people wait to see how far it is going to fall. On a rising market they first satisfy themselves that there is sound basis for the rise and then they come in to buy before the price goes higher.

"There is no present national requirement for another boom building year. Building construction was shown by a Labor Department survey in August, 1925, to have caught up with housing needs. In December of 1915 the real estate committee of the Investment Bankers' Association of America reported that the national building peak had been reached. It showed in its report that rents were then stationary or were turning downward, adding that it had incidentally found that building costs were then 92 per cent above pre-war costs and 10 per cent higher than living costs.

Big Year Coming

"The stage is all set for building as a national industry to have one more big year, not because there is a demand for a building program of perhaps record-breaking proportions, but because since election day the idea has come into the minds of those whose job it is to make and beat former business quotas that 'they might as well get theirs while the getting is good,' heeding in no wise the price of the come-back.

"There is only one analogous precedent in this country upon which to gauge post-war building construction expectancy. That concerns the reconstruction period following the Civil War. It then required 13 years for building material prices and construction to return to normal or pre-war levels. Counting 1920 as the peak year for building material prices and construction costs, 1927 will complete the probable turning point for these items if the span of recovery to be the same after the World War as it was after the Civil War.

"It is at this point that the political twist seems to come in.

"Prospective changes in national administration occurring at the crest of national prosperity have been characterized, in the past, by a certain timidity of capital, particularly in channels where long time investments are involved. If, therefore, coming events cast their shadows before, speculative construction financing for near future building will be a whole lot easier to arrange in 1927 than it will be in 1928, because by that time the country can conceivably be much more heavily overbuilt than it is right now."

1926 Realty Financing in U. S. Will Set Another New High Record

Realty financing in the United States will set another new high record in 1926, according to the Building Economic Research Bureau of the American Bond & Mortgage Company, which estimates that the volume of real estate mortgage bond flotations during the year will total approximately $900,000,000.

Statistics made public by the Bureau showed that the leading investment houses have been underwriting realty issues at the rate of $60,000,000 a month, promising an annual volume of $720,000,000. Financing done by the hundreds of small local houses spread over the country, whose underwritings range from $1,500 to $250,000, it was estimated will aggregate from $150,000,000 to $200,000,000.

"During the first ten months of the year," it was stated, "approximately $611,196,000 worth of real estate mortgage bonds were offered to the investing public by the larger investment houses, as compared with $560,087,000 in the same period in 1925, a gain of slightly more than 9 per cent. The volume of new issues for the last two months undoubtedly will increase this amount to at least $700,000,000, surpassing the record breaking volume of $685,294,800 recorded in 1925.

Building Slackens

"The recent slackening in the volume of building operations has not been felt in the realty bond market and the demand for new capital for apartments, apartment-hotels and other types of buildings continues strong. The situation, however, calls for caution and good judgment in financing new construction, although the importance of declines in rents and vacancies as have been reported from various sources during the year undoubtedly have been unduly exaggerated. Lending institutions must guard against the possible economic blunder of overproduction by pursuing a policy of critical conservatism, with the investors' safety paramount in mind.

"Survey of the building situation reveals that there is still a considerable unsatisfied demand for certain types of buildings throughout the country, especially those that are well located as to light and accessibility. Where there actually is what might be termed an over-built situation, it is so obvious that no reputable building or lending institution will lend its efforts or money to aid or abet further building in that particular district. There is nothing in the present situation that would justify anxiety or jeopardize the interests of investors in real estate bonds, safe-guarded and sold by reputable investment houses, and the wonderful record made by real estate securities during the past year should be maintained in 1927.

"Realty figures compiled by the Research Bureau do not include the enormous purchases of real estate morgages made during the year by insurance companies, fraternal organizations, and other similar financial enterprises for their own account. In New York, banks and insurance companies alone, took $243,420,000 in 1925. Life insurance companies, which at the end of the year of 1925 held real estate mortgages amounting to more than $4,823,000,000 or 52 per cent of all their admitted assets, have increased their investments in mortgage loans 130 per cent in the last five years. Heavy purchases have also been made this year by insurance companies who have found real estate mortgage loans the safest and highest yielding type of investment—one large company alone underwrote $123,218,000 in real estate bonds during the first ten months.

Real Estate Mortgage Bonds Desired

"Another important development of the year has been the growing realization on the part of bankers of the bankable desirability of real estate mortgage bonds. Today it is estimated that at least 5000 banks are handling first mortgage bonds, either as underwriters or dealers. The element of safety and high yield has made this type of bond attractive to the banks and the investing public.

"Review of statistics shows that real estate mortgage bonds have had a phenomenal increase in popularity since 1919, when it is estimated that only $57,458,000 worth of this type of security was absorbed by investors. Since that time the increase in volume has been steady and today they rank next to public utilities as the greatest investment outlet for capital.

"Available figures indicate that during the last eight years somewhat more than $2,170,000,000 of mortgage bond issues have been offered the investing public.

"In 1925 the volume of realty flotations equalled approximately 72 per cent of the amount of public utilities, and exceeded railroad bond issues by more than $321,232,000. The volume of real estate issues for the first ten months of this year equalled approximately 62 per cent of public utility flotations, and exceeded railroad issues by more than $285,000,000.

"An interesting development in the realty bond field during the last few months has been the offering of an European issue, to finance the erection of apartment buildings in Berlin, guaranteed by a group of important German insurance companies. This is the first time that any foreign financing of this type has been done in this country and the experiment is being watched with considerable interest by real estate bond houses, who have kept out of the European realty field because of unsettled economic conditions."

Real Estate Financing

Real estate financing has been an outstanding influence in our present period of prosperity and financial progress, according to W. J. Moore, President of the American Bond & Mortgage Company.

"In furnishing funds for the financing of needed building construction, realty bonds have made a widespread contribution to the business prosperity of the country," said Mr. Moore. "Proceeds of these mortgage securities go through a variety of channels, putting new life and blood into the veins of commerce. Millions of dollars are provided for wages and employment in the building trades, and the thousands of men engaged in manufacture and transportation of building materials. Thus the purchasing power of the workers is increased and business generally is stimulated and benefitted.

"Real estate bonds have stood the test of time and their popularity can be attributed to the intelligence of investors who now fully realize the soundness of this type of security, as such bonds remain unchanged by economic and political distrubances. They never depreciate or fluctuate in a fluctuating market; their value is constant; the income from them dependable. When safe-guarded by responsible security houses, they meet every requirement of safe, profitable and carefree investment."

B. M. HOBLICK IS ADVANCED BY BLAKE, MOFFITT & TOWNE

The announcement of B. M. Hoblick's appointed as manager of coarse paper has just been made by Blake, Moffitt & Towne, pioneer paper merchants of the Pacific Coast.

For several years Hoblick has represented the firm in the San Joaquin Valley with headquarters at Fresno. He has many friends in this section who, while expressing regret at seeing him leave, are congratulating him on his new position which carries with it larger and more important duties.

In assuming the management of the Coarse Paper Department Hoblick takes over the work formerly carried on by Frank L. Unthank who was placed in charge of the new Oakland Division recently opened to serve the East Bay Region.

It was pointed out by an official of of Blake, Moffitt & Towne that now with their chain of new divisions and branches they are better prepared to serve the Pacific Coast trade with the greatest possible care and attention because of the closer contact established. For illustration, where formerly representatives from the San Francisco house visited the out-of-town trade, it is now possible through the regularly organized and thoroughly equipped divisions and branches to serve buyers of paper locally not only in San Francisco, Los Angeles, Portland, and Tacoma but also in Oakland, Sacramento, Fresno, San Diego, Santa Rosa, San Luis Obispo and Phoenix, Arizona. The sales organizations at all these points are thoroughly trained and prepared to give every possible assistance in purchases of paper, paper products and twines, large stocks of which are carried locally to assure the best of service.

Although no further expansion plans have been announced it is understood that the policy of establishing new branches will be continued as further business warrants.

COMMERCE DEPARTMENT REPORT HAS CHEER FOR HOME OWNERS

The annual report of the Department of Commerce has Christmas cheer for home builders; says the economist of the National Lumber Manufacturer's Association. The part made public today shows that while potential homebuilders have been increasing their earnings the cost of building materials has decreased. Since 1920 Union Wages have increased 39 points and general prices have decreased 76 points Since 1923 general prices have decreased 4 points and wages have increased 17 points. In the latter period frame house materials, at retail, have declined from an index of 198 in 1923 and 206 in 1924 to 195 in 1926. In the same period building materials as a whole, at wholesale, have declined from 188 in 1923 and 182 in 1924 to 174 in 1926.

The Secretary of Commerce says of the simultaneous increase in wages and still greater decrease in prices of commodities during the past six years: "Thanks to the elimination of waste and other contributing factors we can as a nation show one of the most astonishing transformations in economic history."

1926 Edition

San Francisco Building Laws

Ready For Distribution

With the issuance of this 1926 edition, the Building Ordinance Books heretofore published will be obsolete, inasmuch as many sections of the law have been amended and additional sections added.

This 1926 edition contains all revisions and additions to the code up to and including June 1926.

In addition to the Building Laws of San Francisco, the 1926 edition contains the FIRE ORDINANCES as regards the construction industry, the ELECTRICAL ORDINANCES, the SIGN ORDINANCE, the BILLBOARD ORDINANCE and other laws covering regulations concerning the construction interests.

Price $1.00 per copy.

1927 CONSTRUCTION FORECAST IS SUMMARIZED

Approximately $6,000,000,000 will be expended in construction in the United States in 1927, according to the forecast of the Building Age and National Builder. The forecast for next year is based on all available statistics fortified by figures obtained by original research. "The probable division of the $6,000,000,000," the estimate says, "will be approximately as follows: residential buildings, $2,462,000,000; commercial buildings $1,020,000,000; educational buildings $360,000,000; hospitals and institutions $168,00,000; industrial buildings $540,000,000; military and naval buildings $10,000,000; public buildings $45,000,000; public works and public utilities $1,020,000,000; religious and memorial buildings $108,000,000; social and recreational buildings $267,000,000."

According to the survey the figures for the annual normal building need of the country is approximately $4,000,000,000. This takes into account the various factors such as obsolescence, fire and other losses and the requirement to meet the needs of increased population. The report calls attention to the fact that no adequate forecast can be made without taking into consideration the fact that the American people are never entirely satisfied with the established order of things. They do not wait for obsolescence and buildings are being torn down in every city of the country, which, under the accepted standards of a few years ago, would have been deemed entirely satisfactory to make way for more modern structures.

Constitution Grants No Rights To Strike—Supreme Court Rules

"The absolute right" to strike may be abridged as a result of a recent decision of the Supreme Court which heretofore has attracted but little attention. The court recently held that "neither the common law, nor the fourteenth amendment centers the absolute right to strike." The fourteenth amendment to the Constitution says "No state shall make or enfore any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any state deprive any person of life, liberty or property without due process of law; nor deny to any person within its jurisdiction the equal protection of the laws."

The courts decision was given in the case of August Dorschy verasu the State of Kansas appealed from the Supreme Court of Kansas. Dorschy was vice president of the Kansas District No. 14 of the United Mine Workers. He and other officials ordered a strike in **order to force the George H. Mackie** Fuel Company to pay a back wage claim of $180 to a union miner.

A strike was called during which criminal proceedings were begun and Dorschy was convicted of conspiracy "to induce others to quit their employment for the purpose and with the interest to hinder, delay, limit or suspend the operation of mining." The judgment was affirmed by the Kansas courts although Dorschy claimed his conviction was a denial of the liberty guaranteed by the fourteenth amendment.

Justice Brandeis, upholding the decision of the Kansas Supreme Court says:

"The right to carry on business—be it called liberty or property—has value. To interfere with this right without just cause is unlawful. The fact that the injury was inflicted by a **strike is sometimee a justification. But** a strike may be illegal because of its purpose, however orderly the manner in which it is conducted. To collect a stale claim due to a fellow member of the union who was formerly employed in the business is not a permissable purpose. In the absence of a valid agreement to the contrary each party **to a disputed claim may insist that it be determined only by a court.**

"To enforce payment by a strike is clearly coercion. The legislature may make such action punishable criminally, as extortion or otherwise.

"And it may subject to punishment, him who uses the power of influence incident to his office in a union to order the strike. Neither the common law, nor the fourteenth amendment, **confers the absolute right to strike."**

Justice Brandeis, in effect, has said **that labor union leaders must not use their organizations aa bill collection agencies, and that strikes may not be** called to collect "a stale claim."

Material Dealers Hold First Annual Meet—Elect Officers

Alec. G. Rhodes of the firm of Rhodes & Jamieson of Oakland was elected president of the Building Material Dealers' Association of Northern California at the first annual meeting of that organization held in the St. Francis Hotel, December 10. O. C. Barrymore of the Golden Gate Atlas Materials Company of San Francisco was elected first vice-president, Clarence Minehan of the F. E. Ferrell Company of Stockton, second vice president. **R. H. Borchers of Borchers Bros. of San Jose, third vice-president.** Wm. J. Feary of the Western Lime & Cement Company of San Francisco was elected treasurer and Frank L. Hatch, secretary.

Directors elected were: L. F. Le Hane of the Central Supply Co., Watsonville, Jos. Russo of Williams & Russo, San Jose; Carl B. Stoner of the San Mateo Feed & Fuel Company, San Mateo; J. F. Woodcock of the F. A. Matthews & Company, Eureka; Wm. Moehlmann of the Contra Costa Building Material Company, Sacramento and L. R. Rosenberg of Rosenberg Company, Hayward.

The meeting was attended by approximately fifty members from all sections of Northern California. Reports from various officers and chairmen of committees indicated the association was accomplishing much and the reports were received with considerable interest by the membership.

New members elected at the meeting included the Eclipse Lime & Cement Co., San Francisco; Fred Schmidt, San Leandro; R. R. Bell Co., Los Gatos; McAbee & Bruegge, Los Gatos and the Berkeley Building Material Co., Berkeley.

The banquet closing the meeting, was presided over by L. R. Rosenberg, the outgoing president. The banquet was attended by some one hundred and fifty members of the material field representing practically every section of the Northern part of the State. Alec. G. Rhodes, president-elect acted as toastmaster. Entertainment was furnished by Elmer Gallagher under the direction of Alec. Rhodes and Wm. Feary, the latter serving as chairman of the Program Committee.

The Entertainment and Finance Committee was composed of W. J. Feary, Wm. Moehlman, Steve Guerin and O. C. Barrymore.

Frank L. Hatch, secretary of the association for the past four years, was commended by the membership for the efficient work accomplished by his office.

The interests of manufacturers, particularly the cement manufacturers in the work of the association, was evidenced by the number of repreeentatives sent out by each firm.

MASON BUILDERS CELEBRATE TWENTY-FIFTH ANNIVERSARY

The twenty-fifth anniversary dance and banquet of the Mason and Builders of San Francisco was held at the Hotel Richelieu, December 11, with about 100 in attendance. Emil Hogberg, vice-president of the organization presided, due to the absence of M. B. McGowan, president. Mr. Hogberg delivered a brief address on the conditions in the industry and the aims and accomplishments of the organization.

Following the banquet a program of entertainment was featured and later the floor cleared for dancing.

Cigars for the evening were furnished by N. A. Dickey of the California Brick Company and Wm. H. George of the Cowell Lime & Cement Company.

Credit for the success of the affair is due to Walter N. Reed, secretary of the organization, who acted as chairman of the Entertainment Committee and to the management of the Hotel Richelieu, whose co-operation did much toward making the social a success.

WHY DOES LABOR SEEK FIVE-DAY WEEK?

Labor is advocating the five-day work week for economic and humanitarian reasons, believing it is practical from the viewpoint of equalizing production and consumpton, and because the worker will be more efficient with the added rest, William Green, president of the American Federation of Labor, said in an address before the New York Building Congress.

"The capacity to produce manufactured articles has increased to the point where continued serious thought must be given to the equalization of our producing and consuming power," he declared.

"In a number of industries, some of them basic, which are governed by seasonal fluctuations, and which, because of their productive ability, cannot operate steadily, a shorter work week would distribute the working time over a longer period and reduce waste and improve efficiency.

"The shorter work week is upon us and we will see it quite generally established in all lines of industry," he declared.

BOSTON UNIONS ENJOINED FROM SYMPATHETIC STRIKE

Officers and members of thirteen unions engaged in a sympathetic strike against the Scully Company and subcontractors working in five construction jobs in Boston and Cambridge are "strictly restrained and enjoined" by Judge Bishop of the superior court, from continuing a strike pending further order of the court.

The court order brings to an end a sympathetic strike that has been in progress since August 26th as a result of which about $500,000 worth of building operations have been held up. The strike was called to force the Scully Company, which operated in conjunction with its construction work, a sand and gravel business, to grant an increase in wages to members of the Hoisting and Portable Engineers Union employed in the gravel pits of the subsidiary company. The Scully Company refused to grant the increase and the men employed on its outside building operations were called out on a sympathetic strike.

$31,429,736 Is Pacific Coast Construction Totals In November

A grand total of 12,037 building permits involving $31,429,736 in estimated construction costs issued during November in 97 cities of the Pacific Coast area, reflects a 15% reduction from the camparable figures of last year, and a 21% reduction from the totals for October of this year, according to the December 1 issue of the National Monthly Building Survey of S. W. Straus & Co.

Los Angeles, issuing 2943 permits for buildings to cost $8,688,255 during November, shows a 12% reduction from the October figures but a 3% gain over the November total of last year.

The 15 municipalities of the Los Angeles metropolitan area report reductions of 26% and 7% respectively, from the totals of October and last November.

San Francisco, with a November record of 765 permits for buildings to cost $3,293,891, reports a 41% reduction from October's record and a 5% reduction from that of November, 1925.

The San Francisco Bay area, comprising 12 municipalities, shows reductions in building program of 30% from October's total and of 15% from that of last November.

Seattle gained 56% over the totals for October of this year and the total for November of last year, with a November record of 800 permits issued for buildings to cost $2,280,840.

Portland's November record of 908 building permits involving $2,099,925 in construction costs, shows a reduction of 25% from October's figures and a reduction of 32% from the November total of 1925.

Oakland issued 791 permits for buildings to cost $1,809,968, during November, 1% more than during October, but 20% less than the total for last November.

Following are the official November, 1926, construction cost figures as reported by building department executives from 97 cities comprised in the Pacific Coast Section.

City	November, 1926 No.	November, 1926 Cost	November 1925	October, 1926

Impartial Wage Board Awards 43 Building Trades Wage Increases

A new wage scale for the San Francisco building trades is announced for 1927 by the Impartial Wage Board.

The decision was made after several public hearings, at which representatives of the employers and employees in the building industry appeared, and after close study by the Board members of the records and briefs filed directly by both sides and data submitted by experts.

The new scales, which affect practically every craft in the building trades with a majority receiving advances over the existing rates, will become effective January 1, 1927.

The Board consists of Archbishop Edward J. Hanna, Chairman; Judge M. C. Sloss and Mr. Seiah Chamberlain.

The decision in full is published herewith.

The Impartial Wage Board for the San Francisco building industry submits herewith the attached schedule of wages to become operative for the calendar year, 1927.

The Board has arrived at its decision after listening to the views of numerous employers and employees presented in public hearings, and it has given careful thought to the written data submitted by various groups. The Board has also, on its own initiative, collected such other available data as seemed to it to have a bearing on the question of building wages in San Francisco.

The effect of the changes made in the existing scale will be to place the wages of building workers in San Francisco in a more favorable relation to the wages paid in other cities than they are at present, and it is believed that in general these changes will be beneficial alike to the employees, to the employers, and to the business community.

The Board has been pleased to find that for many of the crafts covered by the decision, the employers and employees are in agreement concerning the desirability of some increase in the existing scale and this feeling appears to be shared by many informed and thoughtful citizens who are interested in the building industry. In the cases in which there is disagreement between the employers and employees, or in which no representations have been made to the Board the changes made are believed to be in line with the rest of the new scale and therefore necessary and desirable. In many of the crafts covered by the scale there is a considerable range of skill and efficiency as between different workers in the craft. In such cases employers are not estopped from paying specially skilled or efficient workers a wage higher than the scale, as the character of the work or the efficiency of the individual worker may justify.

The wage scale here laid down shall go into effect on the first day of January, 1927, and shall remain in force for one year and thereafter until occasion arises for its revision.

PORTLAND CLAY PRODUCTS MEN PERFECT ORGANIZATION

Organization of a clay products educational club was perfected at a meeting of between 25 and 30 members of that industry in Portland, Ore. J. D. Mackie of the Masons Supply Company was elected president of the organization, W. E. Colman of the Washington Brick, Lime & Sewer Pipe Company, was chosen vice president, and M. B. Reilly, secretary and treasurer. The club has been organized in an effort to promote general knowledge of the uses of clay products, and to stimulate co-operation amoung the various concerns.

ENGINEERING CONTRACT AWARDS INCREASE IN NOVEMBER

November awards on engineering construction in the United States exceeded those of the same month last year by 11 per cent. At the present rate of contract letting this year will show a lead over 1925 of 13 per cent or more, "Engineering News-Record" reports. The value of contracts let in November, all classes of operations, was $206,821,000, as against $185,600,000 in the corresponding month last year. The value of contracts let from January 1 to December 1 reached the total of $2,622,183,000, which comparea with $2,312,524,000 in the same time last year. The value of contracts let since the first of the year, by sections, follows: New England, $227,349,999; Middle Atlantic, $791,276,000; South, $269,319,000; Middle West, $666,719,000; west of Mississippi, $381,543,000, and Far West, $285,977,000. Minimum costs observed are $150,000 on commercial, residential, educational and other buildings, $40,000 on industrial projects and $15,000 on public works.

ENTERPRISE FOUNDRY CELEBRATES FORTIETH ANNIVERSARY

The Plaza Hotel last Thursday evening was the scene of a banquet given by the officers and members of the Enterprise Foundry Company, celebrating the fortieth anniversary of the concern. Mr. Chas. Hoehn, president of the company, acted as chairman. Mr. Henry Martins, retired president, gave an interesting talk on the organization of the company in 1886 and its progress up to the present time. Starting in a small plant the company has grown to become recognized as one of the largest of its kind in Central California, operating four different plants in the San Francisco Bay District, all of which are operating at full capacity. Among others present at the banquet were: James W. Heaney, Henry Nieman, Albert J. Martins, Gus Penning, Albert C. Adams, James Moffitt, Fred T. Williams, Earl Anderson, Leo Heaney, Edward Dickman, Dan Garle and John Siephoff.

SAN MATEO COUNTY CONTRACTORS HEAR TERRA COTTA TALK

Terra Cotta, its history and use, was explained to members of the San Mateo County General Contractors' Association at a dinner meeting in the Oak Tree Inn, San Mateo, Dec. 12, by R. L. Davis of Gladding, McBean & Company of San Francisco. Arthur Dusenberry presided at the meeting. The next regular dinner meeting of the association will be held January 20 at the same location.

ALAMEDA COUNTY BUILDERS TO FEATURE CHRISTMAS JINKS

Arrangements are being completed by the Builders' Exchange of Alameda County for the annual Christmas Tree Jinks to be held in the exchange quarters, 354 Hobart St., Oakland, Dec. 28.

Prizes for the event are now being solicited by the committees in charge of the affair.

The following applicants were granted architects' certificates at the last meeting of the California State Board of Architecture, Southern District: Chas. L. Osborn, 1288 Lexington Ave., Pasadena; Hammond W. Whitsitt, Box 586, Laguna Beach, and Lother Maurer, 1233 S. Serrano Ave., and Clarence J. Smale, 509½ S. Western Ave., Los Angeles.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

William F. O'Connor, pioneer building contractor of Red Bluff, died in the Stanford Hospital, San Francisco, Dec. 7, following an operation.

Offices of the California Highway Commission have been moved from the Forum Building, Sacramento, to the new structure erected for lease to the State by Dr. Chas. Strub of San Francisco. The Strub Building is located at Eleventh and P Sts., Sacramento.

Imports of paints, varnishes, etc., into Australia during the month of July, 1926, totaled £59,204, an increase of £8980 over imports valued at £50,224 in July, 1925, Vice-Consul L. J. Callanan at Melborune, Australia, reports.

Unanimous opposition to the five-day work week "as a patriotic as well as an economic duty" was expressed in a resolution adopted by the National Association of Building Trades Employers at the annual meeting of that body in Pittsburgh, Dec. 14.

The medal of the American Society of Mechanical Engineers has been awarded to Dr. R. A. Millikan, Californit physicist, for distinguished contributions to science and engineerng, it was announced at the openng of the society's forty-seventh annual meeting in New York, Dec. 8.

Building contracts awarded in November in 37 States comprising 91 per cent of the country's construction are put at $487,012,500 by the F. W. Dodge Corporation, a decline of six per cent from October but an increase of 3 per cent over November last year. The total for the eleven months of 1926 was $5,812,518,900, a gain of 6 per cent over the same period of 1925.

Berkeley defeated a recent bond issue for $2,942,000 to finance erection of new schools and additions and alterations to standing structures. The high school issue providing $1,542,000 was defeated by a vote of 6667 for and 6260 against and the grammar school issue for $1,400,000 by a vote of 6715 for and 6312 against.

Directors of the Tri-County Highway District formed to build the Maricopa-Ventura highway linking Kern, Santa Barbara and Ventura counties, have voted to issue $500,000 in bonds divided among the three counties, to finance the work. The balance required to make up the $1,200,000, estimated as the cost of the work, will probably be furnished by federal and state aid.

The Belgian import duties on another extensive list of products have been increased considerably by means of increased duty co-efficients provided in a recent decree Among the articles affected by these increased duties are the following: minimum of lead, railroad ties not creosoted, wooden frames and packing cases, artificial marble slabs, facing tiles, engines, motors and heating plants, a list of metal manufactures, heavy dynamo-electric machines, electric lamps and other small electric apparatus.

Unfilled tonnage of the United States Steel Corporation increased 123,786 tons in the month ended November 30, according to the monthly statement just issued. Advance orders on November 30 aggregated 3,807,447 tons, compared with 3,683,661 tons on October 30, and 4,581,780 tons on November 30 of last year.

DeWitt Appleton, builder and contractor of Montery, died in that city, Dec. 13, following a brief illness. Appleton was born in San Francisco in 1875. In addition to operating in the Monterey county section, Appleton did considerable residence building in and about Palo Alto.

TRADE NOTES

W. Lee, J. C. Flannery and A. Olten. Electric Corporation of San Francisco, capitalized at $100,000, has been incorporated. Directors are: Ross Hartley, E. F. Reilly and Roy Worth.

Thomas F. Smith will operate from 914 Folsom St., San Francisco, under the trade name of Pacific Plumbing & Heating Supply Company.

Ernest C. Wangan and Sam Humphrey will operate from 1606 Kirkham St., Oakland, under the firm name of Layrite Floors.

D. I. J. Manufacturing Company of Oakland, capitalized at $250,000, has been incorporated and will engage in the manufacture and sale of shock absorbers for all types of motor driven vehicles. Directors are: Jos. Doorin, Christian Iversen and Claude Jenkins.

Directors of Santa Cruz Portland Cement Company, on Dec. 14 voted an extra dividend of $1 per share in addition to the regular $1 per share quarterly dividend. The two disbursements are payable January 1 to stockholders of record December 16.

Following purchase by the Columbia Steel Company of the Pacific Sheet Steel Company's plant at San Francisco comes the announcement that the Columbia Steel Company will construct an extensive addition to its plant at Torrance. This will include a battery of six sheet-steel rolling mills with a capacity of 3500 tons of sheets a month, and another open hearth furnace, giving the company three open hearth furnaces with a capacity of 9000 tons a month at Torrance. Cost of the buildings, machinery and equipment for the addition is estimated at about $2,000,000. Output of the new sheet mill will comprise corrugated, black, galvanized and blue annealed sheets in widths up to 60 inches, which will supply the local demand for material for riveted pipe, barrels, heaters, cornices and ornamental work. D. H. Botchford, vice president and general manager of the Columbia Steel Company, with headquarters at San Francisco, has charge of the improvements. W. L. Booth is superintendent of the Torrance plant.

ALONG the LINE

M. M. Murray has been appointed city engineer of Hermosa Beach. Mr. Murray was formerly city engineer of Manhattan Beach, at which time he also took care of the engineering work for Hermosa Beach before that city had a regular salaried engineer.

A movement is under way in Sacramento to reduce the pay of City Manager H. C. Bottorff who is at present receiving $15,000 a year. Those circulating petitions seeking to further the proposal say the purpose is to bring about a reduction in the tax rate.

Wm. M. Steele, former vice-president in charge of Pacific Coast operations for the Foundation Company, is now vice-president and general manager of the company at New York. Martin Schacht has been named manager of Pacific Coast operations and Wm. O'Neill, superintendent of construction.

Stephen Child of San Francisco has been elected president of the Pacific Coast Chapter, American Society of Landscape Architects. Professor John W. Gregg, head of the Division of Landscape Design of the University of California was elected secretary of the chapter.

Prfoessor L. J. Fletcher, head of the Agricultural Engineering division, College of Agriculture, University of California, has announced his resignation to accept an offer made by the Caterpillar Tractor Company. Professor Fletcher's new work will consist of promoting the farm distribution of Caterpillar tractors in that part of the United States and Canada lying east of the Rocky Mountains. His headquarters will be in Peoria, Illinois, where is located one of the manufacturing plants of the Caterpillar Tractor Co.

P. E. Dufor has been appointed valuation engineer of the California State Railroad Commission. He succeeds R. M. Vaughan, who resigned to engage in private business. Dufor has been for five years in the transportation division of the commission. Previous to that time he was with the Interstate Commerce Commission and also for six years was a member of the Southern Pacific staff. His recommendations were responsible to a certain degree for the reduction not long since of transbay auto ferry fares.

LUMBERMEN ELECT

O. V. Wilson of Stockton was elected president of the Central California Lumbermen's Association at the annual meeting of representatives of six central California counties which was held in the Hotel Lincoln, Stockton. George E. Ground of Modesto was elected as vice-president while Lester Elliot of Lodi was made secretary and treasurer. The officers constitute the directorate of the organization and will outline the year's program at a meeting to be held in the near future. Every city of the district was represented at the conference. Peter Simkins of St. Louis and an official of the order of Hoo Hoo was the speaker of the meeting.

LIGHTING UP ON TREES OUTDOORS IS SUGGESTED
"Sandy" Pratt Thinks Capitol Park Could Be Given A Christmas Atmosphere

Editor of The Bee—Sir: I have often admired the Sacramento trees, and I don't know of how much value, or how interested you will be in a suggestion for an outdoor Xmas Tree. There are so many beautiful evergreen trees in the Capitol Park that it would be a beautiful sight if one or a dozen were lit up as Christmas trees, beginning on December 23rd and ending January 2nd.

I believe that these outdoor Christmas trees would be a great ad for Sacramento.

We have six cypress trees at our new home in Monterey Heights, where we moved only last Wednesday, and I personally am going to light one of these trees up for the Christmas holidays. I think in one or two years outdoor Christmas trees are going to be very popular and they will not be uncommon, especially as the Christmas trees in the mountains are becoming scarcer. In a few years I don't think anyone will be allowed to cut them down.

CLARENCE F. PRATT,
San Francisco, Nov. 30, 1926.
—Sacramento Bee, Dec. 4, 1926.

LIGHTING OF TREES IN CAPITOL PARK APPROVED
Another Correspondent Supports Suggestion of "Sandy" Pratt

Editor of The Bee:—Sir: I enjoy reading your "Letters from the People" very much. I especially like those which contain matters of interest to the general public. Sandy Pratt's letter in Saturday's "Bee" is especially good. The idea of lighting up several of the trees in Capitol Park for the holiday season should meet with the approval of everyone. I think it would be very nice if some of the merchants would have a tree, the bankers another, manufacturers another, etc.

I feel certain that electric light and power companies would be very glad to co-operate and I am sure they would not be exorbitant in their rates, either. Only a small percentage of the citizens of Sacramento realize what a wonderful park we have here, and more attention should be attracted to it. Out of doors Christmas trees can be seen and enjoyed by all, and where is the man, woman or child who does not like to feast their eyes upon a beautifully lit Christmas tree? Come on, who will be the first to have a Capitol Park Christmas tree?

BERYLA ELLIOTT, Sacramento, Cal., Dec. 8, 1926.—Sacramento Bee.

KILLAM FAVORS CAPITOL CHRISTMAS TREE PLAN

Frank Killam, Superintendent of the state capitol building and grounds, is heartily in favor of the suggestion of Sandy Pratt, made in the "Letters From The People" column of The Bee, that one of the large trees in Capitol Park be decorated with electric lights as a Christmas feature.

While explaining that state money is not available for such a thing, Killam declared there would be no objection to permitting some organization to decorate a Christmas tree in the park during the holidays.

To do this, Killam said, would necessitate the stringing of power lines into the park and the setting up of a transformer large enough to handle the current for the lights. He estimates the cost would be around $150.00.—From Sacramento Bee.

SANDY WILL give $20.00.
TO HELP light trees.
IN CAPITOL Park.
IF THE Chamber of Commerce.
OR THE Sacramento Bee.
WILL START the ball.
TO ROLLING toward the Capitol.
CHARLEY FRASER, Manager.

H. M. Banfield, engr., 514 Bryson Bldg. K. S. Littlejohn has contr. for excav.

BUSINESS OPPORTUNITIES

SAN FRANCISCO—Further information regarding these opportunities may be obtained from the office of Larsen Advance Construction Reports, 818 Mission Street, San Francisco, either by phone, letter or personal call. Requests for additional information should be made to the Business Opportunities Department. Such requests must be accompanied by the Index Number of each opportunity.

D-2279 Houston Texas. An oil and refining company is in the market for a quantity of SPRUCE GIN POLES, 35 to 65 feet in length, butts and tops in proportion. Solicits inquiries from interested suppliers.

D-2283—Coquille, Ore. Party offers for sale large quantities of MYRTLE TIMBER to be shipped in carload lots.

D-2286—Cincinnati, Ohio. Manufacturers of a well-known line of DOMESTIC INCINERATORS and a STORAGE WATER HEATER desire to secure the services of a San Francisco representative.

D-2288—Portland, Ore. Firm has a PORTABLE BOX-NAILING MACHINE for which they desire to find a suitable manufacturer in this territory. The total cost of manufacturing the appliance, including electric motor, but exclusive of patent royalties, will not exceed $100. The machine handles different sizes of nails, sorts them, heads them up, spaces them, straightens them if crooked, and drives them accurately; can be quickly changed to handle any ordinary size of crate or box; all parts are standard and standard equipment is all that is necessary to manufacture it.

11013—Hamburg, Germany. An exporter, importer, merchant and manufacturers' representative offers his services as buying agent to American firms trading in any goods of European origin. He is prepared to procure manufacturers' lowest prices, for which services he will charge a low commission.

11014—Hamburg, Germany. Import-export house is very desirous of establishing business connections with California firms interested in exporting to Germany or in importing German products. References are supplied.

11019—Nuernberg, Germany. An organization established for the purpose of taking care of the extension of business and economical relations between Germany and the U. S. A., has forwarded to the Foreign and Domestic Trade Department, San Francisco, a number of circulars advertising German-made products of firms which are interested in marketing their goods in the U. S. A. The list comprises WATER HEATERS, SELF-FEEDING STENCIL BRUSHES, TEMPERED GLASS and WIRED GLASS PRODUCTS; RADIO RHEOSTATS and other radio equipment; ELECTRIC FLASHLIGHT CASES; WALL HOOKS for pictures, etc. These circulars are on file at the Foreign and Domestic Trade Department, San Francisco Chamber of Commerce. The organization will be pleased to supply information to San Francisco firms wishing to export to Germany.

11027 — Genoa, Italy. Exporters of GLUE-STOCK, MARBLE CHIPPINGS, etc., desire to get in touch with interested San Francisco importers.

11028—Livorno, Italy. Exporter of WHITE and COLORED MARBLE CHIPS desires to get in touch with manufacturers of cement tiles and pavements, or with a suitable agent to handle his line.

11030—Amritsar, India. Importers of American products and exporters of Indian products desire to establish business connections with San Francisco importing and exporting houses.

11035—Papeete, Tahiti. A highly recommended importer and exporter, one of the most influential men in Tahiti, is extremely desirous of establishing business connections with California firm of commission agents. He states that the usual method of transactng business in Tahiti is that the business houses with whom he has dealings there present him with a list of orders for goods required; he forwards the orders to his agents in France, Germany, England or America, who, in turn, carry out the instructions given, paying him 5 per cent on the net amount of the orders sent. He states that there is an excellent opportunity for California firms to do a large business in Tahiti.

Official Proposals

NOTICE TO BIDDERS

(Compressor—Madera County)

Notice is hereby given, that pursuant to an order of the Board of Supervisors made and entered in its minutes on the 6th day of December, 1926, sealed bids will be received by said Board at their office in the Court House, in the City of Madera, County of Madera, State of California, **up to January 3, 1927, at 11 o'clock A. M.**, for the purchase of one New Sullivan Class W. K. 312-110 foot Portable Air Compressor on Steel Wheels, complete with regular equipment.

All bids to be addressed to L. W. Cooper, County Clerk and ex-officio Clerk of the Board of Supervisors of Madera County, State of California, and delivered to and filed with said Clerk prior to the 3rd day of January, 1927, at 11 o'clock A. M.

The Board reserves the right to reject any and all bids.

Attest:
(SEAL) L. W. COOPER,
County Clerk and Ex-Officio Clerk of the Board of Supervisors of Madera County, State of California.

NOTICE TO CONTRACTORS

BANTA CARBONA IRRIGATION DISTRICT NO. 13, PUMPS.

Sealed proposals addressed to the Board of Directors of the Banta-Carbona Irrigation District, Box "Z," Tracy, California and endorsed "Proposal for the Furnishing and Installing Pumping Machinery and Accessories," will be received by said Board of Directors at its office near Carbona, California, about 3 miles south of Tracy, California, until **3 o'clock p. m. on Monday, January 3, 1927,** and at that time and place will be publicly opened and read.

All proposals must be made upon blank forms to be obtained from the Secretary of the Board of Directors at his office in Carbona; must give the prices proposed, both in writing and figures, and must be signed by the bidder with his address.

Each bid, is to be presented under sealed cover, and shall be accompanied by cash or certified check made payable to the President of the Board of Directors, for an amount equal to five per cent of the amount bid and no bid will be considered unless in strict conformity with the plans and specifications. Should the successful bidder to whom the contract is awarded fail to execute the same, such cash or check shall be forfeited to and become the property of the District.

All other cash or checks will be returned to the unsuccessful bidders who submitted the same.

A common law bond will be required for the faithful performance of the contract in a sum not less than twenty-five (25) per cent of the amount of the contract price and a further bond in the sum of not less than fifty (50) per cent of the amount of the contract price must be furnished with acceptable securities to secure the payment of laborers, material men and so forth.

The contractor to whom the contract may be awarded will be required to appear at the office of the District with sureties offered by him and execute the contract within 10 days from the date of notification of such reward and in the case of failure of neglect to do so will be considered as having abandoned it and the aforesaid forfeiture of cash or check will operate.

All bids will be compared on the basis of the district engineer's estimate for the furnishing and installation of pumping machinery and accessories, as follows:

ITEM 1. One centrifugal pump of 60 cubic feet per second capacity operating under 35 foot head.

ITEM 2. Four centrifugal pumps of 60 cubic feet per second capacity, operating under 25 foot head.

ITEM 3. Motors, starters, relays, float switches and wiring, valves and other essential equipment.

All foundations and pump houses are to be built by the district.

Bids will be received for the completed work but not for any part thereof.

The plans and specifications can be obtained at the office of the Board of Directors or from Thos. H. Means, 216 Pine Street, San Francisco, California.

The right is reserved to accept the proporal of the lowest responsible bidder or to reject any or all bids.

Done by order of the Board of Directors of the Banta-Carbona Irrigation District, this 8th day of December, 1926.

W. SCHLOSSMAN, Secretary.

A call for bids published in this section indicates that bids are desired from other than local bidders Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

NOTICE TO CONTRACTORS

(HYDE STREET TERMINAL STATE HARBOR COMMISSION.)

OFFICE OF THE BOARD OF STATE HARBOR COMMISSIONERS, Union Depot and Ferry House, San Francisco, California, Dec. 11, 1926.

Sealed proposals or bids will be received at this office at or prior to **2 o'clock p. m. THURSDAY, Dec. 23, 1926,** for furnishing materials and constructing a Ferry Terminal at Hyde street, on the water front of the City and County of San Francisco, in accordance with plans and specifications adopted by the Board Dec. 9, 1926, and on file in this office, to which special reference is hereby made.

The work to be done under these specifications consists in removing such portions of abandoned existing structures as are within the lines and which will interfere with the construction of the new work, and furnishing all necessary materials, labor, tools, machinery and equipment for constructing a Ferry Terminal at Hyde Street.

The materials to be used in this work shall consist of the requisite quantities of Portland cement, concrete aggregate, creosoted piles, green pile butts, creosoted Douglas fir lumber, untreated Douglas fir lumber, structural steel, castings, rods, bolts, spikes, painters' materials and the various materials for installing the operating mechanism complete, including all machinery parts and electrical wiring and equipment. Portland cement and creosoted piles will be furnished to the contractor by the Board. All other materials shown on the plans or called for in these specifications shall be furnished by the Contractor.

No bid will be received unless it is made on a blank form furnished from this office and is accompanied by a certified check for an amount equal to five (5) per cent of the amount of the proposal, to be made payable to the Secretary of the Board, conditioned that if the proposal is accepted and the contract awarded, and if the bidder shall fail or neglect to execute a contract and give the bond required within six (6) days after the award is made, in that case the said sum mentioned in said check shall be deemed liquidated damages for such failure and neglect, and shall be paid into the San Francisco Harbor Improvement Fund.

Bids will not oe considered by the Board unless delivered to the Secretary or to the Assistant Secretary at the office of the Secretary, Room 17, Union Depot and Ferry House, at or prior to 2 o'clock p. m., on Thursday, Dec. 23, 1926, at which time and place the bids will be publicly opened.

The Board reserves the right to reject any or all bids if deemed for the best interests of the State.

Plans and specifications for this work to be had at Room 18, Union Depot and Ferry House, upon deposit of $20.00 for same, which will be returned on return of plans and specifications.

Bidders are requested to mark envelope containing bid: "Bid for constructing a Ferry Terminal at Hyde street."

WM. A. SHERMAN,
JOHN B. SANFORD,
J. SHERMAN McDOWELL.
Board of State Harbor Commissioners.

NOTICE TO CONTRACTORS

(Concrete Work—Courthouse — Santa Barbara)

Pursuant to an order of the Board of Supervisors of the County of Santa Barbara, State of California, made on the sixth day of December, 1926. Notice is hereby given that sealed bids will be received **until 10 A. M. on the 17th day of January, 1927,** by the Board of Supervisors of the County of Santa Barbara, State of California, at their rooms in the County Court House, in the City of Santa Barbara, County of Santa Barbara, State of California, said bids then and there will be publicly opened and read for furnishing all plant, material and labor and doing the work required, for the construction and erection of the Court House, Hall of Records and Jail Building on the Court House site in the City of Santa Barbara, County of Santa Barbara, State of California, and all in accordance with the plans and specifications thereof, made by William Mooser Company, Architects, Nevada Bank Building, San Francisco, California.

Such bids will be received for the work as follows; separately:

One general bid: Concrete complete:

Bid (A)—Unit prices for reinforced concrete work in place.

Bid (B) — Deduction if concrete stairs Nos. 2, 3, 4, 5, 7, 9, 10, 11, 13

are omitted as called for in this specification.

Each proposal must be submitted on forms similar to the one here attached as prepared by the Architects, William Mooser Company, Nevada Bank Building, San Francisco, Calif.

Cash, a bidder's bond, or a certified check in the sum of at least ten percentum (10%) of the amount of the bid must accompany each bid, and be payable to the Chairman of the Board of Supervisors of the County of Santa Barbara, as a guarantee that the bidder whose proposal is accepted will enter into a contract with the County of Santa Barbara, for the work bid upon otherwise said cash or bidder's bond, or certified check will be forfeited to the County of Santa Barbara.

Plans and specifications for above work may be seen at the office of the architects, Court House Site, Santa Barbara.

Sets of plans and specifications will be loaned out to bidders upon deposit Fifty ($50.00) Dollars, coin or certified check; said deposit to be refunded to bidder when the set of plans and specifications are returned in good condition, accompanied by bid; such deposit to be forfeited to the architects, provided the set of plans and specifications are not returned in good condition within five (5) days from the time same is taken out, unless a bid is to be submitted on or before date set for receiving bids.

Application for plans and specifications must be made to the architects, William Mooser Company, Nevada Bank Building, San Francisco, California.

RIGHTS RESERVED

The County of Santa Barbara reserves the following rights: (a) to reject any or all proposals; (2) to waive any informalities in any proposal; (c) to award this contract to some other than the lowest bidder, as this clause expressly puts the bidder on notice that his financial and business standing and ability properly and expeditiously to carry out work hereunder, or the consideration of desired alternates, makes his proposal more advantageous to the County of Santa Barbara; (d) to accept any alternate or separate parts of the work, under this provision; (e) to deduct any separate item mentioned in any proposal at the price therein stated therefor; (f) to make any additions to, omissions from, changes in, or substitution for, the work or materials or articles called for by the contract, subject to the requirements of the paragraph thereof headed under that particular item and without notice to the sureties on this bond, if any, guaranteeing the performance of the contract.

All bids must be addressed to the County Clerk of Santa Barbara in the City of Santa Barbara, State of California, and have endorsed thereon

Proposal for Court House, Hall of Records and Jail Building for the County of Santa Barbara, California, and the particular part of the work bid upon.

C. L. PREISKER,
Chairman of the Board of Supervisors of the County of Santa Barbara.

C. A. HUNT,
County Clerk and Clerk of the Board of Supervisors of the County of Santa Barbara.

Attest:

(SEAL) L. W. COOPER,
County Clerk and ex-officio Clerk of the Board of Supervisors of Madera County, State of California.

NOTICE TO CONTRACTORS

Sealed proposals for constructing or improving the Yosemite National Park Road project (Valley Section) located within the Yosemite National Park, State of California, County of Mariposa, will be received by the District Engineer, Bureau Public Roads, at 461 Market St., San Francisco, until **10 o'clock a. m. on the 28th day of December, 1926,** at which time and place they will be publicly opened and read. The right is reserved to reject any and all bids and none will be considered except those from contractors ascertained to be experienced and responsible.

Responsibility of Bidders — Bidders must furnish on forms to be supplied by the Dist. Engr. a statement covering their experience on similar work, a list of equipment available for the proposed work, and a statement of their financial resources. The bidder must furnish this information and it must show him to be qualified for the work to be undertaken or bid may be rejected.

The length of project to be constructed or improved is approximately 15.15 miles, and the principal items of work are approximately as follows:

Excavation and Borrow 51927 cu yds; structures, culverts and headwalls; rock shoulders 6700 cu yd.; asphaltic concrete pavement 43817 tons, or crushed rock base course 168805 sq. yds., asphaltic macadam top course 159921 sq. yds.

Bids will be received on three separate units of work as follows: Proposal A to cover the grading and drainage items only; proposal B to cover paving with asphaltic concrete; and Proposal C to cover paving with waterbound macadam base course and asphaltic macadam top course. Bidders may bid on one or more proposals. The Government reserves the right to award Proposals A and B or Proposals A and C separately or a combination of Proposals A and B or of Proposals A and C.

The work awarded shall be completed within the working days indicated below following ten (10) days after formal notice from the District Engineer to begin the work: Proposal A, 120; Proposal B or C separately, 200; Proposals A and B together or Proposals A and C together, 250.

The contract form and the plans, specifications, special provisions and estimates of quantities may be examined by prospective bidders at the following addresses: Dist. Engr., Bur. Pub. Rds., 807 Sheldon Bldg., 461 Market St., San Francisco, Calif.; Res. Engr's Office, Bureau Public Roads, Administration Bldg., Yosemite, Calif.

Plans and specifications will be furnished contractors who contemplate bidding upon deposit of a certified check of $10, payable to the Secretary of the Interior of the United States. The check will be returned upon receipt of the plans and specifications at any time within a period of 15 days after bids are opened, otherwise check will be forwarded to the Treasurer of the United States for collection.

All proposals must be made on forms and in accordance with the instructions forming a part of the specifications above referred to, and must be accompanied by cash or certified check payable to the Secretary of the Interior of the U. S. in an amount at least equal to five (5) per cent of the total amount of the proposal. Proposals must be enclosed in a sealed envelope addressed to the Dist. Engr., U. S. Bureau of Public Rds., 807 Sheldon Bldg., 461 Market St., San Francisco, Calif., and plainly marked on the outside "Proposal for constructing Yosemite Highways."

Successful bidder will be required to pay a monthly attendance fee for each employee while in the Park.

The Secretary has programmed $499,000, for road and bridge bridges not included in this contract) construction work in the Yosemite National Park of which $64,000 is cash immediately available and $435,000 has been authorized for obligation. In case the contract awarded for this work shall leave available any portion of the funds so programmed, the right is reserved to extend this contract to such extent as will absorb the funds so remaining available, either by increasing quantities of work to be performed or by increasing the length of the project beyond the terminal shown on the plans. Provided, That no such extention shall be made which will exceed in amount 25 per cent of the original amount of this contract. The Secretary also reserves the right to shorten the project if necessary to keep the cost of the work within the above funds.

C. H. SWEETSTER,
District Engineer.

December 10, 1926.

NOTICE TO CONTRACTORS

(Sacramento County Hospital — Administration Building)

Office of the Clerk of the Board of Supervisors of the County of Sacramento, State of California.

Pursuant to an order of the Board of Supervisors of the County of Sacramento, made and entered on record on the 8th day of December, A. D., 1926,

Notice is hereby given that sealed bids will be received by the undersigned **up to and not later than the hour of 10 A. M. of the 24th day of January, 1927,** at the office of said Board in the Court House building, 7th and I Streets, Sacramento City, for the following described work connected with the construction of a three-story and basement Administration Building on the present County Hospital Grounds, definite location indicated on plot plan of said grounds, in the City of Sacramento, County of Sacramento, State of California, in accordance with the plans and specifications prepared therefor by R. A. Herold, Architect, which plans and specifications may be seen and examined, during office hours, by intending bidders, at the architect's office, 430-37 Forum Building, Sacramento, Calif.:

First—For the entire erection and completion of said building, including all branches of the work embraced in said plans and specifications.

Second—For the general construction of said building only, exclusive of electrical work, heating work, plumbing work and elevators;

Third—For the electical work only;

Fourth—For the heating work only;

Fifth—For the plumbing work only;
Sixth—For the elevators only.

All bids must be submitted on blank forms furnished by the Clerk of the Board and must be accompanied with a certified check on some solvent bank in a sum equal to ten per cent (10%) of the amount of each bid, conditioned that if the contract is awarded the party submitting the accepted bid will enter into contracts and furnish such bond as may be required within five (5) days after making award, or, failing so to do, the amount of such check to be forfeited as liquidated damages for such failure. All checks to be made payable to the order of the Chairman of the Board of Supervisors of Sacramento County.

The Board reserves the right to reject any or all bids.

By order of the Board of Supervisors of Sacramento County, Calif.
(Seal).
Attest: HARRY W. HALL,
County Clerk and ex-officio Clerk of the Board of Supervisors of Sacramento County, Calif.

NOTICE TO BIDDERS

(Street Sweeper—Martinez, Calif.)

NOTICE IS HEREBY GIVEN, that the Board of Trustees of the Town of Martinez will receive bids **up to eight o'clock P. M. of January 3rd, 1927,** for one motor driven pick-up sweeper. The sweeper shall be of the Elgin Type or equal.

It shall be equipped with a rubber conveyor belt and with a gutter broom which shall be flexible in all directions.

The transmission and all working parts shall be easily accessible. The sweeper shall be so designed that it can be turned around on a thirty foot street, without backing. It shall have a capacity of at least 2¾ yards of refuse which can be dumped quickly into a concentrated pile clear of the machine.

The bidder shall state his terms of payment together with his price. The machine shall be delivered f. o. b. Martinez and guaranteed for one year against defects and workmanship of materials. Also bids shall be filed with the Town Clerk of the Town of Martinez and will be opened by said Board of Trustees at eight o'clock P. M. on January 3rd, 1927, at the Council Chambers of said Board at the City Hall, Martinez. The Board of Trustees hereby reserve the right to reject any and all bids.

Dated, December 8th, 1926.

By Order of the Board of Trustees of The Town of Martinez.
RAYMOND B. JOHNSON,
Town Clerk.

NOTICE TO BIDDERS

Turlock Irrigation District and Modesto Irrigation District—Stanislaus and Merced Counties, California

Construction of the addition to the Don Pedro Power House and the installation of Two Units.

Sealed proposals will be received at the office of the Turlock Irrigation District at Turlock, California, **until 2 P. M., Thursday, December 30th, 1926,** for the "Construction of the Addition to the Don Pedro Power House and the Installation of Two Units." The Don Pedro Dam is on the Tuolumne River in Tuolumne County, California. The work requires about 1600 cu. yds. of power house excavation, 435 feet of penstock tunnel, 2000 cu. yds. of concrete, and the placing of about 1000 tons of metal work, machinery, fittings, etc., together with other related features as set forth in the plans and specifications.

Plans and specifications will be furnished upon application for the sum of ten dollars ($10.00). The contract will be let to the lowest responsible bidder but said Boards reserve the rights to reject any or all bids.

Bidders may submit bids upon any schedule but no proposal will be considered for a part of any schedule.

Each proposal must be accompanied by a certified check for five per cent of the amount of the bid payable to the order of the Treasurer of the Turlock Irrigation District for the benefit of said Districts as a guarantee that the bidder will if successful execute a satisfactory contract and furnish a bond in the sum of not less than twenty-five per cent of the amount of his bid for the faithful performance of the work in accordance with the specifications and the bond for fifty per cent as provided in Chapter 303 of the Statutes of 1919 of the State of California, said bonds to be approved by said Boards.

Each proposal must also be accompanied by the guarantee of responsible sureties to furnish bonds as required if the proposal is accepted.

The proposal must be marked "Proposal for the Construction of the Addition to the Don Pedro Power House and the Installation of Two Units," and addressed Turlock Irrigation District and Modesto Irrigation District, Turlock, California.

Done in pursuance of the order of the Boards of Directors of the Turlock Irrigation District and the Modesto Irrigation District this 6th day of December, 1926.

ANNA SORENSEN,
Secretary, Turlock Irrigation District.
C. S. ABBOTT,
Secretary, Modesto Irrigation District.

(Heating Plant, Etc.—Mare Island)

The Bureau of Yards and Docks invites attention to Specification No. 5252, "Heating Plant, Equipment and Piping, Navy Yard (Hospital), Mare Island, California. The work includes the furnishing and installing of an open type feed water heater, feed water meter, a steel condensate storage tank, two reciprocating boiler feed pumps, two motor-driven centrifugal hot well pumps and underground storage tank and oil meters. The work also includes a garbage incinerator with brick setting, flue and water heating, washing and sterilizing equipment, etc.

In the event that this work is of interest to you, you should forward to the Bureau of Yards and Docks, Navy Department, Washington, D. C., or to the Commandant, Navy Yard, Mare Island, Calif., a check or postal money order for $10, payable to the Chief of the Bureau of Yards and Docks as security for the safe return of the drawings and specifications.

Inasmuch as the specifications and accompanying drawings are nearing completion, it is suggested that you submit your application as soon as practicable in order that the bidding data may be forwarded when the specifications are received from the printer.

Prospective bidders on the West Coast should make application at the Navy Yard, Mare Island, Calif., for the bidding data.

ALAMEDA COUNTY BUILDERS TO HOLD ANNUAL ELECTION

The annual election of officers combined with the usual yearly jinks of the Builders' Exchange of Alameda County will be held in the Builders' Exchange Building, Oakland, December 28.

A program of entertainment is scheduled and refreshments will be served. Many valuable gate prizes will be awarded and a record attendance is anticipated.

AN ENGINEER FOR PRESIDENT

At the recent meeting of the Board of Directors of the American Association of Engineers, a resolution was passed endorsing the elevation of an engineer to the Presidency of the United States. This action was instigated by a review of what has been accomplished in the federal government by engineers in a co-ordination of industry and government, through the practical application of scientific and engineering principles to industry.

BUILDING CONTRACTS

MARIN COUNTY

RECORDED

DORMITORY
SAN RAFAEL. Brick work, carpenter work, fire escapes, glass and glazing, etc., for concrete dormitory.
Owner—Dominican College of San Rafael.
Architect — Albert M. Cauldwell, 251 Kearny St., San Francisco.
Contractor—Barrett & Hilp, 918 Harrison St., San Francisco.
Filed Dec. 6, '26. Dated Dec. 6, '26. On 1st and 15th of each month contractor to be reimbursed in full .....
TOTAL COST, $122,500
Bond, none. Limit, 180 days. Forfeit, none. Plans and specifications filed.

ACADEMY
SAN RAFAEL. Plastering and lathing military academy.
Owner—A. L. Stewart, San Rafael.
Architect—None.
Contractor — Leibert & Trobeck, 185 Stevenson St., San Francisco.
Filed Dec. 6, '26. Dated Dec. 6, '26. In four equal payments as follows:
Laths on .....
Brown coated .....
On completion .....
TOTAL COST, $4180
Bond, limit, forfeit, plans and specifications none.

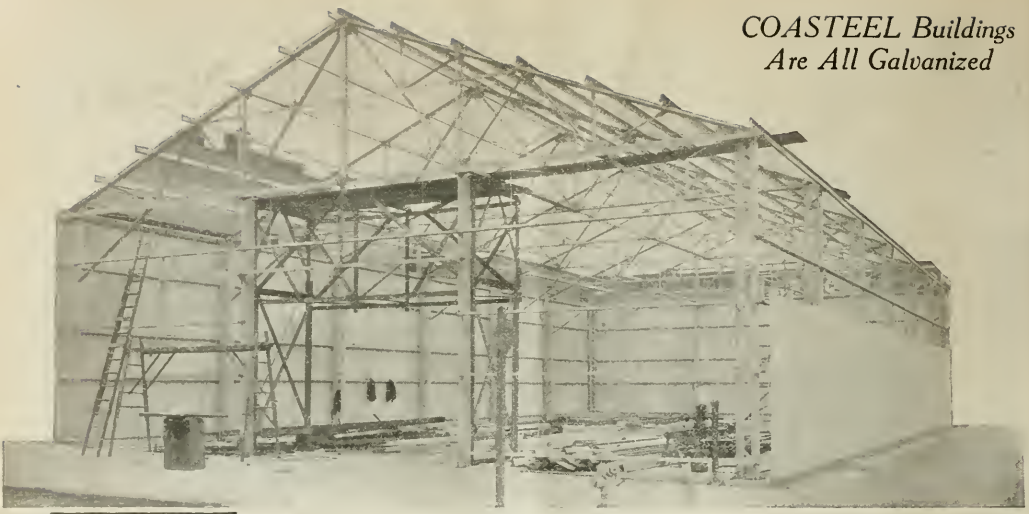
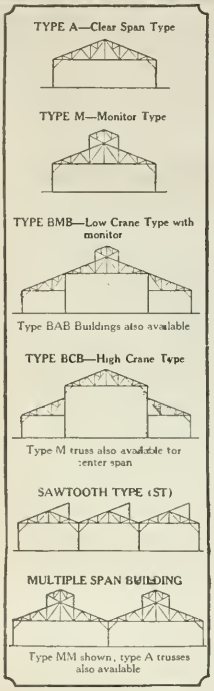
COASTEEL Buildings Are All Galvanized





TYPE A—Clear Span Type
TYPE M—Monitor Type
TYPE BMB—Low Crane Type with monitor
Type BAB Buildings also available
TYPE BCB—High Crane Type
Type M truss also available for center span
SAWTOOTH TYPE (ST)
MULTIPLE SPAN BUILDING
Type MM shown, type A trusses also available

This Building will be Completed and Ready to Occupy Next Week

BECAUSE it is a COASTEEL Standard Building, the building pictured above will be ready for use in that short length of time. All of the fabrication was done before the building was ordered—**COASTEEL Buildings are carried in stock**—and erection is just a matter of making simple connections.

Regardless of size or type of building, this fast service can be expected on any COASTEEL Standard Building. The engineering on the many different columns and trusses, girts and purlins is completed, as well as the fabrication of the various members that make up COASTEEL Buildings.

Let us know your requirements
We have a building to fit them

ARMY ENGINEERS' REPORT OPPOSES ALL-AMERICAN CANAL

An adverse report by the Board of Engineers for Rivers and Harbors on the "All-American Canal" has been submitted to Congress by Major General Jadwin, Chief of Engineers, U. S. A. The board is opposed to the proposed canal between the Great Lakes and the Hudson River as an alternative to the proposed improvement of the St. Lawrence River for deep-draft vessels as being much more expensive to build, more difficult to operate and as providing a longer route to European ports. On the other hand General Jadwin states that "the routes from the Great Lakes to the Hudson River is feasible from an engineering point of view, and its construction by the United States Government would probably be justified in the near future, if the plans for the improvement of the St. Lawrence do not meet approval of the legislative branches and executive heads of the two governments."

The estimated cost of improving the St. Lawrence for navigation alone is $173,520,000 for a 25-ft. waterway, which cost will be borne jointly by the two countries while the cost of a 25-ft. channel in the All-American canal is $506,000,000. With 1,365,000 hp. installed in the international section of the St. Lawrenhce the cost will be from $350,100,000 to $385,500,000 (half of which power belongs to the United States) and when the total of 5,000,000 hp. has been installed the cost will be from $620,000,000 to $650,000,000, or little in excess of the Great Lakes to Hudson Canal with no power. The Chief of Engineers estimates that the value of the power alone would justify the entire St. Lawrence project were it feasible to develop and market so much power within a reasonable time.—(Engineering News-Record).

Merry Christmas
Happy New Year

We desire to express our sincere appreciation of your confidence and friendship which has been such an important element in our success and cordially wish you a Merry Christmas and a Happy and Prosperous New Year. We enter this New Year with the determination to excel our past efforts to please you.

Building and Engineering News

CANTONMENT CONTRACTORS EXONERATED BY U. S. DISTRICT COURT

"Decisive defeat of the suit brought against Rinehart & Dennis, contractors of Charlottesville, Va., and builders of Camp Lee, Va., before the United States district court at Richmond, Va., last week brings collapse of the eleven so-called 'cantonment cases' into the realm of probability," says the Members News Letter of the Associated General Contractors.

"In returning a decision which completely exonerated Rinehart & Dennis of the charges which they, together with ten other contracting firms, have been forced to face as the result of political expediency of other days, the jury was absent from the court room only three minutes. So spontaneous was the jury's action in deciding that the representatives of the Department of Justice were prosecuting a case against the interest of justice that the twelve men merely went through the formality of leaving the room before rendering the result of their convictions to the court. When it is considered that the case occupied three weeks of taking of testimony and arguments by counsel, the speedy action is indeed the most complete exoneration that could be expected.

"The case as originally brought against Rinehart & Dennis was essentially the same as that brought against each of the other contracting firms cited in the 'cantonment cases.' But whereas 'fraud' was charged when the case was first lodged, and whereas the Government sought to recover seven million dollars at the outset, the weakness of the position taken by the attorneys for the Department of Justice was shown when the case finally came to trial with the charge diluted to the consistency of 'wastefulness' and with the attempted recovery reduced to two million dollars. Even with this 'whittled down' arrangement, the Department of Justice experts who have been retained for an extensive period on the 'cantonment cases' found a three-minute decision flung in their faces.

"It is considered doubtful that the Department of Justice will so far disregard the Richmond decision as to press the other cases which involve almost identical particulars. But, if the remaining cases should be brought before the courts, the Department of Justice can expect nothing but fullest exoneration of those against whom charges were launched by political purpose these many months ago."

CONTRACTORS ELECT

Jas. D. Fraser of Eureka was elected president of the Northern California Chapter, Associated General Contractors of America, at the annual convention of that body held in San Francisco. Fraser succeeds Walter J. Wilkinson of Watsonville. Paul Fay of San Francisco, State Senator E. S. Berney of Fallon, Nev.; A. Teichert Jr. of Sacramento and Wilkinson were elected to the board of directors. Earle G. Lloyd was re-elected as secretary-manager. The convention terminated Dec. 18 with the annual banquet and Christmas jinks held in the ballroom of the Palace Hotel. Between 500 and 600 members of the association were in attendance. There was an extensive program of entertainment.

FRESNO EXCHANGE TO MOVE

Offices of the Fresno Builders' Exchange, 921 L Street, will be moved to 1837 Merced Street, Fresno, the first of the year, it is announced by H. L. Hardman, secretary-manager of the exchange. Hardman said the increased membership has necessitated acquisition of larger quarters. Office facilities for allied interests will be provided in the new quarters, which will be located opposite the Merced Street entrance of the Hotel Fresno.

Building Industry To Oppose Higher Costs And Five-Day Week

(Special Correspondence from National Association of Building Trades Employers)

The building trades employers of the country are united in their opposition to higher building labor costs in 1927 and the adoption of the five day week in the construction industry.

Approximately 150 of the leading building employers of the country, representing over 25 of the leading cities and practically all of the State and national organizations in the industry, met in Pittsburgh on December 13th at a conference called by the National Association of Building Trades Employers and unanimously voted to stand unitedly against any further wage increases and the establishment of the five-day week.

Public Tiring of Increasing Costs

The concensus of opinion at the conference was that while the prospects are good for another big year of building, the public is tiring of increasing labor costs and a slump in construction activity threatens unless labor assumes a more sane and reasonable attitude on wages. Almost without exception every delegate expressed the opinion that the employers in the building industry of his community were opposed to the adoption of the five-day week.

The need of a strong national association of building employers which would be in a position to successfully deal with the American Federation of Labor and any other organized body of workers that attempts to impose on the building industry was repeatedly stressed. Many of the speakers stated that they believed most of the problems confronting the contractors of the country could be eliminated through an aggressive organization which had the whole-hearted support of the employers nationally.

The concensus of opinion was that the training of more apprentices would go far toward solving the labor problems of the building industry. It was pointed out that there was sufficient craftsmen to meet the present demand except for bricklayers and plasterers. Employers feel, however, that through the slackening of building and the training of more apprentices they will be in a better position to deal with the building trades who will eventually find that they will have to accept more moderate wage standards and do their part in stimulating building through reduced costs.

Combat Unreasonable Demands

Many of the speakers pointed out that for the contractors to successfully combat the unreasonable and uneconomic demands of the building trades, both as to wage increases in 1927 and the five-day week, it would be necessary for them to secure the unqualified support of the general public.

Scores of speakers denounced the five-day week as uneconomic and unsound and but another scheme on the part of labor to "artificially" increase wages by establishing a new basis for computing overtime pay.

"It is a move toward restriction," said O. W. Rosenthal, president of the Builders' Association of Chicago. "It would restrict the mass production and raise prices which again becomes its argument for higher wages. Labor's slogan for over forty years was an eight hour day yet labor refuses to work eight hours. Its only purpose is to create a standard basis from which its overtime is to be computed."

C. G. Norman, Chairman Board of Governors, Building Trades Employers' Association of New York City, said that labor did not expect to get the five-day week but was using it as a "trading point" to get more wages. He said that if they continued to boost building costs by increased wages, they would soon find a condition where they would be glad to get work at any price. Increased production on the part of labor, Mr. Norman declared, was also needed to reduce labor costs. He urged contractors to make greater effort to increase the productivity of their workers.

Resolutions Adopted

The following resolutions were endorsed at the third annual conference of the National Association of Building Trades Employers at the Pittsburgh meet:

Resolution No. 1

The declaration of the American Federation of Labor, in favor of the five-day week and of the policy of that organization to adopt it, as a part of its program of demands, is of profound economic significance to the building industry.

It is recognized, that high labor costs in building, are already levying too great a tribute on all classes of our citizenship, and are hindering the possession by that citizenship, of that which is considered the most precious boon of civilized society, the American home.

If we are to accept the present basis of costs, as permanent, and to be tolerated on the theory of their value in the distribution of wordly goods and their stimuli to the consuming power of the people, then there should be a pause, until the general level is adjusted and present inequalities are removed and the purchasing power of the dollar earned in Agriculture, and in practically all other lines, is given a chance to catch up with that in the building industry.

It is futile to say that the examples set in a few cases should be followed by others as the issue is this case seriously jeopardizes the economic balance in industry, due to the few cases where the five-day week is even theoretically practicable on account of the economic factors involved, and is especially true in the building business for the following reasons:

First: The building industry is of such a seasonable character that the loss of even a single half day, when the weather is favorable, at a critical point in the progress of a building, may result in the loss of many days later with attendant financial losses, or may even endanger the safety of life or property.

Second: The five day week would make a substantial increase in the cost of building. This arises from reducing the hours worked from 44 to 40 hours and by forcing contractors of necessity to work overtime at one and one-half, or double time rates. It would also result in an increase in the cost of overhead, all of which additional costs must be passed on to the public.

Third: It would reduce the available labor in proportion as the hours were reduced, thus increasing artificially the present shortage of labor in the building industry. This is a very serious matter when taken in connection with the curtailment in the supply of labor under the operation of our new immigration laws, and the restrictions imposed by the trades unions.

Fourth: The trend towards extravagance induced by idle time is such that we may soon expect additional demands for increased wages to supply the means to properly enjoy the new found leisure, thus further adding to the already high cost of living.

THEREFORE BE IT RESOLVED by the National Conference of Building Trades Employers, THAT as a patriotic as well as economic duty, we protest against and will resist by every lawful means, the adoption of the five-day week in the Building industry, as being unjustified by any requirement, either physical, mental, or spiritual, and as placing an additional burden on an already overburdened industry.

Resolution No. 2

WHEREAS, CAREFUL and thorough analysis based on prevailing wage rates and general conditions throughout the United States with the proper consideration given to all the elements which should be considered, fails to reveal any economic reason for any advance in the already high wage rates, paid in the building trades.

THEREFORE, BE IT RESOLVED, THAT the National Conference of Building Trades Employers desires to go on record as being emphatically opposed to any wage increases in the building trades for the coming year.

Resolution No. 3

WHEREAS, IT is apparent that there is a necessity for the induction into the building industry each year, of a greater number of skilled mechanics.

BE IT RESOLVED, THAT each community seek to establish some logical and permanent system of apprenticeship in the building trades, whereby a greater number of young men may be attracted to the building industry for their lifes work.

McKILLOP BROS., CONTRACTORS, ARE BANKRUPT

The McKillop Investment Company and McKillop Brothers, contractors, have filed in the United States District Court in San Francisco schedule of their assets and liabilities, following a petition for involuntary bankruptcy, entered against them earlier in the week. The Pope and Talbot Lumber Company, Roy Clark and Edward Michaels, filed the original petition. Today the two concerns, through the owners, Daniel and George McKillop, list their liabilities at $398,782.18 and their assets at $377,300. Of the assets it was stated $374,000 are in realty holdings. They list their creditors as follows: The Security Housing Corporation, $30,000; California Packing Corporation, $25,231; Bank of Italy, $37,000; California Mutual Building and Loan Association, $125,620; Samuel Wertheimer and Judson estate, $25,000, and R. W. Gilogly, $11,400.

GYPSUM MINING IMPORTANT INDUSTRY IN NEVADA

With an annual production of 1,000,000 tons per year gypsum mining has become one of the most important mineral industries of Nevada state.

Six huge mines are producing, with two located at Jean, and the others at Gerlach, Mound House, Arden and Moapa. Much of the gypsum used on the Pacific Coast comes from these mines, with the market steadily broadening.

The mineral is extensively used for plaster, tiles, wall boards, insulation, sheathing and many other building purposes, with new usee being constantly developed.

The industry is furnishing employment for more than 2500 workers in Nevada, and is declared by mining engineers to be in its infancy.

25 Million Dollar Bond Issue Urged For State Highway Work

A $25,000,000 bond isue for bridge building and elimination of grade crossings, an annual appropriation of $1,800,000 for extension of prison road camp operations, and modification of the existing method of distributing gasoline tax and motor vehicle license funds to insure the smallest counties at least 15,000 annually for road upkeep are among the recommendations contained in the biennial report of the California Highway Commission.

The commission urges a special appropriation of $200,000 from the general fund for reconstruction of the Rio Vista bridge across the Sacramento river in conformity with an agreement with the Federal government, which is widening the river at that point.

The commission states that expenditure of money for new roads was limited to $12,025,605, but that "quite material progress has been made" in new construction. Reconstruction totaled $10,956,888, and maintenance $8,842,611. For reconstruction and maintenance operations there was available the State's share of the 2 cents a gallon gasoline tax and the motor vehicle license tax, amounting to $10,369,144.

The problem of providing new bridges is estimated to require $15,000,000.

On the subject of grade crossings the report says:

"Scores of lives are forfeited every year at grade crossings. The only remedy is in separating the highway and railway grades. The State engineer has estimated costs at $10,000,000 as the State's share.

"We therefore recommend a bond issue of $25,000,000 to be made available over a period of years for bridge construction and grade separations."

An appropriation of $1,800,000 annually from the general fund, the commission believes, would make possible the use of at least 1,000 convicts regularly on the roads. There are at present about 230 so employed.

In urging extension of the prison road camps system the commission points out that "one of the greatest benefits of the system is to the prisoner himself. It takes him away from prison environment and makes him self-supporting, thereby restoring his self respect. At the end of his term it sends him out into the world hardened to toil, and with sufficient funds to support himself."

Peace Looms In Building Industry

The end of the carpenters' strike hoves in sight with the report that an arbitration committee consisting of seven men representing the strikers and seven representing the employers will be appointed to effect a settlement. Officials on both sides refused to confirm or deny the report, but it was obtained from an authorative source and is substantially correct.

Following a conference of Dec. 16, details of which were not given out, it was admitted by both parties to the dispute that arbitration was a possibility.

It is understood that the Carpenters' Union will name the representatives of the strikers today. The seven men to represent the employers are said to have been already selected, but names are withheld. Another member of the arbitration committee, a "neutral" who presumably will act as chairman, will be selected by the strikers and employers.

While the carpenters' committee has not yet been selected, it is believed that it will include Norman H. McLean, business agent of the union, and George Lakey, vice-president of the United Brotherhod of Carpenters and Joiners, who came here from Minneapolis to take charge of the strike.

After the December 16th conference behind locked doors in the offices of the Industrial Association, representatives of both the carpenters and employers appeared amicable and it was indicated that preliminary steps toward ironing out the differences on which the strike is based had been completed. Last efforts at conciliation have reached the final stage and both sides have agreed to arbitrate.

1662 Fires In California Forests During Year 1926

A total of 1662 fires which burned over 584,601 acres and cost $565,136 to suppress, is, in brief, the 1926 fire record for the National Forests of California, according to figures released by S. B. Show, Chief of the California District, U. S. Forest Service.

Of the total of 1662 fires that occurred in and adjacent to the Federal forests, 1138 or 68 per cent were due to human carelessness—as compared with 537 out of a total of 1315 fires in 1925. Smokers led the list with 427 fires, with incendiaries 178, railroads 170, campers 137, lumbering operations 52, brush burners 50 and miscellaneous causes 124. Lightning is credited with starting 525 fires.

The total area of Government timber and brush land burned over was 215,508 acres, while 369,094 acres of private lands within and adjacent to the national forests were swept by flames. The total cost to the Forest Service of fire suppression was $565,136, or more than double the expenditures made for like purposes in 1925.

Fires in the national forests this year killed 296,000,000 feet of Federal owned timber besides large amounts of young growth, destroyed 750,000 feet of cut logs, and occasioned damage to logging equipment, mills and improvements amounting to $216,000—making a total loss, based on conservative estimates, amounting to nearly one million dollars, of which more than three-quarters of a million dollars were timber losses. Figures on additional losses of forage, wild life, water conservation and recreational resources are not available.

The leading fire forests were: Shasta, 329 fires, 85,542 acres burned; Plumas, 181 fires, 30,988 acres burned; Klamath, 161 fires, 111,412 acres burned Sequoia, 122 fires, 104,262 acres burned. Garle and John Siephoff.

BRIDGE DISTRICT IS PROPOSED TO FINANCE TRANS-BAY PROJECT

Preliminary steps toward formation of a bridge district to construct a trans-bay span were announced following an opinion by City Attorney John O'Toole that the city of San Francisco could not take bids on a specific bridge project to be designed by its own specially employed engineers.

The O'Toole opinion was read to the special bridge committee of the supervisors. Supervisor Frank R. Havenner announced he would introduce a resolution in the supervisors' meeting Monday asking the city attorney to advise the supervisors as to the procedure necessary to form a bridge district which could erect a publicly-owned span.

Dion Holm, assistant city attorney, attending the meeting in the absence of O'Toole, was questioned at length by Havenner and Supervisor Warren Shannon.

Havenner sought to elicit the reasons why the attorney held the supervisors could not employ experts to advise them regarding bridge construction although they could employ experte to advise regarding appraisals of real estate. Holm said the charter did not delegate any power to the board to hire bridge experts.

Shannan reiterated his announcement that he would seek to have the city attorney draft proposed amendments to the State law whereby the city could build the bridge itself or grant a franchise to build it to the highest bidder.

Supervisor William P. Stanton argued against asking any amendments to the law, saying interests opposed to the bridge would seize the opportunity to revise the statutes to this city's advantage. Supervisor Alfred Roncovieri urged that the board proceed to grant a franchise at once to one of the concerns now applying for it.

SAN JOSE CONTRACTORS HOLD MONTHLY DINNER MEET

Captain George B. Baldwin of the Pacific Gas & Electric Co. and R. C. Buell of the Portland Cement Association were the speakers at the monthly dinner of the Building Contractors' Association of Santa Clara County at Hotel Sainte Claire, San Jose, December 16.

Buell spoke on "Cement," conducting a demonstration of the effect of water on sand used in concrete mixes. Buell also advocated building inspection at the owner's expense now advised in the uniform building code of the Pacific coast building inspectors.

Captain Baldwin spoke on "The Hydro-electric Development of Northern California." His lecture was illustrated by lantern slides.

PORTLAND BUILDERS TO BANQUET AND ELECT OFFICERS

The annual banquet, meeting and election of officers of the Portland, Ore., Builders' Exchange, will take place Jan. 12 at the Multnomah Hotel, Portland, it is announced by Miss Irene Phalon, secretary of the organization. A program of entertainment is planned in connection with the affair.

Building Trades' Council has requested the San Francisco Board of Supervisors to increase wages of electrical workers employed by the city by $1 a day. A communication filed with the supervisors states that the increase has been granted to electrical workers employed outside city departments.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

A. C. Rice of Los Angeles, bidding $127,500, has been awarded a contract by the Oakland city council to install an ornamental street lighting system in the downtown section.

Southern California Edison Company will start construction in January on a $2,500,000 sub-station at Hynes, near Long Beach. The new station will connect the company's electric distributing system with the steam generating plant at Long Beach.

G. B. Ocheltree of Berkeley has filed his resignation as a member of the State Immigration and Housing Commission. Governor Richardson announces he will leave the place to be filled by Governor-elect Young.

Contract for the construction of the Coolidge Dam on the San Carlos Indian reclamation project in Arizona has been awarded by the Interior Department to the Atkinson-Spicer Co. of Los Angeles, on a bid of $2,268,525.

Small cities will receive little benefit from the public buildings program authorized at the last session of congress. Secretary of the Treasury Mellon told the house building committee that under the $150,000,000 bill not more than 200 cities would receive consideration.

Kaiser Paving Co., of Oakland, bidding $78,555.60 as against the engineer's estimate of $121,174.50, has been awarded a contract by the State Highway Commission to grade 2.1 miles of the Redwood Highway between Fernbridge and Loleta in Humboldt County.

Plans for the organization of a cooperative purchasing bureau for construction contractors throughout Northern and Central California with a buying power of upward of $30,000,000 annually, were disclosed at the initial session of the eighth annual convention of the Northern California Chapter of the Associated General Contractors of America held at the Hotel Whitcomb, San Francisco.

Frank E. Croucher, Oakland contractor, has petitioned the United States District Court to be adjudged a voluntary bankrupt. He scheduled his liabilities at $30,449.60, with assets of $36,100. Of the latter, $35,000 are represented by realty holdings, said the petition. The principal creditors named are the Claremont Heights Company, $8506, and the Metropolitan Building & Loan Association, $9049.75, both of San Francisco.

Plans for increasing payrolls of iron and steel industries of California will be presented at the third annual conference of 300 executives in Del Monte on January 20-22, 1927. Great interest is being taken by the six leading groups of the industry in extending this co-ordinated effort to further increase the payrolls of this important basic industry throughout California. The Industrial Department of the Association has furnished the leadership for this statewide movement.

The 1927 convention of the National Retail Lumber Dealers Assn. will be held at Tacoma, Wash.

The Valley Portland Cement Company, following the approval of the state corporation department, plans to construct a cement plant at Goshen, near Visalia, Tulare County, and to open up a branch limestone mine at Three Rivers. The discovery of a clay bank on the Goshen property, said to be sufficient to meet cement needs for highways and building purposes for 50 years, is reported, while the limestone mountain at Three Rivers is declared by experts to contain a sufficient supply of lime to last a hundred years. It is expected that an extension of the Visalia Electric Railroad to Three Rivers will be made to furnish transportation to the mine.

The Department of Labor, through the Bureau of Labor Statistics, has just made public the second of a series of statements covering wages and hours of labor in the American iron and steel industry in 1926. The second part of the survey includes a study of 10 departments in the metal industry, undertaken the latter part of January, comparing statitics of 1924 with those of 1926. While the 1926 figures show slight average increases in hourly earnings in six of these departments for 1926, averages in three others decreased, while in one, the blast furnaces, earnings remained practically unchanged.

TRADE NOTES

Williams Form Clamp Co., Inc., Chicago, has appointed W. J. Burke, 200 Davis St., San Francisco, as its sole distributor on the Pacific Coast.

Columbia Electric Manufacturing Co. of San Francisco has been incorporated with a capital stock of $25,000. Directors are: J. F. Rivers, E. W. Lange and R. E. Grimes.

C. A. Doyle and Frank Nowak have formed a partnership and will operate in San Francisco under the firm name of Doyle Sheet Metal Works.

Spending $20,000 on the installation of a dryer, and planning the expenditure of $40,000 on a mill the Consolidated Clay Company of San Francisco is taking a long stride toward the development on a large scale of vast clay deposits, twenty-five miles northeast of Mojave.

Harrington Hardware Co. of San Francisco, capitalized at $50,000, has been incorporated. Directors are: H. W. Harrington, A. Sutter and E. A. Whitman.

John Bjorkman and Chas. Haggans have formed a partnership and will operate under the firm name of Acme Construction Company with headquarters at 3685 Cabrillo St., San Francisco.

Crowe Glass Company, formerly occupying quarters at 574 Eddy street, announce the removal of offices, estimating rooms and warehouse quarters to 675 Golden Gate Ave., San Francisco. Larger quarters will permit the firm to carry heavy stocks and expedite deliveries. The new phone number is Market 592.

J. A. Tassi, builder, announces the removal of his offices and estimating rooms from 114 Sansome street to 25 California street, San Francisco.

Combination Awning & Screen Co., capitalized at $20,000, has been incorporated in San Francisco. Directors are: George Gorham, M. C. Ahkmann, Marion Mooers, Grace Ewers and Agnes Mehlert.

ALONG the LINE

Oakland voters, at a recent election, sanctioned the proposal for the creation of a City Port Commission.

Governor-elect Young has been petitioned by the Fresno Engineer's Club to reappoint Paul B. Bailey as state engineer, or "to show good cause for his removal." Reports are current that the Governor-elect proposes to appoint George N. Randle of Berkeley as state engineer.

The annual regional meeting of the Pacific Coast section of the American Society of Mechanical Engineers will be held at Seattle next summer.

California State Highway Commission recommends a $200,000 appropriation to finance construction of additional spans on the bridge crossing the Sacramento river at Rio Vista, to conform to the flood control plans of the Federal Government.

Lovelock Irrigation District at Lovelock, Nevada, has voted bonds of $1,287,000 to finance construction of the Oreana dam and reservoir on the Humboldt river. Fifty-nine votes were cast in favor of the bond issue and one against it.

City of Gilroy, at a recent election, voted bonds of $120,000 to finance construction of a sewage disposal plant.

E. T. Thurston, consulting engineer and former secretary of the General Contractors of San Francisco, has been elected president of the Commonwealth Club of California, to serve for the year 1927.

F. E. Quail, county surveyor of San Joaquin County for 27 years, has resigned to become assistant to T. H. Dennis, maintenance engineer for the California State Highway Commission, with headquarters in Sacramento. Mr. Quail assumes his new post January 3.

E. L. Bruner, vice-president and chief engineer of Hamm & Grant, Inc., architects and engineers, Los Angeles, Cal., has been made a member of the firm, and the name of the firm has been changed to Hamm, Grant & Bruner. Under this name the firm will continue its work in the design and erection of industrial and commercial buildings. Mr. Bruner was formerly structural designer with the California State Harbor Commission and chief stuctural designer for the Spreckels Sugar Co. at San Francisco.

APARTMENTS

Segregated Figures Being Taken.
APARTMENT. $20,000
BERKELEY, Alameda Co., Calif. College Ave near Derby Street.
Two-story frame and stucco apartment building with shingled roof. (8 2-room apartments.)
Owner—Mabel C. Lockett.
Architect—B. Reede Hardman and Jas. McCreery, Berkeley Bank Bldg., Berkeley.
Contractor—A. Le Prest, 2061 University Ave., Berkeley.

Segregated Figures Being Taken.
APARTMENTS Cost, $——
CAPUCHINO MANOR, San Mateo Co., Calif.
One and two-story frame and concrete Spanish style studio apartment building.
Owner—F. A. Oehm, 77 O'Farrell St., San Francisco.
Architect—Grimes & Scott, 77 O'Farrell St., San Francisco.

Segregated Figures Being Taken
APARTMENTS Cost, $90,000
SAN FRANCISCO. S W Franklin and Vallejo Sts.
Five-story and basement Class "C" concrete (23) apartments, 2, 3 and 4-room apts.)
Owner—Edw. Jose, 251 Kearny St.
Architect—H. C. Baumann, 251 Kearny St.

To Be Done By Day's Work
APARTMENTS Cost, $40,000
SAN FRANCISCO, Cal., NW Avila and Chestnut Sts.
Three-story and basement frame apts. (15 apts.)
Owner—D. Cohen, 825 Monadnock Bldg.
Architect — J. C. Hladik, Monadnock Bldg.

To Be Done By Day's Work
APARTMENTS Cost, $30,000
SAN FRANCISCO, Cal., NW Cervantes and Alhambra Streets.
Three-story and basement frame apts. (18 apts.)
Owner—Thos. Quistad, 2108 Post St., S. F.
Architect—H. C. Baumann, 251 Kearny St., S. F.

Plans Complete
APARTMENTS Cost, $25,000
SALINAS, Monterey Co., Cal.
Two-story reinforced concrete store & apartment building.
Owner—Vanderhurst & Duda.
Architect—W. H. Weeks, 369 Pine St., S. F., Ray Bldg., Oakland, and 248 So. 1st St., San Jose.

Contract Awarded
APARTMENT Cost, $30,000
SAN FRANCISCO. SW 24th & Valencia St.
Three-story and basement apartment building (13 apts.)
Owner—May Edwards, 2173 22d St., S. F.
Architect—James F. McGuinness.
Contractor—Louis R. Anderson, 4069 19th St., S. F.

Segregated Bids To Be Taken By Contractor.
APTS. Cost, $300,000
SAN FRANCISCO. Calif. N Turk 37-6 E Leavenworth.
Ten-story class A apartments, 86 apartments.
Owner—V. Fassio, 165 Julian St.
Architect—Clausen & Amandes, Hearst Bldg., S. F.
Contractor—Mission Concrete Co., 125 Kissling St., S. F.

Add. Sub-Contracts Awarded
SAN FRANCISCO, S W Franklin and Willow Ave.
Five-story and basement Class C concrete (40) apartments.
Owner—Ida Krohn.
Architect—H. C. Baumann, 251 Kearny St., S. F.
Contractor—Monson Bros., 251 Kearny St., S. F.
Heating—M. J. Reeves, 959 Natoma St., S. F.
Sheet Metal—Anderberg & McCaron, 2041 Folk St., S. F.
Electrical Work—Radelfinger Bros., 142 4th St., S. F.
As previously reported, reinforced steel to Badt-Falk; lumber and mill work to Sudden Lumber Co.; plumbing to Anderson & Rowe.

Ready for Figures in a Week
APARTMENTS Cost, $55,000
SAN JOSE, Santa Clara Co., Cal.
Three-story frame and stucco apartment building.
Owner—J. A. Valpey.
Architect—W. H. Weeks, 369 Pine St., S. F., Ray Bldg., Oakland, and San Jose.

Owner Taking Segregated Bid.
APARTMENTS Cost, $275 000
SAN FRANCISCO. N Jackson Street 34 W Buchanan Street.
Seven-story Class B reinforced concrete apartment building (28 three to five-room apts. Brick or cement exterior).
Owner—Wm. L. Penziner, Rm. 258, 58 Sutter St., San Francisco.
Architect—W. L. Schmolle, 519 California St., San Francisco.

Plans Being Prepared
APARTMENT Cost, $50,000
SAN FRANCISCO. S Clay 137 E Baker.
Three-story and basement frame and stucco apartment house (12 2, 3 and 4-room apts.)

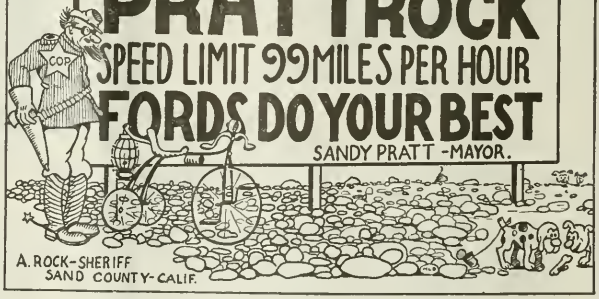
ALBANY, Alameda Co., Cal.
Two-story frame and stucco community hall and educational building.
Owner—Albany Community Methodist Church.
Architect—Wythe, Blaine & Olson, 1765 Broadway, Oakland.

SANDY PRATT HAS OUTDOOR CHRISTMAS TREE

Mr. and Mrs. Clarence (Sandy) Pratt, who just moved into their new home on El Verano Way in Monterey Heights, between St. Francis Wood and Westwood Park, have a beautifully decorated outdoor Christmas tree with colored electric lights. The tree is almost forty feet high, and stands in front of their new home. Sandy, who is "Mayor" of both Monterey Heights and Westwood Park, claims to be the first resident west of the Twin Peaks to have an outdoor Christmas tree at a private home. Sandy is advocating the decorating of outside trees at Christmas time and was the first to suggest the lighting of some of the beautiful evergreen trees in the State Capitol Park at Sacramento. Many do not know that this wonderful thirty-acre park has trees from every part of the world, many of them large evergreen trees. Also at Sacramento, Sandy's company, the Pratt Building Material Company, has placed a large electric lighted Christmas tree over the water on the American River at the 12th Street bridge near the Auburn-Marysville highway. Sandy has a sand producing plant at this place. At night the colored lights reflect in the water and present a beautiful sight. At Sandy's sand plant at Marysville Sandy also has a lighted tree on top of the high tower near the Yuba River. This tree can be seen for miles. Mr. Pratt believes that outdoor Christmas trees will be very numerous by next Christmas and Sandy is also behind the movement to preserve part of Sutro Forest on the top of Mt. Davidson (highest point in San Francisco). Sandy lives on the south western slope of this mountain.—San Francisco Item.

SANDY HOPES.
TO SEE hundreds.
OF OUTDOOR Xmas trees.
IN CALIFORNIA next year.
WE HAVE the climate.
AND WHY not advertise California.
AND OUR several communities.
BESIDES IT is lots.
OF FUN and pleasure.
SANDY'S TREES.
AT HIS San Francisco home.
AS WELL as.
AT THE sand plants.
AT SACRAMENTO and Marysville.
ARE BEAUTIFUL.
AND ALL can enjoy them.
WITH SANDY.
AND HIS family.
AND NEXT year.
YOU WILL also see trees.
ALL LIGHTED up.
AT THE other sand.
AND ROCK producing plants.
OF THE Pratt Building Material Co.
AT PRATTROCK (near Folsom).
PRATTCO (MONTEREY County).
AND MAYHEW (Sacramento County).
AND IF Sandy.
HAD HIS way.
ALL THE evergreen trees.
IN CAPITOL Park, Sacramento.
WOULD BE covered.
WITH ELECTRIC light globes.
"I THANK you."



This California Highway scene on the Tahoe-Placerville Highway will be more beautiful next year when Sandy Pratt, producer of crushed rock, sand, gravel and concrete mix (sand and gravel) erects more outdoor Xmas trees (see above news item.)

LOS ANGELES, Calif.—Until 9 a. m., Dec. 29, bids will be recd. by bd. of educ., for the following work at city schools: For constructing retaining wall and steps at Lockwood St. school; for constructing a boys' physical training bldg., at McKinley junior high school; for installing water pump and auxiliary equipment at George Washington high school site at Normandie Ave. and 109th Pl.; for furnishing and installing special electric fixtures at Horace Mann and Thos. NOTICE TO CONTRACTORS

(Hayward School District

NOTICE IS HEREBY GIVEN that sealed bids will be received by the Clerk of the Board of Trustees of the Hayward School District of Alameda County, California, Jacob Harder, Jr., at his office, 568 Castro Street, in the Town of Hayward, Alameda County, California, **until Wednesday, the 5th day of January, 1927, at ten o'clock A. M.,** at which time said bids will be opened for furnishing all labor and materials and mechanical workmanship required for the erection and construction of the proposed new Hayward Highland School Building, located on the southwest corner of Hayward Boulevard and Lemos Avenue, in the Town of Hayward, County of Alameda in said school district.

Bids will be received for this work on one general department or contract, including all work complete, and in accordance with the complete plans and specifications of slad work on file and open to inspection at the offices of the Architect, E. P. Whitman, 192 Main Street, Hayward, California, and on file with the Clerk of this Board at his office hereinbefore mentioned. Copies of said plans and specifications may be obtained at either place by depositing with the undersigned Clerk of the Board or with the said Architect the sum of Ten Dollars ($10.00). Contractors will be restricted as to the length of time they may retain these plans and specifications to one week. If the plans and specifications are not returned to the Clerk of said Board or said Architect within the time above specified or are returned in mutilated or damaged condition, the deposit shall be retained by the said School District as agreed and liquidated damages for such mutilation and detention and will be immediately used for the purchase of a new set of blue prints and specifications.

Each bid must be made on proposals obtained at the office of the Architect or at the office of the Clerk and must be signed by the bidder and accompanied by a certified check for at least 10% of the amount of the bid or proposal certified to by some responsible bank or banker and made payable to the Board of Trustees of the Hayward School District of Alameda County, California, to be retained by said School District as agreed and liquidated damages should the party or parties to whom the contract is awarded fail to enter into the contract after the award or to give the bond required for the faithful performance of the contract or any bond required by law.

Bids will be opened by the said Board of Trustees of Hayward School District on Wednesday, the 5th day of January, 1927, at the hour of ten o'clock A. M., at the office of the Clerk located at 568 Castro Street, in the Town of Hayward, Alameda County, California, in said school district.

The Board reserves the right to reject any and all bids or any or all items of such bids.

Dated: December 13, 1926.

JACOB HARDER, JR.,
Clerk of the Board of Trustees of the Hayward School District, Alameda County, California.

NOTICE TO BIDDERS

(Pipe and Fittings—Redwood City)

Public notice is hereby given that sealed bids will be received by the Board of Trustees of the Town of Redwood City, California, **up to and including Monday, the 3rd day of Jnaunry, 1927, at the hour of 7:30 o'clock P. M.,** of said day, for the following material and supplies, to be delivered f. o. b. cars at Redwood City, to-wit:

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section

5300 lineal feet of 8 inch cast iron water pipe, Class B, standard weight.
1 8 inch by 8 inch by 4 inch by 4 inch cross.
5, 8 inch by 8 inch by 8 inch tees.
6, 8 inch by 8 inch by 6 inch tees.
10, 8 inch by 8 inch by 4 inch tees.

All pipe to be of the bell and spigot form, and of lengths of not less than 12 feet nor more than 16 feet. All tees to have bells all around. Pipe and fittings to conform to American Water Works Association standards.

All pipe and specials to be subject to inspection by the Superintendent of Water System of the Town of Redwood City upon delivery and rejected pieces to be stored at the expense and subject to the order of shipper.

All bidders shall specify the time within which delivery will be made. The town of Redwood City will pay for said pipe as follows: one-third (⅓) of the amount thereof on the first day of the month following the delivery and acceptance of said pipe; one-third (⅓) thirty (30) days after the first day of the month next succeeding the delivery and acceptance of said pipe, and the balance of one-third (⅓) sixty (60) days from the first day of the month next succeeding the delivery and acceptance of said pipe.

Bids to be accompanied by certified check in the amount of ten (10) per cent of the aggregate of the bid, payable to the Town of Redwood City. Checks of unsuccessful bidders to be returned at once, check of successful bidder to be returned upon acceptance of goods ordered.

The Board of Trustees reserves the right to reject any and all bids.

By order of the Board of Trustees of the Town of Redwood City.

Dated, December 14th, 1926.

W. A. PRICE,
Clerk of the Board of Trustees of the Town of Redwood City. Dec. 16-12 87

NOTICE TO CONTRACTORS

(Grading—Lakeview Junior High School Site—Oakland)

OFFICE OF THE SECRETARY OF THE BOARD OF EDUCATION OF THE CITY OF OAKLAND.

Notice is hereby given that the Board of Education of the City of Oakland and of the Oakland High School District of Alameda County, hereby calls for sealed proposals to be delivered to the Secretary of said Board, Room 211, City Hall, Oakland, California, until **Tuesday, the 4th day of January, 1927, at 9:45 A. M.,** at which time said bids will be opened for the Grading of the LAKEVIEW JUNIOR HIGH SCHOOL SITE of the Oakland High School District, located on the westerly side of Harrison Boulevard approximately 350 feet north of 26th Street.

These bids shall be presented in accordance with plans and specifications for said building on file in the office of the Secretary of the Board of Education, City Hall, and in the office of the Superintendent of Buildings, 337 17th Street, Oakland, California.

On a deposit of Ten ($10.00) Dollars, complete sets of plans and specifications may be had by any bidder on application to the Superintendent of Buildings at his office hereinbefore mentioned, and in each case shall be returned within ten (10) days after securing same, to the Superintendent of Buildings. If the plans and specifications are not returned within said time, or if mutilated, the said deposit shall be retained by the said School District as agreed and liquidated damages for said mutilation or detention.

Bids must be made on proposals obtained at the office of the Superintendent of Buildings, and be signed by the bidder and accompanied by a certified check, certified to by some responsible bank or banker, and made payable to the Board of Education of the City of Oakland and of the Oakland High School District, to be retained by said School District, as agreed and liquidated damages should the party or parties to whom the contract should be awarded fail to enter into the contract after the award, or to give bonds required for the faithful performance of the contract, or any bond required by law. The amount of said check shall not be less than 10 (10%) percent of the amount bid, provided, however, that in no case shall said check be required to be in excess of Five Thousand ($5,000.00) Dollars. Each bidder shall execute the affidavit accompanying the proposal obtained from the Superintendent of Buildings.

Bids will be opened by the Board of said District on Tuesday, the 4th day of January, 1927, at 9:45 A. M. in the Board Room, 211 second floor of said City Hall, in said City of Oakland. The Board reserves the right to reject any and all bids or any or all items of such bids.

JOHN W. EDGEMOND,
Secretary of the Board of Education of Oakland, California.

CONTRACTORS FORM PARTNERSHIP ON COOLIDGE DAM PROJECT

In connection with the construction of the Coolidge dam for the Bureau of Indian Affairs, Department of the Interior, upon which the Atkinson-Spicer Company of Los Angeles were the low bidders at $2,268,525 on November 10, it is announced that work on the contract will be completed under the firm name of Atkinson, Kier Bros., Spicer Company.

The new co-partnership reflects the participation of W. E. and E. L. Kier, contractors of San Diego, who operated in San Diego under the firm name of W. E. Kier Construction Company for many years.

The Atkinson-Spicer Company, composed of Lynn Atkinson and C. A. Spicer, has successfully operated in Los Angeles since 1923, prior to which both Lynn Atkinson and C. A. Spicer operated for many years as individual contractors in the southwest.

W. E. and E. L. Kier have completed several million dollars worth of building construction, including road work, both for the government and on private accounts in San Diego and vicinity during the past 15 years, and they will add to the new firm a large experience on superstructure work.

Lynn Atkinson and C. A. Spicer have, as individuals and as co-partners, completed a large volume of engineering construction, including a large mileage of state and county highway throughout the state and the Broadway and Hill St. tunnel in Los Angeles outfall sewer and Sacatela storm drain and other substructure worn including the Macy St. bridge in Los Angeles and the Cave Creek dam in Arizona.

The new co-partnership will specialize on general engineeringg construction, maintaining a general office at 1315 Edwards & Wildey Building, Los Angeles.

Detailed business relations in connection with the Coolidge dam will be handled as far as possible through the job office at the damsite, 35 miles southeast of Globe, Ariz., near the Federal Indian post known as San Carlos.

E. L. Kier and C. A. Spicer will act in the capacity of resident co-partners at the damsite.

SANTA BARBARA BUILDERS O. K. LICENSE LAW

Concurring in the movement inaugurated by the Southern California Builders' Exchange for a state law providing for licensing and bonding contractors operating in California, the Santa Barbara Builders' Exchange has appointed a committee to attend the district meeting of exchanges in Pasadena to make plans for endeavoring to pass the proposed legislation through the next assembly. The Pasadena meeting will be held December 28.

THE CONTRACTORS' ROOM

BUILDING AND ENGINEERING NEWS maintains a Contractors' Room where plans and specifications may be filed by Architects, Engineers and Owners for the convenience of bidders in San Francisco and the Bay Counties.

Architects, Engineers and Owners are invited to forward plans of their projects to BUILDING AND ENGINEERING NEWS. No charge for this service. The plans will be returned in good condition when contract for work is let.

BUILDING CONTRACTS

FRESNO COUNTY

PERMITS

GARAGE, $5600; No. 1328-32 Fresno St., Fresno; owner, Dr. J. C. Cooper, 1457 M St., Fresno; contractor, A. Allen.

TO TEST LEGALITY TO ISSUE STOCK

Permission to sue the Bell-Columbia Marble Company, a San Francisco corporation, and Robert Connell, Robert Lamke, F. M. Spress and Russell Spicer to test the right of the Company to hold and exercise a franchise and to levy assessments as a California corporation has been granted by U. S. Webb, attorney general, to May F. Warner, Edward Hill, Ed. L. Park and Celia Arendt. The company has been organized with par and no par value stock, which the proposed plaintiffs allege is not permissible under the California laws.

Architectural Service On Cost Plus Basis Proves Satisfactory

Widespread interest has been created among architects by the recent studies of the Architects' League of Hollywood on the cost of architectural service and its adoption scedule of carges. President Charles Kyson has received a letter from a large architectural firm in New York City telling of a new system of charging for architectural services successfully used by it. Three other firms, according to the editor of the Journal of the American Institute of Architects, are using a similar system. The New York firm in its letter to President Kyson says:

"What we do with our clients when the subject of professional charges comes up is to say that we find that the scheme of cost-plus charges for architectural services works more equitably for both client and architect. We find that in the long run some clients pay more than the schedule rate for complicated work and others pay less than the schedule rate where the work goes quickly or the design is repetitive in its general nature. With the exception of one or two institutions where any variation from the customary schedule of charge would embarrass the trustees or directors we find that clients acknowledge the fairness of our contention and accept our scheme without hesitation. We make a contract for services which states that we will do the professional work on each particular building at the actual cost to us of all draftsmen's salaries, plus overhead, plus the time of principals at a certain rate previously determined, plus fees paid to consulting engineers, plus one-third profit, plus the cash disbursements (blue prints, traveling expenses, long distance telephone calls, etc.). In order to protect the client against extravagance in our office we add a clause which provides that the maximum amount to be paid by a client to us for our professional services shall not exceed 7% of the cost of the building, in cases where the A. I. A. charge would be 6%; or 8% and even 8½% of the cost of the building where the normal charges would be somewhere around 7 of 7½%, as is the case with small hospital work or complicated structures only slightly repetitive.

"The overhead percentage that we use is actually based on long experience throught a series of years where where we find that our general office overhead related to the expenditures for draftsmen's salaries varies from 40 to 66⅔%. In order to insure against lean years we have generally taken the percentage as high as 60% and as low as 50%, but not lower. Last year when our office was crowded with work (as it is now) our overhead was around 43%, but we established the 50% or 60% figure in our contracts and have never had it objected to. What has actually happened is that we have only once or twice been caught on jobs that were so complicated that our cost-plus system actually ran over the guaranteed maximum percentage mentioned in the contract. I hardly remember a case where this was so except in the case of one small institution where the scheme was completely changed after the estimates were received, and in that case the directors are now considering our claim for repayment of the cost of remaking the plans.

"On the whole the results have been satisfactory to both sides. We have generally come out lower than the upset percentage price. Sometimes we came out very much lower than that. We have had some very large buildings of the more or less industrial type where both the design and detail were so insignificant compared with the mass of the building that the work has only cost the client between 3 and 4%, and yet the jobs have been profitable to the office. We should not have dared to fix so low a percentage had we guessed in advance at what rate to charge under the schedule.

"To give you an idea of the kind of clients who have accepted this scheme we might mention that we have contracts of this nature at the present ime on the buildings for a tuberculosis sanatorium in upper Westchester county amounting to about a million and a half dollars, we have used it in the case of the main buildings for the department store of R. H. Macy & Co. in the city, where new construction work amounted to four and a half millions, and the alterations to the old building to three millions. At the present time we are also building a half dozen buildings for this and other companies under this arrangement. Of course, we should explain that the cost of the alteration of a big building like Macy's the upset percentage within which we agreed to keep was 10%. Actually the alteration cost the owners around 5%. As before stated, we would not have dared to guess that we could do it at that rate, and yet it figured out that way with all our costs and overhead and profit included.

"This In general is all there is to the scheme. We are not along in using it. Sturgis of Boston works on this plan and one or two others that we know of have adopted it within recent years. There may be more that we do not know about. We find that the client likes it because he can ask for any reasonable amount of work restudying the plans or working out supplementary schemes in the early stage of design without the embarrassment of always asking how much it is going to cost to do so. On small work we frequently refuse to make any upset percentage figure, saving it all depends entirely on how much work we have to do on the job. Whenever any question is raised as to our high charge on this kind of work (where the building costs are low and the architectural design is complicated) we can always turn to the books and show just exactly how much it cost and also show that the profit we have figured is no more than we figure on any of our larger work. At the same time we are repaid for our exceptional amount of time expended on such small projects by the fact that our own salaries have been repaid, and hence we are not the losers thereby. Each of the principals in our office keeps a fairly accurate record of assignable time on each job and these charges are 'loaded' by a certain addition due to the fact tht we spend a good deal of time in general administration which we then spread over the assignable time by this 'loading.'

"Finally, I may say that we have occasionally been criticised by architects who say that we are in position to impose our plan on clients, whereas architects not so favored might find it difficult to do more than stick by the schedule or even work below it. That may be so. However, we have never known a client to refuse to recognize the fairness of our plan."

Announcement is made that White Brothers, hardwood dealers of San Francisco, will commence building operations for the establishment of an East Bay plant on High Street between East Twelfth Street and the Estuary, Oakland. J. H. Pedgrift, contractor, is erecting warehouses which will accommodate several million feet of oak, ash, hickory, mahogany, walnut, lignum, vitae, Australian iron bark, Philippine mahogany, etc. In this plant the company will handle oak and maple flooring, veneered panels, etc.; in fact, a complete hardwood business

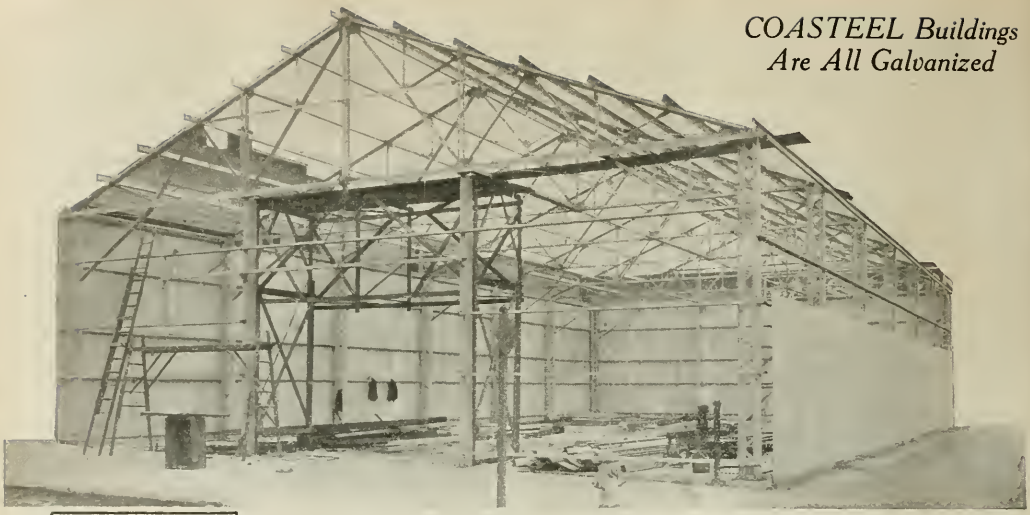
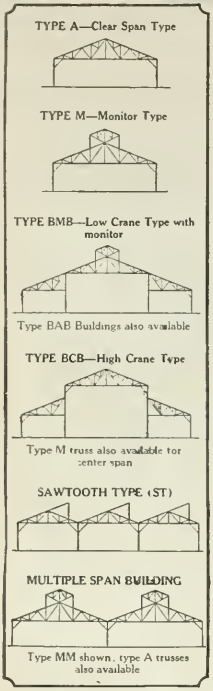
COASTEEL Buildings Are All Galvanized





TYPE A—Clear Span Type
TYPE M—Monitor Type
TYPE BMB—Low Crane Type with monitor
Type BAB Buildings also available
TYPE BCB—High Crane Type
Type M truss also available for center span
SAWTOOTH TYPE (ST)
MULTIPLE SPAN BUILDING
Type MM shown, type A trusses also available

This Building will be Completed and Ready to Occupy Next Week

BECAUSE it is a COASTEEL Standard Building, the building pictured above will be ready for use in that short length of time. All of the fabrication was done before the building was ordered—**COASTEEL Buildings are carried in stock**—and erection is just a matter of making simple connections.

Regardless of size or type of building, this fast service can be expected on any COASTEEL Standard Building. The engineering on the many different columns and trusses, girts and purlins is completed, as well as the fabrication of the various members that make up COASTEEL Buildings.

Let us know your requirements
We have a building to fit them

A. A. E. DECLARES WAR ON CORRESPONDENCE SCHOOLS

A national campaign sponsored by the American Association of Engineers is to be waged against fake correspondence schools, particularly those which advertise engineering courses, says Walter B. Hogan, president of the Stockton chapter of the association, and city engineer of Stockton.

"Fortunately," said Mr. Hogan, "there are few of these correspondence schools in California. There are many in the East, and all are being thoroughly investigated by the association. Efforts are being made toward introducing suitable bills in Congress and in state legislation which, if passed, will materially curb the promulgation of the misleading advertisements now being used by the majority of these so-called technical correspondence schools.

"I have no doubt but that young men of Stockton and San Joaquin Co. have taken these engineering courses and have wasted their money. The schools have advertised that for the sum of $250 they can teach anyone, even without past engineering experience, and will secure engineering positions for their 'students' at salaries ranging from $250 to $500 per month, which they cannot do.

"It is a big graft. One of these schools employs instructors with little technical education or training at a salary of $30 a week to teach young men to become engineers at $10,000 a year!"

The Stockton chapter of the association has passed a resolution endorsing the national campaign.

U. OF C. ARCHITECT SURVEYS BUILDINGS THROUGHOUT U. S.

After four weeks spent visiting the auditoria and large public buildings of the principal cities and universities of the United States, W. P. Stephenson, an architect of the University of California has returned to Berkeley with a large collection of data and observations which are to be used in deciding upon a plan for building the projected Hearst auditorium at the University.

In all the public and university auditoriums and theatres visited Stephenson gathered information dealing with their size, shape, systems for handling traffic, architectural and decorative treatment, acoustics, lighting and heating arrangement, organs and other physical equipment.

Among the famous buildings visited by the architect in his trip were: the auditorium and Art Museum at Cleveland; the Eastman School of Music and Theatre of the University of Rochester; the New England Conservatory of Music at Boston; the Hippodrome, Metropolitan Opera House, Carnegie Hall, St. Patrick's Cathedral and Cathedral of St. John the Divine in New York; the Washington Auditorium and the National Academy of Sciences in Washington, D. C.; and the Shrine Public Auditorium in Los Angeles. In addition he made a detailed survey of many university buildings, visiting the campuses of Illinois, Harvard, Yale, Cornell, Princeton, Chicago, Michigan and Massachusetts Institute of Technology.

The proposed University of California auditorium is to be a gift of William Randolph Hearst. It is to adjoin the Phoebe Apperson Hearst Memorial Gymnasium, which is nearing completion. As soon as the results of Stephenson's survey are reviewed, plans will be made by university officials for the type of building best suited to the campus needs and the actual designing and building will follow.

FIRE-CLAY BRICK SPECIFICATIONS OF U. S. GOVERNMENT

Circular No. 299, 2nd Edition, entitled, "United States Government Master Specification for Fire-Clay Brick," just issued by the Department of Commerce, Bureau of Standards, contains revised specifications for six classes of fire-clay brick for use by the various Government departments.

This specification was developed by conferences at the Bureau of Standards of officials representatives of the various interested Government departments and of manufacturers and users of fire-clay brick. General requirements are outlined, and the requirements for each of the six classes and the methods of testing are detailed. In addition, the Specification contains a definition of each class based on the requirements of the service for which the brick of each class is intended.

Although this Specification was developed for the Government, it may serve as a basis for specifications for other users of this material.

Copies of this circular may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C., at 5 cents each.

AMERICA HAS DISTINCTIVE ARCHITECTURE

America has developed a branch of art that is distinctively American in the creation of the modern office building and skyscraper, according to J. O. Davidson, famed sculptor, who is in San Francisco on his first visit to the Pacific Coast. The artist sums up American art and art tendencies as follows:

"Our art is, of course, a continuation of the art of the famous old masters of ancient Europe since we are all descendants of some European nation. There is little that is new in the painting and sculpture of today, but America has produced a real American architecture, and architecture is one of the primary branches of art.

"I believe that are develops according to necessity and public demands. It was necessary for Americans to build a new type of edifice for the great business industries of this country, and from that sprang the office building which is gradually becoming more beautiful and is already a work of art."

Davidson believes that futuristic and freakish art has its place and purpose. "It s a revolt from the old classic models, and there is a demand for it, therefore it has its purpoae."

LOS ANGELES FOURTH U. S. CITY IN NOVEMBER BUILDING

Los Angeles was fourth among the cities of the U. S. in building for November, nosing out Philadelphia by a few thousand dollars. Detroit was third. Seasonal slowing up was reflected impractically all the larger eastern cities. Reports from 210 cities showed a total of 52 831 permits with an estimated valuation of $259 888 issued during November, as compared with 55,180 permits with an estimated valuation of $296,663,000 for the same month last year. The November record shows a decrease in valuation of 12 per cent compared with November, 1925, and 26 per cent compared with October, 1926.

For 11 months of 1926 these 210 cities reported permits issued with a valuation of $3,421,907,700 a decrease of 6 per cent compared with the corresponding period last year. Following are the figures for the first five cities:

	11 Mos., 1926	11 Mos., 1925
New York City	$946 673 300	$932 134,615
Chicago	342,488,500	341,500,451
Detroit	171 032,152	165 943,299
Philadelphia ..	19,420,275	162,466,100
Los Angeles...	112,488,500	135,835,759

Forty-one cities reported a million dollars worth of building or more for November, 1926.

CERTIFICATES GRANTED

Wm. Freeman, 133 Lexington Ave., San Francisco, and Harry A. Schary, 624 Mariposa Ave., Oakland, have been granted certificates to practice architecture in California. The certificates were issued at the last meeting of the California State Board of Architecture, Northern District.

Stone And Webster Perfect New Construction Organization

Stone & Webster, Inc., and Blodget & Co., announce the formation of a new company under the name of Stone & Webster and Blodget, Inc. The company will begin operations on January 1st, with an authorized capital of $10,000,000.

The corporation is a combination of the securities department of Stone & Webster, Inc., and the old investment house of Blodget & Co. The engineering and construction, management, and investigating departments of Stone & Webster, Inc., are not included and will not be affected by the combination. The consolidation follows the trend of amalgamation in other fields, being one of the first of importance in the investment banking business.

Bayard F. Pope, now a partner of Blodget & Co., will be president of the new corporation. Other officers and the directors will be drawn from both the participating companies, all the present partners of Blodget & Co. being officers of Stone & Webster and Blodget, Inc.

The head offices of the new company will be at 120 Broadway. Each company has been maintaining offices in New York, Boston and Chicago. They will be consolidated in each city under the new plan and C. E. Ober, now of Blodget & Co., as senior vice-president and R. H. van Deusen, now of Stone & Webster, Inc., as vice-president, will have charge of the business of the new corporation in these cities respectively. Other offices, which are now maintained in Providence, R. I., Hartford, Conn., Rochester and Albany, N. Y. and Portland, Me., will be included in the combination and will continue operation.

Stone & Webster and Blodget, Inc., will offer a complete service to investors and to issuers of securities, namely, municipalities, railroads, public utilities and industrial companies. It will give investors increased efficiency in handling their accounts, additional facilities as a result of investigation of new issues and diversification of securities lists.

Public utilities and others whose securities will be handled by Stone & Webster and Blodget, Inc., will have the advantage of a wider market through the combination than either of the companies could offer separately. Its facilities will be available not only for originating issues to be sold by the new house exclusively, but also to public utilities and other corporations in the sale of whose securities Stone & Webster and Blodget, Inc., will participate with other houses.

"Stone & Webster, Inc., has built up a substantial securities business over a period of many years," Mr. Charles A. Stone, chairman of that company, said, "which combined with the banking business of Blodget & Co. will give the utmost diversified experience to the new corporation. While this new corporation will be operated in an entirely independent capacity, it will have at its elbow the comprehensive engineering and construction, and analysis service of Stone & Webster, Inc."

Commenting on the combination, Mr Pope pointed out that the tremendous development of the country indicates that billions of dollars must be provided to facilitate refinancing and expansion. "The amount of new money needed annually reaches a figure almost beyond belief," he said. "The largest part of this huge sum must be obtained on long term securities taken by investors, either individually, or collectively through deposits in savings institutions or premiums paid to insurance companies. This has made it necessary for security and banking houses to offer service national in its scope in order to fulfill their obligations both to the investor and to the thousands of municipalities, utilities, railroads, and industrial companies which are depending on such houses to secure the needed funds for refinancing and development. Stone & Webster and Blodget, Inc., will be in a position to meet these needs of both interests. We realize that the security dealer is absolutely dependent on the confidence of the investor at large, and in order to deserve this confidence and to expand the service which we can render to the fullest extent, we have effected this combination."

Blodget & Co. was established in Boston 41 years ago, and is considered one of the soundest of the moderate sized investment banking houses. Until the war its business was confined mostly to New England, but in the past ten years its New York office has assumed importance and its distribution has increased several hundred per cent. All of the partners of Blodget & Co., most of whom have been connected with that house for twenty or more years, will become officers of Stone & Webster and Blodget, Inc.

Stone & Webster, Inc., was established in 1889 to engage in engineering and construction. Four years later it undertook the operation of public utilities and has been outstandingly successful in this field. The inclusion of a securities department was a logical outgrowth of this operating business. Charles A. Stone, chairman, and Edwin S. Webster, president, who will be directors of Stone & Webster and Blodget, Inc., organized the partnership. Both are graduates of Massachusetts Institute of Technology. Their operations cover the United States and other countries. Mr. Stone is also a director of many important companies, including American International Corporation, International Mercantile Marine Co., Union Pacific Railroad, The North American Co., International Acceptance Bank, Inc., First National Bank of Boston and many other corporations. For four years he was also a director of the Federal Reserve Bank of New York.

In addition to being a director of the Massachusetts Gas Companies and of some 25 other public utility corporations, Mr. Webster is also a director of the Atlantic National Bank of Boston, First National Corporation of Boston, Pacific Mills, Calumet and Hecla Consolidated Copper Company; Trustee of Massachusetts Institute of Technology, Massachusetts General Hospital, and the Museum of Fine Arts of Boston.

The officers and directors of Stone & Webster and Blodget, Inc., in addition to Bayard F. Pope, president, will be: C. E. Ober, H. R. Hayes and R. H. Carleton, vice-presidents; T. T. Whitney, Jr., P. L. Warren, J. D. Thomas, R. H. van Deusen, A. C. Dunmore, J. E. Baker and A. B. Griffin, vice-presidents; F. T. Pratt, secretary, and Howard F. Neill, treasurer. Directors: C. A. Stone, E. S. Webster, B. F. Pope, H. G. Bradlee, G. O. Muhlfeld, F. P. Royce, F. H. Cabot, Jr., C. E. Ober, R. H. Carleton, H. R. Hayes, T. T Whitney, Jr., P. L. Warren, J. D. Thomas, R. H. van Deusen, A. C. Dunmore, J. E. Baker and A. B. Griffin.

NEW YORK CITY TO FEATURE HUNDRED AND TEN STORY BUILDING

Manhattan is out to keep the record for the world's tallest building away from Detroit. Plans have been filed in New York for construction, beginning early next year, for a 110-story superskyscraper. It will soar 1208 feet from the street, excluding the flagpole.

Detroit has an eight-five-story project under way, The Book Tower, which will be thirty stories higher than the Woolworth Building, the world's tallest building at present. Manhattan's new skyscraper will be 300 feet taller than the Book Tower, 506 feet higher than the Woolworth Building, and approximately 200 feet taller than the Eiffel Tower in Paris.

Manhattan's new giant will be known as the Larkin Tower Building, and it will be located in the Times Square section on the south side of Forty-second Street, between Eighth and Ninth Avenues. Its cost is estimated at $18,000,000, and the land it will cover cost $4,500,000.

Building plans have been filed with the city authorities by John A. Larkin, president of the West Forty-second Street Corporation, the prospective builder. He and his brother, Edward L. Larkin, architect and engineer, and Alexander D. Stark, structural engineer, designed the building. It will have 1,450,000 square feet of floor space, 950,000 of which will be suitable for office purposes.

Three other buildings surpass it in its proposed rentable floor space. They are the Graybar Building, near Grant Central Station here; the Equitable Building, on lower Broadway, and the General Motors Building in Detroit.

The building will consist of one tower piled upon another, with ten setbacks or banks. Excavation for the foundations will go forty-eight feet below street level, and there will be a basement and two-story sub-basement. It will rest on a reinforced concrete foundation imbedded in the solid rock of Manhattan Island.

The building will be served by sixty high-speed elevators, two of which will be expresses that do not stop between the first and eigthy-second floors. Four shuttle elevators will carry passengers upward from the eighty-second. The three top floors will be devoted to sight-seeing purposes.

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

CONCRETE PIPE MEN TO MEET AT BAKERSFIELD

Concrete pipe manufacturers of California will meet in Bakersfield, Jan. 9, for a state-wide conference. R. J. Gibson and Lloyd Stroud of Bakersfield, are planning a program. Round-table discussions will be held of methods for improving concrete irrigation pipe, more efficient irrigation and general betterment of agricultural conditions throughout the state. It is expected that the attendance will number more than fifty.

PLUMBERS ORGANIZE

Master Plumbers of the San Joaquin Valley, twenty in number, reorganized the Master Plumbers' Association of the San Joaquin Valley at a meeting in Dinuba, Dec. 23. Fred W. High of Fresno presided, and was elected president. Clarence Foin of Fresno was named secretary, and George Stanton of Dinuba, assistant secretary. King S. Ford of Dinuba aided in making arrangements for the meeting.

EXCHANGE DINNER-DANSANT SET FOR ST. FRANCIS HOTEL

The annual dinner-dansant of the San Francisco Builders' Exchange will be held Saturday evening, February 12, in the Colonial Ballroom of the St. Francis Hotel, according to Sam Cohn, chairman of the Builders' Exchange Entertainment Committee, which is completing arrangements for a program of entertainment.

Blue prints for table reservations are now being completed and will be on exhibition at the exchange quarters in the immediate future, Cohn announces. Reservations for seating may be filed with the secretary of the exchange when selections are made.

Wm. J. Feary of the Western Lime & Cement Company and A. H. Bergstrom, general contractor, are assisting Cohn on the committee.

SEATTLE TO BE SCENE OF CLAY PRODUCTS MEET

The first annual conference meeting of clay products manufacturers in the Pacific Northwest is being called in Seattle January 14.

It is the aim of the Pacific Northwest Brick & Tile Association, the sponsors of the conference, to make this meeting the first of a series of annual meetings to which all the manufacturers of clay products such as terra cotta, common brick, face brick, hollow tile, sewer pipe, roofing tile and drain tile, as well as other products, will come once a year for the purpose of discussing problems of mutual interest to the various divisions of the clay products industry, to promote better competitive relations, and to serve as a clearing house where ideas and information may be exchanged.

The annual business meeting of the association will be held in conjunction with the conference but not as a part of it.

COUNTY SURVEYORS WILL MEET IN SACRAMENTO

The California Association of County Surveyors will meet in Sacramento in January in conjunction with the meetings of the California State Association of County Supervisors and the California State, Municipal and County Purchasing Agents.

Announcement of the decision of the engineers to hold their meeting at the time of the meeting of the other two associations has been received by the conventions bureau of the Sacramento Chamber of Commerce from Lloyd Bowman, their state secretary, and county engineer of Santa Cruz County.

The total number of surveyers, supervisors and purchasing agents who will be in Sacramento for the meetings is expected to exceed 1200. No definite date for the sessions has been set.

ELEVATOR INSPECTORS PROPOSE TO CURB ACCIDENTS

Additional measures to curb the number of elevator accidents in California and problems of increased pressures in steam plant operations are the outstanding discussions to come before the joint gathering in San Francisco, Jan. 5, 6 and 7, of the California Boiler and Elevator Inspectors' Association.

"There are altogether too many avoidable elevator accidents, due primarily to a failure to maintain safety devices in proper repair," declared A. J. Lamie, convention manager. "During this gathering, to be held at the Bellevue Hotel, we expect to outline an educational campaign on the safe use of elevator equipment.

"Also, we will study the rapidly increasing steam pressures now being used in the industrial world. Twenty-five years ago a steam pressure of 100 pounds to the square inch was considered an average in most industrial plants. Today a pressure of 750 pounds is not uncommon. In fact, in one plant a pressure of 1300 pounds is used. This development necessitates enormously increased temperatures, and our association members are therefore eager to assemble here for the purpose of studying the subject in detail from the standpoint of inspections."

The opening address will be made by John A. McGilvray, chairman of the California Industrial Accident Commission, which is sponsoring the convention. Mr. McGilvray is also one of the directors of the local Convention and Tourist League.

PATENT INDICATES STEEL WILL BE PRODUCED CHEMICALLY

In looking over recent patent grants issued by foreign countries I came upon a late application which tends to revolutionize the steel market. The Badische Anilinfabrik, Germany, have now published a statement, giving a few details of this much promising new process. The new process consists of treating iron in a chemical way to produce steel which is far superior to steel made by the melting process. This new steel product has a greater hardness and still retains a higher elasticity than steel made today. The new steel product is very uniform and allows unlimited confidence as to exactness and quality.

This new invention is creating a sensation equal to the new process for liquifying carbon, invented by Professor Bergius, and which is now being exploited in this country. Should this new steel process become a manufacturing monopoly of Germany, one can anticipate a lively commercial feud when the new product will come up for competition on the American steel market.

The aspect of this steel product receives additional interest if one considers that many thousands of special machinery parts and tools are now made at high cost because of special steel material being used to insure either greater durability or dependability.

Steel is carbon-containing iron. Its manufacture so far consists of a decarbonizing of the raw iron whereby the carbon is reduced to a certain degree. Special fine steel is obtained by adding certain chemical substances to the steel, for instance: manganese, silica, titanium, nickel, chrome and tungsten. These metals added in certain small quantities give the steel material high valued properties.

The new invention consists of adding carbon to the iron without melting the same. This reduces the manufacturing cost considerably. The above-mentioned chemical additions can also be incorporated at the same time the carbonizing is done.

MEASUREMENT OF PREMEABILITY OF CERAMIC BODIES

The Engineering Experiment Station, (University of Illinois), Urbana, Ill., has issued Circular No. 14 covering the measurement of premeability of ceramic bodies, the purpose of which is to describe two types of permeameters which have been developed in connection with investigations of the drying behavior of porcelain bodies, the burning behavior of different kinds of brick, and the problems involved in the utilization of refractories in water-gas sets and boiler settings. In both cases these represent radical departures from previous types of permeameters, and are the result of considerable experimental work which was undertaken when it was found that the usual types of permeameters were not suited to the measurement of ceramic bodies. The one type of permeameter is used in measuring the permeability of small specimens of extremely dense bodies, and the other in measuring the permeability of standard-sized, burned refractories. A modification of the latter type, described in the circular, is used for full-sized unburned clay brick.

Some of the ways in which permeability measurements can be used to advantage in ceramic investigations are described in the appendix to the circular. Copies of which may be obtained without charge by addressing the Engineering Experiment Station, Urbana, Illinois.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

California Water Service Co. of San Francisco, capitalized at $12,000,000 has been incorporated. J. M. Mannon Jr., R. L. Lipman, H. D. Costigan, E. S. Pillsbury, W. E. Wright, J. G. Elliot and J. G Baldwin.

San Pedro - Wilmington, Calif., Builders' Exchange, James B. Stout, president, has gone on record as favoring the licensing and bonding of contractors by the state along the same lines that realtors are licensed.

Construction will be started about January 15 by the Union Oil Company on a 15-mile 8-inch diameter pipe line to connect the main oil fields in the Kern River District with the Mt. Posi oil field.

Mayor Cryer of Los Angeles has signed the ordinance regulating the construction of school buildings. This requires all buildings over two stories in height to be Class A construction. One-story frame emergency school buildings may be maintained for one year.

Babson says "spotty conditions developing." Bradstreets notes "irregularity in trade and industry." Dun adds "irregularity of conditions increases." Speaking of prospects for the next 3 to 6 months most of the economic services are cautious. But one considers "outlook wholly satisfactory." —(Exchange).

Roseville city trustees set February 1st as date to decide on the question of issuing and selling bonds of $326,000 to finance construction of a municipal water system. Preliminary surveys for the proposed plant have been made by Olmsted & Gillilen, consulting engineers, Los Angeles.

State Senator Roy Fellon of San Francisco, at the next session of the State Legislature will introduce a measure seeking a state bond issue for between $20,000,000 and $50,000,000 to finance construction of a San Francisco-to-Oakland toll bridge as a unit in the California State Highway system.

Acting with L. B. Travers of the vocational training department, Oakland Board of Education, Painters' Union 127 and the Master Painters' Association are co-operating to establish a development class for young men wishing to follow the painting trade. The union has agreed to furnish apprentices to attend the class and to cooperate in the matter of instructors.

The San Francisco Civil Service Commission announces examinations will be held January 20 at the city hall for the following positions: Electrical Designing Engineers, Electrical Engineering Draughtsmen, Hydraulic Engineers, Mechanical Designing Engineers and Structural Engineering Draughtsmen. Further information together with application forms are obtainable from Civil Service Commission, Room 151, City Hall.

Santa Monica has adopted an ordinance regulating plastering and requiring plasterers to be licensed. A Santa Monica newspaper quotes the city commissioners as saying the ordinance is designed to protect investors against irresponsible plastering contractors and to give the city power to enforce the license ordinance against master plasterers who come into the city temporarily from other cities.

The Richmond-San Rafael Transportation Company, operating ferry boats between San Quentin Point and Richmond, seeks permission of the War Department to construct a new trestle, wharf and ferry slip on the Marin county side. The contemplated wharf will extend out into the bay for a distance of 3700 feet, ranging in width from 100 to 280 feet, according to H. G. Gill, secretary of the company. Improvements contemplated will involve an expenditure of $250,000.

Exports of electrical goods from the United States during October totaled $8,035,710, an increase of $468,623, or 6 per cent as compared with October, 1925, according to preliminary figures of the Department of Commerce. The total for the first ten months of 1926 was $80,090,854, and that of the same period of 1925 was $70,015,126. The comparison of export values for October with those of the same month last year show, in general, substantial increase in shipment of light electrical equipment, such as batteries, electrical appliances and signal and communication devices, and slight falling off in sale of heavy equipment such as generators, motors and transmission and distribution apparatus.

A total of 1,973,000,000 board feet of lumber was cut from California forests in 1926, W. B. Rider, deputy state forester, estimates. The stumpage value of the cut was $6,154,000, while the same lumber after it left the mills was valued at $59,190,000. In 1925 the cut was valued at $68,000,000. Approximately 25,000 men were used in harvesting the timber crop, which was divided as follows: California white pine, 855,000,000 board feet; Redwood, 471,000,000; sugar pine, 269,000,000, and 378,000,000 feet of other species. White pine averaged about $3 per thousand feet, redwood $4, sugar pine $4, and other species, $1.15.

ALONG the LINE

Henry H. Meyers, San Francisco architect, will leave January 9 on a trip through the Mediterranean for a tour of Europe. Mr. Meyers will be gone about six months during which time he will inspect the more important structure recently erected in that section with a view to securing ideas on new developments in architecture and construction methods.

Carol Aronovici, city planning engineer, has been appointed city planning consultant, for the city of Alhambra.

Glenn M. Scofield a member of the firm of Scofield Engineering-Construction Company, builders of the Biltmore Hotel in Los Angeles, died in that city December 22.

Because of illness, George R. Olshausen, for five years structural engineer in the city building department at Oakland, has tendered his resignation to the city council.

Walter J. Mathews, building inspector at the Sacramento county hospital, died at his home in Sacramento Dec. 24, following an extended illness. He was sixty years of age.

Mrs. Parker Maddux has been reappointed a member of the San Francisco City Planning Commission. The new term covers a four year period commencing January 1.

Nelson A. Eckart, assistant city engineer of San Francisco, has been elected president of the San Francisco Section, American Society of Civil Engineers.

Walter J. Vance, a civil engineer for the Associated Oil Company at Sacramento, died at his home in that city Dec. 23, following an illness of fifteen months. Vance was 46 years old. He is survived by a wife and four children.

California-Arizona Bridge Company, a San Francisco organization with a capital stock of $350,000, has filed articles of incorporation with the secretary of state. The company proposes to build and operate toll bridges. Directors are: S. N. Barnes, H. J. Finn of San Francisco and S. R. Pfund of Burlingame. The location of the proposed bridges are not disclosed.

F. W. McCarton, city engineer of Modesto, has tendered his resignation to the city council. The resignation is effective Dec. 31 and was submitted due to a lengthy illness which handered him from carrying out the duties of the office.

J. E. Johnson, Stockton contractor, has started the construction of a $150,000 crushed rock and gravel plant south of Chico, Butte County. The plant will have a capacity of 1000 tons of material per day.

TRADE NOTES

O. C. Colegrove, 428 Stock Exchange Bldg., Los Angeles, is in the market for catalogues and literature on building materials and equipment.

Annual meeting of stockholders of the Pacific Portland Cement Company, Consolidated, will be held at room 824 Pacific Bldg., San Francisco, January 28, it is announced by Harry T. Battelle, secretary of the company.

John K. Burton has purchased the hardware business of J. F. Pace at Colusa. W. E. Lewis for twenty years with the Pace interests will continue as chief clerk in the business.

Legality Of Priority Policy Of State Water Body Questioned

A controversy over the legality of the priority policy which the state division of water rights has followed for ten years developed at a hearing in Sacramento, Dec. 16, on the application of the Yosemite Power Company for permission to divert waters of the middle and south forks of the Tuolumne river for hydro-electric power purposes.

The question of whether the division was ignoring a plain mandate of the law exploded during the examination of R. V. Meikle, engineer for the Turlock Irrigation District, which, with the Modesto and Waterford Irrigation districts and the Water Users' Association of San Francisco, is opposing the power company's application.

P. H. Griffin, counsel for the Turlock district, in questioning Meikle, paused to explain that his aim was to show that if an amended application recently filed by the district were granted there would be no water whatsoever left in the middle and south forks for appropriation by the Yosemite Power Company or anyone else.

Edward H. Hyatt, presiding as chief of the division of water rights, interrupted to say that the amended application in question had no chance of being granted, inasmuch as the Yosemite Power Company's application was prior to it.

When Griffin explained that he understood that the State Water Power Commission was bound to give preference to agricultural applications when they came in conflict with power applications, Hyatt declared that it had never been the policy of the commission to waive the priority of a power company application in favor of an irrigation district application.

Griffin thereupon cited section 15 of the Water Commission Act, as follows: "It is hereby declared to be the established policy of this state that the use of water for domestic purposes is the highest use of water and that the next highest use is for irrigation. In acting upon applications to appropriate water the commission shall be guided by the above declaration of policy."

The hearing adjourned with the understanding that briefs for the protestants, including a brief on the interpretation of section 15, would be filed by January 1, and that final briefs would be in by January 10, after which the commission's decision would be announced.

Celotex Company To Bond Dwellings Properly Insulated

Contractors whose business is chiefly, or largely, building homes for individual owners have only two methods of appealing for business—cutting their bids to a minimum, or relying on a reputation for doing fine work.

Cut-throat bidders who disregard quality have been the bane of the contracting business during recent years. They have made it hard for the man with a reputation to keep his work up to a high standard , and they have caused many disappointments which have turned owners from boosters into knockers of the "own-your-own-home" idea.

Quality construction is a sound foundation for any contractor to build his business on. In the long run, the man who obtains a reputation for excellent work in house-construction will be able to bid on the basis of a reasonable profit and will get the job in spite of competition.

Because, among other reasons, the home-building public knows more about construction now than it did ten years ago, or more. Especially since the war, there has grown up in this country an unofficial "better homes movement." Hundreds of the most influential newspapers in the land print home-builders' departments weekly and many magazines of national circulation publish such departments every month. They reach millions of readers with educational articles, explaining construction materials and methods. Again, great numbers of women's clubs and other organizations in every part of the country sponsor annual "better homes demonstration weeks" and by so doing they reach audiences numbering hundreds of thousands.

All this propaganda for quality construction is a threat against the business of the unscrupulous builder. For the vast number of articles printed and read by millions of readers and the scores of demonstrations reaching additional thousands all tend to make the public more intelligent in construction matters. The "better homes movement" is teaching the American public to discriminate between good construction and bad construction and to demand the good.

But, unfortunately for the contractor who maintains strict standards of quality, good construction in some parts of the building does not always show. He may feel an honest pride in the fact that he insists on three-coat plaster work to full half-inch grounds, while a competitor may "skin the job" on the plastering because it won't show—until the cracks begin to draw maps all over the ceilings and walls.

Or take the matter of insulation. The quality-builder may insulate the roof with an insulating lumber of sugar cane fibre which reduces heat-losses at this most "heat-leaky" point in the whole building. He may insulate the walls of the house he builds with this same insulating lumber used in place of ordinary wood sheathing. Or he may use the large rigid boards under plaster, taking the place of wood lath, adding the advantages of insulation and sound-deadened partitions to the job, decreasing the chance of cracked walls and eliminating ugly lath marks.

Meanwhile, his competitor may be ignoring such improvements altogether, applying the shingles directly over loosely spaced roof boards, depending on ordinary wood sheathing and building paper for the walls and using common wood lath to support the plaster and the interior decoration.

In the case of competition like this, the quality builder's conscience will be perfectly at ease, but his cash and credit may suffer. For his splendid work isn't visible to the casual observer. Indeed, the price-cutter, if he is clever enough, will distract attention from the fundamental defects of his work by tacking on all sorts of gimcracks that cost him little but attract the attention of uninformed prospective buyers.

What is needed by the contractor who seeks to build a reputation for quality of construction is some way of making that quality evident and impressive to the prospective owner. The Celotex Company believes it has found a way of meeting this need.

To the owner of every home in which this insulating lumber is installed for any one of its numerous services, The Celotex Company offers a $200 bond guaranteeing that the material has been applied as specified. The bond is underwritten by the Fidelity and Casualty Company of New York and is issued to the owner guaranteeing him the sum of $200 unpon production of conclusive evidence that the Celotex was not used as stated.

This aid to the contractor is provided without expense to him or to the lumber merchant who supplies the insulating lumber. The dealer appoints some employe in his office to act as registrar of bonds. This person receives the application, which must be signed by the contractor and the dealer, stating that so many square feet of Cleotex was sold for and was installed in a certain building as sheathing, under plaster on side walls and ceilings, as a sound-deadener in floors, as roof insulation, as attic lining , an interior finish plain or decorated, as exterior finish or in the garage or other minor building. The application is sent to The Celotex Company by the registrar, who receives $1.00 for every application sent in, and then the bond is issued to the owner.

In case the owner is the contractor himself, this bond may be used as evidence of the high quality of construction when he talks to a prospective buyer. In case the house has been built under contract for an owner, the effect of the bond is to make the owner appreciate the permanent value given him by the contractor. It concentrates his attention on the hidden comfort of insulation, the hidden excellence of construction which makes for structural strength, permanence, low maintenance costs and low fuel bills.

Before announcing this bonding plan generally, The Celotex Company tried it out experimentally for several months. Contractors and lumber merchants testified that, while it was not directly and entirely responsible for sales of the material, it did clinch many sales, and invariably it proved impressive to the owner. The bonding-plan is an additional sales help to Celotex dealers. No less than this, it is a help to all contractors seeking to build reputations for quality construction and using this insulating lumber as a means of giving the home-owner something more than just a house—a real home of sound construction, enduring comfort and permanent value.

Logging camps of the Hutchinson Lumber Company near Oroville, Butte County, closed down Dec. 22, to resume operations again about Jan. 15. Four hundred men are out of employment due to the shut down.

A substantial holiday gift was made to the common stockholders of the Otis Elevator Company, directors authorizing a stock dividend of 25 per cent on common stock, amounting to about $4,250,000.

Four Sand And Gravel Concerns Merge As Associated Gravel Company

(By Oscar H. Fernbach, S. F. Examiner Staff)

Consolidation of four sand and gravel companies of central California into one concern, known as the Associated Gravel Company, becomes known with the offering for subscription of $450,000 first mortgage (closed), 6½ per cent sinking fund gold bonds of the consolidated company by Hunter, Dulin & Co. and Schwabacher & Co. The offering price is 98 and accrued interest, to yield 6.80 per cent.

The new company merges all the properties and assets of the Niles Sand, Gravel & Rock Co., River Rock Gravel Co., Riverbank Sand Co. and the Coyote Gravel Co. The company will own and operate two modern sand and gravel plants at Niles, Alameda County, and Tracy, San Joaquin County, together with a modern sand plant at Riverbank, on the Stanislaus river. Plans are under way for the erection of an additional plant on the properties of the Coyote Company, in the heart of the Santa Clara Valley.

This issue of bonds will be a direct obligation of the Associated Gravel Company and will be secured by a first mortgage or deed of trust on all the real property, leaseholds and improvements to be acquired by the company, which is appraised at $822,756. This amount will be increased by $150,000, which will also be pledged as security, upon completion of the plant of the Coyote Gravel Company.

Net earnings of the consolidated companies, after depreciation, depletion and other charges, but before Federal taxes, for the three years ended December 31, 1925, have averaged $149,238 annually, equivalent to more than five times the maximum annual interest charges on this bond issue. Estimated earnings for 1926 are reported to compare favorably with those of the past three years, and upon completion of the Coyote plant net earnings are expected to be increased by at least $50,000 annually.

The issue is dated August 1, 1926, and matures August 1, 1936. Provision is made for a sinking fund of 15 per cent of net earnings for the first year, 20 per cent the second year, 25 per cent the third year, 40 per cent the fourth year and 50 per cent for all succeeding years while any of these bonds are outstanding. On the basis of past earnings alone, the sinking fund is expected to retire the entire issue in about eight years.

Materials produced by the consolidated companies are sold through dealers in practically every important community in central California. The importance of the new company is illustrated by the fact that the component companies supplied materials used in construction of the Standard Oil, Hunter-Dulin, Matson, Pacific Gas & Electric, Southern Pacific, Civic Auditorium and Public Library buildings and the Twin Peaks tunnel.

Engineers Reduce Weather Making To Exact Science

By E. B. Cresap Ventilation Expert

It may seem a far cry back to the days when Mark Twain used to "razz" the weather of New England and his famous line that "Everybody always has complained about the weather, but apparently no one has ever done anything about improving it."

But during those intervening years science and engineering skill have made rapid strides and one of the mechanical wonders of this age of wonders is the mechanical control of air, or scientific ventilation.

The fact of the matter is that the ventilating engineer of today can create any condition of weather or climate wanted. He plays with air like the par golfer or start pitcher plays his ball. He controls air—directs it—curves it—dominates it. Mechanical ventilation, electrical air control, manufactured weather or what you please, has been reduced to an exact science.

Do you want your home, school, theatre, factory or office torrid, frigid, arid, humid or like an ideal, balmy day in exquisite June—58 degrees wet bulb temperature? If so, the ventilating engineer can fill the prescription in every detail.

Until just two or three years ago, theatres and other public gathering places closed every summer because of the hot weather and resultant low attendance. What is happening now? Electrical air control carries off the heat and cools the theatre. People go to many theatres on the hottest days in summer to keep cool! Thus, the theatres are turning a serious liability into a solid asset.

One of the unhealthiest places in the world used to be the "little red school house up on the hill." Here children were packed into stuffy, odorous rooms, with absolutely no ventilation except the occasional spasmodic opening of a rattling window that was quickly closed when cold draughts brought chills and shivers. Thousands of children caught bronchitis, tonsilitis and all the other itis's and isms because of a stupid system that vitiated their little bodies with dead, fouled air and annihilated their resistance to disease.

What is happening now? Many cities and states have passed severe laws compelling mechanical ventilation of schools. An aroused public sentiment has become crystallized against the wicked, crass attitude that our children are not worth spending a few extra thousand dollars on in the protection of their lives and health.

Public schools in Detroit, St. Louis, Chicago, Columbus, Bloomington and scores of other American cities are now equipped with immense air washing machines and all the other equipment necessary to properly clean, temperature and humidy the polluted air of our cities.

Electrical control of air or air conditioning plays a major role in almost every ramification of modern life. It is used in hotels, greenhouses, hospitals, department stores, warehouses, cold storage plants, printing establishments. Without it, mass production in industry, as we known it today, would be impossible. Air conditioning is vital in the manufacture of candy on a large scale. It is imperative in the volume production of bread, corn flakes, yeast, rubber , chewing gum, textile, drying tea, gunpowder, photogravures and a hundred other things too numerous to mention.

Huge blower type fans are used in the very bowels of the earth to ventilate mines and minimize the danger of coal dust explosions. The ventilating engineer conditions the air in flour mills to prevent explosions. Such modern giants as the Holland tunnel under the Hudson river and the Liberty tunnel that ploughs through the small mountain that splits Pittsburgh would be impossible without mechanical ventilation. Proper ventilation by mechanical means nullifies the menace of carbon monoxide gas, the deadly poison poured out from the exhausts of millions of automobiles.

Fundamentally, the ventilating expert manipulates four factors to produce exactly any type of weather desired. They are: Temperature, humidity, cleanliness of the air and effective distribution of the air or air motion. These can be controlled automatically and if variations are wanted they can be controlled or directed automatically. Like a chain that is just as strong as its weakest link, each of these factors is indispensable to health and comfort.

Is your home or building too dry or too moist- One extreme or the other is created by the relative humidity present or the amount of water-vapor mixed with the air. There are times when humidity is more important than temperature. The temperature may appear all right, but you may be decidedly uncomfortable because there is too much humidity. If the air is still, you will feel uncomfortable. Why? Because air motion carries away body heat and moisture.

How many tons of dirt and dust do you suppose the air of our American cities carries each day? Mow many buckets of dirt and dust do you breathe each year? In special experiments, it was revealed that one public school in Brooklyn removed one bucket or five pounds of dirt every day from the air entering the building. This dirt was taken each day from the residue left in an air washer.

THE FIVE DAY WEEK IN THE BUILDING TRADES

A recent national survey shows that the five-day week is now in operation in a few of the major trades in the following cities: Boston; painters, plasterers, lathers; Gary: plasterers, cement finishers; Pittsburgh: plasterers. lathers; New York: plasterers, painters; Miamo: plasterers, painters, plumbers, electricians; Seattle: electricians, lathers, painters, plasterers, lumbers, steam-fitters, plasterers' laborers; San Diego: electricians, plumbers; St. Petersburg: plasterers; Portland, Ore.: plumbers, steam-fitters, electricians, plasterers, cement finishers, tile-layers; Buffalo: plasterers; Columbus: plasterers; Dayton: plasterers; Philadelphia: plasterers; San Francisco, painters.

Shifting Land Ownership Chief Obstacle To Forestry

Shifting forest land ownership is declared by Col. W. B. Greeley, Chief of the Forest Service, United States Department of Agriculture, in his annual report, to be the chief obstacle to the rapid spread of forestry, which requires stable long-time tenure of land. Large private forest holdings are particularly unstable, often being broken up after the timber has been cut off; but there is strong evidence of a trend toward stability, according to the Chief Forester, who characterizes the trend as the most significant feature of the present forest situation in the United States.

"There is a changing attitude of the forest industries and timber-land owners that if they accept in good faith the idea of self-government in industry they must not ignore a public responsibility created by land ownership," declares Mr. Greeley.

From the standpoint of stability, Mr. Greeley pointed out that the holdings of municipalities, small private owners, and the Federal Government rate relatively high, while State holdings vary from highly stabilized to wholly unstable. Large private holdings are in the main unstable, but with strong evidence of a trend toward greater stability.

"Not so long ago," states Mr. Greeley, "nearly all large private holdings of forest land were in unstable ownership, in the sense that the proprietors did not contemplate permanent retention of titles. The point of view of many lumbermen has been that they were engaged in an essential industry—the manufacture of lumber—which necessitated timberland ownership as the source of supply of raw material; that their business was utilizing timber, not growing it; and that what might happen to the land after they were done with it did not concern them. That they should be regarded as destroyers instead of producers of wealth seemed to them a distorted, unfair and monstrous idea. But what happens to the land is certainly a public concern. Open-minded lumbermen are coming to see the responsibility created by land ownership, and it has imposed an obligation to weigh carefully, as business men, the methods of forestry.

"The greatest single obstacle to the rapid spread of timber growing is unstable forest land ownership. It is represented by the land speculator, or the lumber company which intends to dispose of its holdings when cut over, or a State without a policy of permanent forestry. The prosecution of research on a large scale and a large amount of educational work has been necessary to make known the best methods and induce those who would profit by using them to undertake them. Public facilitation of timber growing through the removal of obstacles and economic handicaps have been essentials of an adequate public program of forestry."

The need for more public ownership of the forest land of the country is indicated by the report, which stated that ultimately public ownership and stable management of at least one-third of the total forest area would be found advisable. However, the purchase of additional Federal holdings in regions where local needs can be met by State and municipal forests or by the extension of farm and industrial forestry, was declared as not desirable.

Notable progress by the States during the past year toward a national policy of forestry is recorded in the Forester's report. New York has more than 2,000,000 acres in State forests and parks, and is gradually adding more land through purchase. Pennsylvania has over 1,000,000 acres in State forests and parks and is contemplating extensive further purchases. As a summary, twenty-nine States have either State forests or State parks, or both.

While the past fire season has been exceptionally difficult due to prolonged droughts and dry electrical storms, Mr. Greeley reports a greater degree of public co-operation for fire prevention was given than ever before. Airplanes were used on the far western forests for patrol when the atmosphere was too dense for effective observation, and for reconnaissance of large fires.

Southern California Construction Council Adopts Rules Of Procedure

Since the Construction Council of Southern California, which has just been formally organized, is to represent the entire construction industry in that section, the rules governing its procedure contained in the by-laws adopted by it are of general interest.

(1) At all meetings of the board of directors each director shall vote individually and a majority of such individual votes shall be considered to govern except where the constitution requires a larger proportion.

(2) Only votes cast personally by directors or their alternates shall be considered at a meeting of the board of directors.

(3) All meetings of the board of directors shall be governed by Roberts' Rules of Order in all matters not expressly covered by the constitution and by-laws. The rules may be suspended by a two-thirds vote of the directors present at any meeting.

(4) The annual meeting of the board of directors for the purpose of electing officers and receiving reports shall be held on the first Wednesday in December of each year.

(5) At the meeting second preceding the annual meeting, a nominating committee of five directors shall be elected. This committee shall report at the meetings next preceding the annual meeting its nominations for the officers required by the constitution. After this report additional nominations may be made by individual directors. No nominations may be made after the adjournment of the meeting next preceding the annual meeting.

(6) At the annual meeting the board of directors shall vote by secret ballot on the nominations before it and a majority of all votes cast shall be required for election to each office.

(7) The board of directors shall hold regular meetings on the first Wednesday of each calendar month. Special meetings may be held at the call of the president and the president shall call a special meeting on the written request of five directors.

(8) Officers elected during the year 1926 shall hold office until the first meeting in December, 1927, and thereafter the term of all offices shall end on the first meeting in December of the year subsequent to the year in which they were elected; provided, that all officers shall serve until the election of their successors.

(9) All funds coming into the possession of the board of directors shall be deposited by them in such bank as the board of directors may designate in the name of the "Construction Industries Council of Southern California," and funds so deposited may be withdrawn by check signed by the treasurer and countersigned by the president or the vice-president.

(10) An auditing committee of three shall be appointed by the president at the annual meeting in December of each year; such auditing committee shall examine the checks, records and vouchers for the year then past and shall verify the correctness of the same and of the bank balances and the cash on hand.

(11) Any presentation of a subject, proposal or recommendation by an auxiliary section shall be made in writing by the chairman or presiding officer of that section. Such presentation shall show the number of representatives of member associatione present at the meeting of the section which authorized the presentation and shall show the vote of such representtive on the question of such presentation.

(12) A copy of the minutes of every meeting of the board of directors shall be mailed to the secretary of each member association within one week after the date of such meetings.

(13) In case of any objection to the consideration of a subject by the board of directors is made under Article VII. of the constitution notice in writing of such subject and such objection shall be mailed by the secretary of the council to the secretary of each member association, and such notice shall designate the date of subsequent meeting of the board of directore at which such subject and objection will be considered.

(14) These by-laws may be amended by a two-thirds vote of the members of the board of directors present at a regular meeting, provided that any such proposed amendment must be submitted in writing to the board of directors at a regular meeting at least one month prior to the regular meeting at which such proposed amendment is voted upon.—S. W. BLDR. & CONT.

More than 9,417 miles of roads were improved in the fiscal year 1926 under the federal aid road program, bringing the total length of improved federal aid highways to 55,902 miles, the United States Bureau of Public Roads announces.

Construction is in progress on 15,000 miles of roads. The aggregate length of federal aid highways completed and proposed is 82,134 miles.

The highway from Washington, D. C. through St. Louis, Texarkana and El Paso to San Diego is now 97 per cent improved; from Atlantic City, N. J., to Astoria, Oregon., seven-eighths improved, and from Boston to Seattle 73 per cent improved.

Progress in federal aid construction by states was announced by the bureau as follows:

Arizona—Total cost, $11,629,326.07; federal aid, $6,250,194.69; miles completed, 767.1.

California—Total cost, $30,236,379.81; federal aid, $14,568,628.81; miles completed, 1,169.7.

Nevada—Total cost, $9,315,505.61; federal aid, $6,659,890.11; miles completed, 710.1.

New Mexico—Total cost, $13,200,059.12; federal aid, $7,851,157.91; miles completed, 1,490.6.

The total cost of completed federal aid road projects is $1,051,403,098.05, of which the government contributed $463,554,553.90.

APARTMENTS

Segregated Bids to Be Taken by Owner
APARTMENTS Cost, $45,000
SAN FRANCISCO. Alhambra and Cervantes.
Three-story and basement frame and stucco apartment building (46 rooms).
Owner—R. J. Stemple, 80 Sotelo St.
Architect—J. C. Hladik, Monadnock Bldg.

Contract Awarded
APARTMENTS Cost, $31,398.50
SAN FRANCISCO, Cal., N. Golden Gate Ave 50 E Scott.
Three-story and basement frame (10) apartments.
Owner—C. A. A. Rosen, 1127 Elm St.
Architect—J. C. Hladik, Monadnock Bldg.
Contractor—Joel Johnson & Son, 180 Jessie St., S F.

Contract Awarded
APARTMENTS Cost, $40,000
OAKLAND, Alameda Co., N. Hawthorne Ave., 120 E. Elm.
Three-story frame and stucco (18 1 and 2-room) apartments.
Owner—Patrick W. Donovan, 547 24th St.
Architect — Clay N. Burrell, American Bank Bldg, Oakland.
Contractor—John Maloney, 4165 Howe St.

Owner Taking Segregated Bids
APT. BLDG. Cost, $45,000
SAN FRANCISCO. S W Balboa and 31st Ave.
Three-story and basement frame apt. bldg. (15 apts.)
Owner—Caroline R. Sovig, 248 Oak St.
Architect—A. W. Burgren, 110 Sutter St., S. F.

Additional Sub-Contracts Awarded
APARTMENTS $1,000,000 or more
SAN FRANCISCO. S W Jones and California Sts.
Fifteen-story class A apartment house 100 2 to 5-room apartments.
Owner—Jones-California Inc.
Architect—Weeks and Day, 315 Montgomery St., S. F.
Contractor—Cahill Bros., 55 New Montgomery St., S. F.
Elevators—Spencer Elev. Co., 155 7th St.
Electrical Work—H. S. Tittle, 85 Columbia Sq.
Heating — Rodoni Becker Co., 1230 Folsom St.
Plumbing—W. J. Forster Co., 570 Howard St., 355 4th St.
As previously reported, atructural steel was awarded to Central Iron Works, 2050 Bryant St., S. F.; excavating to Granfield, Farrar & Carlin, 67 Hoff Ave., S. F.
Sub-bids are being taken on other portions of the work.

Owners Taking Sub-Bids
APARTMENTS Cost, $70,000
SAN FRANCISCO, S Washington W of Van Ness Ave.
Four-story steel frame and brick class C apartments (16 2- and 3-rom apartments).
Owner—Stock, Maas & Sauer, 3300 Washington.
Architect—Albert H. Larsen, 447 Sutter St.

To be Done by Day's Work.

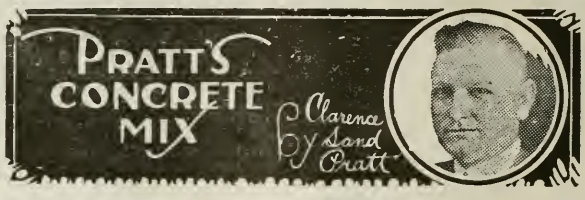
SANTA MARIA, Santa Barbara Co., Cal.
One-story frame and stucco residence.
Owner—Mr. Lee, Santa Maria, Cal.
Architect—Willis Huson, 277 Pine St., San Francisco.



HERE IS a Xmas story.
WHEN CLARENCE (Sandy) Pratt.
WAS A small boy.
DOWN AT Tulare City.
EACH YEAR near Xmas.
ALL SUNDAY School attendances.
INCREASED EACH December.
UNTIL THE churches.
WOULD ALMOST burst.
WITH BOYS and girls.
FOR ALL Sunday school children.
NOT ONLY received a bag.
OF BROKEN mixed candy.
BUT ALSO a gift.
AT THE big Xmas tree.
ON XMAS eve.
SANDY AND his crowd.
OF BOYS.
HELD A conference.
ABOUT NOVEMBER 15th.
OF EACH year.
AND RECEIVED reports.
FROM THE research committee.
ON THE different churches.
TO SEE which one.
HAD THE most liberal policy.
IN THE size and cost.
OF THE candy and gifts.
SOME YEARS the Methodists.
SEEMED THE most liberal.
AND SANDY'S gang.
WOULD ENROLL.
AT THE Methodist Sunday School.
OTHER YEARS the officials.
OF THE Christian Church.
SEEMED TO be more liberal.
AND SANDY and his crowd.
WERE SEEN regularly.
AT THE Christian Church.
THAT IS, during the month.
OF DECEMBER.
BUT JANUARY came.
AND THE attendance.
OF THE Sunday School went.
AND EACH year Sandy.
WOULD HAVE a month.
OF SUNDAY School training.
AND ANYWAY.
THE CHURCHES made happy.
A BUNCH of boys and girls.
THIS WAS reward enough.
XMAS has been gone.
FOR A week.
BUT SANDY Pratt, President.
OF THE Pratt Building Material Co.
AND PRODUCER.
OF CLEAN, sharp sand.
AND CLEAN gravel and rock.
THOUGHT YOU could stand.
ONE MORE Xmas story.
"I THANK you."

Down in Tulare some years ago lived Sunbonnet Sue and Sandy Pratt, now producer of sand, rock and gravel at Sacramento, Prattrock (near Folsom), Marysville, Prattco (Monterey County) and Mayhew (Sacramento County)—Central office at San Francisco. Sandy used to take her for a ride in his little red wagon. Now Sandy drives a green car and her name is not Sue.

OPENS L. A. QUARTERS

The Western Asphalt Association has been formed with headquarters in Los Angeles. Officers of the association are: President, John R. Keane, manager of the fuel oil and asphalt department of the Pan American Petroleum Co.; vice-president, Wm. A. Johnson, banker and road builder; treasurer, Francis P. Smith of the Union Oil Company; directors, James T. Armitage of Pan-American Petroleum; E. R. Werdin, president of L. A. Paving Co.; J. B. Arthur of Union Oil Co.

President Keane says: "Asphalt plants and their equipment in Southern California now represent an estimated value of approximately $10,000,000. Asphalt is a direct by-product of the oil industry of Southern California which represents property and equipment investment of almost $200,000,000.

"The object of our association will be in all lawful ways to promote generally the use of asphalt.

"The petroleum companies have taken a deep interest in road building, with the realization of the progress that is prompted by good roads and also by the fact that they are the largest tax contributors toward the building of good roads, and also that the distribution of their products necessitates good roads."

Henry F. Schlichting, succeeds Edward S. Babue as a member of the Alameda City Planning Commission. Babue resigned due to the pressure of private business.

NOTICE TO CONTRACTORS

(Linden Union High School District)

Sealed bids will be received by the Clerk of the Board of Trustees of the Linden Union High School district **up to the hour of 8 o'clock P. M., on the 12th day of January, 1927,** at the Linden High School.

Plans and specifications for the aforesaid work may be obtained at the office of Glenn Allen and Charles H. Young, Architects for the Board, at Forty-one South Sutter Street, Stockton, California, upon deposit of ($25) twenty-five dollars. All bids must be upon forms obtained from the Architects.

All bids must be accompanied by a certified check for 10 per cent of the amount bid, payable to Frank S. Israel, Clerk of the Board of Trustees, to be forfeited should the accepted bidder fail within five (5) days of the acceptance of his bid to enter into a contract and give satisfactory bonds for the faithful performance of the contract and for the protection of persons furnishing labor or materials for the construction of said building.

The Board reserves the right to reject any or all bids or waive any formality that may be deemed in the interest of the owner.

By order of the Board of Trustees.

D. W. MILLER, President.
FRANK S. ISRAEL, Clerk.
JOHN RYBURN.
WALTER FREEMAN.
ALBERT WATKINS.

NOTICE TO CONTRACTORS

(Schools—Petaluma, Calif.)

Notice is hereby given, that the Board of Education of Petaluma City High School District, of Sonoma County, California, will receive sealed bids for the furnishing of all labor and material necessary in the erection and construction of,

(1) Two Class C additions to the existing Petaluma City High School Building, situated on the property of the Board of Education of said District on the southwest side of Fair Street, between Bassett and Douglas Streets, Petaluma, California; and,

(2) A frame agricultural building to be erected on the premises situated at the easterly corner of Bassett and Sheldon Streets, Petaluma, California.

The contract for both of which said buildings, to-wit: (1) and (2), shall be let as one contract. Said buildings to be erected and completed in accordance with the plans and specifications therefor, prepared by Brainerd Jones, Architect, of the City of Petaluma, now on file in the office of said Board of Education of the City Hall, City of Petaluma, County of Sonoma, State of California, copies of which said plans and specifications may be procured at the office of said architect, in the City of Petaluma, upon depositing with said architect the sum of $20, which said sum will be returned upon the return of said plans and specifications to said architect.

Sealed bids will be received **up to 8:00 o'clock P. M., of the 12th day of January, 1927,** by the undersigned Secretary of the Board of Education of the Petaluma City High School District, of Sonoma County, California, at which time said bids will be publicly opened at a meeting of the Board of Education of Petaluma City High School District at the offices of said Board of Education in the said City Hall in the City of Petaluma, County of Sonoma, State of California.

Sealed bids must be accompanied by certified check in a sum equal to at least ten per cent (10%) of the amount of bid to do the work mentioned, which said deposit shall be forfeited if such bid is accepted and such bidder or bidders shall fail to enter into a contract for the construction of said buildings in accordance therewith within fifteen days after acceptance of such bid or bids.

No bids will be considered unless made out on blank forms furnished by said architect.

The successful bidder or bidders will be required to give bonds in the sum of fifty per cent (50%) of the contract price as security for labor and materials, and in addition thereto a bond of twenty-five per cent (25%) for a faithful performance of said contract.

The said Board of Education of Petaluma City High School District, as owners, reserve the right to reject any and all bids.

All bids to be addressed to John A. Olmsted, Secretary of Board of Education of Petaluma City High School District, of Sonoma County, California.

By order of said Board of Education of Petaluma City High School District, of Sonoma County, California.

JOHN A. OLMSTED,
Secretary.

December 28, 1926

NOTICE TO CONTRACTORS

(Santa Barbara County Courthouse)

Pursuant to an order of the Board of Supervisors of the County of Santa Barbara, State of California, made on the 20th day of December, 1926;

Notice is hereby given that sealed bids will be received **until 10 A. M. on the 17th day of January, 1927,** by the Board of Supervisors of the County of Santa Barbara, State of California, at their rooms in the County Court House, in the City of Santa Barbara, County of Santa Barbara, State of California; said bids then and there will be publicly opened and read for furnishing all plant, material and labor and doing the work required for the construction and erection of the Court House, Hall of Records and Jail Building, on the Court House site in the City of Santa Barbara, County of Santa Barbara, State of California, and all in accordance with plans and specifications therefore made by William Mooser Company, Architects, copies of which may be obtained on application from the Architects, Nevada Bank Bldg., San Francisco, California.

Such bids will be received for the work as follows, separately:

1. Heating and Ventilating.
2. Plumbing.
3. Heating and Ventilating and Plumbing Combined.
4. State price deducted if Hot Water System in Main Building, including Steel Stack for Ruud Heater, also the Ruud Heater, also Circulating Pump, also Hot Water Faucets on Fixtures; are omitted.

Jail Building Hot Water System as specified not included in the above deduction.

5. State price deducted if Air Washer as provided on Main Ventilating System is omitted, but leaving all provisions for its installing at a future date.

Each proposal must be submitted on forms similar to the one here attached as prepared by the Architects, William Mooser Company, Nevada Bank Bldg., San Francisco, California.

Cash, a bidder's Bond, or a Certified Check in the sum of at least ten percentum (10%) of the amount of the bid must accompany each bid, and be payable to the Chairman of the Board of Supervisors of the County of Santa Barbara, as a guarantee that the Bidder whose proposal is accepted will enter into a contract with the County of Santa Barbara, for the work bid upon, otherwise said Cash or Bidder's Bond, or Certified Check will be forfeited to the County of Santa Barbara.

Plans and specifications for above work may be seen at the Office of the Architects, Court House Site, Santa Barbara.

Sets of plans and specifications will be loaned out to bidders upon deposit of Fifty ($50) Dollars, Coin or Certified Check; and deposit to be refunded to bidder when the set of plans and specifications are returned in good condition accompanied by bid; such deposit to be forfeited to the Architects, provided the set of plans and specifications are not returned in good condition within five (5) days from the time same is taken out, unless a bid is to be submitted on or before date set for receiving bids.

Application for plans and specifications must be made to the Architects, William Mooser Company, Nevada Bank Building, San Francisco, Calif.

Rights Reserved

The County of Santa Barbara reserves the following rights:

(a) To reject any or all proposals; (b) to waive any informalities in any proposal; (c) to award this contract to some other than the lowest bidder, as this clause expressly puts the bidder on notice that his financial and business standing and ability properly and expeditiously to carry out work hereunder, or the consideration of desired alternates, makes his proposal more advantageous to the County of Santa Barbara; (d) to accept any alternate or separate parts of the work, under this provision; (e) to deduct any separate item mentioned in any proposal at the price therein stated therefor; (f) to make any additions to, omissions from, changes in, or substitute for the work or materials or articles called for by the contract, subject to the requirements of the paragraph thereof headed under that particular item and without notice to the sureties on this bond, if any, guaranteeing the performance of the contract.

All bids must be addressed to the County Clerk of Santa Barbara, in the City of Santa Barbara, State of California, and have endorsed thereon.

Proposal for Court House, Hall of Records and Jail Building for the County of Santa Barbara, California, and the particular part of the work bid upon.

C. L. PREISKER,
Chairman of the Board of Supervisors of the County of Santa Barbara.
C. A. HUNT,
County Clerk and Clerk of the Board of Supervisors of the County of Santa Barbara.

THE PRICE-CUTTER

The price-cutter is worse than a criminal. He is a fool.

He not only pulls down the standing of his goods; he not only pulls down his competitors, he pulls down himself and his whole trade. He scuttles the ship in which he himself is afloat.

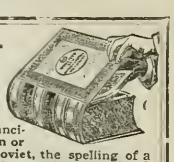
Nothing is so easy as to cut prices, and nothing is so hard as to get them back when once they have been pulled down.

Any child can throw a glass of water on the floor, but all the wisest scientists in the world can't pick that water up.

Who gets the benefit of price-cutting?

Nobody.

The man who sells make no net profit; and the man who buys soon finds himself getting an inferior article —Tri-State Constructor.



Whatever Your Question

Be it the pronunciation of vitamin or marquisette or soviet, the spelling of a puzzling word—the meaning of overhead, novocaine, etc., this "Supreme Authority"

WEBSTER'S NEW INTERNATIONAL DICTIONARY

contains an accurate, final answer. 407,000 Words. 2700 Pages. 6000 Illustrations. Regular and India Paper Editions. Write for specimen pages, prices, etc., FREE Pocket Maps if you name this paper.
